(Top)File Deptosk-keeping note (from around newyears 0809):

Considering the amount work needed for (in my eyes .. *[[avi]]* .. at least) pleasant viewing of finished product would require htmlizing the folders as i did with [JA.html](#) pfui!!! Can't see how i would do that (eliminate spaces in the file names, get it to show the entire name, etcetera) manually. Perhaps a little software could help out here someday. Either way, that chore should not be done precipitously, that is, overrelied on when not quite finished ... but in the end, combined with anchors you cannot beat it for navigation.

My content lends itself to anything but furtive glancing except for those who don't understand 'glare' rhymes with 'stare' and in dutch the word star (the a pronounced in islamic rather than anglo fashion and the meaning: a mental condition, rigidity, derived from stoer meaning macho) would with glar if dutch had such a word.

<file:///C:/WINDOWS/Desktop/KinActour/JA.html>

Well, this is it ... instead of the JA sets sent on detail, targeted to the most disciplined thinktanks monasteries and rural archives.

If I had realized then, instead of 5 years later, the key position of my birth oracle (the little crosswise arrangement glyphs that return in identical formation every 52 years) assigned by judgement day type funny folk pinpointing bigswitchday variously as solstice 2012 or 2013, happens to be that which occurs at last mentioned date, as i seem to increasingly now, wondering how exactly it relates to hiroshima day (guess how many years ago) i might have taken the appeal to invest in propaganda more personally. But of course, nobody said, we are gathered here today so preparation for a birthday party 12 years away can commence just in time, instead they rather obliquely insinuated i was to feel honoured and welcome to join, given such high ups in the enlightenment business had bothered to open the books on truth publishing so buzily nobody took time to listen or feel honoured themselves. All that transpired sometime early present millenium in belgium with the up to then most success- and artful calender distributor Mark Healy and others in attendance. Mark i found an impersonal creep dogmatician, he did not deign to adress or reply to me, quite unworthy of his peace calendar distro serving accomplishments (staat van dienst as Dutch puts it with unsurpassible beauty). Many years later 2006 i went to visit his office in Glastonbury but he was not there.

[openfarmtec.org](#) (mudbricks and solar), which is all well and good but if there is any doubt this guy is deeply delusional this tidbit of knowledge will set you straight: he believes that truth strained through cell phones will set people straight about cleaning up water and keeping it clean. Hey! Great! I found the antithetically upside down exact parallel to Jose Arguelles.

I gripe about people that inspire occasionally, such as Jose Arguelles, who loves factoring along native american lines, the 20 count, and 13 and 7 and 52 and 19 and and and but is totally naive and millenarian about money also).

11.1. All biological entities called human possess a holon, a fourth-dimensional double, dormant and repressed during 12:60 deviance from norm. Activation of holon is an evolutionary development dependent upon release of organic instinctual consciousness into telepathic continuing consciousness.

on june 7th i wrote:

----- Alvin Miller (*champ spammer who attempted with this and one other article to convince everybody who used the word rapture on the net, that he was, for all practical purposes*), on a par with jesus (*that is, filled with desire to be turned into and taken as restlessly selfsacrificial saviour vaccine reveiler*). ... time to add a telling quote:

"Jesus and i are vessels of the collective unconscious."

This is what i guess happens when/after an intelligent obese dreamy and sensitive drops out (*but unable to wrest free from his background, on top of that he admits: "Hollywood had a big part in making me"*) slob up, acquires and cultivates qualms about his consumption of porn to the point of making it a point to conquer at least that dependency .. only to wax megalomaniac a while after swearing it off succesfully.

Between 86 and 2006 he got progressively worse (*though it is hard to say which of the only 2 large pieces i found spread all over the net wherever rapture was mentioned*) i like better. He was/is(?) the "son of a southern baptist fundamentalist preacher" who, he says, "was one of the sweetest men i've ever known". He is a "weird radio" operator, "like Osama, i was attacking the Whore" ..adressing terrorists, he says: "I am on the case, I am shortly going to remove them all", though Alvin counsels to "make life simple and easy", then resign to becoming wormfood.

He "never put it in", and was "womanless all his life" he says near the end and in the beginning: "I do own up to being up close and personal with pornography off and on all my life", a type of Weininger he turns out (*who makes war on 'dolls', 'putting them to sleep' which is euphemysticism for monogamizing them*). ... Perhaps his father had a sleep inducing effect on the females in his congregation.

I know somebody in Holland whom Alvin reminds me off, a man with great big backing pack of talents but his mom is this crazy lass and despite good teeth and infectious laughter, he did not get laid till he went and got a bride in russia, whom he got with child and had to trade in for medication during a failed homemaking attempt. I blame most of his trouble on diet atrocities disabling activities and/or enabled by inactivity (*not to juggle responsibilities, pitching foods towards mouths but to wallow in leisure and luxury*). --- funiest line: "Cookbook - To serve man"

... as it happens, Alvin's extended family is (*besides as much on the run from themselves as they are seen and taken for leaders*) a large, diverse and spread very thin one. My collection of artisavants (*which includes myself*) can testify to at least the great variety amongst them, though as i said, they tend to all make much of recurrences, as does a guy called Raphael ([kachina2012.wordpress.com](#)). Matter of fact, just yesterday i took a closer look at this latest of my acquaintances in the pool, a quote will help you determine family resemblance for yourself:

And the formula for Phi is found on CARD X of the TAROT.

The numbers 1 2 5 and 8 (*the phi symbol*). Those numbers ARE the formula for Phi.

And 1258 coincidentally was my former badge number, and I was born at 5:28 am.

Yup, what else can I conclude, I was issued a badge to help build a bridge, deliver an archetypal message about universal asymmetry, embedded within the mythical/religious scriptures, however announced to the scientific world the year I was born in 1957.

2012 = 1957 + 55 years to help build a bridge with the aSSiSStance of the Holy Spirit.

message found in the Runes ... 55 = SS = ZZ = 22 = 1+9+5+7

I mean what else can I conclude? ---- namaste --- Raphael

see? a headcase (*yet another one with overly dominant critical faculty*), fine, dandy and entertaining when keeping to themselves (*craftsmanship and select groups*), when however delegating all sorts of tricks, these groups grow and lord it over other ones as privileged and elect groups (*obsessed with input they insist on being preserved, profitable, held and carried over or if all else fails, even pushed upon others against their will*) while nontransparency and cryptocrud in a jungle of non fractal patch upon patch jars and

bottles everything to a putrid squalor.

Dan Winter: "...because of their ugly arrogance. The only way...."

and here he goes off about his once again, like a robot. Full on deathliness of golden spiral symmetry as i learned a semi-colleague of his Paul Laffoley has it, who complicates *(or balances if you like and he thinks)* the story with an archimedian spiral.

the quoted phrases are from correspondents with a self confessed *(or professed rather)* 'universe constructor' - his manuel at www.dpedtech.com

Their problem is wanting to trail clouds of glory, not do something as vulgar and mundane as help terrestrial clouds meetmate their dry counterparty fresh rock dust and have heaven on earth rather than pretend you must be good enough and arent good enough until you 'seed charge' and propel onto distant stars. That is running away from and betraying this one if you ask me.

Let us quote White:

Also, with regard to the Phi alphabet, take a look at my chart that depicts the RUNES IN THE PYRAMIDS. The chart is near the end of my book, THOTH AND THE TAROT: THE AMAZING SECRETS *(available online at www.dpedtech.com)*.

The phi spiral definitely has a rich diversity of profiles when viewed from various angles and is a major key in the alphabet of nature to build physical forms, and hence the Language of Light. On the other hand, the primitive Semitic tribes were not quite up to speed with that level of sophisticated math *(though the high Egyptian priests and adepts may have been.)* skipsnip For the common people they adopted the simple universal Euclidean geometry of straight lines, circles, triangles, and squares. They combined these in various ways to get the 22 letters of the alphabet. They probably chose 22 because 22/7 was the ancient approximation of PI.

.... skipsnip That is why the Eternal Garden is called in GeNesis "GN ODN", the Eternal Place of GeNeration. G = C, the camel's hump. GN, or CN is the generative cuneus or cunt, the cuneiform letter shape *(the mystic Delta Sumerian female sign)* impressed with a stiff phallic stylus into clay tablets to generate the garden of literary flowers. N is the nose or gonad, with the ODor of eternity. OD is the O-eye not just on, but in the magic triangle. This is also the secret of Babaji's magic signature, the yantra for the root chakra: Circle within Triangle, within Square, within Circle. OD-BO, the eternal Bo, Babaji bubble babbling holy baboon fool *(QDS BOBO)*, or the Cloud of Knowing OB-DO, as the attention zooms into the bindu point for trataka.

Dan is *(for all his posturing about fractalitreestrees)* a dendrophobe .. or else he would not state his lead-onto-law question assbackwards:

"what geometry connects elecric charge to gravity" ----

- should be: sweat over lightening up and wetting the heavier dryer bits if you care for lovely trees. Whoops, i lied:

"Today we plant forests in order to set them free - and feel the bliss of implosive genetic diversity *(fractality of DNA radio by phase conjugation)* in the electric field of their core."

OK, I'll try one more time to shoot holes in Dan's armour ...errr, liberate him from it: Can it be that Dan has

a lot in common with Alvin : ?? . though if son of a preacherman Miller is captured, medicated, institutionalized and Drew is too by now (*his blog has been down a week*) the latter pair are a good match also. It is exactly because and to the extent that Dan pits 'heartless machine' against 'The Force' (*also stinks of favoring jerusalem over all geography, Rennes makes do with Rennes for now*) rather than, instead of splitting genius, he himself blocks (*himself from*) ensoulage possible when a smart combo. He does use the word 'force' in a plethora of ways though:

"We are forced to conclude that the electrical physics of assembling a coherent and compressed charge field (*your KA*) ready for fractal unpacking, may be the best religious hygiene information about how to die successfully (*take your memory with you*)."

speaking of himself in third person as he did early on in 2007:

"(*to symbolize is to embed is to compress charge constructively.*)"

--- Wooow!!! a parenthesis is good enough to pack a gem of idiocy in as tight as that is is??? Can i try that game? Symbol use, as far as it leads on reliance and overreliance on it, tends to breed dependencies and sterilize, delegate and gravitate towards cities. That you Dan are an exception (*though a highly ambivalent one i think*) is no proof the rule is not a rule. By continually feeding charge into that 'burning fountain' (*- see the book by that title of origin of language by Phillip Wheelwright*)- DNA attains a common library of survival info.

<http://666decoded.blogspot.com/> partly cool but here again, they fuck up by personalizing calendaric metaphor in complete loyalty and surrender to the jew john the baptist.

zelator (*not foolish enough yet? Buy this book*)

only just now looking at a file named zelator (*A MODERN INITIATE EXPLORES THE ANCIENT MYSTERIES by MARK HEDSEL With an Introduction and Notes by DAVID OVASON First published in 2000*) on the 20th of januari (*the size caught my eye, 1284K, i actually just entered the folder 'Michael Topper', filled that day and the next mostly*) it has been hiding/hid in to see if i could dump things off the thinkpad to free up space. It is a 500 page novel (*or perhaps an autobiography that pretends to be a biography, not sure yet*) with 150 pages worth of bibliographical notes *[[my copy lacks the index]]* and concerns art and symbolism in narrative form, travelling europe to take in the sights. This book has all sorts of toots and bells, illustrations with such meticulous description one hopes for hardcopy in hand and wonders whether it ever will so be. The esotericisms packed book (*a line to illustrate: 'Yes. We met in Egypt. You were a scribe in that life, too.'*) covers meetings between 1955 - 1997 and very much concerns foolishness:

Mark Hedsel decided to title this book The Zelator because this is the initiation rank he lived before reaching the higher grade of Master. In hermetic lore, the zelator is one who burns for higher knowledge and insight.

Does me thinking of the world in (*oh dear*) general terms (*telltale right off*) as ungrateful mean that actually i am ungrateful for the way way way above average filledfull wishlist of washlist (*ick[[err]]yness*)? how can me thinking ... not mean ... exactly that?

Imagine a metal trampoline, strengthened in loadable parts where, once momentum reaching bottom out / contact point and surfaces a straightforward squeeze takes place (*while a simultaneous blast of mist/steam in the direction of progressively finer mesh*) .. or if strong enough straight at rock itself makes sure the contact points don't become so numerous that impact dilutes to the extent no rock solidifying bonds are matched and decidedly crisply cracktly and cheerily exceeded.

Then there is Johan theatre, a king in his own right, this one on the belgian rainbow gathering scouting front (*one scheduled to begin in 6 days in toup toup near Paliseul maissin*). money and men, pretenders dilute and launchers propel the real thing to the point of one in a billion. Drew ridicules Arguelles for falling for Oliver Reiser and the latter for falling for a harebrained idea that we will assimilate nuclear energy use ... implying some sort of conscious direction about how and where it enters our body, no remarks on it ever leaving. Belief and anecdotes about matters such as these are on a par though with their antithesis: the bigu and what not. Both are equally recommended, the one to be looked into, the others as a goal to be attained Drew even asserts he can operate both hemispheres, separately and respectively responsible for both activities, bracketing eco-social justice into oblivion as if these things not only can but must exist side by side to certify the ultimate meaninglessness of cosmicity, emphasized by the occasional apocaglimpse.

evolutionary clocks vs horoscopes, mandalas, medcin wheels, simplistic diagrams and designation that are so bland that the inventor thereof can begin to embolden himself even further and consider himself the spice of life *(Keely's magical presence, never mind his secret levers and pulleys)* is needed, not to mention looooooong study and embroilery, voila, clique strordinear you, yoursand sundry for a fee and limited time only. To compensate for this out on thin limb fringinality and in the corner paintiness, Drew resorts to highly unlikely reminiscences about his desirability. Wonder if we will ever find out more about his relationship with the sister that had to resort to total loser pool for hubby material.

Pretense sickens me. And let me hasten to add i have no illusions to cure Drew's fabulastic addiction. To the extent i think Simanek lumps workable schemes in with inert ones or at least taints them with at first sight lookalikes, i seem to suffer them too, except mine are extremely low tec.

Guess you have to beat your way through the crowd to find out their leader is being murdered in the very midst of them, or else he would have long since managed to disperse and diffuse them along with the rest of creation.

Now, i knew how simplistic DP was since he mixed Keely with Russell. I went off and mixed Walter R with David Calder Hardy and forgot about Pond pretty much.

i run into that Raphael kachina *(math is myth is math)* idiot fella unexpectedly on a Coral Castle thread at Freethought Nation. He likes this: quantummatter.com/

On 694743 - 13th of october, our mystic 'polistician' Everett goldcrocker ... eh Tucker *(any relation to Benjamin Ev?)* does a little dogged sirius dogging. He claims to have a library wonder if it is any more informative than the standard 'this is a broadcast ... with Carolyn' *(haven't heard her so far, even after 190Mb worth)* spiel he *(over- and thus ab)used* at btr *(even a name of the person who authored the book that fills the program would really help, that would be Robert Temple in this case ... i forget who's criticism of that person made me forget about both and only remember half now)* ... he also likes to admit he is retarded and claim he is funny at the same time. That illustrates the split of that incredibly widespread zeitgeist meme which Everett is a not so much articulate as very vocal exponent of quite representatively. The Anastasia crowd is quite international too but at least it is inspired on real and existing communities *(of the charismatic kind, deep into Siberia, Christian)*. They are just imagining that they are throwing a worn out seen through superstition out but are actually just refurbishing them. The dutch leg of this network *(rivendellvillage.org)* has a vid up that illustrates this dichotomy.

Adoration and ornamentation of the lotus posish (*unlike Drew who celebrates it as much as he practices it, he claims he can do both brainhalves at the same time!*).

Anyway, on the one hand a vague ideal gets suitably 'festivated' with swirly twirly and even geared lights -- some of which rotate at very dignified speeds .. that did get a chuckle out of me, Arguelles is of that bend also very much but since he hooked up with a less intelligent woman all he pumps anymore is mysticrypticism for which he has to go borrowing from competitors -- and on the other hand they feel the urge to flip the switch and show some of the harshest scenes ever filmed. All this goes down perfectly parallel and 'causalinked' (*look ma, no refuse all itch*) to the other polarizations and erosions of middle grounds, classess and roadlessnesses -- off the wider road lies pleasant pathhood .. the kind of moderate mediation that would simply use grit instead of salt for a slipstop cause prettiest plantage rises right next to roads cause we do it in 'm and which is why we do it in 'm some more as well as hope to keep doing da dingdong doing boingutitiously.

Forget what i said before even, he is a bought and making bold (*with*) in the fold subsidiary. The iconoclast repost is, other than his, a commercial show (*though her site nwo library is not*) that straddles the feeble fence between faux and fine. ... but i should not be too hard on them it is alright for teenagers of a certain bend maybe

Music history (*same source*) is a big ass 4 hour file, needless to say it completely devoid of substance in comparison to my own work on the subject, which is accesible in pithy spurts of highly scattered aphoricism and aphorismical cosmologery. I think i have had my fill of this crap, my fabulator folder is swollen as it is.

piet said... all caught up to you now buster, on the same page in fact you be dreaming still now i guess i did an exceptional sesh on that front this morno anyways be ready for a nontacky yak yackle first ... here's what i found out yesterday:

4th mpr file 699152 i listen to leads me to ruminate that Everett Tucker might just be in/on a fruitlessly rebellion against not being as smart as he is good looking, cashing in on the fact that his popularity does not depend on anything he says anyway, making the sort of spectacle of himself i am resenting more and more since on that issue he is reading Bailey like a stupid moron drone.

697690 has him all fired up about how all esoteric flavors are talking about the same thing. Yeah, all equally cluephobic, that's how they land in the same undesirable second hand book sections you can spot from 4 aisles away.

i can see how E Tucker is inspired by her (*an MPH fan also*), he is a veritably loyal clone even .. or at least a diligent apprentice.

Adventures With Cassiopaea -- Chapter 33 is on Ira Einhorn

- she writes thrillers/horror a lot more convincingly than the (*prolly equally fictiofabulate*) style of 'inspired' science (*science disfigured by channeled [[so far out it is in]] smalltalk*) she unleashes on ... you know, them huge (*and thus cold and spaciouly distant seeming*) time factors that eternally tempt to contrarianisms like personification (*all things gravitate to intimative (m)othering and not inti(mid)atory Nothering*), like 666 (*please do not waste your time with her {{{very remote}}} views regarding the dubious fame of this number, it isn't any numberer than all the other numbing numberings*) - Thus aeons weave forth

from ... and *(inevitably,)* back *(again, into)* the infantilizing and renewing neotecization *(recueillir pour mieux sauter type of thing - regress for egress)*. - Best avoid Laura on at least these herein recounted counts though, if you value my counsel ... mind the collection cauldron on your way out, don't let it catch you in the pocket, don't fall for nor into it and/but thank you either way.

cassiopaea.org/forum/ index.php?topic=1162.msg6858#msg6858 Excerpt from Michael Toppers 'Cattle Call' *(meanwhile also taken **[[in]]** by the saucers or too far in his cups to squeeze any more ink on paper - god knows he contributed more than a fair share. small print free mags placed in select locations **[[where the gullible good n clean souls congregate]]** around/between Santa Monica and Hollywood)* anybody stuck his tapes up on a vid/podplace yet?

Topper reached top mastery levels of near perfect mirrorevisioning, encrypting my message for me in case revitalization and bottom line sovereignty measure prosecution kicks in and i have to circumvent a censor or two: Michael Topper on Stalking -

"...standard "humanistic" saw ... dichotomies of good-and-evil are too simplistic and medieval, truth always being some "gray" blend of opposites; in this way he shields from himself the obvious implications of his ongoing ordeal."

consequences of ideal ACT are stores and scores of dry grey *(not 'gray')* pow(d)er *(not 'power' which occurs 22 times on the **[[66K]]** page i am discussing)* -- no hollowoody one, but rather anyplace one finds water, pouring them *(reducables, hey, there's your fu(s)elage Drew)* out into all manifestations of it and let it grow. Meanwhile Laura plays along with the Topperware man and condemns "light eaters" after ponning *(yeah, in dutch we use it as a verb - powning is a good synonym for stalking by the way, the haras, defame and slander variety)* them out of reach in a higher density ... ehrr, as in rock mam? *(bet she will remain mum about light storage, light ripening)* -- Perhaps this is a taunt and tease specially designed for guys like me huhm? Can i riddle her a reina? Is she keeping the lcky guys off my back as well as her 'light beings'?

consequences of ideal ACT II - to crush a crystalline structure results in a local intimate micro-climate improvement stimulanthus - easily explained to children but Laura, following Topper turns it inside out:

"... objective is to crystallize under artificial pressure of economics, a global power ... "

Can I make that pow(d)er for you now Laura? Take your time, consult your densit(w)itt(err)ies.

consequences of ideal ACT III ... are deep and definite engravement, serious but at least subsurface of too many solids keeping too much sun and rain out, disallowing them a weave of life, pleasure and thankful wonder, do the hard stuff by all means, and i don't mean math meth or myth. Turn waterways into mudslides from great hight to deepest delta bottoms, venturing further afield is betrayal. Did i mention Obama wants to curb rocketry? He aint all bad. What he loses to the autistic but emotional ruthless talent of Mafiyose *(HFT)* kids *(at GS)* resulting from far too early conception rates for generations, carrying that vibe into economics, he may regain by tightening the tap on those eager to forfeit not just time but place as well.

Elsewhere Laura Knight-Jadczyk maligns Dan Winter *(and his litigation opponent who managed to rob him of his name)* both and DW specifically for gibberish. One can blame anybody on all sorts of counts but to denigrate DW's linguistic inventiveness is unfair, schpesealli when she herself goes thus *(about what the ruthless dominant Lizards told Hitler)*:

"Couldn't a Germanic master race be created without destroying another group? A: No. Q: Why? A: Because of 4th density prior encoding mission destiny profile."

--- I am allowing similar scepticism to rule the following criticism: LKJ on IE convinces me she writes/divines thriller/horror a lot more believably than the *(prolly equally fictiofabulate)* style of 'inspired' science *(science disfigured by channeled **[[so far out it is in]]** smalltalk, taking a leaf out of every book in the modern fable (spirituality) section and a few at a time out of nowadays reduced to poddin and ploddingly copying wikipages to his blogger account Glen, yes the very HymHooeyHoncho, Kealy)* she unleashes and attempts on ... you know, them huge *(and thus cold and spaciouly distant seeming)*time factors, *('remotations')* that eternally infect with reactionary counterisms and tempt to contrarianisms like personification *(all things gravitate to intimative (m)othering rather than levitate to inti(mid)atory Nothing ... sooner or later ... oh the tides of entitlement endorsment and recognition between self and other, ask GoldSackmen to sort you out on that one by way of Matt Taibbi)*, like 666 *(please do not waste*

your time with her *[[very remote]]* views regarding the dubious fame of this number *[[much much mo betta to consult www.calendar-design.com for that]]*, it isn't any numberer than all the other numbing numberings). - Thus aeons weave forth from ... and *(inevitably,)*back *(again, into)* the infantilizing and renewing neat(*e-n/c-*)ization *(recuiller pour mieux sauter type of thing - regress for egress)*. - Best avoid Laura on at least these herein recounted counts though, if you value my counsel ... speaking of identity and proximity problems, traps, triggers and tender care, i sign out with a final warning, mind the collection cauldron on your way out, don't let it catch you in the pocket more than you can afford, don't fall for nor into it altogether and/but thank you either way.

An example of how she dances with herself as with her countlessly avalanching waves upon publishing *(of nativity displacing publishment)* wave of 'opponents' *(equal parts equality meme infection and trying her hand at comedy cause she wants to be funny and cheer up her fawning following [[fido come get your joke]] no doubt)* like P&P much liked by Drew deconstructed:

"Well, OK, but is this Mars Rock, and is this opening of the doors concept, is this leading up to some definite, overt interaction with aliens? *(7)* They told us, we know it, yes!"

Give doors of Mars a good knock? Marsical treatment and Umgang with rocks? Easy, forget about what was once possible and timely on mars, focus on tasks at hand, crush and spray/blow into rain and snow storm, use pretty lights and warm drinks as requiring, presto *(a season or so)*. Carnivolition! More soil organism proliferation and healthful diversity than necessary to see aliens in the right fabulatory perspective and turn the sting of their emptiness distracting from rocky fullness and 'death' into its opposite. The most momentous market corner turnable and markable mark *(remarkable mark - markitit!)* turn cornerable. I used to write this sort of screed in the late 80s about a colleagues of Laura's who made much of greys *(a stage in the distractive symboltweakfaddery)* which made me prick up my ears, having already spliced white black and grey bands at various *(i think appropriate)* places in the rainbow. If i was to be comparatively cryptic and naughty enough to try brashly waste your time i would riddle: 9//11 you don't see it now and then your do ... ledgasledge yar beelance into soll und haben - slurdy sturdy steady ready go.

a long ps written the next day: In one passage she practically lays the whole paranormal arms race *(puharich, tesla, bearden, sarfatti)* at the feet of Einhorn *(who, she says, may have actively faked prosecution [[infected people around him purposely, like torching his colleague's house ... hey wait a minute. ... why would he not burn his own rather????]])*, and claimed to be taken for a patsy cause of his detective skills, all in order to distract from that horribly stinky skeleton in the closet *[[literally!!!!]] WITHOUT REALIZING IT* on the never smart reasoning that what worked for him should work for all, after all, he was one of the first folks to be celebrated as truly universal *(if not quite as yet galactic, that came later)*. Then she goes a step further and suggest he was programmed, used in much vaster act of distraction, directed, manchuriated to do his deed 22 years before a more famous 9/11.

Here is Einhorn in a book on stress he wrote:

Embracing stress and using overload consciously ...

Let's tweak that in the spirit of earlier corrections: Squeezing a high tension body like rock and make it overflow with prime preconscious powders

... is one way of producing psychic breakthroughs

(sounds like he is on about tantra doesn't it?)

.... what i was in the midst of with my exquisite nymph. Some deep trauma was playing itself out again and again.

creepy huh?

we ape on = we imitate - we are focused on perfect conformance *(wether to those judged superior or from those held inferior)*

Beneficiaries of and delvers into secrecy and separation thrive by and gravitate to the realms of discovery, clarity, clearcut rationality, invention, encryption and flipsidedly cold cold autism.

Its wielders would certainly sponsor the hollywood script writers who like scape goat hunting conjecture

and the suspense of dark room anonymity.# .. quite reflective of how puppeteers and cult leaders play their charges, drones, orcs and followers off and out against each other.

"They are friends of mine. I have known them for a number of years, and they have become 'not for attribution' sources. I have never burned them, so they tell me stuff. - Robert Friedman

Fitts on black budget (*a loyal friend to Einhorn by the way*) is quite good on how it all works for an imperium. An audiated book by Mark Chavannes about how bureaucracy feeds itself better than the subjects it is supposed to serve, eventually reaching the highest theatricality levels hypocrisy has been seen suited to attain again and again, in this case for an ex imperium is instructive, even though the reader misplaces emphases, etcetera.

This very competitive crib little morsels from each other in a dogpack hierarchy to hopper and funnel it's various constellated maxmix and remicksnacks all into

weapons of mass distraction - inverted formulas that are symmetrical mirrorages meant to seduce paying respects to and working with a more ancient form of (*femininity*) and precondition for desirable flesh and blood females

The 'Knol' (*a google experiment*) on Gurdjieff's truck with Christianity by William Patrick Patterson has an impressive seque of styles in crosses collage all the way back to egyptian versions making it look more and more like a real pump (*complete with birdheaded pumpers - ankh =?/as watertower, etcetera*) instead of the empty pomp, symbol, re- and deification of lazy duh dumber muscle-abuse. A dog's bet, loyalty to aliens will pay off even though it betrays my brethren.

found via ashtarcommandcrew.net - a fullfledged community, the memory of a 2 minute glance at it yesterday leads me to observe now that the fairy tale (*orality field*) was mangled, mutilated mutated, altered and emaciated by petrifying urbane industies (*the organ bridging a magic and [[manic]] realism gap*), this dev- and emotion conduit morphs into a relay run where angels wear and wittle down to aliens (*as an aside, parallel and echo, the alien one replaces the riot plague .. just as the sterilizing individuation of hip hedonism wasn't the ideal champion of social justice [[too easily distracted and seduced by sabotage]] another besiegment and rebellion that tried to counterproductively replace a different grade of social concerns with a still and plain lower one, thus divide and average replaces tally and distribute, all gods of lies left to keep their pump and dump eating into fairer deals up with still higher tec, differentiability primes it and pulls the cart, equality dogma installs and reboothers toll, to weigh in all in waiting*).

February 10,

from an account of a stay at Dan Winter's house near Buffalo in the mid 80s: had a great time, got a glimpse of arguelles' "arcturus rising" in manuscript form, Rodin coils ditto, etcetera, dismissed 99% though, had the savant-curiosity or else i would not have kept up. I showed because of his brush with dust and he keeps falling through on that score despite his recent Callahan rehash. Never saw all those hours he is supposed to have recorded with that 'Kwetal' in the the first place

February 24, 2010 5:24 AM

Ah the debris -- that must be cleared -- tax deductions -- and Western civilization.

don't go sounding like Arguelles now, he is in remote Oz for better telepathic alignment, he recently talked to an old acquaintance who does newage poddies now, tami simon at soundstrue.com/podcast - he mentions (*2/3rds into the hour*): noosphereforum.org run by Boris Petrovic (*who has wild a i thought creepy art when i found him midlast year or so*). Arguelles relies on him and relates a BBC item about bulgarian alien believers in the 'space researchinstitute' Dr Fillipa, who got in trouble with his govt for rapping about croppies, alien telepathic intervention,etcetera. Arguelles coined a funny phrase (*as far as a man with fucked up lungs [[must be all that no-mind Buddhistdiscipline he brags about]] can sound funny: cosmic intelligence operation. Laszlo was on that cast recently also*).

none of these combozos kinbine/compute or turn up anything worthwhile:

Kaulins Rothwangl ::::: Kaulins Arguelles ::::: Kaulins Fellv ::::: Kaulins Heribert Illig ::::: Kaulins chronologists ::::: Kaulins chronologistics

nemrud.nl/ (*Anatolia*) Antiochus was Jesus' dad - bleuest of royal blood, a sanctimonious way of referring to territory hoggerwash of course his marriage arrangement kindled enormous promise and challenge resulting in the attempt to span and fuse them (*turn domination into voluntary submission, politics of brutes into the dogma of spin/priest caste*), 'pursuant to his father's wishes. He sure is given to a little fabullnotion of his own, Jesus and John were one and the same.

towards a better understanding of kin 55 (Muhammed, Pacal, Volum, piety piet):

The dust-pile was intentionally made (*wether by Pazuzu boys, Ashkinnazi, or stations in between like catholics, illuminati i care not*) to instill (*with brandlike searing scourge for sure*) an association with toxicity and the outrage over injustice i noted will swell like the catholic childabuse cases, whipping into the final stretch after a long tale that started with Canadian residential school cases a decade ago - see Jim Craven (*jew/blackfoot and louis proyect, his buddy, little nerdy despot bigmouth mama baby goldman sachs marxist*) even though it concerns a single point rather than the whole globe.

This whole debacle cut my steady climb towards helping a sounding thought -- dust is The Preeminent preemptive perse, and therefore massively as well as easily* massifiable meme, make that finger rubbing wealth gesture mixing it will daily fare both in and out and your immunity shoots up through the roof, spending shade and sustenance.... speaking of skylight, turnover, new leafs turning over, overturn ... well maybe soon sometime -- reach critical mass: the insight that crush and humble crumble equal credit of the sort all beings near enough instantly profit from (*that is a matter of effectively targeting rain and shine with it, the solar guys often neglect the first and push their favorite pole forwards to the point they lose sight of half of themselves, thereby becoming all the more significant and other, not to say sore, making a perhaps too fine point of it*).

* that is, only when folks are easy on each other, ease each other and in generally under the influence of as favorable as exceedingly rare (*flawlessly executed non-profit accreditation and voluntarizing*) moods and circumstance.

Speaking of polarity though, a near facetless and simplistic flip will right their (*the evildoer's*) twist of (*that humble crush*) truth. They turned it into humiliation and crushed pride used to prod the populace into outraged screaming for war

enjoying a little rainbow history = indexterity post on Art Kleps

Drew: The Theosophists of the New Age movement -- aka Jose Arguelles

Apart from the fact that 'aka' ito indicate association is incorrect and though there may be much i do not know about Arguelles relation to Strong/Laszlo et al -- let alone his visits to Puharich and the latters position in the constellation of constantly reconfiguring culprits like Uri Geller's dentist, Leary, Einhorn, .. and as Jeff Turner has it (*explaining some of McGowan's bafflingly endless music industry fatality listings*), the Manson family as Weld's execution squad -- one thing is for sure. Drew stars right among them 'spinner', the lot of them. Arguelles is a meditator by as much as Drew, even Kleps did not bust out far enough from the God buzznose to restore Lord of Animalism glory. I visit germany, drew goes 'you kraut', i say i loved it, drew goes 'you nazi'. Sigh. I need to stop talking to this guy. ...

Drew, if you have read Millbrook by Kleps you'll understand that you can be compared to the Libra Leary (*minus the LSD*) and I to Aries Kleps (*minus the booze and though i have nothing in aries*). Funny enough the objections Kleps developed regarding Leary and GoodGodCrowds is comparable to mine regarding Arguelles, the dominant detractions all specialism can develop.

i posted a little rant at Drew's *(wow, this link takes up 5 lines, that is like one of them galactic signatures arguelles puts up under his increasingly rare - and odd# rants)* billy *(belinda)* jones sings about palestine from the position of triple goddess seated and positioned to pronounce justice.... your music expertise isn't 'een knip voor de neus waard' is you do not endorse and promote this type of work with the same alarming tiresomeness you have demonstrated to be capable of when it comes to your holding back on eating long enough to overshoot the firm turd goal at the other end *(very stupidly named 'pigging out' while only penned pigs are in danger of outgrowing their own work out and off into the asterixaradise ... whatev)*

goldenmean.info/carringtonevent/ Drew actually visited and pronounces it the best Winter yet but has nothing but a very old and worn comment, .. predictably (*it's where his skid rises from its bathwater yano*):

"Jose Arguelles who is the main promoter of Dr. Reiser's views."

catchin you lyin again bout old Hosea yet again, thadda (*PERSISTENT*)boy (*not to mention stupidass stubborn*) .. he aint no nuclear premotor man! He is a newclear fella doing sacred circles and counts 20 the native american way beginning with a base four for the sun and 13 for the moon and finding significance in 19ery (*Bahai and all*) then the mysterious gap days correlate with serious earthquake a lot of the time ... it aint as dismissible as you make out.

98% of all the socalled scientific abstracts and excerpts you post are nothing more than artistic word acrobattery- Sokalian collage - sci-tale stringery. Same trick Dan Winter and Jose perform a lot of the time, i'll give you that, crossing borders between disciplines and hitting as many outliers along the way as possible ... and besides .. they started nuthin ... think Daeniken, Sitchin, the 'i am' crowd (*30s*), hollow earthers, like thepeacock.com I was there twice in the eighties, they built an earthshelter with 800 tons worth of concrete and rock chunks (*too heavy for most people to lift*) for a roof and then there was a host of drugged up hippies in between .. lots of them burnt out by the time the net came around and their work crumbling or moldy.

surgically of the two or a stage in its progression.

A 'two' trait, the interp(r)enetrait treat and the 'one hand other hand' thing Austin Coates keenly notes - to not convey and allow for a confidence of much trust, being a macho man with no eye for micro-miraculousness, blinded by militarism, as far as i master embody and command it - balks not so much as cleaving rock as at making blood flow. Still, neat scheme in his 'numerology' (1974). It seems beholden to china somehow, cover illustration and motto wise, then he mentions his chinese dentist in hongkong and has examples from all over the world. the larger cover image is not in any way logically connected with a turtle however. It shows colours divided in 2 colours (1245 green, 3689 red) and placed in a most inexplicable arrangement inside an octagon

add a bit of bemomb bomemb, eehrrrm, ahh .. demand (yeah, thaddit) demand driven budget for rope and squishy seats and the lack of and craving for bounce by way of fatherly force of arms can be met by the tangle toss along the way to targeted lowbrowery stack ... and that brings me to somebody with the thankless task/mission of distracting from the most unethical jostle hustle imaginable and getting tired of it: General MCCRYSTAL. He must be connected to 7 .. as is james joyce .. as is i i learned since i cracked the little 'numerology' (1974) by Austin Coates yesterday (mine survived being the Westminster public library copy splendidly, apart from the characteristic indentation their stamp inflicts - check the --'two' trait-- entry near the top of of yesterday 5 page-ups from where [[and how]] i am now), but as most are (M philips on gematriaKaballah thingamajig that comes up 55 a lot for instance) this matrix is too flat, not lively enough. ... guess i am due for a leaf through the BF Fuller (inspired) material ... and play with a bunch of fruit a while ... hang my numeracy/fruitstand and landscape pics and posters.

Just invited the arguelles crowd for a conf at my place. ... but just in case i get impatient and/or thrown out of my present onlinehood wallop dole out spot .. a rehearsalish foreshadowing of which happened last night quicker search functions, camera, onlinehood, i am ready to spend big bucks on ya ... specially afterthe grief given me last nite by the type lass who will take any opp to humiliate a man, any and all, bring them to their knees but pretend these victims put themselves in her way deliberately, the more the merrier, it's the put-in to the drawforth these brave brave souls (not) cannot resist, the sedition by way of sedation, immobilization by way of stuffage (pride cannot be plastered, but the plastered can fake pride). Suffocatress of stricture and far from friendly squeezes, maybe a missus McCrystal (of cruelties) candidate.

While even onto highest levels (cabinet [gvt coalition] formation), word of the day the other day (-- ... or other week, i cannot follow that stink too closely anymore ... i like dispensing good advice cheerfully and cheaply but apply the 'graag of helemaal niet' clause (no gratitude, no continuation), like yesterday's) was 'perspective', the media cut-up/out and collage has everybody saying it so the semblance of agreement is thereby incessantly repeated, the automaton model reinforced, exemplified and 'had' the only way it can be had at all, fake, with salving, soothing and syrupy words that stick to everything and everybody with it including whatever 'it' can be cracked up to be and become in whosoever's eyes.. Not much of a break from the equally emptied (in that 'oogluikend toegestane' schietzionist sense of never inapplicable but always unapplied rule that rules) and lent sanctity of hysterical union [uniyonì] 'tolerance', well, that much abused atomization process where o so potent can all show prowess AND thoughtfulness was once again, at vital micro-level, only one where any- and everything matters, affecting me, cut and killed dead down to the (militarily) lowlaylawletter (like Coates on about gunnery and generals a lot but zippo about musical rock grinders and grippies).

you will have to do your date of birth to finish the job as your 1 is derived from a fiver pile i would watch out for the subconscious frust of the surrounded one and dilletante ... keep on paying that boozin respect there. Rainbow family has plenny of hoarse indulgents who shamelessly hog the sacred emptiness and what's far worse, the sacred emptying in the middle, dat da placementpriority i allocate to the musical rock grinder (not surroundings to ashes but fresh ground availabilized mineralstashes to surroundings, HO! tripple frickin HO is next!!).. then again it should swiftly be magically mobile and lure folks out of the pile up and terrorist temptations one and all, the fumbly, rumby (and all ways but humbly submitted) varieteeze. Then again, when you're in a good way, it's easy lime-light basker, all over the place, kinda like golden mean on downward and logarithmic/Archimedes on the uptick (did you crib that from Laffoley by the way?) ... double 4 accounts for your mathy interests.

Normally, i save up some youtubes as i hurriedly surf to get all the reading fodder onto my stick to take home to my liddullappytoppie and stay 5 to 10 minutes after the online buttons gets pushed off at the main reception (where, you guessed it, the evil witch holds court 2 days a week .. and rather than conform to

colleagues (which she did one week), she goes higher up to the likeminded 'kenau' (and both come at me with full severity the next), equally blind and hostile to any and all measure of mindfulness ... making them gravitate to jobs in healthcare) the same way the media are the lying lefty media worrying over loss of privacy where they should berate the lack of transparency or fishing around for the next austerity triggered violence to justify the next strangulation of ultratransformz where ideally-like, extreme individualism, discipline, simplicity and highly regimented, strictly enforced, collectivized, and polarized regimentation (oops, said that already) meet, meddle, mate, mold, muddle, morph, mediate, miserate and might as well, some salutary time soon, muster a mugfull of generalizable and soaked crystals, ... mud. Fresh. Now shoot for shade shoed on this list and lean tubtender lender - lubberlander tubbertender and lol around till ripe. The kei is tast, the dag acome klouty.

a wooded (and or woody) set up with lots of tackery and webbery, yarn with colourcoded keyword clouds dangling on slips of paper lead to pages in books and prints at the other end but not before and without being switchrich (over your head but within reach and not boven je pet = unintelligible), that is to say, suspended (bundlable, rearrangeable) on curtain-railtrack circuitry ... damn look at the lines growing in front of my mind's eye rollercoaster realercoaster liebiary (that is a term Ray invented perhaps but he charted cheating his own inventiveness with the funetik skeemeree).

he needs to be asked why, in 'Geometric Games' he cites all Bucky Fuller's preceders including the contemporary Escher but the man himself not a single time ... in case he replies to my first email. To be fair, he focuses on the 16th century.

O there's all sorts of links to israel on Arguelles' website now, a dutch lass travelling with a very oversized drum getting folks to lift their arms to heaven well, fuck him, what do you think palestinians will make of his latest 'luminous friends from beyond' sermon? A very absolute nothing since they lack wherewithall to make anything, not even ends meet. Fuck New Age sermonizing and the overhead & over all heads calculations justifying a guide status. What i make of it is a meme that IS a dream of separation (rather than the remedy). But hell, earth does not mind having a mind thrust upon her ... unless it is part of an even

more than hitherto suffocating masque. He counsels not to rebel and let the comets and pole shifts take care of it.

HHUUUUUGGEE pages ... endless bulshit and smokescreen, waffle and unmoored waffle on top, .. ad infinitum.

the brainwasher and -washee introduction page: <http://goldring.wetpaint.com/page/Team+~Zyan~>

I sense a great misprision of earthly nuts and bolts dross, they all pretend to be fucking angels .. no need for material coordinates.

I hate these new sew ager!!! .. cryst .. they screw up big time with their fancy tricks of the light ..

[\(\[http://goldring.wetpaint.com/account/Rysa5_bottom_vid\]\(http://goldring.wetpaint.com/account/Rysa5_bottom_vid\)\)](http://goldring.wetpaint.com/account/Rysa5_bottom_vid) and derivatives of the divine presIDent font.

I try have a little fun reading stuff by folks who ferreted out the dirty real life deeds of this clique but at first 'rysa goldring' delivers endless result pages of yay-sayers from 1-13, 19, 28 and 33 too.

Moron rysa err.. more on rysa youtube.com/watch?v=z_Dqp7Lltfk shaktipatseer he has 840 of them up himself (*in only a year's time!!!!*), 8000 friends, 5000 subbers ... a colleague obviously ... though with a lot more realism in the vidart .. he's got both Bridges and Winter up .. say no more ..

the only earthy vid up is an earthship footage thing ruined by 'rhythms' of 'house' music and political grandstand (*Kennedy or someone*) ... in the related vids i see one called 'the building of our dome-ination' (*lol*)

youtube.com/user/burslemchakra sacred geometry 7 is as much about chemistry ... oddly enough there aint such a keyword/tag in the stupid vid-info, many of them just show generic diahrea of keywords and phrases .. meanwhile though, the vid is not nearly making the sharp distinction between the symmetrical ashes and organic more dynamical puzzle pieces as clear as Julius Hensel does (*curiously undescribed, as if this were stealth knowledge - hint to self: try chemistry and burslemchakra*).

It is worth repeating that on the 2nd of september i discover a German admirer of that special person has begun a serious extensive website about him (*.com - check the grey table in this file and 2 days down from there*), .. how such an intelligent person can get into all that monodron 'sound healing' is beyond me ... loads of uploads but he cribs them all over and i suspect, sometimes may strip them of sourcing info it seem .. unless it is explicitly in the movie ... hashemsfilms.com for instance

ps about the hi-lite colour settings ... it is just to do with the appearance choices in windows - start - control panel - display

youtube.com/watch?v=6tlbUQCuKE0 my admiration for rysa rises ... as i find his web sentiments resemble the ones i used to have, he is very serious about astrology (*haven't found any 'raakvlakken' with the dreamspell crowd yet*) ... AND the link goes to a chat with david dees (*from illustration, as stark as his living conditions are steady to boring*) ... he had eye vessel blow outs too and blames it on aspartame instead of his web/visual obsessions. He rants as desparate and solutionless as his illustration are, no matter how 'good is heye' for real friction points when it comes to 'realisticized imagination' if i may coin something not quite as deceptive as we all know hollywood and the networks are. The vid does a steady second per pic show of his work

30th of august, 1st day of a wavespell ending 911

i ended up selecting parts of the spikey and asymmetrical ramble from the 30th of august till the 9th of september for a mail rather than posting the whole turbulent stream of it (*at the end of 13 days - 911 a day after Saddam's galactic birthday*) as a 'brainwave'.

I praise my parents for getting me out of my head a great deal better than his parents managed. READ ANDREW LEHMAN - THE STATE OF WAR AND PEACE (*suffering and bliss*) IN THIS DECADE DEPENDS ON IT!!!!

this one is short and cleverly playful ... there are a few more like it by this person, mostly naively slow punctuated by overspeedy spurts, narrated by occasional fingerpoints and rotatory baubel motions pausing at symmetrical divideries

note: requires pricey toys .. so far no remains of albatrosses found 'awash' with these parts .. the uploader does a rather insane blog with 20 followers .. he posted nearly 700 times this past august and his family cut him back from 20 to 1 hour a day. it is in dutch ... uh oh ... it IS that mad meier man ... herculean effort lasting from 98-07 ... he prolly died of exhaustion ... sounds pretty weak on the music i am finding now (*not the first time around*)

this man has done about as much work as arguelles but stuck to much more mainstream concepts he went and made some vids in 08, viewed nearly 500 times since march 1 on islam ... ok, quiet on that front from around that time onwards so he croaked a little later than i thought. youtube.com/watch?v=mAhe1nX0HLM looks like i have to revise my morbid expectations upwards again. .. he made new energy vids another year later still - 3000 views too

the date added button tells me about his childisplay (*loser*) efforts (*july 19*) to get a few nuts, bolted to pieces of wood with a bearing and magnet here and there (*doubles and redoubles visitor numbers many times over*) to keep on turning in his nice quiet and light toddletinker toy paradise which he is o so eager to export ... rather than import a little reality of course ... but since his heart is in a good place and he is prolly alive right now, i should send him an email ..

funny, ... that vid i claimed was 'ditto' earlier today (initially below a noteworthiness threshold even .. by an australian [[wayne brydon, 'goldmosaic' on youtube]] into Leonardo, SaGeo and very vulgar type lube wrestling - talk about a meeting of polar opposites!) had a set of odd matrixes (covering permutations expressed in terms of physics) with slanted 9 or 10 point parallelogramlike tracing ... that i am reminded of after viewing the ones that are still up on a tripod page by Meegan .. whose aol.hometown page is gone like the rest of them .. and he may have croaked himself meanwhile too ... On closer examination though, there is little resemblance.

Nope, Meegan still kicking (born June 17, 1948): thegreatnetwork.com/forum/topics/the-transcendent-function?xg_source=activity

top down diversity is about the best slogan he could come up with ... they did symbionomics but that fails to characterize what they are after, diversity thanks to rather than despite centralization. ... Hope they can bring a big enough mirror to bear on this issue if they are gonna turn 'arount' the count. Quite as Quichotic(ally chaotic) as the Arguellan (including semi- and anti-) crowd.

Ulam Spiral Formation

Illustration of the Ulam spiral, with tink sounds for the composite numbers and sosumi sounds for 1 and the primes.

The mathematician Stanislaw Ulam discovered that the prime numbers shown sometimes fall unexpectedly along lines in the square, such as in the diagonal ray extending from the center to the northeast corner.

See Figure, where the primes are in the shaded cells; note the sequences such as 7, 23, 47, and 79, or 5, 19, 41, 71, 109.

Gann's 45-degree line, the northeast ray, holds the primes 5, 17, 37, 101, 197, 257, 401, and so on: 70% of the numbers out to the 10th square are primes, even though only about 20% of the integers up to 401 are prime.

Prime numbers are important because they act as the "elementary particles" of the numbers: all integers can be uniquely calculated by multiplying together only primes. The distribution of the prime numbers among the other integers is considered by many to be the greatest unsolved mathematical mystery.

all bycause they can't muster the vision to break on through to provision (without beginning to suffer from all sorts of professional bias, disease, etcetera). I mean that (p)ounce of prevention is childs-play and can be done at play, finding out from how great a height exactly must x sized rock, hardness m fall to shatter on impact to over 80% sub 200 mesh and is there a formula for the size and hardness and support of the surface it impacts upon or how fast must 2 rocks (size x hardness m) travel towards each other to both shatter upon impact and how must water (power) does one need to hold/bring down all the powder in xyz knots windstrenghts?

how about a 3 axis 3d matrix that fits an octahedron?

my criticisms of whenever i discovered Fekete *(again, thanks northy .. 03?)* still stand:

1 - awkward delivery compared to the fluency of Beckerath's writing *(though the latter's voice, is, alas, lost).*

2 - misuse of the term 'coin of the realm' *(i could even argue it is abuse and usurpment of the fertility enhancing dusts the gold is found amongst & encased [[with]]in. Haahahaahhaaahh!!!!!! remember my recall joke *(yoke)* yesterday???

this guy gets all mighty clever about egypt letters, in particular the letter v, water mem ram memory brainman rainman and ... recall ...then he goes: 'we are about to experience totall recall'. Now, is he a millenarian or a singularitarian of would he like my version of the wars forestall??? All sagges want to know.

the number one tool for those who claim to rule the world is future. yet symbols are intended to evoke memory and invoke time .. so he contradicts himself.

if you write in rock *(depending of the relative indelibility and the fineness of your instruments)* you invoke the past not so much as the future cause:

a - your product is relatively amorph and not *(though they all look alike from a distance)* letterlike *(in the sense referred to)*.

.. ah, i get it now, he claims that to look at letters straight is wrong ... one must always fold knead, mirror etcetera, thus helping yourself get beyond, over and past them. Now, that's what i call vanishing mediation. Sjeesh, Americans *(both blacks and whites it seems)* are fucked up about space.

i think i posted that joke about space at the end of that necronaut file didn't i???

dunno why he has 2 accounts in the beginning of his vids images come fast and furious, requiring frequent pauses to be able to read all the labels, poster texts and what not ... i liked the can text: 'for babies with fussiness and gas' EXACTLY!!!! buy that shit and more of that sort of shit and you get babies with they aint lying, they are promising ... they predict a FUTURE .. the war called peace is waged with a ruletool ... curious, .. in holland we've been hearing a radio-ad about the hundreds of thousands of animal casualties yearly due to barn-fires, blamed on a safety code that isn't any better/higher than that for toilet roll storage.

As it happens, my chosen form of public service -- a library and teahouse, smack in the middle of the village i was born in and returned to after 20 years of absence -- was thwarted by present renter with the excuse that the shop was needed to store pallets of toilet paper (*one is indeed visible through the cracks of blinds closed over a giant shop window*) though this guy also claims to work hard and long (*which is why i was willing to contractually stipulate entry only during his absence with him*) for the city-halligans (*who left this decision up to him*) and runs a giant brand new social centre (*with alcohol license*) just a few blocks down.

I could now place an ad with opening hours of the place i now do have .. sort-of .. but it is in the next village over and i just don't see how i can do anything like this .. anymore .. ever since i was barred (*over bantering and bartering too much or causing each of the 5 deskattendant to start a program and set the meter running .. then making change an hour or two later, once a week*) from the rest-home and a shadow came over my take on social issues .. as well as a quite literal barrier between them and me (*of course i should totally reverse that 'take' and go: goody, more time to dedicate to my own toko. But i am too much of a nethead and that puts me back in my office/bedroom right 'heyahr'*).

lawoftime.org/pdfs/GalacticDensitySpiral2012.pdf noosphereforum.org/drupal/?q=node/29 4 vids of Arguelles in Kazakhstan this summer validity and yet same old same old ... he is definitely expecting help from outside.

either outside reform in this what i file as tecscapeaze and fabulatory fashion or inside *(the graduation of lighting one's allegedly intersystemic christmas tree like chakra system up, famously denoted with rainbow colouring up the torso and head of a seated or standing person are famous spiriporn but the interactive depiction do not ever involve one's immediate surroundings except with fringe groups like permaculturists)* leaves the fascists in the real world unbehelligt.

i really do not like the man, no matter how good he juggles his colours ... he begins with his graphic in the 7th minute of part 2 ... but no matter ... he has already imprinted upon me the impression of a man sitting in a desert and speaking of climbing a high tree ... claiming breaking the ego is good enough never mind putting a stop to distracting from and betraying location but all out zionism in reverse like begin breaking rock and carry water for the time it will take for a tree to even begin surviving ... thanks to his till then merely vaunted mindfulness ... exactly where is REALLY is AND applies it for other than number tricks serving fake prospects and false comforts, but what is worse, robbing his fellow man of it outright or changes towards it, right along the best of zionists. And for what? For his multicultural jetset hedonist kicks while he can hardly manage a weak tea cackle at this stage?? He certainly ain't mindblowing ... he blows minds off, his own first and foremost.

Mr Arguelles blows off yet pretends proper use and roadmapping for mind-time AND matter-space both -- synchmeisters are just gamblers systematic happy go luckiers, not systemic even keeler *(though they constantly refer to it as obliquely as necessary for their followers to be kept keepin on hanging on)*. he realizes very well that he chooses not for par- but anticipation. I do not deny the importance of sharing visions but he talks about the role of trees far too little .. in fact he reminds me of a goldbug .. promising himself and his followers enormous benefit, which, should such runaway value rise of laid up store occur, would be nothing but a self fulfilling prophecy fueled by fear for and shunning of the opposite YET THUS manifesting that very spectre .. cause all the money flowing into the totally inert unproductive material (*though i guess borrowing against it will then be easier but that is secondary, first, the stuff*) just hoovers all the borderline and full on unimaginitive money away from more worthy causes.

he makes it sound like a transition from bio-to noosphere is complete and final ... a bit like saying ... on that day boiling point kicks and the very very few poor to escape a toxic broth will manage the leap just before the whole think loses that and maybe all capacity. --

i am number 4554 and you know ... you know me .. having written loads against FIREWALKING, iow, keeping one's feet 2 the fire for some power trip and not simply when and if they are cold and you want to warm them .. i find a look at the F2F logo reason enough to laugh. the Fs are mirrored in a way the 4s are not .. and i haven't yet seen a foldingflaw, a fissure, a failure to frict and fract for real or fictitiously, which i haven't liked. It's the other type fictions, the ones i have been on about in this post that worry me. I see now that Les is quite 'vormvast', conservatively wending his way in a mystifying tradition that will distract from powder with powers, a problem i must have mentioned close to hundreds of times by now, at around half as many websites, easily.

ps: the solar cross foundation link there: <http://jancikradionetwork.com/issa/miller/galaxy/mgs-16.ram> i do love the ramheads (*but these do not allow recording*).

CONVERTS have telepathic contacts with disincorporate enlightened karma cleansed saviours, messiahs and other degenerations of a hands on, instantly liberating and usually suprisingly quick (*when it comes to come and gone*) hero

CONTACTEES (*which is the tradition of this website*) are also 'technicated' (*formatted and appropo apps installed, or walked in, .. brought over in mysterious ways, as in the case of Laffoley*) and all sorts of technique is projected, expected and bored with waiting for it, of course, designed.

LAST REMARK: if i am so delighted with Genesis Continuous, then why disappointed with the hordes and hordes and growing bunches of people who pontificate, project, conjecture, extrapolate the hell away .. the living hell out of such undocumentalbe and even more inextricable lines than one can see unsolvably knotted in the 3 monotheisms for instance.

22nd (*the afterthoughts*):

the use of colour in commercial endeavors is henceforth prohibited all arms manufacture, trade and sale deprivatized forthwith. the map carved and cut up into agroforestable puzzlepieces to be auctioned and won by lottery, one to a man 10 to 10 men, etcetera.

A FEW good rools i think of when i see the ad for brandnewday.nl/ and remember the icesave drama. I always thought their great popularity had a lot to do with the clever colour use in their ad campaign ... using a natural graduation of them to convey confidence in their sequentializing and graduation skills ..

.. whereas we all know ... the true sociability ensues NOT from the tiny tiny drop of inklube which a small clique of puny but powerful humans can use to paragraph stuff like national economy 'saving' measure *(time-buying that is really time-selling - digital strokes, instant, cheap and easy, 'bought' with incredibly vast amounts of citizen's time - sold - consumed by a diabolic trick that keeps the fictitious money at the top 'in touch' and mixing with and attractive to [[and of]] the realer types).*

As the closer reader will know, i love returning to volcanoes to illustrate the laws of life as they are applied to and distorted, sometimes wholesale aborted, by economic punditry and doctrine:

We see vast credit amount blob enactments by way of penstrokes. But instead of bait landing speculators on a chopping block it will be loot they abscond with, it will attract and breed them either way, quite as predictable as it is provable their peers are being foundational *(not to mention fundamental, fanatical)* at presentday magic numbertrickerey.

One *(SPL)*international cotery and/or cabal constellation after another these daze, .. but no matte how desirabe social coherence and cooperation, they/this is not available by decree or command, in fact top-down trick *(l)*ery is antithetical to what we all want.

Sound living as a benign dictate is not impossible but exceptional. As a rule we see co-optation, subversion and sabotage, stooges, pawns, pretty window dresses and the brainless or scrupleless types, the sell outs in them.

Volcanicredit -- VOLCANOS dustify - BANGSTERS financiale INDISCRIMINATELY Results as always, subjects to the changeable winds *(where change meets chance, some (folks/regions) get too much, others none)*

big blanketing blob of dust or debt is that a question suggestion?? Or can we order a better than best of both combo? 1- dust in the compost and vital food for near and dear ones 2 - debt/interest charge, iow, artificially and superficially driven bunch of aggregators, heap height raisers, tension builders, unmannerly clicks counting tricks in a box under locks.

We see precariously *(topheavy, topple-ready)* pinnacle positioned persons bearing too impossibly great a burden and share of responsibility - b.r.e.a.k. u.p. time yet???? Nope, despite the clarity and lightning speed, instant and sharp picturesqueness as well as lovely soothment and comfort the visions of those who have struggled with this material the best and longest, become, the general public lags woefully far behind.

these people at the top grab what they can - thanks to AND despite of being so visible - as an insurance against what being such a lighting rod - token and *[[even if just passively, at the end of no change at all]]* promise of real change and clean break bringer when leaving, ousted, let go of, fired, disgraced, pilloried, resigning .. after a suitably sized spell of discharge and venting *(distracting from the real probs and opps more often than not)*, a period of this 'kop van jut'ness *(target of wrath over this that and the other urgently mattering matter in which he is as likely as not innocent)*

All consequences the very positioning is bound to soon enough entail - a statustructure or statusphere is a more realistic word than info-, cyber-, noo- or hypersphere

the big digs/dicks lay, rain and drizzle their fake loads forth and down in the manner of a powerful volcano and forces everybody to get broom bucket shovel and wheelbarrow.

Whereas if given the choice and a little opportunity *(right scale, accurate info etcetera)* as well as the knack for coordination, they would surely opt to go a little distance and get some of that vital stuff, then target and dose it properly .. instead of having to remove it from where it is more hinder than help in the first place.

On the whole though and if democracy is, at least mentally applied, the chain of being will opt for dust rather than digits. But, options ar toption really and only available at the very vanishingly fleet,

ephemeral, shortlived, cramped and tiny top.

In our mind experiment (*giving voice to voiceless and vote to voteless*) the base (*layers and strata*) of pyramediation must be made equal, that is made to boast of comparatively vast vast majority constituted by the convoluted, collocation of beings have less chance, mobility and choice.

This netknot of heritage, endowment, and whatnot filled collective of chaineer-trainee is also peer senior and arbiter, sponsor and support. The validation of their majority and divination of habits instincts, needs and preferences paramount. the line from sustainable indigenous to traditional conservative is too distorted by unscalable and partial measures to implement fever dreams and assorted poisons quite stubbornly denied as such (*from paint to drink, slave labour has toxified hearts and minds of all ranks*).

the natural defense against toxicity is dilution (*breeding quicker/younger*) but the civil one is adding a social strata, overlay the previous discredited one that began to crack, chip and erode. Stakes are raised, slave labour pools enlarged. Hell is bloated.

numerical and even despite tinyness of individuals, weightwise, so in every which way you try divvy them, fuck, i cannot seem to get to the point here .. even though it was the hot flash insight i decided to try write down this morn over 10 past 9 talk radio (*subject ireland*). THE POINT IS WAS the differences, parallels and transpositionings (*with and without posture sequences, folds and other stance pacing dance ritualisticity*) between ..MONEY AND SPERM there are about as much squables over money creation as one finds jostles and positionings (*voorsorteren is lane change .. as in lineage change hahahah!*) over squirtery rites and rights.

the name and shame things in most public and most private form must .. I REPIET, M.U.S.T. be harmonized, reconciled and become a single smooth sailing thing. Good thing they can be.

simply place/use/order fresh dust right in the middle between them in such a way that nobody can get around its vital lessons about respect.

Dana thinks she is genius and so do i (*and so did the caller i did a long rant about in dutch last week*) but links to delusionists all the way in greece: hellenandchaos operator Rees has a habit of sending rush telegrams to leaders of the world and drawing weird diagrams filled to overflowing with texts in greek

23rd:

'water splitting photosynClock' is what i call a diagram gif i am saving, made by David Yarrow and extant at yogaverse on a page pointing to birdtribes.net for sacredd geometry and of course i check on championtrees.org/ ... which, alas, after almost a deccenium of being one of the most pleasantly soft on the eyes site has gone totally harsh, bland and blinding in that respect. I cannot imagine David is responsible still.

Perhaps he simply sold the name to a rich bonsai outfit cause he needed the money.

By the way, this is a good place to mention Dana in Toronto is pro morningsky and contra Shriner (*the impression she was pro-the latter carried onwards till yesterday from the day before, may or may not have been in error - don't care either way*). I hope that woman, along with all the other real or imagined victims of bohemian ritual sex abuse (*clustered at freedom888*), is not gonna be too much of a drag on them that do real work (*she is eying such efforts as permaculture and giving them furtive props like she does with native issues*) ... but it would be a disaster if her type, media moguls in their own obsessive ways, would become the 'face' of such worthier causes, in the general and shallow rather than probing public eye. --

-- kcrw.com/bookworm has a downright scary host, fits the rysa mold ... folks utterly separate (*overprotective mommies of course*), sounding like they can barely stand up anymore ... from an obsessive compulsion to keep their noses glued to the classics and a computer screen respectively. Pretty much the same but to a lesser degree applies to the host of conversations at berkeley.edu i linked to the 25th

I am listening to Rysa right now and he bursts out laughing at his own joke about a lightworker manuel .. needs to be a binder so you can take pages in and out Hahaahahahaha. Won't be a hardback quite yet. No, i am not expecting any loud crack out of you any time soon you hardlightworker. Get back to guitar playing and do it on the street. Note I am scolding myself at the same time i am you. That said, ... get out of your stupid ensconement, yar stuffy little room and quit the girly twirly automation already!!!! Mr Rysa filters his 'contacts' via (*suffers his deficit thereof due to rather*) chatgroups he addresses as a little hierophantic pedantic pontificator pundit and other abusive p-endicizations. .. at 1.14 he gets into funding and speaks about his real-estate biz in the desert. ...

Soups n brews i will prolly, before long, return to and flesh out the story of how taverns and pubs (*not to mention wedding celebration soups the butcher made .. his wife .. my mom, amongst others*) functioned kinda like the first demografuk tweakins setting off on the long and slow slide towards wards in psycho clinics, precursors (*proving precussings*) of yold legal and medical professions including just about all 'care' industries .. and before getting there causing wave after wave of migration through monoculturization and social strata entanglements and steepenings.

the vid with mutation discussion was by who again? the guy who likes to make fun of religion ... but which one exactly. .. guess it was either AronRa or FlowCell (*the 27th*), pretty sure it was the one called 'Is the whole Quran "out of context"?' .. nope, that was by askegg (*178 uploads*), a boring one with slow and silent lettering .. but he does have faster paced ones as i am finding out right now ... stupid distractions though, showing the different ways folks get fucked up once they read the bible unprepared and not forewarned

So meditation teaches the secret of what gives the female the climax -- electromagnetic energy through the vagus nerve activation. The male then learns how to have INTERNAL orgasms -- internal climaxes -- through the vagus nerve. So celibacy means MORE sex not less -- and also healing energy because Nature is female.
O.K. the goal is to IONIZE or BURN AWAY through electromagnetic fields -- the fluid. So the West has focused on retention -- this just causes blue balls, etc. People FIXATE on this because they do not FOCUS THEIR MINDS enough to create electromagnetic fields.
If you exercise tons and tons then you will also burn away the sex energy. Muscles are just stored electromagnetic potential -- but the mind is the source of the electromagnetic energy.

Debunking Chris the Xtian Icke debunker -- According to him DI is under control of exactly those he is warning others about. He says this at the end of a passage recounting Icke's views around Leylines. Any charge there is not only bycause of being trade routes or bycause they have some sort of hinge and faultline tension releasing function in a galactic sense but first and foremost bycause of spilled blood. If i remember correctly, it was in the vids on masons and Dee I saw the straight line through major east coast centers (*philly, ny boston(?) and beyond, .. being drawn across the atlantic*). It also goes right to roslynn (*templar*) chapel scotland

Took more than a few hours but finally, with the search phrase 'ley line eastern seaboard' in google images i went bingo (*though the line goes through southern england, not rosslyn*).

whatabeginning.com/Misc/Wonders/SA16.htm tries to trick you into accepting that the bible is as solid as a stellated, nested, cascading virtextualization since its kernel is a perfectly symmetrical nest of what later came to be called platonic solids ... but david star would do fine for hebrew ID (*i hesitate to extend that to jewish and israeli though*), as a matter of yar fact (*any positive uses left no evidence and so, are even more unseen than 50s russian gymnasts filmed tumbling to the tunes of a homosexual 'instrovator' Partch*). ... ultimately though ... nice try (*nice colours here especially*) .. but no thanks ..., i'll stick to my engagement with the Fuller/octahedron x wessel contraption put to hamaker/hensel useso far, but perhaps they do not need to necessarily keep apart .. as they clearly are now.

at labyrinthofthepsychonaut.blogspot.com i will be honest and admit i visited fruitlessly hoping for a fix .. between your last and latest.

now i will be impolite and ask you for some imagery sources, care to divulge any? Or do you have a stash from 10 years worth of leaf turning, scanning ... or these kinds of (*google image*) searches (*from before archive.org managed to save the kind of 'work' aborted and austerized nowadays praps?*):

hippie imagery 203.000x hippy imagery 3,550,000x hippie art over 2 miljan hippy art over 1 miljan psychedelic art over 3 miljan hermetic.blog (*Rampage, very old time digital presence from Nimbin stock, fucking and hippying like it's religion, discovered only a few months ago*) hermitec .. yeah, i wish but i will be mum until cities themselves become nomadic and macho's associalize and immediate their force in ways that serve life, not death,

this is what happened when trying to find if you credit anybody with being good image sources at all someplace: i read a comic ...ehhrr, i mean comment pointing at you here <http://blog.comicbookrevolution> sigh, .. if i ever --and in as much as i set out consciously to-- head these guys of and give them some serious competition i should not have spent any juvenile, infantile even, time to outdo and outwow 'm on the pixelcombo front ... they go for conventional black on white textwise but are extremely sparing with that, .. no doubt to leave more space for the killer colour nuance. Then they do pathetic podcasts over them, complaining about being starved for content despite 'their'* good money, in heavy grown up voices that belie their neglect, overcooked in fantasy land ... no orchard and forest nor treehouse and permaculture available to save them from their own minds. It's a given. It's a culture (*culture of occupation is perhaps better called occulture*). Tragic.

how are purchases of comics funded? any stats? my ideas of multistory (*perhaps even multifamily*) tree nurse mother care praxis (*kill politricks kindle branchotecs*).

Now that i think about it, a tree is the ultimate rocket ship say we did have a 1000 year consistent of keeping biomass and diversity coming. By that time all regions will have their heirlooms back and much more. no unemployment, no pollution, suspension technique aplenny .. and ... more than that, rock fed into compost feeding trees. It's quite simple really.

To end the changing luck struggles between and amongst races, genders and classes we need to quit face- and start interfacebooking. Curious innit, that facebook offers a face and a few spare hints, up front, then, for all the rest one needs to log in. That devious Zuckerman is proolly just a calculating cunt, specially if/when not 'van voornemen' (*intending*) to follow up a huge string of social media (*as money once was, before macho market mono-this, -that and the other started dominating the scene*).

Either way, he or some other bodies need to put some flesh on the bare bone brushstroke outline/promise of 'life after television' (*Gilder*) and neoteny.org (*Lehman's vids, posted just before going under the knife due to eyetrouble [[telling that]] in april staying offline since*) to just name a few milestones along that long road i happen to look back down, walk, and criss-cross.

the facebookies cynically realized that mating modes and frenzies cause the craziest risk taking ... and we are doing so more massively and collectively with each wave of syncromustism ... i mean, let's 'face' it, much like the skew and imbalance in the debates over biomass and bio-diversity, we can look at syncs and sinksorrows as melody and beat.

Financially speaking, from bundlings of fairly abstract, not to mention obscured amounts to amassments (*read only, real time*) of sentiments, urgings amongst and surgings through the masses (*perhaps the 'invisible feet' would be an apt concept*) proolly takes pgprivacy and pgpublicity at either end with lots of openness and openings in between.

We'll return to proffer formulay opinion on facade facage, angling stuff to better face its different facets and aspects (*handy when trying to break up all to clump cluster cliquey shit too, thereby making these remarks the continuation of a note i wrote on breaking rather than sawing firewood on Drew's blog the other day*).

haven't actually returned, .. too quiet there

Last nite, during a talk-radio discussion of a socalled 53rd week (*something that seems to happen 5 times in 28 years and can be predicted using wednesdays and thursdays as year ending day for a clue*) i remembered all the bickering over this or that fraction in this or that calculation mode and mold. All told, i have little patience for that, it quickly gets old. it's like tuning at the races, best gear tire spoilerwing n fuel-stop interval combo wins.

The totally amazing calendar man Jose Arguelles (*cycle closer, a walking pacal votan memorial - he claims more than that even*) opens ceremonies with a prayer to the 6 compass corners and then the seventh step goes within. There is proolly a numerological formula for determining the relative sizes of 6 outer spheres with respect to single, singular (*proolly at the same time most social*), central one but i am pretty sure it is very purely abstract and mental construct without spacial and extensive application rather than an always retrievable connotation somehow or other. i simply cannot think of a stable form of it inside a cube, a form the JA crowd makes much of whereas an octahedron is nothing but structural soundness ... see <http://grunch.net/synergetics/ivm.html> ... and my old 2000 front page called blabsabs yeah, i do keep returning to my own vomit, born in the dogyear, earlier this month it was bible math and just now i stumble into <http://littleguyintheeye.wordpress.com>: Chemistry & Numbers - E.W. Bullinger – Number in Scripture pg 11 ---- But i did not mean to get THIS distracted again, must be all that symmetry in the form of fireworks today, i was actually getting ready to offer a prosey derivation and dualism cure: the for and against, good and bad splits are made as fat and few as possible cause the driving force is domination and safety in fishy numbers, the dive to the middle obscures but now the drive to the middle clears (*clearing in accounting echo principles which were, by hindsight, ahead of their time so far they went under again. That docu 'the ascent of money' wows you with good camera work but offers nothing along mentioned lines of substance*).

To me universal, transparant, central, upright and just, ARE light, LIKE light and like light, have their equivalent complement, substrate and pole in things of the (*right*)nite(*rite*), like heavy, kinetic impact that serves rooting (*gently budging and massaging vertical biomass borders*), closely linked and alternating concepts. It's what i reserve and plant to restrict my engineering genius for. A Moire lover like yourself could proolly see the relation of mesh, the omygosh gossamer gauze and finest filamental fabrics, in layers going through their own paces with carefully dosed blanketing volcano principle, the shiftasiftery in my sense .. unless your third house the taurus sign and venus in your chart are heavily beset by countervailing and countermanding momentae. In that case, forget i tried to talk to you.

7 easily syncs sieving. rockdust, deep soil .. and giant trees seque from there, given permies do not betray principle in order to dominate, clean out and up to only then begin the good work, but instead, remain true to their calling and earn the reverence and 'assessinotion' political brownie points to get and keep that kind of 'runaway' growth on course. Take you rockit kits away kids!!

this person works in the mold of philip cohane in that he relates the whole world to mesopotamia, even the chinese hail from there .. cause their remarks and squigles used to signify 'dust' and 'moving' which, thrown together constitute the pictogram for 'life' is, of course, straight out of the bible (*at least, it is according to him*). Likewise, PCohane finds hebrew placenames around the world. gotta love them those diffusionists .. but not the arrogant ones, anyways, i'll have the place names over the bible texts anyway.

Still, ... love scrolling around here on account of the sometimes astonishing pictures, this one i had no clue about so far:

Time to take leave of a certain Teutonophobic Minnesotan He is a victim of types like John Loftus, here's the proof: <http://naturalresonancerevolution.blogspot.com/2010/12/truth-repressed-by-psychic-vampires-my.html>

drew let the first version of my comment stand and later took it down again. sorry, but to me the belief germans rule america in secret has as likely a basis in truth as and is equatable with a sibling belief which will 'swear' by all the hi-n-lowayz (*and ho-n-lie laze*) that humans who are somehow really (*taken over by hostile*) alien reptiles do. People tricked into doing a dirty occupation job for a well covered third party is key factor and, subconscious mostly, act-out triggering association and resonance here, i will repeat that for those who, unlike you, haven't seen me type it yet. Haven't you at all ever begun to notice and wonder why anything smacking of christianity is by definition Nazi to folks like John Loftus?

People like him do not mind - and actually bank on - lowering their critical faculties to that of the lowliest and most uncritical for whom mindless repetition is the most decisive criteria - they do hone their delivery into an amazing smoothness, boosting self-induced conviction, a masturbatory type hypnosis - a definition of the rotten, rotten, torturous, world banking and politics poisoning core of holy bookiekeepery mindsets by the way ... a race to hell some certain folks have a reputé for excelling at .. like the dutch soccer coaches have for their trade.

Actually, that alinea is is not quite fair. I bet lots of stuff JL discovered WERE (*and are*) dirty secrets as he claims they are, but he fails to mention the role (*choices in funding*) play, he downplays them. It stands to common and fairly uncritical reason that weapon guys can always coerce and put one over on the money men (*assuming all actual [[and fond memories of]] good money men haven't been exterminated yet*), former molds latter's behaviour, latter first has to give in to blackmail and buy off the former, then in a stage and age sliding towards degeneracy, the financializers get used bribes and tributes but then begin cajoling and even actively enticing them (*carrot and stick trade places*), circulo vicioso, chick n egg.

Sound Banking is a bit like Eco-Painting in that a proud banker would never fund and mediate arms races and sales, just like the honourable painter would not knowingly smear a very toxically sticking substance on anybody's living space. In other words, a good carrot-(*ac*)counter would ultimately insist on and persist in striving to eradicate sticks altogether, mute and transmute, re- and transform mindlessness mindsets that go obsessing over trajectories instead of real (*inaudible or innerly audible eh Drew?*) music.

We need an earmarkery culture. Essential to teach the art of voluntarization. Until then we are stuck in/with unmarked money vs unmarked double agents who come to as often as leave a split scene .. in confusion. Better rethink that 'leaving'.

Rowan item with all sorts of doc links, most amusing of which is the file on numbers from the lebanese bi-lingual site. Numbers are pliers, and meant to put the squeeze on you. give the seven a foot but do not give one and you have the sigil/squigle denoting a number showing as many quite graphically. clever that.

What Rowan does here dovetails with my present subject matter: <http://niqnaq.wordpress.com/2010/12/30/histories-of-lurianism-sabbatianism-frankism/> I visit a site linked by helvena about which Rowan says this:

Helvena, that site "surrendering Islam" is run by someone I used to know slightly, a German convert to Islam with the peculiar name of "Sahib Mustaqim Bleher". He doesn't seem to grasp the importance of the fact that Egyptian Freemasonry wasn't a unified phenomenon. The British had their lodges, mainly military in origin, but all the other European countries had their own lodges too, especially the French, which were pro-independence and anti-British. Still this pdf is fun: glbet-el.org/masonictexte/egypte.pdf

It's wrong when it says that "Prince of Jerusalem" is "one of the highest titles conferred by Freemasons". It belongs to a grade which is about half-way up the 33-degree system. I received the Crowleyan version of it, which is where I encountered the Crowleyan version of the famous 'Jabulon':

J_A_H_O_N_B_V_L

Here's a lovely piece of British colonial double-speak, from the pdf, whose author doesn't seem to see anything

double-speaky about it: .

Broadbent gives us an insight on Freemasonry in Egypt during the 1880s when he differentiates between the principles and practice of Freemasonry in England and on the continent in Europe. While the British system embraced nothing more exciting than charity and good fellowship, 'foreign Masonry is almost avowedly an appropriate and convenient arena for political discussion, and both political and religious agitation.' Thus, according to Broadbent, 'in Egypt the tenets of continental Masonry, with its Republican watchwords of Fraternité, Liberté, Egalité had evidently overshadowed the strong British elements which once prevailed in our numerous lodges!'

there is Icke material (*interv w mindcontrol/earth goddess Wilder*), in the 5th minute of over 2 and a half hours he points at NatWest, a clearing bank. Bullshit, clearing in the sense Bth recounted it is no longer possible, can't be done with monopoly and kinder kinds which have become monetarily co-opted.

This one on the dollar bill stone of destiny fabuliciousness - another east and west uniter, like nemrud, a rolling stone - lapis exillis. The makers speculate about this 'chintamani' and/or kaba chip if not even the green moldevite grail 12th C v Eschenbach raps about, etcetera etcetera for nearly 3 hours of absurdity, just as longwinded as one of the cited sources David Ovason:

Some Christian leaders continue to downplay the occult nature of the dollar bill; but once you understand the beliefs and influence of Roerich, Wallace and Manly Hall, you will clearly recognize the Luciferian nature of its design.

It is useful for me to look at this (*though the schlissing narrator irritates me*) cause it is good to realize Roerich was quite a big fish .. hence Drew's association of JA with the elite, since JA did indeed make much of Roerich .. but i thought it was just a friendly nod toward yet another colleague, as obscure and splintercultural as himself. The art Roerich produced certainly is extremely juvenile and .. 'naive' i think is the official term.

Certainly a contrast with the highly sophisticated hidden authorizations alledged to be inscribed on a little something like the dollar bill, which to steepen the paradox, goes through more hands than any single other artifact on earth nonetheless, i bet.

Ascribing intent to naivite is absurd, let alone crediting artistic dabblers with evil intent. Most things are a kind of mm mm rather than THE one and only mm mm. Fucking inyourface humans tied fetishist subvert and give the human ties natural at motherhood stages of life A BAD NAME.

Funny that paranoids who make these kinds of programs always rely on dark suspicions and allusively formulated ties, very grave ones though the actual material involved is a nearly literally vanishingly small amount of substance ... whereas those used to staying up nights and counting stars if their day jobs in the grainstore and irrigation water accountancy did not tire them out too much (*...anymore, takes few generations of that kind of grunt before somebody has the timesaving lightning speed at his disposal*).

Then there's that rock, bearing some sort of jerusalem-like charge .. philosopher-stone, messianic pabulum, all misplaced and displacing as well as disqualifying pinpointery and lottery like tricks (*lucky sperm mimicking, even worse than the piscean age 'tolerance' - stimulus bordering on trapping and trawling*) for massification used to hoist and leverage crooks and thugs into positions of privilege.

Perhaps a lot of the Moray legend (*the technical version of all this abrac-aqua-ckery potion potion sneaky snake oil salesmanshipshaper's power ascription*) has a basis in this also. There is a little talk of some sort of meteoritic theremite but i failed to note the time (*around the 10 minute mark maybe*) .. right around the hour mark we see the roerich flag which Arguelles promotes and i had a deep think and did a write up about yesterday.

.. prolly also so deadly, in the case of fire, it will outoollute all other chemical compounds. That seems to me the most likely and logical scenario to ensue from and as the dark side of all Dan's totally exxagerated rants against metals ... neve a word about coins or swords, it's always about building materials and metals, especially aluminium, always deadly. He claims sprouting seeds in metal cups is impossible. Well i can claim right now no matter how you aim it, Dan's vaunted magic is unnozzleable.

Him and Drew Hempel haven't learned anything new in the last decade, that i am sure of, .. may the continue fringe idiotically into a ripe old dotage.

youtube.com/watch?v=-nNZOjDi_dQ the accompanying vid is a 35 minute and considering the redundancies, a little too long though pretty impressive in spots, making it an overall worthwhile. Oddly the dramatized parts [\[\[cataclysmic hollywoodie art\]\]](#) have looping soundtracks which comes across as very amateuristic.

Most astonishing moment for me was where it argues that the great serpent mount is really a monument to the plumed comet that came and tried to swallow the earth.

The beginning is a fast pace recounting of the great extinctions, then we see precession animation and astrology with historical and mythological iconography.

Last third is all about egypt (*bauvalian*)

This vid is part 2 and was viewed over 3 miljan times since aug 08 ... whereas part 1 only drew half a miljan

(*prolly not cataclysmic and gloomy doomy enough*) ... well, it's about the Inca mostly.

On Saturday, March 9, 1918, the skies turned black in Kansas, and great winds filled the air with a stinking yellow haze. Men and women who had been healthy that morning, fell sick and died. A killer virus spread across the country, hospitals overflowed, death carts were heaped with corpses which were dumped into mass graves. Over 20 million people died world wide, among them 680,000 American dead.

note on Arguelles imagery: total tosh, complete bosh and dumb little tricks like making the hunab ku look like spiral arms of a galaxy (*that part is fairly easy but then to see the straightlined tzolkin in there is harder*). he also recommends visualizing the center of the earth as an octahedron and has no place for the use i had

been hoping to put the structure to.

<http://i-can-soar.com/geotran.htm> Jose Arguelles wrote an article entitled "Compute and Evolve" for the Jan-Feb, 1969 issue of Main Currents in Modern Thought. .

The "new mysticism" which we are witnessing is not a reaction against modern science and technology, but rather represents an inevitable outgrowth. The I Ching is becoming popular not because it is a refuge from modern life, but because its structure is once again understandable;.

Something the heirs of modern day coin shavers, hi-frequency traders will come and 'collect'.

The arguelles novel from the eighties about the final battles (*that will end the hands down winning streak of battles that were each, one and all, done after a decidedly inelegant fashion**), set in the rockies, don't remember when, are instead acted out right now in eden prairie - link posted yesterday. The man is a prophet after all.

the fascist type tries to stay as far away as possible, likes to pretend differences are insurmountable and in contrasts mounts considerable, not to mention terminally deadly, in the long run even to the very ones making and using the stuff, due to inbreedery or shots heard/hurled around the world and catching the shooter in the back (*i still think Katrina was just such a thing, energy - expended in an Iraqi bomb campaign [[Fallujah??]] coming home to roost*). BIIIIIG chick alert!!!!!!!!!!!!

Moving from fascism to fashionism we see folks move more, approach, count coup, and mingle a little better, always piecemeal, always the most daring, brazen (*, reckless, alienated too perhaps*) and curious (*no man'sland crossers*), the council of maidens judges picking off (*and pairing off with*) what's worth saving, as Sidis recounts. . . .

Berndt by the way, needs to write a crime novel about how the erasure and disappearance of a curious 4 story hi mural --- (*ostensibly bycause of a renovation*) in the Library of a U famous for its liberality, 4 miles out of town, painted in the late 60s by a man who went on to pioneer and become the world leading authority on synchronization, rituals, medicine wheels, mandalas, sand painting, matrixery and calenderaisers --- triggered, unleashed, seeded, signalled the waves, habits and largest concentration of them all to sprout up on all the blind walls around the State Capital of the pacific northwest, he already has a huge huge collection of specimens ... but hasn't answered any of my queries for some reason.

I have criticized the man (*the painter, Arguelles*) for seeming to feel a need to foster awareness of a mirrored and therefore distorted truth: sharability is worth it, no matter how vanishingly small and fractious or even altogether fictitious the morsels, a logical consequence of his overvaluing mental aspects of being.

It is also a distillation of the missionary and crusader complex in him, the machismo invested in splendid waste .. potlatch ..opening the casings revealing inner clockworks, invisibly springloaded and represented in squiggles displacing (*he, on the contrary, posits and proclaims them to precede*) all possible other and more palatable physical precipitate of such glimpses, analogous to the quivering dazzlement of peacockfeatherload-like displays.

The visual portion of fitness is far from residual and eyes are stressed more than rocks are being squeezed. Again, is this a displacement or merely tell-tale early sign and good omen?

Screenage of eyes rather than rocks has helped 'unfairing' fights, made them more fundamentally dishonest (*more fundamental, more dishonest*).

And so i lose respect for eyeball magnetude, beautifying skills that dictate a dazzling pixel dance with razorsharp contrasts (*moves and dreamflow grooves provided by the toxtec at a rate far surpassing that of fake breasts being 'fitted' at the shapeshop*).

I don't pretend to have figured out how far and in what way Arguelles pipedream applies or might relate to these versions of pretentious immobilization. Compare and contrast (*if possible harmonize or even reconcile, 'relativate' - as dutch, quite uniquely perhaps, has in use**) with dreamspell mirror day i reffed last week. Disputes about wrong turns in ancient times are what feeds the religious classes. I hope we will soon see disrepute of reli-rows rather than disputes about them heating up and inflaming to the point of the old flare and burn up, over and out.

It's like economics innit, old uncorrected mistake become cumulative, growing and finally urgent need for UN CoreAction, deneglAction#

Not sure if that relates to Nick Szabo's vaunted universality preference as people's drive towards danger zones of obliquely monopolized centralization. and to Gilder's vaunted monopolies broken left n right by telecosmicity .

We are commentarianists of a different stripe. He is the antithesis to me regarding the degree with which we judge youtube commentariatisms worthwhile, to be taken seriously. He does, i don't, let alone find it worth engaging with. Not just cause the pages are always white either. For example, the guitaoist guy came across as interesting and as rather self-occupied and severely under-exercized (*not to mention more wholesome activity*). Kopflastig. Then, soon after that i noticed he is a real prick in comments. Totally sniperish and snide, in contrast to the easy, not to say, too easy goingness noticable in the visuals.

how do you like that? .. coming from a guy who on the same day manages to once again, and after such a long time of obs(*ervation*) opps, even still, even yet, remain a fop, sop and sap (*and root*) for a liddul china man who once pushed himself into knee pain (*i know exactly what that's like*) until a 'master' (*cough hack, he really means circusman**) told him to sit still for 7 hours .. then he started to heal.

<http://naturalresonancerevolution.blogspot.com/2011/02/chunyi-lins-instant-teleseminar-replay.html#13MB> ... don't he come up with pretty free-way similes though? So sweet. "sluggish vehicles. hu ha huah". what a fucking crock. Can i send you an unconditional bill for wasting my time listening to you? Have you healed your wife yet, asshole?

* check that lovely link to monestaries, plenny of whities over there now, female and fuckable too. Hell perhaps the broads are 'tolerated' (*read broodnodig = rock a vital role*) as they they 'bear cost and consequence (*finance*) this revival/continuity of ancient recluse-cultic remoteness mystique ... benefits from visits to which were a secret in plain sight from the very start: ascribable to the exertions and adventure needed to go (*and return [[Ito urban squalor]] refreshed from*) there.

Now a christianized china man in western urban enviro is a much more iffy proposition.

He's got new tricks up his sleeve though. He can direct-invest generous wallops from his energy savings account, not despite its huge bulging and toutly globus-boundsbursting, intercarnationally stellar bulk but thanks to its massless extention (*conveniently undetectable of course though a mixer upper like him will help anybody try, as long as they are prestigious*), to believers in him, through anything, including of course the tiniest and modernest of modernist - and on the whole poisonous to all culture except monoCultYore - ConTrapSjans, cause source and destiny are the ultimate same, so it's all allrite all ready. It's out of his hands, everone a healer, he's only charging for the reminder service, just gaming logic for all the rootlessness it can convey .. and we're gonna take as much as we can stand.

I am all for monks in the middle, delighting in humble yet most basic building blocks or harmony (*herbs, fruit, compost, shit, etcetera*) but monks with refugee pedigree, the very ones with fabulous reps for being o so prosecuted? They tend to tender pretension.

Meanwhile, the statues of the real(*heal*) archetype (*Cernunnos*), closer to deserving that status are crumbling and the professions flowing from their inspirational practice are as good as extinct, with worryingly exceptional exceptions ... unbelievably precious (*more a dying breed than a pioneering one*) in direct competition of miracle claimants and the plague of snake oil salesmen and secretive secretion pressure exploiting potion peddlers. Not the type of company i tried to find and invite to join me in delight about the notability of Cernunnos-like after 'shockarockas'

you know what's really funny too? Chunyi lin's page title is: 'incompatible webbrowser' ... and has been for months. he is fishing in the dregs of unbalanced and nontalented people obviously. 'incombattible prowessser' would be an improvement no?

it strikes me .. (*at 5.55 of this*). that McLuhan is devilish/devoutly channelling the centralized thought of homogenized, abstracted, totally measurable monolithic paranoid catholicism a lot of the time. He was alien to micro, obsesses with mega, and, in the light of his turning to the church as he did, with omega.

<http://buzzcoastin.net23.net/> i really don't appreciate all that underscoring finnegan stuff (*joyce's voice, clips from the movies about and inspired by it, etcetera*) with a bunch of noise. In fact, i hate it. All the Bob's vids by buzzcoastin do it but for now i am interested enough to try ignore it (*i watched a dozen and only one had un undistorted zappa tune for background, instead of one they tweaked and nearly suffocated with additions*). this buzz fella though really overdoes it from the get go. wv = word verification, very quickly teases out the 'bizarroity' of die-hard commentariats. Commentarians lend that dressed down digital banking (*key-click*) trick weight and give it credence over-eagerly, not just a joycean key to fit the occasion kinda flippantly (*though there's that, and with me that's as far as it goes*), but often as if it is a divine password. The practice can be seen among intervention announcers, and since they are, often also, the stuck record, chronic type, a wv for desert after the hard slog of rearranging the furniture yet again, like the liddul lady chasing that elusive praps 'pass en core' or only just arrived dust. For them a wv jive provides a welcome break FROM the alchemical meticularity of rote, rut and recipe, if it doesn't break that UP and make light of it altogether. It's like the seal of approval, the proof in the pudding, the royal gesture, setting yold heir of heirs in motion, a stroke of the missing chord at last. Destiny meets random sense of identity. A last flare of the illusory lucidity and resolution literacy seemed to offer, make believe from the get go. Took flight with the bible, nuff said.

The wholly silly autist/occult slitslotting a whole world up (*in lists and matrices*) so the fragments fit on cranks in a box (*fascinatingly, 'spy-shilly' wif a few flickrish laaits*) and then janking a handle to see if the work avoiding spell won't be rewarded just this once (*and for all .. lootery lottery like*) is like putting in a request for confirmation of

rite place ritime. None of the grades they think they make have any grit whatsoever. So convinced are folks of the 'verlossend woord gehalte' ['just right'ness content] of their toss off comment's content, a wv is revered as a cake's icing, the cutting edge of coincidence and synchronicity, a truly psychedelic poly-plot-plot of centricity compliant realms, whence vortextualized coinage emanates and 'emitates', the 'flat disc of mind' (*synonymous with god a la Walter Russel who painted and damn near systematized it, his followers animated that - reminds me of a spinning top that turns inside out and back, and his house is a museum i stumbled into, serendipitously peddled up to in the 80s*).

One wonders about wv programmers. How many rules like 'no cu before nt' will it take?

Like i said, it gives rise to at least one linguistically original, genuinely Joycean, perhaps even brainy 'tempestestrian' moment per comment.

with 'fidec' i had a quick and dirty association with fedeocracy (*via fidelity, fidecracy, fidocracy, etletterallittery*)

ps: Greg, your profile has the word 'not' missing, right?

As to emission rights and wrongs, i seeded the net with soundbites about that around the turn of the century, sample here: <http://poetpiet.tripod.com/index2.htm>

conclusion: i am watching way too many vids about James Joyce and am awful mad about the abuse that is alcohol, it, and everybody else too, seems to mask.

it's funny, about a day before JA introduces me to 'kin' ann margret i hear someone onn the radio (*dutch or english, .. i forgot already*) say that AMeRoCultJar is based on dance. Looking at AM (*who won a prize not so many years ago for a movie about Vegas*) that seems right.

he is not shy about antagonizing convo partners with patronizations ... no wonder he got murdered. He maintains the Hadiths are blasphemous, they glorify Muhammed too much, all messengers should be equal (*himself first amongst them of course*). He says Muhammed was forbidden to interpret the quran (*at 5.30 of part 2*).

<https://sites.google.com/site/evidenceofgod/> submissionist site .. attempting to fuse the 3 monotheisms 27m vid ... kinda dumb (*txt on screen, overly dramatic soundtrack, clips from 'the passion'*), tries to make the point Paul's version of the Gospel falsifies Jesus, fragmentedness of torah created a need for renewed revelation: Quran

Hadith are like talmud (*and mishnam, gemarrah*), to be rejected. Abraham more fundamental than Muhammed

i do not agree that the 3 monotheisms can be harmonized, salvaged, purged and fused quite so easily. Even if they integrate and cancel each other out, what are we left with? Better clocks and a vigecimal instead of metric system?

Yes, the 3 monstrosities need to be put in perspective and at the very least neutralize, for all i care eliminate each other, save the best dump the rest and start over ... but that certainly doesn't displace the need to fair fighting (*yes, fair is a verb here and fighting a noun, you niggly old sour bbc cunt! Perhaps you could skill up a little or find someone worthy to take your place*) from top priority. As long as we can not (*yet*) outgrow and elimitate THAT (*the fights*) with decency altogether we must make do with a liddul tweak that turns them fair, clean, honourable and profitable too (*take their turns at the 'free' market [[hell, perhaps even free it for real for once]] and in turn give the market a chance to take to them, give a folky spectacle a chance to outcompete [['outfavor']] big big arms dealers*).

very 'outf(l)avorsome sample: pali person, 75 pounds publishes being prepared and offers to -- in a month's time (*place your bets*), after 1 week of living on 1 box of dates and 10 gallons of water -- fight an Izian to the death. Stake: waged mercenary to keep the settlers out of the orchard for 6 years and 40% of betting gains. The challenger posts his weight and preferred attribute range. The challenge acceptor gets exactly the same paraphernalia (*though i doubt recipes will be as cavalierly shared if self-assemblable 'keeping your distance but not really' devices are dangled as bait and/or threatened/boasted with*).

Bets can be placed on wether the challenge will be accepted, when, etcetera.

If you're not gonna legalize pot and keep the promotion of alcohol and tobacco legal, at least stop the pretense of deploring *(and instead of that, in every way stimulate and instigate)* violence on and by the masses.

I am doubly sorry you are missing a new as well as an old favorite ... but there are legions of his type of account, right? In fact, the last name i mentioned pointed to another such clone from that pool of speculations and suspicions regarding secrecy serving technical advantage. A man who has been in the surveillance and security industry here in Holland for a long time. Too long. Good and quiet jobs for students to read by, once upon a time. But the paranoia surrounding this profession has proliferated sensor and monitor fiddling duties to the point where having time left for saner times, even if only mentally, is gone. And besides, 'the vibe' had already influenced the man's choice of books the wrong way long before that.

I just listened to William Irwin Thompson *(the 6 vids with him in front of bookshelves, easy to find)* speaking in 1991 about a book i read a long time ago 'the american replacement of nature' which deals with much of this.

reading is good, reading out loud is good, Arguelles' ostensible goals are good but his pointers, anchors, and fractions are .. fractitious, kinda like pinpointing race characteristics or subtly tracing the mixture, sometimes practical and useful but often as unreal, non-existent, abstract and a mere wistful 'wishfolly' as the desire for trees in the middle of a desert, thinkable but looking at what time it is won't get them growing ... i don't see clockage as vehicle, tool and staple supply to *(RE)*turn deserts green.

Savantism has brought humanity a - heaps of painters painting *(themselves into a corner, compensated with fevervisions of space filling conquest - Laffoley, etcetera)* b - genius inventions, all no sooner produced than abused ... and usually toxic well before that.

culture is a vacuum and totally vacuous ... when stuck on ideals ... reaching out globally and all that .. dead dinosaur and ancient sunlight fueled jazzjazz. NO ROOTEDNESS. That's my biggest complaint about Arguelles. He SAYS and CLAIMS his wisdom will, once studied lead back to garden culture. But all i see it used for is ways to postpone and avoid it. Cause folks have to go on a mission to spread the message, concert, festival and gig circuits to be made to try gather funds for a garden etcetera..

----- Did I misread you, or do you not agree with the videos I post? This is really the kind of feedback I am looking for. Peace

Here is William Irwin Thompson delivering a reading at Black Oak Books in Berkeley in 1991 for his book "The American Replacement of Nature." part 5 *(on the american media dominated cultural paranoia)*

I don't agree with him saying that Euro depths were popularized and translated into comics well enough already, or else we'd have our garden culture by now. A stated goal of Arguelles which i admire him for. I read the book you are doing now already .. and the next one ... then slacked off.

i've prolly written more than is decent but haven't even gotten to fundamentals yet ... i'll add them in keywords and just hope you'll be willing to do a little home *(page)* work on your own:

"The prophecies have come around, the future couldn't wait It's up to you to make it true, to break the seal on Heaven's gate"

i wish all dreamspellians much consolation on and beyond this day of their bereavement. Jose, goodspeed, heapmud and thanks for the tie me in timins .

Gslinger77 *(Otey)*: I was hugely pleased with this video. Excellent illustrations. But then, ending at minute 6.38 of 8.38 i hear this:

"it does not need help to expand, it only needs help to be compressed"

You simple must learn to distinguish between rock on the surface and the raw material for nuclear energy you are on about and arguing against in this vid as follows: surface ones are in position to receive rain and shine but simply in too compressed a state to benefit from the weather, to absorb and process it in life spending ways. That type of rock DOES return on and reward very richly the efforts to help it expand, become soil.

i watched a 'hislut' vid showing 15 minutes in the rain by quiet bouldered pools in a forest somewhere, .. big guy with eager hard working blond *(fake boobs)* and asian beauty *(he has to wear a condom on only one of them)*... the last 5 minutes get extremely ugly, asphyxiation sex, these people need to go to jail, the lot of them.

where do you think misogyny overreaches the most, attains it's largest/worst virulence, dictates, rules and reigns? ANSWER: in the porn industry.

Guy is ramming the poor blond into screams even when she is not supinely bare backing rocks at the same time ... but it's deep grunts they were after, that much is clear. The guy getting to do all the moves - and the ignoring of screams in protest of rough handling *(a real staple in porn i found)* - in combination with the rain and those asphyxiations from 'going for the jugular' moves - which mister macho may need to perform in order to convince himself he is firing on all cylinders that day *(instead of just following pornifying orders)* has the poor girl shivering with chills, adding a tinge of genuineness to her growls ... but making her silicone breasts look horrible

.. i guess this is now, not exactly mainstream, but out in the open nevertheless, no longer highly encrypted secret society fare .. for the rich and decadent. I am shocked for the 4th time in a row this week

lots and lots more BobStuff, a sample of my thoughts: began this morn trying to formulate a thought that withstood the alniter quite sharply. It is that Bob is trying to pull up anchors in reality in the same way alchemist used to repeat their mix tricks over and over quite precisely, convinced they had the formula right but weren't sure about the exact and most propitious and conducive moment, a narrow window they aimed to not miss by aiming early, often and most persistent. I guess Dan Winter, who can dream his little sermon by now, spreading it far wide to make it sound new, rather than hackneyed and tired, which it is, falls quite squarely into this class also. They all try hard to enjoy and make the most of really very harmful addictions.

1996-07-29--06--Bob_in garden.mp4 1.05 of the 2 hours of Bob in a garden *(1996)* with his wife, an odd 'student' *(Randy Koppang)* and a japanese person, he gets into palestine

i now find Bob Dobbs 'socialTIMedia' wrestler traffic *(king)* A CROSS across macrotime, life and death ajoinments, Nahtstellen und joints, not just over emphasizing abstractions versus the practical consequences they are claimed to lead to but leaving out *(betrayal in my book)* the latter altogether.

Talk down and negation like that raises my ire so here goes:

look at prompted to try help supply balance and/or at least pointappetitapp hopper di hop to it, the now and future living .. though i am certainly not more hopeful about finding gardeners to sponsor or join among Bob's listeners than i was among the rainbow family that was Jose's recruiting pool.

Still, Bob's audio oddlsee has been rewarding for me so much it has caused a spike in jump in my attempts to skip sleep .. since the 27th. .

What i meant is that Bob ain't even bothering with lip-service and elevating the lo goALL stake out any, let alone, hi status - garden-culture, best of the indigene medleys muddles, mediations and snuggle puddles - . like Jose did .. but he's talking folks through mazes at amazing speeds and more accesible too *(less archetypical cryptology more pop cliché)* and what's more, the man IS approaching me by way of inverting the honourable impact into disgraceful betrayal by way of pronouncing this work and intimacy with gravity a switch flick trickering the law of attraction to come do its thing in our lives.

he admits to inverting the aaa ask access allow (*Dave Worcester - the abrahams - Rahi*) 'seek wench'
.. oops, ask, answer, allow

Bob don't like time, the growing season or anything that serves. The butler karma has thoroughly put him off nurture. And everything he does denies the grounded things his wife strifes for .. he just undergoes the ministrations (*and motions no doubt*) passively and benefits from them but the lady is surely betraying her aims by doing so to such a blaspheming denier, ... or is she? Either way, i am calling the Deans out .. both.

.. as i did the dreamspellian miscalculationists and disfrictfractinotionizers. stringing out their place taking into time making ... forgoing the hard slog of creating landtrusts, regaining sovereignty, seceding and so forth, for the quick cerebral fix.

Bob Dobbs (*Dean really*) is in lots of ways a worthy one to be targetted for taking down a few notches. The showmanship disease of allocating lots of importance in 'conceptual break throughliness' hooey - to themselves, like all selfrespecting saviour do - did not pass this lifetime (*radio*)talkshow host by unscathed either. And that makes him prime. Target. Boom.

I of course will have to spell out better that he inverts the 'lightening up gravity' (*see the first 3 vids in my 'natural' playlist*) to receive and weigh down sunshine (*the 'accepting' part he plans to make 'selfseekinstant' without the work and soulsearch*) before he understands.

native ceremony for the occupier thrice guilty

.... a long account of impressions via Bob happens over the next few days (*see 'regular' mix or the blog for the rest*)

see regular bloggage for more, focus of ensuing weeks [and weeks] there ... until i get thoroughly frustrated with BobberBloatBob towards the end of july

Turning to Bob, i get to be a nobody again, just like Bob .. who is fond of claiming that but as much as he is of it's inversion. He too, is hoping to do the 'don't energize the paranoia' village idiot routine, harmless and unharmed. The very tactic that got TvGogh offed but Theo was trying to fill too tall an order, coming from a secret service family as he did. Anyway, nice to take a break from the Bowie, Margret Hiroshima, HARMmanic kinvirgins conundrums and assorted quandaries Jose saddled me up with - by way of Shearer as i recently found out via youtube on which i saw him do a sometimes angry talk with smidgens and smudgens of ritual (*hoping it would 'go through the roof'*) .. .but in front of older fatter and mostly female 'TIOccupists', not militant youngsters who might join a blockade, inspired by the likes of Ward Churchill

and so, for now, Good abode Jose, Hellhole Bob DogsPad Pacal, HurryHome Bobber

Bob the mad central 'first prototype' cerebation banker (*'who doesn't die'*)

----- part 2 of Battling cosmETicists - since show (*wo*)men need it first, a quick recap: midmarch i listened to some William Irwin Thompson, saying McLuhan was a quite solipsistic borderline autistic person. Then ..

.. the 27th i begin a 2 day (*and nite*) splurge taking in a lot of Bob Dobb audio. Some of my earliest thoughts regarding him, beginning with a tentative bottom line: McLuhan and Dobbs are Gamer World Ideologues

want another taste? <http://bobdobbstown.posterous.com/bob-dobbs-the-mcluhan-centenary-part-six>

my fave so far ... the most relaxed music Zappa ever made. Him and drumming (*serious and so not toned but certainly turned down*)

.. at least half of the other mash-ups by buzzcoastin i tried are totally unpalatable due to 'over-accompaniment', 'missmixage', .. to be kind about it.

he overreaches too. Lots of youtube accounts with literally thousands of vids up are not safe from the copyright infringement claimers, no matter how uncurrent and educational the material. Germanicfolc had literally over 2000 nature and historical documentaries up but instead of prize, cherish and protect he did something less honourable and that buzz fellow by the way, can be seen taking the side of the chinese (*where he lives*) over google all over the net.

a range of unmixed stuff here:

fighting tec and spiri space races till my last breath ---- info volunteered upon application to the McLuhan google group .. prolly dead though. the Dobbs forum is too, more or less.

Bob claims (*after McLuhan*) the tactual is discontinuous ... used strategically by the secret services. I take that to mean Bob is not in favour of atavistically holding on to centralism, censorship and 'moneyshopping' distortions, propaganda (*disproportion*)

compulsive masturbation? comes in many forms, this particular brand has its patients clutch their right to deniability.

Absurdization and distraction from ugly truth by way of alcohol addled situation and/or inspiration like Finn's Wake (*itself making an effort to obscure and bury truth, yet show it off too in order to prove having that power*)

McLuhan is the most cold-hearted philosophicationist of occupation (*though one could mirroreverse his [re]tribalization*) formulas and claim he was propagating assimilation and urging people to do it right this time)... a thought striking me at the 18.37 minute mark of Channer's chat with Bob mid june 2000 ... halfway through the hour Bobb stuffs and tuck the grace notes in at a fine and furious rate, really packing some intricately multifacettled ones close nevertheless.

Willing to practice and speed up your licks and riffs yet another notch? In other words, can you perform and polish repertoire at the same time and at the drop of a hat? "is there life before death"

says Bob just before midway of part 2. Well, is life in front of death, ready to take it on and transform it, go through, take it and carry on with it necessary or wise if wishing for more life after death is wishable (*and wise*)?

bypass and pull your nose up at gravity and go straight to the 'law of attraction' bob??? What a childish simpleton you are. No awareness of hard honest sweat equity, pulling your weight, standing your ground and never mind being rooted. It's a dirty word for all those with the worst possible affliction amongst occupational hazards, that of occupier, descendants of missionaries, mercenaries, pilgrims, luckseekers, goldiggers and those harsh rent extractors severed from their roots, meanwhile overrun by the massification mechanisms the loot was being sacrificed to. You worship a form of this very cold disembodiment cause you suffer Oslo syndrom on top of karma that could be mended following a few simple rules of the like for which i am a lone but proud proponent.

a thought (*cropped up at 1.13m of the 20th of feb 1991 - last of many Toronto radio shows*): americans can not be direct, all their conversations require filling to the brim with distance, however

small but hugeually large. They're lost, the lost, lack direction .. are mediated, ... yet make a great show of being o so direct, warm, welcoming and open rather than a great big ugly collectivized warmachine.

wee hours of the 30th: "*cavalier about an old environment*" says Bob at 13.22 of the 4/10 05 hour called 'building organic bodies', a series in which he debates a yoga teacher. Why don't you try on 'betray an old environment' for size bob!?!?!

He's a Tx creationist proving the genesis flood chronology right with an argument that surely, and i myself always thought, played a role: somehow the ocean got shallower near the formerly pressed down ice bearing areas and deeper in others ... which is counterintuitive cause the ice skater who pulls his arms in (*ice at the poles*) slows down when extending them (*water evening out*). How much does a red wood forest weigh??

Still, on some points it might be wiser to keep bouncing this guy's contentions off of Hamaker's ones (*ice age end 10thou y ago*), he certainly seems to close to a vast range of sources (*Houston*):

Corraborative that the Ice Age began to end circa 1500 b.c. (*timeframe of the Exodus*) is that circa 1350 b.c., Jason and the Argonauts navigated and portaged portions of then diminishing Lake Tritonis, now the desert basin of the Great Eastern Erg, and camels came into vogue about a thousand years after that, by the time that the Sahara had become fully desert with just a few oasis between hundreds of miles of desert wasteland. See much more here <http://genesisveracityfoundation.com>.

For now i'm prepared to dismiss as ridiculous the possibility his timing isn't as way of as his spacing ... his claim to have found THE explanation for this, that and the other tat but so it goes, i still don't need both hands to count the nonjewified americans, that is to say the ones who know that all this mass arrest and camp hype is a consequence of not turning the clock back a little so it can actually take a running jump across the reciprocatory hurdle of making red land white and black free, yet another population crash as the only act of reparation that could possibly count. A 'collapse' but not a massive die-off; no quid pro quo 14I stuff, no croakin from horrible diseases. Instead, calmly, collectedly and via voluntary incentive, migrate back to europe and africa in orderly fashion. Let's have a scenario contest.

Anyway, judging from the few snips i saw so far, he seems to offer the bible in hily dilute fashion so that's progress ... and i just made this the 22nd vid in my3rd vids in german list: Anarcho-Syndikalistische Landkommune (*Monty Python sketch with the fake horse and 2 of them playing cunt sync lay*)

his comment facilitiess are off everywhere and he invites to come to the foundation for the big picture .. but he doesn't do pictures (*though referring to them a lot*). fuck that jazz.

30th (of april?) morn:

Bob likes to do something the one time Maui resident therapist charismatic marathon speaker John Ray (*body-electronics*) liked and recommended (*to testdrive*) also: encompassing dualities. Bob take a few year for each set though. In 1996 he bitched about Rockefeller making a real estate grab for the moon (*or mars*) even while hoping and speculating about some of his recorded voice reaching the man's ear ... since he studied under and inspired W I Thompson who WAS under such desired sponsorship at the time. Kinda like me findng comfort, identity, confirmation annd encouragement in the fact i read about the Hopi elder/shaman's vision of the spirit helper with the red helmet, .. well after 98 when i uploaded all 2 pictures (*apart from my youtube avatar, recently photographed off of paper*) i had to show for wandering turtle island in crisscross fashion for 7 years.

... nearly 15 years later now .. but still a bit rich to see him do exactly that:.

"It's almost like the astral plane wants to get here, cause this is better than there"

there appears to be no transcript around ---- quoted from the end of part 3, all of which hosted at that Iona Miller link who by the way, is a brainy and magicartsy gal, another white person shamelessly supping up the vitality of native america to feed fever dreams of tecolutions with reckless abandon, most of which if and when tried, cut that procedure shorter very rapidly with rampant pollution (*Bob's a [[killer]] fusion man himself*).. in other words, the progression of agriculture/colonialism disease (*this 'ziektebeeld'*) is clear - all space race and space age imperia captives sooner or later toy with extropian singularitan and assorted ideas of their own accord. Eating light and more such bullshit (*part 4*).

What fits to follow up a rant about lazy 'imagine' hippies? Right, a HollowCostly brainfart:

"did not know what was happening" .. "global concentration camp"

How does flattering jews work out for you Bob? Just like you, they were/are - but cannot (*be allowed to*) in perpetuity remain - collectively 'past-phobic', entitlement mannerism riddled yet blind, and though the vast majority of any kind of population was and always is innocent, the reason for multiple expulsions ought to be curriculum material instead of suppressed, prosecuted and propagandized away at all cost.

he goes: "*How we can allow the registration of the positive facts of being dead.*" ---- Not: hey, let's develop our perceptions (*'have eyes'*) and appreciation for plain rock, not so dead without perks after all, etcetera ... or 'well, let's prevent this race/culture to remain at liberty to (*re*)produce bastard banker culture and shekel them to a compost instead, liberally supplying them with stinking crud for them to turn over and over into great credit. Give them raw sewage and rocks, if they won't mix it they will sit in the stink, lose nutrients (*we'll put some adequate filters around them, turn their desire for control against them*).

None of that, Bob remains firmly entrenched in the fringe distracting from inner uglier workings.

As a good and proper addict to and prophit of the substitute surrogate prosthesis make believe arsenal of a dedicated somnambulist psycho he recommends reinventing contrast. physical deeply ill and falling away, it cannot contrast with non-phizz anymore

"cause nothing is being contrasted, with the non-physical"

Bob!! Bob! Boohhhoobbbb!!!! Over here mate!

In part 5 Bob goes off about hidden ground, mystery landscape, hope (*blackness of obama symbolic*). Those who have studied (*like*) me will see he is obscuring and co-opting ground rock .. vital beauty through mistery (*in my sense of the ye odd aud auld concept*), etcetera

... "mystery landscape can be known, and that's what i'm doing, then it falls away as a hidden effect on us, in other words, it weakens the role of obama's mystery body, we don't need the

mystery body anymore if we understand the mystery and experience and allow it to happen."

(occupier's populist paranoia about obama overtones bob??) After this he, confusingly enough, gets into what was allowed to happen economically.

Talk about this kind of thing condoning and producing shameless bonus cultures. It's a world wide greed-race / arms-race dialectic even as the progenitors pretend to 'go home' and are perfectly justified to solicit and engage the whole world for help defend it, not with trees but surveillance tec and agression.

Then it's time for ... and when is it ever not, specially after a lapse of a few minutes, to once again *(chronic really)* remind his audience that the past is gone, ..

i haven't even touched on more than a hundredth of a percent of all the double backs he performs.
/end post ... ??? *(not the one from the 30th??)*.

another example of Bob's very stupid ass megalomaniac [non]sense of contrast: in 2000 he is on about the above it all ness of the astronaut *(as if that's epitome of self-sufficiency, not a going to far type reaction to the not going far enough back to the landism of their landscape fractalizin path-treadin contemporaries)* .. never mind forks in roads, fuck roads. If they HAD gone far enough, to euro lands, none of this might might not have haphapped.

in Many Festo *(2011?)* he is on about the world's attention is capable of collectively manifesting powdered concrete, turning an intended pin-prick into a hammer blow.

51.28 of 2000-06-015--Channer -- Bob says something i agree with: *miniaturization is autonomy*, but before the minute is out he says the "*virtual environment (second nature) is approaching that of first nature.*" ... Bullshit .. unless he is thinking of really smart friendly rock to compost applications. Not likely. Anyway, he does except the economy but thinks cold fusion is the solution not *(my)* Blabsabs ----- At 2 thirds of this hour he poses a parity between infowork *(commentariat bob?)* and heavier lifters.

McLuhan's literacy as detachment is only applicable to the specialists ..

ah yes, i remember now, i w.. no, that's today's jots .. on paper .. soon to follow here.

.. not impartiality but exploitation results. Though it would not be anti-Sem to stop and make that point, turning it into a pivot and lever goes against semitomeme dominance alrite.

Thoughts before, during and after a sun earth moon alignment What's the difference nowadays between costly and destructive art, iow, between denaturalization (*enartung**) earth and disposition/nature? low, what is the connection, disconnect and/or circuitshort between innateness (*being true to inner self*) and deviating from 'sinkright'

= not upright (*'aus der art schlagen', nicht aufrecht, nicht senkrecht, nicht richtig, nichtig gerichtet, recht mitnichten*) - uit het lood slaan?

First off, note the fact that art is kunst in german, the german art is what the dutch call aard and 'een kunstje doen' is to perform a trick, though the anglo type of turning one isn't anywheres near translated as 'twisted or deviant or prostituted love' or some such.

unroot, transplant, dislocate, the fractionation of cubism, symbolism and perspective ... teetsome totsme, leany/slanty, the distortion in the splinterpart art popular at the time ... keeled over and crashed, art pieces naZIs perceived as degenerate, what they (*not just*) thought of as not- or unart portraying disfigurement (*'verstuemmelung'*).

Entartete Kunst was a 'thing'fling, a buttbug they had and attempted to ban from their ideal narrative, hopes and expectation to the very exact same extent they fell for the temptation to instrumentalize it without resistance, questioning, etc. and ended up trying to place, bring/take home (*export*), make it real for those who they thought suspected and accused of holding THAT ghastliness up as ideal (*pre-shockvalue pronkstuk*).

I mean, before that 'wie niet horen wil moet maar voelen' action, degerate art fetched great big high prices on the international markets, taking with the left hand and withholding with the right, refusing to deliver raw material without string attached, that is to say, not unless earmarked for bombfactoring, that made it quite a different matter, in more sense than one, namely thus doing the bidding of the very international caBOMBal -- now holidaying at the CuppaCObombA cause the show must move on, vindicate justify and execute demographic incontinence, the semitic purpose in l .. eh .. death do them art -- they professed to go after and prosecute - but bought all art which the nazis, after talking the general public out it and being so kind to take it off their hands, turned around and sold. All pieces normal folks might posses of such Kunst. Lest they become possessed by them, though nazis were in fact just that already, handsomely profited by the banishment (*read SALE/EXPORT!!!*) of it.

best advice: think of the energetic balance / result / consequences / origins of all sounds, great and small, far and near ... do so especially when with music that thrills and chills you. Really question why those trimmin slimmin tonin moanin flexies occur.

i think they do cause they reflect (*foreshadow and/or echo*) acts of kindness and sociality succesfull enough to cause festivation of mood. consistency is claimed, averred and ascribed at rates inversely proportionate to it's actuality and presence, as a rule of thumb by no means green.

Co(re)llationists such as Keyserling, William Irwin Thompson (*and his dud student Bob Dobbs*) and Arguelles are inventive diagrammers (*but, quite apart from our inability(/disability?) to follow them much less divine the world [[they may or may not enter at will]] behind their cryptic labeling*) not actually trying nor driven to relate the system they present/work on with previous iterations very much nor very often, not as a whole anyways; subdivisons thereof, yes

Numonationalism (*the enumerate as hard drug addicts*):

Savantry is Nerd code for the most part and Hi-FreqWreckTradeware is war as usual but worse. It splinters everything and everyone, beginning with users, admirers and on down the line to the short stickend and bag holders.

Autism factors: glandular cocktail tide clocksettings can keep mix and dosage from reaching harmful intensities .. and are but the wet n routinized equivalent of mental design culture constructs and they fit as closely, yet variably as nite&day. Hence the Vacc discussion is only half as important as yall make it seem, on top yall twist this tale the wrong way:

Silicon Valley delivers the equivalent of many times the number of 'autistictees' (*'vaccaffectees' and infectees*) via toxic E-waste, destroys inescapably, quick and lastingly -- keeps on keepin on at the opposite end of its 'live' terminals, very little termination of tox around, nor determination to detox since greenies got overshadowed by the violence industries, way easier to monetize than the deepening of soils.

By the way, you can now wank over an entire book about Israel's Kidon assassination teams, Spies Against Armageddon, if that kind of thing turns you on. It is unlikely to be any more informative than their previous narcissistic epic, Every Spy A Prince, but it will doubtless be just as full of Jewish homo-eroticism, for the delectation of lesser males – RB

i sincerely hope tmq will make an effort to go deep into the 19=260 material as it will be on the 109th page, .. for a while anyway, after the next page set of posts pushes this next up and coming batch onto page t2o (*page/0/ redundant formURLa for frontpage] which will then be at the freshly growing tip and opposite, oldest end of the archive, page 110*)

Page 109 will be born just before and/or around the shig bift comin along right about nowhere ... hell to pay if we keep getting it wrong and are unable to help those who have kept up getting it wrong, then defy us with stuff like this:

Eretz Zen replies to me:

what are you talking about? The Netherlands has been already infiltrated by these jihadist pests. Believe me, in 5 years from now, you'll be advocating for their eradication.

I thought of answering something along the line following but decided against it:

1: not if we cure folks from listening to the likes of you

2: not if we won't let you plant and perpetuate bias.

3: not if we can dam and stop the stream of victims who fall for scaremongering by the likes of torn and split folks like you .. making them torn and split folks like you too. Not if we can help naive souls realize there's nothing likable about you .. bycause A: you ignored all of that therapy i was on about and B: you won't be until you have had some.

A distort aint served well enough with a mere retort

Pompous pontification on the edge of slippery slants, juggling toxic loads ought to spur all folks with more sense to take measures that contain your reckless and not just death-defying but death invoking and inviting thanatopianisms!!

For instance, it's seems to be all of the whole world of difference at first but in the rapidly oncoming end, here before you know it, there remains but a small and inevitable step from recommending arms, buying some for and/or sellin 'm to the side you're on at first, then to both sides only a few generations later. The difference between being and doing, man and woman (*leftwist/rightwist racies*) in starkest contrast

The removal of fighters who go fight (*and don't really defend home turf at all, the estrangement and*

rejection between staybehinds and returning vets).

Warracketeer career / dynasty regression

Starting point is always what feels like the good side at first .. if you forget that the most important law in the land rules this bias: proximity and its conveniences. Intimacy so absorbing it leaves no time and resources to deflect and divert into defense preppery.

Another way to define the 'good' side goes:
those who take up arms reluctantly and for a cause.

Problem is that heavy industries especially have seriously generational effects and so when the circus has moved to areas with fuller pockets and hungrier eyes, they simply arrange to ship there.

When distance loses it's dignity and defenders to treasure and protect it, selling to both sides is next on the road to birth defect causing ammo, that's a long way from rock, spear and arrow tip, bullet, coin more bullets yet more coins live rite left right.. etcetera .. rockets roxtox .. end of the line.

Wars are over substantial resources with real or perceived value *(+A weighty thinks the simple folks can understand and tackle OR -Z)* .. and many circle the same drill/mine / drain locations.
War buzz business is notorious for excizing feeling noble right quick *(reason are sketched out above)* and once in it, the desparate grab for the consoling illusion you help fair the fight will turn you into that mythically 'neutral'* jew *(the one who does not defend turf but sidesteps trouble, yet on closer look proves very secretly hostile to flows that don't flame).*

On the surface he aint picky nor rooted, a shallow opportunist
his opponents however will claim he starts trouble, then runs, leaving chaos and sacrifice behind after setting up payment and revenue flows for and from all the stuff poured into such brews to make them as hellish as they are.

The ExPellican

His minions and paid off ups!Downing defenders assert that, to the contrary, events, cause and effect, take the opposite course and go on to claim that expelling jews causes a country to collapse due to braindrain.

A warprofiteer's stance:

Wherever testy todods can be sold toy arms *(without their parents trying to expel one and prevent that sensible cull and prune effort)* one may later instigate war and profit from it

ps: no such thing as EretZen, nor CityZen for that matter, citification kills zen, cities are inimical and hostile to zen.

youtube.com/watch?v=zPu6-iZQgal 49m Norwegian docu on Islam features a larges chunk of hijab lore -- "putting reins on her" Sure, that's part of it, but surely no bigger than a much much more pragmatic meaning - specially for the poor, living marginally, by dusty roads they are forced and subjected to go up and down serving the liberals this docu so liberally features - namely, dustguard. Your 59 and 78 Cairo U (*hijabless*) student pics prove nothing.

It's fine to remind us that Whahabist MB types are only human and that non-integrants (*those hewing to distant sugardaddies, missionary westerners more often than not used as the ogre boogieman tortures by their fratricidal co-semities*) are punished but it's worse than tendentious to do so in place of and to displace a truthfull tally of war efforts in the respective societies.

misplacement voids meaning but defying justifiable generalization evokes punishment ... tiny differences tear families and communities in the west.

We compensate a surfeit of freedom (*in and spilling from certain overprivileged pockets*) with coerced participation in war efforts, economic pressures are real in the west also. To hail and tout the former at the expense of the latter (*human rights as terminology that steals from the humble man from a long gone past whose memory is being violated into deceitful and instrumentalized undeadness*).

Condemnation of the duties islamites lay upon themselves and especially of those they impose. But denying an ideal Islam is irreconcilable with human rights is just a bit too rich liberal and stuffy a view, especially when layed on thick by the guy who speaks fluent arabs and meets a handful of thickvoiced folks threatened by the brotherhood.

.. but now, in the light of Bob *(the blobblomb)*, realizing how totally impopular he is, despite his 'best' efforts, i am glad they are spared the trouble and stench out of his tiny repertoire boring noise he makes through the otherwise gifted hole, talented very far above average. But this is not a recruiting attempt. No hopes for that at all.

wv: suras .. .before i had even written this comment ... now that is the koranic meme and not the android one eh!?!?!?!?!?

you sit among trees messing with fresh dust poured into water, swirling, compost kept moist most optimally, energy taps and valves and lines and all the micro processes to contemplate ... you do it right ... before you know it, the trees amongst which you build in such a way that the branches are the living rafters you accomodate decorate and give right of *(growth)* in each of however many remodellings and circumrangements are necessary ... and, like i said, before you know it, it's not you but your great grand child realizing the trees are a 1000 years old and relatives are at various stages of maturity in the same process at varying distances ... that's both work and what works.

the minute you abstract it into a math formula based on humans instead of compost critters you blow the place up ... as graphically shown after the gesticulation which is suggestive of radiance and tree height until he comes to the point of running out of space .. the burst ... the next segment fits quite seamlessly topicwise but it's exactly about the the creases, increments and angles involved in bulge booms.

Like I said, this betrays the intimacy of the humans in gardens in parks scape quite like Bobberman does ..even if he refuses to take the blame and pretends to be aloofyspoofy.

His lucubrations evince what's more like that famous passionate intensity Yeats was on about *(war minded warrior moods)*, like i said the other day, Bob aint happy unless he can humiliate the folks he can't possibly continue to pretend he's talking with, cause it has been a talking to for ages, and when it's too obvious he doesn't mind them not getting in a word edgewise, well into the danger zone of being perceived as a ranter, a street preacher *(LaRouchites anybody?)* he needs someone who really understands, .. like lon, to gift and endorse powers, he in turn is the only one in the world to spot and has the privilege to announce.

You won't see the Bobber break through a rock anytime soon. Too dusty, too dangerous, too manual, too far beneath him. If his type is not chained and forced to serve he will serve ill and toxic spill .. but claim the opposite. He rapidfires syllables where Breivik 'serves' bullets.

debt is dust and if you want to pile piles of it ... rather than putting out the effort to compost it and turn it into soil, food, then trees and more *(as well as better)* food .. then housing.. .. then ... you're gonna have to raise the ceiling if you refuse to feed the fish and plankton with it .. another big debt issues really. Something all coast line territories ought to get together on on the Do-Jubel-Uble.

real nature based law don't just and just don't pisaddear just bycause God says so ... Bob forbid.

Bob's bid for bit attention growth poofytude to be on a par with his looney tune and he apace with it in turn, perfect timing .. plus .. now ... trying to cash in on bare naked make believe ... never touches what is not just essentially new *(compostition .. photosynthesis through and along with most polished)* but quintessentially so. ThErE's your fiveaz mr fiefoefoom schlomogus.

If all debt, fortunes and guilty consciousnesses really would disappear *(rather than Bob distracting us from that and misallocating, misfiling, mislaying the very concept)* we'd be a lot wiser about how real jewbillee relates to also quite regular expulsions ... that passionate attachment there again too i guess ... see white female flesh trade to israel articles .. if you have a litte time to spare .. and let it soak in if you dare.

.. anyway, you guys are guppies compared to the real sharks ... blobberbleating about gravity being concentrated in another dimension ... then showing a cave.... *(morgan freeman's wormhole snaketoil series Season 2 Episode 4 Part 1*)* ... not satisfied with and in the worst case distracting from being and/or making whole through worms *(care for them aint ha.. .. oh wait, it is hard .. but nothing plain non literate sweat won't solve)*. And the bodies you gain thereby are the old .. strike that .. ancient fashion ones populating optimum diversity as was can and should be.

Bob is performing arbitrary flipflops to boost and fill his overly large absolute hegemony requirements, sure his listeners hew closely to him .. so that leaves him in the perfect condition that they'll buy him .. and/or whatever he says they should buy. 20th comment:

Mr Yuksel hasn't found time to answer this, too busy bestowing guidance on the EU i just found out. What you say is acknowledged by someone else who took Khalifa very seriously: Jose Arguelles (*believed himself the reincarnation of someone who communed with Muhammed (pbuh) - telepathically proly*): Pacal Votan, who's tomb was discovered in 52.

Re last minute's distrusted 'purpose' imperative:

I am all for the lesser purpose of harmonizing primordial hazes, mists, fogs and indistinctions, to wit: combining wet and dry grey into garden culture, note, not purposeless at all but very specific, and it might one fine day just prove to be (*come?*) even more universal than vigesimality (*even*).

Yukself brings up the illogic of the christian god concept:

'his' great temptation dangled in front of humans as bait cause he's really eager and chomping at his (*totally self-imposed, putting self on with self*) bit for a glorious op. to (*be seen/known and worsspipped bycause he can and does*) forgive he's god after all YET has an only son - Yuksel says this formula will never run a computer but it's running lots of dupes who can run computers perfectly well, no matter how callous and lowsy the programming. And that's the point, To keep usurious book is a buybull symptom.

Linea thinks without religion we will end up doing lord of the flies live (*she says 'relive' even, as if it was ever more than depraved mindspin[in/of LAkeytectural planning permission contests]*).

russian lass conveyed befriend request, so i look at her latest faved vid, "Know Your Heritage!" youtube.com/user/DrWalterRhinehart just after the first of 10 minutes we are shown a big placard held up by spic protester which says 'go back to england' ... then, out of the blue: "*With the presumption that whites aren't indiginous anywhere!!*" I looked and it's neither the beginning nor the ending of an argument, so, ... feeling a little overly insecure there are we? I suggest You turn it into: "Down with the presumption that whites aren't indiginous anywhere!!"

the images were fun, thanks. Make a difference between diffusion and mass migration (*the latter more and more often than not due to calamity caused by humans*).

if you take this line of argument to justify your presence in america you've got another thing coming: get of turtle island you fucking occupiers. I don't care how pale you are, your actions are crimes perped in service of desert memes and it needs to stop. Read Will Blum if you can't possibly imagine what i am referring to.

To split and polarize a good thing is to abandon and starve it, create 2 other things with it, both trying to lure with echos and faint fakes of the real thing. Thanato-picture-perfection that pretends to tap an thrive on a hunger for balance, but really just isolates, de- and distract FROM, as well as bar and meter the way TO, to raise the price OF it.

Despite her rebellious image, SINEAD HAS HAD TO PERFORM SKIZZY SONGS TO FIT INTO THE EMPTYING AND PRE-EMPTION OF MEANING ----- .. not happy with the last off the cuff portion of this sentence: i care to carve truth in stone and last a solar system in season yet the shavings to perfect, finish and polish my signs, glyphs, graphs, seals and fractions, the powder ... ends up taking care of miniscule micro business, the dump of labour ...sing the great grate as you work that grit ONLY ... iow, don't mererly hint,allude or bluff the glorious buff ---- better would be: the dump of labour the compost heap neither sings the great grate nor bluffs the silent buff. ---- rock rubbings, ash-like dusts, shavings = scratchins, scrap (*s*)kin, grit n dust (*s*)= mineral rich dust has a tendency to fluff and dome up and constellate once weathering (*watering, rain n shine*) sets in. ----- observe fresh puddles in quarries (*that actually crunch n crack rather than just classify and sort*) after strong sunshine with nary any organic matter in sight. you used a form of the verb, in this context the noun (*grievance, or grudge*) would be called for.

it's a subject that interest me a lot thanks to the work of a rather strange professor in slavic and german language whose work returns to Freud more often than others but he wonders .. physically as well. His language is awfully convoluted, Double entendres, etcetera. I question his interpretation of 'the' devil (*which he does by doing B movie reviews on the subject .. endlessly .. but that may be because the students really eat that stuff up. He is arresting their development by fixing on the infantile imagination regarding the monstrous in my opinion*).

recently i encountered a mention and countered thusly:

i contacted an astrologer (*dcsymbols man i referred to here earlier*) cause he made vids relating conjunctions of sun and mercury to earthquakes (*his followingtheplanets youtube account recently put out severe warnings about october this year*), in order to alert him to the work of rohaan solare (*emergent-culture*) relating earthquakes to gap days of the tzolkin ... but his responses where the run of the digital mill rude, blunt and coarse, proving once again that connections also disconnect, and do so doubly, almost as a matter of principle, whereas the positive outcome must make do with a fraction of all attempts.

First, looking around beyond your own sphere of (*hands on*) influence, wastes precious time to any of that but i don't mean to discount the advantages of broadened perspectives, aspect and facet enrichment .. of course, .. being quite addicted to it myself .. yet more often than not, it distracts FROM present and immediate difficulties (*though again, it may also offer/bring relief TO them*).

Second, the autist, artist, nerd, apopheniatic and 'matrologist' (*my coinage*) look, reach for (*often teach*) whole systems as a compensation for sedentation. The artist Paul Laffoley is an extreme example. Lots of ordinary people nowadays get to suffer similar bondage, to a screen, their neighbourhood gardens and

compost heaps languish in physical paralysis, , if they even exist at all. This femininity in males (*a cerebrality possibly caused by descent in female lines*) makes him the center of the universe and if he finds worshippers, yet another religion, cult or movement is born.

God forbid these processes of abstractions get expressed in, adapted and applied to the realm of money circulations.

Hi frequency traders make 'connections' in a hurry and the results are criminally insane severances. Too many jokers poison the pack.

Es una utopía porque las personas que han encarnado la movilización de la noósfera son grandes optimistas que ven en la evolución un vehículo de la inteligencia que no puede cejar, una arrolladora máquina orgánica que se magnetiza con el fin de la historia. Tanto Teilhard como Vernadsky y los continuadores de esta idea (*Mckenna, José Arguelles, Ken Wilber*) son, en el fondo, utopistas que acaso por su luminosa capacidad de penetrar en la noósfera misma y obtener la epifanía de su conciencia tienen una enorme confianza en su ineluctable sendero. Pero tenemos el caso de James Lovelock, quien popularizara la noción de que la Tierra es un ser vivo que se autorregula con su teoría de Gaia y que en su trabajo más reciente considera que debido a la fatalidad de nuestras acciones, y su efecto en el cambio climático, para el fin de este siglo solo existirán 150 millones de seres humanos sobre la faz del planeta ¿Será la noósfera solamente de ellos, los elegidos, concretizando el paraíso de la mente pero destruyendo el espíritu democrático de su origen? ¿O tendrán que reiniciar el sistema y atravesar un nuevo proceso evolutivo para congraciarse con la inteligencia nativa del planeta?

On Kin 5.5, TMQ first [silently] encountered a poker player at the Auckland Casino. Two days later, while playing at the same poker table, we chatted about backgammon, poker, politics and 2012. This man, a very knowledgeable alternative healer, exemplifies his signature as a Planetary Hand/Healer. Just as TMQ realized that their Kins [18.8 + 7.10] equaled his G-Force of 5.5, he turned over his two cards: 5,5!

On that day, coded by 7.7, we [5.5] equaled 12.12, TMQ's G-Force.

If to look at the "single" Ba and "dual" Ka together - as Ka Ba of Akh, a Tree will start growing, with 9 energy centers within. This tree is known as Kabala, or Qabalah, or Kabbalah, or Kaballah... but we call it Ka Ba Akh.

inner planets are queen, outer king and other oddities, like dwarves in between the fishes, dragons, a few more creatures, images, symbols and code at the top

fish, tortoise, boar, man/lion, dwarfs, axe, bows and arrows, images, letters, numbers

parallel to them are:

matsya, kurma, varana, narasimha, vamana, parashu rama, rama, krishna, bala rama, kalki

.. a recent vid does have sound it's a gamer's world gimmickry .. trying to stuff it with anachronistic truth but truth nonetheless ... though as with his reversible identical alpha omega rap, the reverse is also true and spells paralysis and stupid repetition, machine code, surety, the stuff all rich folk strive to get close (*r*) to, take a hold of, own and 'do as they will' .. which is the way a filthy rich guy put it. ... and so we have the truth but anachronistic and cloyingly niche nonetheless.
... still plotting away i guess .. but it looks like their success with music is leaving to little time to start a fullblown esoteric cult

He tolerates only people that go belly up *(like a pup)* at the change of a tony tine - he made a socalled 'tiny chart' with folks like JJoyce, McLuhan, Larouche, WIThompson and Kroker on it and has stuck with it for 30 years, highly repetitive fellow - and tests them frequently, never leaving doubt about foulmoodedness, a point he reaches with neurotic frequency ... just like he is one of them germophobes who doubts nor hesitates when the time comes to wash his hands off of the enormous pile of E-waste he is responsible for over the years, even without being at all popular, once again.

<http://www.flickr.com/photos/randymakiej/sets/72157603484076080/>

He took his life 2 days ago by hanging himself. He and I talked 2 days before that and he let us know he was thinking about this. We tried to get him to go to a doctor and get

medication for his chronic manic/depressive disorder (*that he's had for decades*) and he said he would. But, I guess he was just ready to leave this world. He was never really comfortable here. Too much sorrow and insanity for him to stomach. He was a real sensitive spirit and he tried many ways to deal with it. Well, now he's happy. He can finally get some rest and truly be celebrating the Great Spirit all the time now, which is what he wanted for all people. I'm torn up, broken hearted and a general mess right now. I would love to hear any exceptional stories (*which would probably be most of them*) about Bam and any pictures would be appreciated. We will be having a memorial service in CA, probably near Santa Cruz for him at the end of Oct. as we all have to fly in and plan the thing. Plus, he's being cremated, so it can wait. He left a note pinned to his shirt and I know Bam would want me to tell you all that at the end of the note he wrote this, "P.S. Hang Loose!" I will let you and everyone else know the specific date, time and place of the memorial in Santa Cruz. Plus, we will ABSOLUTELY have a memorial at this year's gathering, so if you can't make it, don't worry. I love you all. You are, and always will be Bam Bam's true Family. He lived for The Family. He believed in The Family. He loved us all more than most Family folks will ever know. Stay in the Love. Mama Turtle

A page dedicated to Michael Hilgers, aka "Bam Bam". Provocateur, wildman, lover, heyoka, and one of the most free-spirited mofos who ever lived . He is now on to the next adventure

Beschrijving

My name is Elizabeth and I met Bam Bam sometime in 1987 in the People's Republic of Santa Cruz. He was one of the first people who inspired me to dance wildly, love furiously and to live life on my own terms. I started this page as a tribute to the man who brought so much life and love to the party.

Please share your thoughts, prayers, and fond memories of our outrageous brother of the Rainbow, Bam Bam. He took his life a few days ago (*by hanging*) and left us with these final words pinned to an item of clothing to his body "hang loose." He made us remember the gift of laughter to the end.

Some little known facts about Bam Bam (*taken from someone who knew him better than me:*)

Little known Bam Bam facts: born Michael Hilgers in April/Aries 1956, year of the Fire Monkey..initiator adventurer warrior...(*kinda like Hanuman*)..i think graduated from Watsonville high 1973 then the California Maritime Academy approx 1978 as an Merchant Marine Engineer which explains his ability as one of the most disorganized, unfocused & ungrounded people in the universe to help folks fix their cars... From what he told me I think his first exposure to Rainbow & drum circles kinda ruined his interest in continuing his career as an officer in the Merchant Marine..as it made him late for reporting for duty one too many times.

i wrote him:

hi, i wonder if i may ask you some questions about Bam Bam

i am a dutchman who met him in the eighties ... several times at gatherings, once out of the blue in Seattle and he is in the top 10 of my long list of most admired americans.

here's the last line i wrote in this mail but i am (*p*)repieting it here cause it's really the most important one to me and you might not have time for the rest, right????

Did he ever mention a crazy dutch guy using rocks from drumming?????????

i returned to holland after 7 year long visits (*and a 2yearlong ones*)

i just took a few notes on your work* and i wonder if my take on drumming would interest you.

i can help search out the relevant urls if you are having trouble with it (*first hint: the green chapter in the original/initial work*)

i could not find a condolence register nor much besides the facebook and google groups RIP pages. There are photographs i had never seen before but ... crazily enough ... it does not show nor refers to the Rolling Stone article he featured in. A public copy i had for a display at get togethers mysteriously disappeared in the late eighties.

* = 50.45 the copwatch runs into BamBam on brb090101 radio edition of The Huff .. he alledgedly alienated a customer .. he's not in the mood to talk ... so third hand stuff here mostly (*first show i try here*) .. 56.08 is another little snip .. 59.14 again .. he has to move his stuff across the street where the sidewalk is actually narrower

... he's waiting with all his gear for a picker upper ... 1.03.30 he declines a chance to comment 1.07 it

gets interesting, the reporter mentions Palestine to an officer, then turns to BamBam ... who asks to use a phone and is kinda pissed at the reporter. This is Robert and he is a genuine fan of drumming ... he proceeds to the christmas do *(which got prohibited, perhaps why BB was leaving, though it was a 10 year tradition)*.

1.41 we hear Becky ... i am aware of her disputes with the black anti-zionist joseph anderson.

ps: is there a reason there are no more mentions on the page for shows after mid 09?

Did he move away?

BB, ... in the Santa cruz homeless radio archive his name is given as Hilgard.

... why aint you posted here so long by the way? Not been to the gathering this year either?

<http://www.huffsantacruz.org/brb-descriptions.html>

That link has 3 years worth of chronology for this radioprogram about the homeless harassments and efforts to stem the tides of outdoorsy types attracted by the hazy and/or lazy weather .. the music and hippie rep, etcetera a thankless task that wealthier more settled pay their coppers for

i have tried one the handful of mp3 files that mention Bam Bam there, the one before last mention of BamBam .. from januari first 09 *(it's an hour long, recorded just before christmans i guess)* Bam Bam on an ostentatious mission to leave and royally pissed with the radio maker who later goes to check out some drumcirclce folks of 10 years standing being forbidden to continue on their familiar haunts.

brb090101

BamBam can be heard very sparingly here, though is offered a chance to say more. At minute 50.45 Robert on copwatch runs into BamBam

Like i said, after 09 BamBam aint mentioned no more and the email boxes of the site are all defunct.

i have a few burning questions though. He must have jumped from great height with a rope or else he would not have died anybody see the imaginarium by terry gilliam by the way a movie BamBam would have made even better.

Is it even true he committed suicide?

music, california and natives have caught my interest for many years now.

speak about tragic and unnecessary deaths!

quick refs for each: Dave McGowan, Laurence Rickels *(not for the not and/or unheady, sloppy language ahead. Did he ever mention a crazy dutch guy using rocks for drumming?????????

i returned to holland after 7 year long visits *(and a 2yearlong ones)*

I love Bam Bam dearly. I cannot think of Bam Bam and not get happy. I saw him do a lot of things
but two stand out. 1993. May? Dead Show. Sacto. It's just the way he would lead that tide of
one hundred drummers against that sea of leos and block the squadcars from encroaching on
the village in the parking lot, just as he would at various gatherings. It was a joyful thing.

may be a hoax though, all the more reason to party when the to be commemorated star shows up live ... a true

You married Christina in Colorado, Turtle in Alabama, Turtle-dove in Washington State, Beautiful Women loved you. Looked like Jesus Christ, a booming voice, a booming laugh, the call of "Shanta Sena" rings across the forest floor, you were the first on the front lines, what it means to be a spiritual rainbow warrior. You made us laugh, you made us cry, and you made yourself die. A cosmic martyr. They cannot keep you out, you are climbing the walls, you will kick down the pearly gates. For whatever reason, you showed us the bigger picture, the bigger figure. A peat man, a bog man, one of the first mud people always leading mud babes to Graceland, the green man, a chalk man, laying down upon the hillsides of England. Wild Horses, stealing horses is stealing power. Chopping wood and carrying water, for the grandmothers, this is the sign of enlightenment. Down the Canyons, Up the walls. Long and lean, slender and mean, a rickety man, a plastick man, a stuffed man, a hollow man, these were the pearls that were his eyes. Burn him in the fire, his ashes, sage and smoke signals upon the wind. We would never see his like again. With him there would have been no attack upon Kiddie Village, every tribe needs an outrider for protection, you were our guard, the beachcomber, the gunslinger, the bomslinger, the master singer, the troubador, the picador. The Happy Accident, The transcendant event, the strange attractor at the end of time, the end of all rhymes, the end of all climes, the galatic synchronization you were here once again in all or our past lives one of the dream warriors, one of the 1000 jesi, one of the images caught in time, one of the invaders in the maze. quite a gem of jewish decency journalism:

After watching a five-minute video clip of the incident, a federal trial judge dismissed Norse's suit in 2007 and a three-judge panel of the 9th Circuit upheld that decision. But a rare en banc panel of the appeals court agreed to rehear the case and revived the suit in December.

As part of a potential agreement to withdraw his suit, Norse said he expects the council to change its rules regarding public participation — including expanding a two-minute time limit for general commentary and dispensing with a rule against booing speakers. He has vigorously

fought against a gradual tightening of such restrictions, which his speeches to the council, as well as a host of tirades by other gadflies, have engendered.

A longtime advocate for the homeless, Norse has needled the council for years, opposing crackdowns on the city's overnight camping ban and panhandling. He criticized the council for placing controversial matters on its consent agenda, agreeing to discuss those matters only if council members agree to transfer them the regular part of the bi-monthly meetings.

Date: Sat, Oct 8 2011 3:22 pm -- From: Butterfly Bill ---- I have now converted my book to an ePub file, a format that is becoming the standard among e-book readers. I have put it on the Barnes & Noble site, where it is available for the same price as the Kindle version: \$2.99, and is readable on a Nook. To find me on those two companies' home pages, you can select "Books" in the little button beside their search box and enter "rainbow gatherings". There are at least five e-book reading programs for a PC, which I discuss at <http://www.bliss-fire.com/EPubReaders.htm>

(I have also made some corrections to the Kindle version, and uploaded a new one.)

I am publishing it free of DRM, so there will be no copying restrictions. I am also offering it at my own website, for \$3.00 even.

So now there will be several ways you can get ahold of one. You can buy one from Amazon or B&N, and after you have paid the price it will reside in their cloud for as long as those companies shall live, and you'll be able to re-download it if your current computer dies. And \$1.90 of your money will wind up with me if you use Amazon, \$1.94 if you use B&N. Or you can get one from me directly at www.bliss-fire.com/Purchase.htm, in which case I get all three of those dollars, and I'll send you another one if needed if you are on my records - but I may or may not live as long as Amazon or B&N. All of these ways help to enable me to do things like travel to more gatherings and write more things about them *(something I was not able to do this past summer because of a lack of funds)*, and continue to maintain my computer equipment and ISP payments so that I can put more stuff on the web.

Or you can copy one from one of your friends who already has one, in which case I don't get a cent, but after I have left this planet others will still be able to access this work on any machine that can read the file, no matter who is still in business. You can use whichever way conforms to your values. -- -Butterfly Bill

2000 year old computer found - shows 235 monthly moon cycles - that repeat, proves 16 dec 2013 at sunset is the end of the current grand cycle, and, proves 17 dec 2013 at sunrise, is the start of the next grand cycle

55 - 416 on the way to 144 = 1366560 the 'super' number

the shows are quite as repetitive as those of any frequent performer and so that takes the pressure, need and burden for keeping timestamps and other means of sequencing straight, OFF!!!! In light of the fact these guys aren't 'consistiating' their (*filename*) changes..... quite a blessing .. but uploading identical ones of slightly different lengths and names is taking things to far! Just downloaded 2 such ones, a program i heard already ... though only 2 days old ... oops, nope ... my mistake

i'll be curious to learn how much of a cold shoulder this nevertheless very akin person will receive in your eyes .. at your handkinknocktID fingertips .. due to competitor qualities.

Please welcome, a calendar lady, a matrologist, a bible and pyramid student ... <http://biblevoyages.com/> very tastfully pixeled page i have to say ... prolly just a ready made template, she just began blogging this summer ... though sorry to see her fondle and frisk the bible so closely ... a truely intelligent yet christian lass, a meticulous measure, rescale telescoop and fractalate, then draw a diagram kinda gal: TeaTephi the curvealattress nailing the pie, cookabooking Phi, steeping tea and verknipknoppert genoeg to be a respectable member in my bouquet right next to yall:

Thou speaketh too kindly! Thanks for your kind words, and your prophetic Scriptures. Never remembered reading Isaiah 32! A ChurLiO! HA "to destroy the poor with LYING words, EVEN when the needy speaketh right!" Very interesting! Looked it up, and Churl is related to 5230-1, which mean deceitful, act faithlessly, "their craft", and their wiles.

The same vile one as Daniel 11:21 maybe! Which would make OJoker the ORaiser of the Otaxes

prolly need to break out the image of the temple which from above looks like a human figure, kinda sponge bobbish of course but otherwise mature stature.

i introduced you there and in turn will say a few words about them here:

fans/followers of Arguelles, a language innovator and explorer of spirituality# and inspired uses of symbols in order to turn audial and inwards, rather than just visual and outwards.

- Maya Calendar, Quran, and much more (*I Ching and lesser known work by colleagues in quick succession**), he stood at the cradle of worldwide activism enabled by quickening communication but had an eye for the drawbacks (*E-waste*) way ahead of me anyway.

*Mevlana for instance, a female turkish biblical mystic and profuse author (*The Book of Knowledge*), prolly closest to your preferred flavor- Bulent Corak is her birthname. Arguelles asserted she is an incarnation of Rumi.
<http://mevlevisufi.blogspot.com/>

= a link found at/via

<http://godlymanifestation.blogspot.com/2011/09/karma-tale-of-soft-deceit.html>

cause i liked the photographs of 2 great big snow owls at a picknick table in the mist when i searched for images with terms 'arguelles mevlana'

... wow, talk about omnivorously new age ... i am afraid the bible is not the main course at that blogspot ... too many modern distractions and ... seductively 'killer (/) colour' .. not to mention music .. does have a tiny commentarian culture though ... so i might revisit your blog does not allow comments at present settings.

i can that sort of music stomach this a whole lot better than the type of verbage the net and E-waste processing sites in bum-fuck china and africa are clogging up with, like this preacher dude .. dunno who it is and don't wanna .. it's akashaonline or some such chuoitsji (*ns*)anity .. makes a big deal of 63 ...you'd like it ... haha .. mentions 1975 as the first harmonic convergence ... 87 ... 99 ... 2011 ... 12 year cycles are very chinese.

I noticed you took the 9-9-9 as a rather pivotal year ... here's Arguelles on that year at one of many sites by his students:

<http://www.elciudadano.cl/2008/12/21/4867/jose-arguelles-2009-ano-de-la-gran-division/>

the mystery queen, unlike you, did not choose a nice wordpress template .. but apophenia reigns ... i guess you might not appreciate or 'have time' for a 'diversified' colleague of yours but i am taking the chance here anyway, i have at 53 manouvred through my life in such a way that i now once again hear my 86 yo mother read little bits from the bible after noon meal. So for her sake, read on.

Jose Arguelles fused native america north and south with asian wisdoms in order to try attack rome ... He takes offense at the way they twisted the calendar out of shape/symmetry to throw us off all the time .. or so he claims. even though Jose is prolly too omnivorous or hybrid for such a bible focused person as you are. i fear taking the pyramids as a rather heavy set illustration of what perfect sow n reap timing the bible is capable of, might be turning cause and effect on its head but maybe not. No matter, cause either way, the pyramid is really the result of efforts that began (*with*) monocultural cropping and massification, wether or not well before the bible ever began. see jewdas.com about how joseph's grain storage and manipulation to create a reserve labour army got the 'spirit' of the bible going and the peasants/indigenes off their land. That trend hasn't abated since.

I categorize yall under matrology (*got a phat collection!*) and try examine those with a taste for code in light of work by the likes of Andrew Lehman .. a not at all religious person but very intelligent and with a long view talent like almost no one else i know.

more art by arguelles follow uppers that i just harvested to add to my collection:

may the god of your choice convince you that you nor anyone has any whatsoever or may the god of your choice be so helpless that he can only reciprocate by hindsight .. very far into the future.

I think that second attempt is actually quite profound in light of my own work which i haven't gone into very much ... but this letter is too long as it is ...

Humanity is learning to love/understand which is heart chakra, TMQ and others are learning wisdom (*how to create, using universe numbers*) which is throat chakra, our expectations of humanity need to be appropriate for where they are as a group soul. Humanity can't leap thru the heart chakra into the adept/throat/skywalker phase, they have a whole cycle ahead on how best to function as a coherent whole which will open the question of how to create.

There is no exact alignment with the galactic centre in 2012, John Jenkins and others looked into this in great detail. There is an exact alignment with the galactic centre in about 2222, at present the alignment is with the galactic equator, which is itself 'thick' and it takes some 40yrs to cross it

many — low .. ignorance, separate/dualist nationalist / sectarian /
atomized ego .. max disunity

these are levels 4 and 5 (*of 7*) called 'supermind' and 'matter' above and below the horizon ... the 7th, though called 'life' isn't even drawn into the figure ... in its stead is a waffly quote by Sri Aurobindo (*not to disparage his amazing feat of establishing a full[[fool?]]time church*).

[linked to the latest michelvee here](#)

world class hooey .. i have to say ... merlinesque crystal mirror house self-obsession and self-imprisonment, relativating earth and root(*ednes*)s away, betraying them and off into the next nearest black hole to be at the center of a code spinning out a melody "only god could possibly hear" ... ??? .. please. Showing humans with antlike antennae (*beginning of 4th minute*) is giving the game away as well, diminutive domesticated matrix entangled milkable food for machine thinking. He did not escape and end his time in conspirator circlcs unscathed. His claim for his pointers to help lead to garden-garden are a pipe dream and his ways to get there counterproductive as we may conclude from his own walk of life, let alone it can help serve anybody in other. And another thing, all proportions and ratios are forever in flux and liminal.

the note loss occured bycause i was also distracted looking for that 'many' quote to add to the chat ... since the host at that time liked and recommended one of them galactic fed sites featuring Nesara and a slew of other stuff ... which i was putting in perspective.

and if so i would expect a little discussion of what my criticism amounts to .. instead of hairsplitting about which of 3 fake fractionations (*fractal, fibbofib and ffie*) is the favorite flavor of the month.
Go see the King of hearts ... it might apply to Arguelles as much as to me.

i seem to live this, what feels like a final stage of my life in/under the sign of anticlimax. i am doubly tortured at once, by the awareness of lost potentials and the hellish reality which has managed to displace it and nip it in the bud since day one. Now telektonon says this year is an eagle one and i certainly feel that since eagle 35 the 15th of october we see a sudden sprout and bloom of all i have been struggling to make obvious and saw as my talent, pride, task and function.
However, lots remains on my hard drive in a much more disjointed fashion than i would like as well, and though i carry on supplementing with fresh material, i have lost the drive and energy to work real hard at it, disappointed by the fact that what i did manage to get out there was, until the 15th, so little appreciated and specially since i now feel that in fact digital efforts amount to all sorts of pollution, the straight up kind more than what arguelles argues is a noospheric typ due to the disparities of material available.

i am even failing to live up the very minimum of standards i set myself early on. Like the conviction no person could remain sane nor should be subjected to living in suburbia, let alone urban conditions. I sacrificed these requirement for access to libraries and broadband for a full decade.

Now i do it to keep my old mother company. I do owe her a lot of my life long liberty.

A certain Mr Coon there claims that the Harmonic Conv was centered at El Tuje (biggest oldest tree in the world - former Aztec realm) and that it was an entirely Shearer inspired thing. A fizzicool QuetzalQuatl was involved also. Check this line out:

"In terms of sacred site evolution, the year 2012 - favoured by the time terrorists - is a quiet non-eventful year."

He mentions 2020 as a culmination .. certain 19 code scholars (last i heard in IDF custody) claim the same.

hey sweetums, 214 right? .. that makes 9 either way added and/or subtracted from mine .. and we're either side of the spirit/one matter/many divide snuggums! (third of michelve's latest vids) ... how salubrious ..

. oh and by the way, 'nevertheless' is 'immerhin' in german. Minds are like steam engine locomotives, big old giroscopes, lots of spin momentous monumentae (very spacey, very filling) ... modeling the minor/many /micro muddle seems too much less glamorous for those bent on the mind game sparkle not realizing they thereby disserve the truly self-effacing and much more effectively festive light/dark weavers, not to mention themselves

Rainbow family generally practice humility but have nevertheless not broken through to this either and are even less likely do so now that they broke through in the other direction.

this might all seem psychobab(i)bley or too telegrammatic to the reader but i assure you there is a method in this madness:

Let me quote Arguelles and add my twist after that, MichelVec vid transcribed yesterday and my twist ... slightly expanded ...

... a cautionary thought i had last nite:

what if the familiarization and becoming adept WITH all the crops of symbols reflecting the foldings, merges and enflowerments croppin n poppin, creepin n peepin out of ever shifting faultlines in timelines, volumes and cascading is the spiritual equivalent of how the game industry commodifies neoteny?

Gaming dispenses the seemingly welcome relief for and alleviates the burdens of bringing up the next generation. While it may distract and entertain YOUR next generation, the buck don't stop there, youngsters acquire a taste and get instrumentalized, given jobs by the military and thus get caught up in ulterior motives and motions. The playfully acquired 'skills' end up unleashed on the competition,

destroying THEIR next generation. -- wikileaks first big claim to fame was footage of the not the most despicable but certainly totally immature people given the most horrible toys, their development arrested by game world ensconcement as career choice. This appears to me like a law of deprived nature OWSer efforts are so far calling to a halt ineffectively.

There are manipulators out there aiming for just those outcomes. Main and crucial trick they employ is to aim their victims/recruits inwards, then construct a house of flimmering mirroring windows that secure and at the same time insulate against breaking with the loneliness. It similarly immunizes the novice entrant / captive audience / auditioner against any and all qualms of conscience. Self-immunization sets in quickly.
This dovetails, albeit invertedly, with the new age efforts uncannily.

You can say lots about JA but not that he had a sense of place. Respect for those that did yes, but not to the point of calling for massive redress, reversing ill conceived migrations, even if they occurred hundreds of years ago. I do call for that.

He did though, struggle against quite a few of the jewifications most americans fully succumb to, such as:
1 - use of alcohol
2 - use of symbols, the Bilbe principally, holding the good bits hostage

to reinvent and proliferate 'code', most of it used, not to leave but to erase a trace pry funds loose from the saver, then bundled, gamble with it.

to grant, award and assign this deracinated literacy primacy and decisiveness over and to the detriment of direct reference, transparency, continuity with historic precedent in order to exploit alienations and drive slaves

.. those early stages of the closer to the ground grind-mind stain-strain, sharpnings, poultices, marking and sign, superficial scratches before slightly more penetrant incision ... etcetera ... the polished and shiny letters staying in touch with the material evacuated to achieve such buff, referring directly to and staying in proximity to the gardens thus hard won material feeds (*soft dust won from hard rock, noblest writs in and for the land*).

3 - sitting on somebody's land by dint of ability to come up with something that will chew it up and remake it in one's own image (*bleak as that may be*)

and on up to Gate 52 in the year 2065. I live on Maui so my intention is to be poised above Mt. E'ke in a helicopter in my own backyard to drop a crystal into the crater at 9:11 our time (*11:11 Pacific Time*).

All seven rays are equal, this means these artists (on their 'ray') and their work is of equal value as the work done by V.V. and the other five 'Ray' types.

previous item's comment about air-dropping a crystal in a volcano was certainly an example of what i feel richly deserved and of course defied my critical note (*mind you the lovers of these type actions distance themselves from me [[literally also]] rather than the other way around*) ... i am just taking a break and looking around pointing out yet another odd way in which the candy coloured stone fetish and handicraft can get/slip out of hand (*'skills'*) and concern with rock derails into a totally miss the foundational point kind. Not that i care. It's part of the however 'many' .. and i nonetheless can only continue to hope a good example will draw help in rather than receiving little cause i drew it out of and got it from the reluctant cooperators i managed to cajole blame shame and drug in, who would much rather stick to their take on today and revert as quickly as i am gone.

i always fantasized about setting these criteria in statute type stipulations for very easily defended premises and make the amenities too seductive to prevent waiting lists. Hah!!

A Rock and (*turdy dirty*) production tale.

all matrices and ledgers these days are increasingly fake screens and filters unfolding nothing, the latter in turn poor substitutes for a fresh squeezed rock and newly moistened dust. I am next gonna say no different but not in so few a set of words ... subject to the space filling race* as i am, .. like all 'go()o(g)gle till the mind boggle' crowd, *it counts IN (ahead) what the gvt bails OUT (*glosses over waaaaay behind the ball*), tying safety vests together in order to float places of prestige and (*cough*) 'decision' in a mirror aggregation game of the screen war era ... digital storage = bait n bail sums, on ice as buffer and promise, all fictional and make believe .. costs nobody nothing but chip factory spaces and same for megalomaniac office n conference races until end of cycle E-waste catastrophies manifest and set in (*haven't we seen too many of them yet??*).

<http://brigidshouse.com/tag/destiny-cards/>
Jeanne Troge (Mn), in 09 she hosted Cheryl Gordan (excerpts):

Olney Richmond wrote a book in 1894 called "The Mystic Test Book". This book talked of the cards as way to predict the future. Since then Edith Randall and Florence Evylinn Campbell wrote "Sacred Symbols of Ancients" in 1947

The SSoA is a book i carried with me and tried out on people.

If you just take a look at the cards you'll notice something. There are four suits. They correspond with the four seasons. A deck has 52 cards. Our year has 52 weeks. $5 + 2 = 7$ which are the number days of the week and the number of visible planets. If you take the value of all the cards of the deck Jacks worth 11, Queen worth 12, etc. you have a grand total of 364. But wait there are $365 \frac{1}{4}$ days in our year. A little known fact, the value of the joker is $1 \frac{1}{4}$. The value of the joker comes from the fact that he is all the four suits plus himself, making him worth $1 \frac{1}{4}$.

Having a good fiefdefy time?? Lemme fess up how i cut off my nose to spite my face .. i own very few of Arguelles works ... even passed up the neat sets a Belgian kin was assembling and keeping at the ready to pass on over a year ago haven't even seen the last 3 CHCz (*other than via Michel's vids*) ... and the SSoA played a role in this.

This has, partly, to do with my skulkiness (skull is key - see Oscar Kiss Maerth) and lack of exposure. I mean, i lean towards being an old misandroiddickdude and my natural leanings towards that inclination already increased alarmingly over the years (*by dint of the fact hermiticism has respectable standing in my eyes*), have lately been boosted by the care of a gradually slowing down mother i took upon me back in the place of my birth, where the insularity of canalization (see Wittfogel on the early massifications in barely alive memory .. the manifestation of masses may splinter planets if the beginnings of tiniest clay dams go horribly wrong).

So besides giving lonely leeway i give 'care' (after a make believe nominal fashion perhaps, but still, immerhin, i am here and she is calling me for her OJ shot right now!).

Crisscrossing the world and coming back here i haven't grown one wit more lenient to the ways they stunt, stilt, mold stuff and disfigure human and all other nature round here with a mere handful of pitiful monotheisms (*Bibles and dairy pasture the principal ones, to continually crown them staple, crimp on frills and beat down challenge(r)s* is a case of Stockholm Syndrome fur sore). In that sense this region is a globally tone and pace setting delta (*some of the finer channels still maintained less than 20 miles away, the first harbours deepening corporations began from Sliedrecht, even closer than that, their social center is, quite significantly, been derelict for as long as i live!!!*).

The main reason however has to do with a query about the cross over between tzolkin, birth (*destiny*) cards and astrology, focussing on the diagonal created by covering all the days in a year diagram with playing deck cards, identical ones on the slant lines, so 1 (*kind*) in the corner, 2 below that and so on ...<http://www.lisa.fm/chart.htm> .. too tiny to read but this goddess (*very serious about making a living off the net*) will sell you one. <http://www.goddessofdestiny.com/>

<http://thecardsoflife.com/your-birthday/>
clear, complete and concise ... oh .. no .. wait, .. it's confusing actually ... instead of the Spade King on the last day of the year (*as the SSoA book and 7thunders have it*) we see the joker there (*lisa does that too*).. sigh ... must be one of them 'matricksplinterbet effects' again, i referred to them on the 11th of march 2005 thusly:
..... snipped here

back to my story:
That is beyond and on top the Maldek scatter shatter unravel effect laid out in my SSoA book (*see further down*) but not explained. See it right here:

http://peacebewithus.net/?page_id=283

.. there's perfect (*logical sequential, gradual*) grid and then there's life grit.

never ever saw a blow by blow explanation of what makes (*never mind keeps*) the life lay out real and don't expect i will but that diagonal thing seems to or may quite likely have some sort of obvious cause ... earth's girth/polarity for example.

i posted the query repeatedly on the tortuga forums back in the day also, and haven't had a useful answer to date.

That kinda hurt and prompted me to adopt and stick with a 'shun theirs if they shun yours' attitude.

Dan Winter hypnotises with nonsense and talking fast -- starting with saying how standing waves are the secret to sacred geometry. That's a tautology -- as if "sacred geometry" means something and as if "standing waves" mean something. So two meaningless things on their own somehow reinforce each other in a self-definition of nonsense. haha. So then he goes into sacred geometry as fractals and how only he understands "electrical fractals" and that this secret is the "Golden Ratio" so that the maximum number of waves interact constructively. But what about destructively! You need balance. Geez. haha.

Nominally my startlingly vivid dream (4th to the 5th) about my father's sexual advances to me .. which he never made all he did in the way of physical sensation dispensing was to squeeze my fingertips ... him a 12Hand and fixing to make his only son into a butcher like him getting funny fingers from handling very cold meat? May that dream though, have been Chunyi Lin probing my kidneys to see if i was any use, worth an effort, or just as study object, a side issue to his Drew thing (which unfortunately triggered Drew's huuuuuge thing for him)? The day Drew can begin to notice the similarities between ChunYi Lin and Dan Winter instead of being so absurdly polarized about these two sermonizers and public performers will be a happy one for me.

MM = SS a submartian: How will this time be remembered after 2012-13?

VV: As the last dark days of dreary old Earth. When the blue meanies were still holding sway.

'all in' the spirit matter mix, a spirited matrix

note he does not say meanie blues, in other words, bleus are not by definition mean. Much clearer terminology would help, like calling alcohol what it is, a weapon .. and like changing the too generic 'meanies' into semitified or bigbooked folks, who need to be restrained, retrained and not left at liberty to make themselves at home, which invariably pulls up walls, causes blood to flow instead of water. Thus traumatized people cannot, left by themselves, choose the noblest activity ...and should rather be left no choice but to do this by keeping them inside walled and surveilled places, then given plenny material and opps to turn rock to dust* stored in the composting spaces awaiting arrival of fresh turd

* hemp seed, loom, swivel, lumps of metal or maybe even ready made bearings, it's all about helping them get some after all.

Hint: It's a matter of making rock pivot on each other

Turd loads never bigger than they can reasonably be expected to manage mixing in a day's work but they will be locked in there as long as gases are not fully absorbed (*they're welcome to be on the receiving end of a strike hoping to get laid off and let out but they can't get laid off*) and thus they better prepare to optimize the benefits (heat, healthful food and fertility) of the city surpluses as the citification is reversed, thinned and phased out, a process they are largely guilty of any way. accounts as well as sewage flows will be de subterraneanized and become transparant, celebrated as a communal achievement instead of a prize for some individual to 'win' and make off with

VV winnows, size selects and compartmentalizes in a typical divide and rule fashion. I saw this clearest when he or maybe his followers did so spontaneously, dressed up in their seal's colour, whereas the point is to show how you are an ever changing constellation of them* like a chameleon, cycling through daily chores of a highly diversified set of brief burst in a garden culture way. But if you were to higher key that shit, exalt some and say kill the others you'd be right back to what he blames nationalism for, fundamental factionalism,

* - hence the disco ball hype i guess, and the appeal of Arguelles to the rave/party crowd, after all too much of a swirl makes you dizzy and does your head in, even for the young, ready, beautiful and willing to hurt and trade away their stamina for short term gains, ... the dreamspell works as a wellcome braking action on them. But from the other end it might just be a seriously rigid bizniz, necessities and necessitators who remain to well hidden to compost them.

VV and Fourier and the pyramid / stack fo leagues .. the tournament tizzy, the John Michel sacred pilgering .. the seasonal worker, the despised and demonized travelling professions. Dreamtime. I have suspected VV before of harboring a desire to filter and specialize his teams, to purify in order to polarize, not to remix at the proper scale but to establish a 'higher key' in which presumably the meanies will add euphemism of your choice ... fail to transition for example.

It's like his banning of the octahedron to the center of the earth ... i put it up on my site in 2000 with the suggestion that it would make an excellent ingredient of any small scale energy translation and provision tool.

Grayham:

And the reason scientists can claim the universe is the same SHAPE as a brain cell is because of fractality (all sizes same), and the template for fractality is the golden phi ratio, in 3D this is a dodecahedron or Triacontahedron, but being fractal means every dimension has a membrane which is a dodecahedron/Triacontahedron, as is the membrane which contains each universe (144 Triacontahedra snugly pack around a central hub). The One self

replicates. This is simple, as it should be, as consciousness develops modelling the universe and everything becomes evermore simpli-phi-d.

oahspe itself got hotly contested (*accused of plagiarism*) by competing channeler (*Cora somebody*), also wildly productive and doing one celebrity after another.

Stage productions of bygone eras are instantly remixed and roundly mocked (as the response to long suppression) in the next generation's upticked hiccough media they in turn are judged by contemporary testers who acquired a taste for the genre .. location, medium .. whatever ... the reviewer will call some 'faithful' commemorative and admiring representation but slander other shows, a few doors, blocks, counties or states down, and condemn them as mocking impersonations or poisoned plagiarisms.

Difference are a thing to celebrate, not complain about, unless decisions are based on them rather than the similarites. Decision needs to based on the latter ... always good for overwhelming majorities.

This evolutionary message is now about to replace biblical work ethic coupled to singled out heroic and epic individuals in favor of the across the board outlook.

Like the symbol harvests from various places ... sure it's great to turn them into one giant clock that flickers and lights up the aspects, resonances, syncs .. but we aint locked up in a ghetto art colony .. we have a world to regain before really losing it.

The long-term strategy to overcome Koranic Islam with the help of wheeler – dealers of the Biblical Project

18.02.2010, 09:00 by ?? ????

One of the main cultural problem of the global scale for the Biblical project wheeler-dealers is the Koranic Islam.

The very reason of this problem is explained by the fact that the global and political doctrine, the basis for the Western policy, is based on two statements: ----- The thesis of Judaism predominance over the rest people and the obligation of other people to be tolerant towards them; ----- The buying up of the whole world with its inhabitants and property on the basis of Jewish corporative transnational monopoly on usury. ----- In spite of the fact that these statements are not directly mentioned, they are being strictly implemented.

Koran denies the Judaism predominance doctrine over the rest people and the usury is under a strict ban and is characterized as a kind of Satanism. These statements are not practically used in the political life of Muslims, based on the alternative concept different to the Biblical slavery concept, the Western wheeler-dealers understand that Koran – is the potential threat to their global power regime imposition. This explains their desire to leave Koran in its historical legacy.

so, hordes of idiots go to raves and then start blaming all sorts of outdated cliques on the paranoia it evokes? Aided and egged on by the deco artists who love nothing better than become 'veelbesproken' via a wink here and winkywank there, then a wallop on top thataway to intense loaded controversial imagery?

Sure there's the evil arts of rebranding an all to tarnished corporation / nation, new contracts .. new calceys callcars and kalkars, fresh agreements ... but what's incessantly pointing to it gonna do for voluntarization of anything, let alone of basics?

Countering LylythTV's overdoing the 'on purpose and inescapable' meme. The causal and self-perpetuating factor is actually the furthest possible from intended and intentional .. add your preferred mind/crowd control buzzword here. In fact the cause is the exact opposite: N:E:G:L:E:C:T

'Rock' music as ingenuous way to try attract attention, express frust and there is an instaflip involved there also.
The attempt to stem, call, sing and/or scream the neglect to a halt on the contrary, amplifies it (*literally in the case of stadium magnitude human branding corral*).

PRIME CAUSE: WORK PRESSURE

.. which comes in a range of intensities .. if there's any intent it's quite simply staying alive, earning a living.

neglect caused by parents being hi-jacked to perform underpaid wage slavery on is easiest to take.
neglect caused by parents who work for work sake, or simply overdo giving what they mistakenly think is a good example, iow, a wealthier set, is a lot harder ... but hardest neglect to take is by people that have yielded to pressures that don't work at all except counterproductively, .. exactly, military careers. You got that part right. Then there's the whole issue Christopher A Brown bared so carefully (*native americans*) always figuring big in any American cultural phenomena and west coast ones worst.

Another big aspect that plays into your mistake is the ubiquitousness of acoustic space ... radio&tv are surrogates for audial/tribal space/bonds (*borders*) and begin to feel imposed the moment you fail to realize the on/of button choice is yours and refuse to remember why you need to .. always and forever.
Grow an apple and trade it for what you want .. it's your currency.

quarantine.. archon..
fractal nature of time –generating self awareness..
meaning of galactically resonant individual..
—

initial comments by Dan Winter:

When time or relative rotation measures are properly embedded, then recursion in that nest/ self-awareness is nourished. This may be next step along the Mayan concept of spiral time.

Note the semantic closeness of archon to anarchy.

Note the first blushes of galactic resonance in a human, as siddhi and kundalini effects on environment. At first coherent EKG entrains tree. Then it is a centering force for galaxies.

Please consider with me for a moment, the "Contagion of Set" and the conditions which required a quarantine of Earth from Galactic contact. Vincent and I have seen a parallel to what Doris Lessing describes as the loss of "the substance of WE feeling". ("Shikasta", "Sirian Experiments", "Briefing for a Descent into Hell" etc.). The substance of we feeling is very akin to the very palpable glue which holds tectonics and gravity fields together. Gurdieff described this as "coherent emotion which feeds the earth". The aboriginal inhabiting of song line/worm holds by recursion/awareness braids that fractal which makes planet's gravity able to hold atmosphere and birth self-awareness.

Vincent made an interesting suggestion about the timing of the onset of the possibly 5000 year quarantine from major galactic contact due to the possible propagation from here of fear and aggression on a galactic scale. He noted it's probable triggering to be associated with the tectonic upheavals at the time Atlantis sank. I believe the Atlantean priest/scientists as reported miscalculated the synchrony of the frequency signature of their Tuoi stone/"Fire Crystal" with the very ELF harmonics of the tectonic/continent on which it sat. This is not dissimilar to those poorly informed technologists today who think they have a "free" energy device, gathering from the fractal scalar magnetism which creates coherent gravity, to make electricity. (Pod-Mod, Neuman, Trombley, dozens more.. cf Bill Ramsey..). Of course metabolizing gravity/starlight directly is the way to be weaned off fossils, but first a responsible way must be in place to monitor the decaying recursion of the Schumann harmonics of the Earth's grid, in response to the bleeding. (Ref: our "heart biofeedback 2000? Global Grid ELF Harmonic Monitoring and Global Prayer Feedback Project..).

By monitoring and using feedback for the surface of the Earth's harmonics exactly like a global real time color coded 3D EEG map, millions of friends breathing together/heart and Schumann entrained, will see how they heal/feed the planet grid. (via Global Media.)

There is a story to this story about how we pass the test to get out of quarantine from the Galactic community. When Atlantean tectonics broke up, the very fractal fabric of the Earth's long wave magnetics decayed into fractionation. THE ESSENTIAL PRINCIPLE IS, THAT ONLY FRACTAL OR ROSE LIKE MAGNETIC FIELDS IN A WELL NESTED OR FRACTAL OR SPIN DENSE GRID PERMIT COMPASSION/OR THE SUBSTANCE OF WE FEELING, TO PROPAGATE/ OR BE SHARED. When we live in cities or grid points where the magnetism and tectonics look like fish tangles ONLY FEAR AND AGGRESSION ARE POSSIBLE. This is because fear and anger are glandular magnetic symmetries which specifically and angularly maximize DESTRUCTIVE interference. While love and compassion, are PHI and recursion based hence braiding self-awareness and substance of we feeling. Clearly if our children are raised where the long wave magnetics that surround them are fractionating and decaying into destruction interferential chaos, then their emotions will be almost entirely of fear and aggression.

native earth systems
<http://accessgranted.com/nas/>
sustainable living construction technologies

Over many years, Kesner C. Flores Jr., CEO of Native Earth Systems, studied cultural sites in search of sustainable, ecologically safe and affordable housing. He studied the eco-architecture of his people and the use of materials and engineering and science that went into past structures. He found that once a house was made, it was re-inhabited over and over again, even after earth changes. He saw that the floors and walls were cleaned and life continued. Native heritage maintained balance and relationship with the environment.

Kesner saw the Holistic Structures system giving families and communities the same abilities along with new innovations in building and design. He saw the Native American Indian way of life being returned to building design and systems.

Following the 9/11 tragedy, many American experts and agency officials requested a "single solution to multiple problems" in the domestic and global construction industry. Markets and government agencies required new construction technologies to replace conventional structures.

Native Earth Systems was founded to develop and commercialize a single solution to the multiple problems of structural strength, fire, earthquakes, hurricanes, flooding, mold, insects, chemical attack, biological attack, acid rain damage, ultra-violet *(UV)* damage, maintenance, rapidly rising property insurance rates, and excessive energy consumption in homes, buildings, and military and homeland security structures.

Native Earth Systems new construction technologies are based on three *(3)* decades of investment in materials science and product development by John Orava and Orava Research Corporation *(ORC)* of Illinois.

In 2005 and 2006, John P. Del Favero provided two rounds of angel investment, strategic planning, and corporate development resources to support Orava's creation of the intellectual property portfolio, the suite of prototypes, and the corporate start up of the Native Earth Systems venture.

Now, Native Earth Systems has a central team of strategic executives to help deploy these revolutionary technologies worldwide. With a powerful vision and mission at the heart of their work, maintaining integrity and establishing developments that help fully sustainable building systems become a reality.

Glsto1995-1.30m-first5s-l-cicle

Here's my 5s of fame folks.

It happed in 1995 at the Glastonbury 3 day festival.

I studiously avoided the crowds where they grew too thick and you'll understand why ... specially if you try trace my thinking about thickening.

A succesful presentation will be it's own reward .. and i'll top it off as long as i am alive ... i somehow have lost courage meself ... who cares about winged seeds in the wind, rite?

Hope your food water and air are still fresh but i fear the worst. I can barely overcome conscience qualms about using his medium. The E-waste disservice is prolly keeping in sync, pace and abreast with, if it doesn't plain quid pro quo rival the credit crisis. Remember the google line about using a tiny percentage of your account? Was that to get folks used to small margins, be modest ... or was it a spur to upgrade? You decide and you better start deciding stuff you let slip from your hand into the hands of hyenas long ago enough to allow them to begin outbreeding any thought and hope for huge trees ... hell, Glastonbury farm still has no permanent permaculture patch .. and these filmers never even ended up there.

was i really 'no harm to noone', am i not now? Music is for the birds, and i take no credit for it ... speaking of which ...

i made the 9Mb DVD trailer too i see .. but they cut off the octahedron i made to spin above my head .. seen here: [I-cicle-first5s-of-1.41m-Glasto95](#) ... rather ironic in the light of what Arguelles has made his movement do with a similar shape .. mentally bury/see one in the center of the earth and 'mentally' spin things within it. he went onto cubes later (*the Merlin cocoon/crystal syndrome i try warn matrologists about*) .. kinda funny .. and resembling the confusion Sokalian mashers like Drew Hempel, another person i worked on (*to little avail*) spin out into and feel free to 'share' with (*more like, impose on*) you:

leglocker Hempel on Reiser (*reblogging a piece of his own from 2006*):

Once the infinite natural resonance is physically contained into what unified field Matrix planner professor Oliver L. Reiser called "the music logarithmic spiral" then infinite consciousness, or Apeiron, is transferred into external technology since the One-One pythagorean theorem is actually the I-One of IS-IS, the tantric Cosmic Mother (*source: UC-Berkeley math professor A. Seidenberg*).

By the way, one of the 2 first such 'windmill' models i made there (*originally designed as the busker band stand deco .. the price of my entry ticket*) was nicked at the end of the festival ... from where i had hung it over a water sculpture in the upper field

Just curious if you've done Fly Agaric considering the Berserker connection — it shuts down the amgdyla. I mean LSD is one thing but in terms of experimentation I recommend Fly Agaric for that personal experience of the Berserker. haha. Then watch the Pharmacratic Inquisition because if you watch it before you experience the Berserker it wouldn't work I think. O.K. Fly Agaric also acts as an MAOI so the DMT levels do increase as well. I mean what role did Fly Agaric have in the hippy turned mass murderer scene anyway? I can ask with sincerity as I used to write a zine with Kathleen Soliah of the SLA and she wanted me to publish the expose about the CIA mind control of Donald DeFreeze to help her trial.

** got back to the edit button to late to correct at link*

I say yes, yes, yes and yes again. I call bullshit ... literal 'spin'.

*I am not saying aliens don't exist -- the genesis continuous story by David Calder Hardy remains a more
appealing and more levelheaded scenario that anything the eso-scene has managed to bring to my
attention (winging it with broad sweeping brushes is modest, whereas all those indecent dismal decimal
placements are not) .. and elegantly short too, very few excercises and tricks required -- .. but they are just
as untimely a concern as is real snow in summer*

*I travelled a parallel road, the 4 axis model you show (right after we see Fuller)has been up on the front page
of my (long since inactive) first site since 2001 --*
http://members.tripod.com/poetpiet/Blabsabs_Index.htm .. my path was along the verticals also, upright

also, radiant also .. but i probe both directions at once and define my borders clearly ahead of time ... stay well within the tree canopy and root zone parameters .. and there IS in fact nothing that resembles a torus more than a deciduous tree that has been favored, cleared space for, loved and let be, fed even perhaps. None of your stick figures and hi-falutin fables can begin to match THAT .. though i concede they so far succeed to lead ASTRAY FROM that, my type of intelligent primitivism plenny. I am gonna pay closer attention the second time around (*after doing a skip through initially*) to see if you mention Arguelles at all. He clearly was in your camp but at least he emphasized garden culture .. periodically.

thrivemovement.com/blog 24 Cs there now

JadeAmazon is a youtubing, over 50 dancer friend of spokane greg, an altE fella (*not much else on his yahoo pulse profile linked from his comment on .. with rough stories on Gamble's blog*):

"The SuperFoodGrower product grows produce several times larger than the norm, filled with nutrients, and flavor, a product from seawater. I love your movie, but for those of us in the trenches for decades working to bring these advanced technologies to all nations, we would love to see real support for a change. Friends of mine, with an actual nuclear remediation material tried to get it to Japan, and were warned away, prevented from getting the material to the Dai'ichi plant, now we have 20 million tons of irradiated debris heading towards Hawai'i and our West Coast. Can we dialog on finding investors you may have lines to?"

notes taken watching part 3: Unlikely inbred alienite fanatics do not know of each other .. specially those who are and/or (cl)aim they are "harrassed by gvt agencies" (and/or big corps i guess)??? ... more like goaded, charmed, 'paid by' possibly

good thing you mention rabbits .. fucking breeding obsessives if ever there were any.

.. create a mystique, egg on (hire) inventors, instrumentalize the spin-offs

part 4: money CAFitts, 12.38 GEGriffin

part 5: defining contrasts and contradictions, glaring incommensurabilities and injustices in term of "gaps" is losing touch, obsessing over touch lost from the get go, no productive contact, paralysis, limbo .. ungroundedness ... this confirms my suspicions.

bottom up community money emissions are only tacit and implicit presences .. for those who care to dig down on Cath Fitts for instance. Near the end [of part 5] we really enter Alex Jones type shrillshillitory and what the latter studiously side-steps (*jewish middlemanhood metastized to meddlemanagement - his wife being one i hear*) ... is gotten into the 14th minute .. redoing stuff i began with in the eighties but on from. his wife does Clear Compass Media

part 7: Sathouris and Hubbard, 2 grey females get a few lines of sermonization in (on butterflies and riches respectively) near the end Paul Hawken appears briefly in the 13th minute and is touching, funny

what makes the story leally reak' worst though is the lack of hormone level perspective (neotenus pattern juggling on a millenia long slide as in herb-witch gone symbol-savant - see Andrew Lehman - .. the burdensome karma jews have chosen ever since they became the much desired managers of mass society, as the champs presiding over the living made .. demographics .. at all cost .. competition (*come pitter patter potable .. set up hazards to pump 'm for opps*)

Money merely reflects this as a purely reactionary mechanism in respect to it ... and a solution therefore ties into the breeding (*rites, initiations, 'schooling', not the tools*) an alpha male is given. The big question becomes: has decency and responsibility -- *environmental awareness must figure really really big here in this toxic day and age ... let's hope Sidis and Arguelles are correct on reversibility or else it will be (like) fucking an aeon of hell* -- been offered and given to bearing capacity or was it the 'freedom' (*'over' occupation*) of the street and fists made and thrown up and down 'duh drags' that shapes his personality? Kingship and Charisma are tied to tree crops .. and rock dust enhanced energy (*powderhouses for a bit of warm water to reward the dung collectors, the digest wheelers*). Real decent garden culture can do without 99.9999999% of 'inventions'.

capitalization out of horror possible, gotta bet that pound of your own flesh to be able, not just willing to win AND take it off others. It's the demographic trick that makes walls a mockery, specially their own .. which needs a change of not guards but sides just as regularly).

If people like Arguelles had worked with models rather than pen and paper (**i did see a funny 3D tzolkin someplace**) we might have gotten further/better with/at making that a good habit and matter at small scale microlevels rock grinding easier.

i'd like to say that the big suprise and disappointment for me for lies in the fact that it starts off all multidimensional and all that ... lifting them from the flat cropcircles elegantly enough .. only to let them collapse again as the topic of economics comes up ... the pyramid is treated and shown as flat .. it is not though. Our only change lies in folks like you, specially when 'pooling, filthy rich enough to just go and be autonomous her and there, legally secede if possible even, with say the occupy crowd willing to resettle .. and as i always add, if you're at that, why not resettle whities to traditionally white territories .. plenny of empty villages .. simply for sale even .. and perfect places to try out radical permacultural ideas.

Could it be Mr Gamble is a little like King Ludwig whose family barred him from burning through their fortunes?

He indulged in fantasy architecture and artful settings, Wagner freak showman - YPVCBan8D_o = 40m worth of slow pans from all possible angles and archival shots w Wagner music. Same filmer did some rainbow gathering footage .. Might be cathartic to make a stop in southern germany too and, unlike the rainbow couple filmers, NOT forget to visit the friendly Likatien tribe* withstanding pressures in and spread throughout the very conservative border town adjacent since the 60s. They 'resist' with various bodies of hippie thought, over 200 in the flesh last i looked - years ago, oversalted veg ones at that, but the whitie X biblical 'demogrevphery' 'causing' lots of younguns (**despite/thanks to their Tantra pose/front/'standustry'**) keeps the whole thing mighty flex and hospitable if controversial and contradictory .. such is life.

* - hmmm, still a bit cagey webwise i see, slightly more forthcoming are the kindred spirits here: <http://nhz.twoday.net/> .. although they gave up in 2009 i see now

It's like platonic solids innit? if you cut off tops and bottoms here and there, replace all joints everywhere you get ... flex! -- adrianrossiter 2 vids@YT bvEj9UJGqzYIf - 1046x Vs since 09 -- .. if you are a middle of the road kinda guy, avoid extremes and square it all with the golden mean as well ... (**found another bunch of obsessives doing so last nite, Winnipegian youngsters doing 'spirit science', making speedy cartoons out of the Dan Winter FoL Hareme in territories .. and being just as clumsyclutzy in real life, they screen memes at great speed but can't strain rocks**).

Similarly .. if you avoid the needy and violent at the top and bottom of the command lines you have a pleasant make believe world. I am the first to follow the leader in finding brutishness distasteful and will avoid anything associated with it like the plague alcohol and guns the lef&raat semitoID expressions of it raucous protests that end up as weird sacrificial and scarifying acts of capital and resource destruction ... etcetera ... but i try analyze it sharply .. and point out more productive ways and means .. like Gamble does.

In other words, Gamble might be more than a little like Gore who claimed he could not change the course of his family fortunes (**with regard to the Uwa tribe in Venezuela was it?**) other than to plead for it.

Ps: i saw the link to reinventingmoney(.com) and am mighty grateful.

Tom began hosting Beckerath* quite a few years after Chelseagreen the Vt publisher did and after I, in turn another full year after SS, a brilliant german man - with a fat manuscript and hoping for help (**way too guarded and shy for his own good**) - did. Sigi S began, in 1996#, a year before me, to do the first digitalizations/uploads. We, with a german and english version respectively (**both pretty much unchanged to this day**), picked up the slack from microfiche hobbyist Zube (**4000 personal, pretty repetitive letters comprises the bulk of it**) buried under a deluge of 'liberty' lit to the tune of a 1000 fiches (**i'll have you note**).

* = Beckerath was my guiding light through hirnwix 'lupholand', although i came to think of gold reserves and free - to fee .. ehrrr, i mean please women - markets as the abstract, inanimate and/or fanciful precursor of actual reserve armies out to optimize soil moisture levels, dig swales a la Sepp Holzer, tree planting flood preventers, etcetera

[14 Oct 2005] The Classical Monetary System - According to the German School of Monetary Freedom A set of largely unknown Germans, writing under heavy Nazi censorship, still managed to put together some brilliant texts on monetary freedom, free banking and the way the montary system works. These Germans include Rittershausen, Beckerath, Zander and Zube. This introduction is a definite must read. Article at SafeHaven.com.

after 5 years worth of hiatus following that article RCBJ (**a swede who came online in 02**) went strong again in 2010 but nothing so far in this one.

i just discovered new content on this front:

'Wi(c)ki(ed) Talk:John Zube
==Kurt Zube==

John's father has an article on the German Wikipedia (http://de.wikipedia.org/wiki/Kurt_Zube). Anyone know German and care to translate it? - [[User:N1h1l|N1h1l]] ([[User talk:N1h1l|talk]]) 17:14, 26 September 2009 (UTC)

- sorry, yes i do but don't care to. I WILL say though that the second line as the article stands now is pure non-sense:

"Born in Germany, Zube was introduced to libertarianism by his father, Kurt Zube, a prominent individualist anarchist persecuted under the Nazis. During the 1950s, Zube was radicalized by his interaction with Ulrich von Beckerath, leading him to begin assembly of an archive in 1952.[1]"

The opposite is closer to the truth. Kurt published Stirner, an extreme individualist (*hence unrealistic to say the least, robinson crusoe edition galoritude notwithstanding*). Beckerath, on the contrary put social flows, stops an goes in perspective like no other. His biggest flaw was to never mention the disservices of gold (*wealth wars, aggressive mining, etc*) but he did emphasize and stipulate the emancipation from it and failing that, optimal distribution. Zube's archive was meant to pave the wave towards Beckerath but the effect was to bury him under the 'freedom' and 'liberty' buzzsaw fallout and over of the day and rage.

Did Beckerath comment on Mises directly? proly not. He died in the late 50s What's the Mises position on Gold? Pro Real Bill Doctrine like Johnsson, Fekete, etcetera right?

Van: BuckyFullerArchive | 29 Sep 2010 | 91 keer bekeken
During the last two weeks of January 1975 Buckminster Fuller gave an extraordinary series of lectures concerning his entire life's work. These thinking out loud lectures span 42 hours and examine in depth all of Fuller's major inventions and discoveries from the 1927 Dymaxion house, car and bathroom, through the Wichita House, geodesic domes, and tensegrity structures, as well as the contents of Synergetics. Autobiographical in parts, Fuller recounts his own personal history in the context of the history of science and industrialization. The stories behind his Dymaxion car, geodesic domes, World Game and integration of science and humanism are lucidly communicated with continuous reference to his synergetic geometry. Permeating the entire series is his unique comprehensive design approach to solving the problems of the world. Some of the topics Fuller covered in this wide ranging discourse include: architecture, design, philosophy, education, mathematics, geometry, cartography, economics, history, structure, industry, housing and engineering.

After editing out the hours of blank, blue screen and the constant doubling of the same part, mislabeled as the next, e.g. part 15a & 15b are the same (*this happens often*) we are left with 38h 39mins of original footage, 3h 21mins short of the 42hour presentation.

The quality of the video varies all the way through until the end. If you know of a better source on the web i would be very interested. The full 42hours can be found on this channel in audio format but i felt this video, albeit far from perfect should be added to the archive because the visuals shown are important to grasp what

is being taught.

Playlists feature 20 videos each (*19 for the final playlist*) averaging at just under 5 hours per playlist. These can be found on this channel. Playlists labeled, 1-20, 21-40, 41-60 etc... Thank you

it is now the 21st of april 2019 and after going over the source file once again ... with hilite colours added to what i now consider too dark without it ... go figure my shifting take on colourzz ... sigh to see if i missed much (did add the stuff about the crazy slovaks above) i realize, after seeing i posted lots on permieculture that/this day, that i should have added all the permie stuff all along (wrote a note quite a while ago, saying that adding this topic / aspect (and the indigenes one) would be doing JA too much honour). After all, i keep butting in with .. ehrr .. about rather ... rockdust ... yet keep this as a stand alone without the chance to buttress a bit? So i now take the opp to point to the blog where you'll find a nice long quote even ... on permaculture ... i'm not gonna go back over it all yet again to act on this insight. I found the rockdust insights are too much honour for permieites ... ever since ... wayyyyy back ... i corresponded w Ben Falk about it in the 80s ...

on OWS by way of Bob Dobbs 'discussing' (*remixing rote snips&snatches more like*) McLuhan on MoM 32 recently

Android Meme is, according to Bob, after it's anthropomorphized (*ized*) phase, our mediatec (*radio, tv digital*) wrested control from the elite manipulating it all continuing in a more or less same vein and with the same problems but now anamorphic, a mystery landscape personified by his blabbing (*talk-radio*) partner of a few years standing, his equal in cockiness, they schnabbel on the side doing private sessions with rich females.

So, Bob makes the AM an elite lite E-lite (*coprolite*), an impersonal non-profit ID crisis riddled and muddled

off kilter messmass communionKoter (*tod in german*).

Quite the vernietlichung (*cutification*) .. and soon not just over but under our skins, anchoring the vested investinterest, vestigial thrust. Well Bob is busted, .. like an old spinster with a self-overwhelming, self-outdoing urge to belong, take pride in break through edginess, up shape, sharply focusable mine and dine distinctions, honour and prestige.

This is where the pedestal territory like metropolitan parkscapes come in.

My helping Vondel park get overrun and leaving all that in disgust after eviction of what i, until then, deluded myself would become a shrine preserved in eternity, plays a role here but i won't go into that now.

Satanic pleasure is taken in ability to subject, enslave the natives of paradise. Sharing with them would be way too icky, hey OWS mickey .. lemme take the piss on that check .. no coat of arms beyond cardboard models allowed, *up-raise appraisal disallowed. All failbail money his easy*. Let OWSers do their play-act pretend palestinian mime meme performance someplace the hellware else .. or else. Bob needs to feel he cornered and locked the market for vocalization of outrage down his deep throat and needs a little threat to pull the stops and blow on all registers. In that case though, and a few little e-mails suffice, he becomes a one man police assault protest victim all by his lonesome solo. Some people get their alpha image kicks in the most unethical ways imaginable. Murderess Courtney Love confesses at every concert (*either that or she was threatening a corpse in perpetuity like a stuck record until she finally got enough drug inside her to stop that*) no less than Bob does at his nearly private but pompously archived shows.

His historicity is mega meta and never beta.

Elite delight? Elite delete!

Alpha Egoic Elite crisis is, as ever, inbreeding. They keep stepping it up, trot it out (*make an example of dah Trot himself if it helps*) and step in it. Rite now they are (*literally pre*)occupied but that still doesn't capture their attention, is not, even now, priority .. but the ropes will soon be out of their hands and the shittox will get attention, dismantled. They'll be left with the baby versions (*.. see my lines from earlier this month . about their rigorous relegation and confinement to the compost industry by means of high, secure and guarded garden walls 2.2 miles around.*)

The likes of Bob will be there where momentum threatens to spin up, ready to impart a little haircut .. but no amount of disrupt, rip up and off of resources has ever gotten the indian off his land, even reduction to a ghost (*hosts of ghosts*) won't.

Meanwhile visibility varies w mileage and acts of solidarity are sympathy waiting for empathy to happen and startle jump the chosen few panicking bunkers panaching binkers, banikin punkers (*jew terms for right wing brain semitish news are hard to find*). Helping them and and their glory trailers full of arms dealers, drug pushers, ballot bribers kick a grudgeful nature is a daunting task for inherently quiet guys but the method is the same as the best one for their own hi-test kith & kin kids who don't require as much restraint since they more naturally can be taught to take to and later look after their peers and keepers.

michelvee vidding Arguelles material on 'rock' stars/music

note none of them actually do anything with rock, they instrumentalize their hard won right to free expression leverage it electronically to massify the extent and guidance effects which morph it into market dominance and control on the double, that is, their deepest desires are fully in line with those of their handlers, dealers and what not. It's like the Belgium vision council with number projectors going wild. But their idea of reproduction were driven by hopes for market share, not based on humblest cleanest growth factors. It's homeopathy, last ditch remedy of the strength- and helpless.

Speaking of humblest cleanest growth factors ... i had a fresh thought on that yesterday:
just like children .. most have greatly divergent interests ... from their parents even and so having any realizing that first will make the sacrifices easier. Results you hope to see will invariably skip a few generations if they are gonna show up at all. As with kids so with rock dust batches??

it says 'cumulative impact' in the 3rd minute showing a man dancing wildly on the edge of a huge quarry ... I wonder if you realize this picture illustrates the rift and gap this kind of art causes. To be this absorbed, fanatic and specialized a type of artist requires the urban environment for which the big quarries are necessary. If I were you i'd switch to permacultural art ... i tried that very phrase the other day and found deplorable and very weak results.

Ignoring the independence of layers and the graduation, the staggerment of change .. no matter how spectacular and staggering it may turn out, is not a good idea. that said, i can see how you'd not like your work to be featured amongst a bunch of disparate stuff ...but i'd counsel against focusing on such inevitability, specially if you don't offer it free with best possible

supportive material to make the case.

After 110,000 views the movie was taken off youtube 'by owner' today Nov 14, at 2:44 Hawaii time, while I was watching it. It is now up again in several parts. Centralization is the same as evil. Centralization has to be completely banned and replaced by a communication net that feeds everyone without any top control. I hope all data bases are destroyed. Collecting data should be illegal.

Let local villages be stewards for their watershed and no more spying.

Let tourism end and pilgrimage with long journeys by foot to diverse lands come back. The purpose of life is pilgrimage in the Great Mystery, not mastery of the physical and chasing of the carrot of novelty. More more more.

Your visions are still tainted by need to manipulate and control. You are not yet free of dominant culture. Communication is our savior, not speed.

My vision is that most transportation ends, everything goes back to local stewardship, and communication is spread. We stay connected but avoid monoculture. I call it connected diversity, and diversity is maintained by difficult transportation, not easy transportation.

Copyright 2011, William Irwin Thompson ----- Zuccotti Park, 10/31/2011 ---- This tented settlement is indeed an occupation—a job for the unemployed, a new inner vocation: Abraham called out of Ur to live a life in tents, waiting for the Elamites to set the Sumerian script, “Lament for the Destruction of Ur.” The suspended men in suits work behind the walls of the cop-protected Street. Ananké has cornered the dollar and shorted human time in favor of the high rollers you can sense out at sea. Poetry One day it just stopped: as if God had turned a dripping faucet off. Perhaps He was right: enough water had drowned in words’ detergent froth. Now what? As I looked into the mirror it seemed tired of reflecting me. What was it then that turned to face the morning, whose streams of light moved me along anonymously intent on everything in the created streets? Adam’s naming of things, and not Eve’s apple was the Fall. The snake? He had only one letter to write endlessly in the unlettered grass.

Coffee Cantata: Die unerträgliche Sehnsucht

Certain moments of beauty that take you by surprise so brutally uncalled for embarrass you with tears because they reach behind the Roman stage for street living and recall the primal hurt, the raw shock of incarnation and so become torn satyrs like Marsyas exposed to light. Why did Bach have to sneak into of all places the comic Coffee Cantata-- before Mozart’s Nozze di Figaro-- the sublime trio with so trite a text as Die Katze läst das Mäusen nicht?

But isn't that just how it is with life, when all that you are is interrupted in its casual business of lying by the unbearable played longing of the life left behind you in the stars?

RS [Reality Sandwich]: And we seem to be on the verge of confronting this new reality, this encounter with the transcendent unknown, on a mass cultural level. As increasing numbers of us spend all day immersed in the ethers of cyberspace – as shared experience becomes more spontaneous, immediate, and rich, and the boundaries of discrete selfhood are called into question – it gets easier to see how cultural historians like William Irwin Thompson argue that the spirit world is again an inescapable aspect of modern experience.

"Telepathy" vs. Telepathy

Submitted by Michael Garfield on Mon, 11/28/2011 - 14:44.

Two ways to answer this question.

1) Charles Stross's answer to the issue of whether a computer that can reproduce the *(KNOWN)* functions of a human mind is, "Does a submarine swim?" In some sense, yes, this is telepathy, in the same way that the internet is astral projection;

2) In EXACTLY the same way that the internet is NOT astral projection, computer-mediated "telepathy" is a highly suspect mediated replacement/outsourcing of an innate organic function of the human bodymind. William Irwin Thompson follows Rudolf Steiner on this one, suggesting that we're all polluting our etheric bodies by spending so much time in the incoherent electromagnetic radiation of these devices...making us even more dependent on them because we have forgotten we can walk without the cane.

I know you're half joking, thank God. No, I don't think the cloud is an acceptable substitute for empathy.

Review: Anarcho Grow: Pura Vida in Costa Rica by T.A. Sedlak ...

<http://www.celebstoner.com/201003203964/reviews/books-media/anarcho-grow-pura-vida-in-costa-rica.html>

20 Mar 2010 – T.A. Sedlak's Anarcho Grow is the best marijuana adventure novel since T. C. Boyle's Budding Prospects.

Saturday, 20 March 2010 17:57

T.A. Sedlak's *Anarcho Grow* is the best marijuana adventure novel since T. C. Boyle's *Budding Prospects*. Sedlak's protagonist Ben Starosta grows pot in Costa Rica, but the CIA is hot on his trail. Can Ben stay out of their crosshairs while he enjoys the "pura vida" in Central America?

Anarcho Grow Ben's a self-styled anarchist whose cultivation and smuggling scheme benefits the ticos and ticos of Quebrada Grande, a mountain village north of the country's capital, San Jose. He's a regular Pablo Escobar of pot, giving back to the community, which earns him the locals' loyalty and respect. Ben has one partner, Chi Cho, and a girlfriend, Daniela. Sedlak's picaresque takes you deep into Costa Rica's lush jungles and dusty towns. As Ben chows down on a morning bowl of gallo pinto or he and Daniela tour a coffee plantation, you're right there with them, breathing the fresh mountain air and hearing the the yelps of howler monkeys.

Their problem is Bill and Ron, the two CIA agents charged with finding Ben. They're classic Ugly Americans, especially Bill, who chain smokes Camels, drinks like a Costa Rican grouper and has a hooker in every town. When they finally track Ben and Daniela down hiding out in the shadow of Arenal Volcan, their capture is brutal and swift.

Can Ben and Daniela find a way out this colossal jam? Pick up a copy of this quixotic book to find out. At 235 pages, *Anarcho Grow* is a quick, compelling read.

Marilyn Welch

Props to T.A. for getting the review. I got a copy of *Anarcho Grow* from him at Hemp Con in LA in February and loved it. While it's a book that stoners can relate to, it's one that non-stoners will love too. If you're a reader you have have to read it. If you're not, this is the perfect book to get you going. I read it in less than a week.

This video is a Neal Adams animation about his theory that the Earth is growing. This collides with the Pangea theory. Watch it, you will be amazed. youtube.com/watch?v=f_jRcZx6LCA

your theory is by definition ragged but i like it ...don't see how we cannot have both subduction (*even superduction both wet and volcanic as i understand from the vid*) and growth.

Wonder if you can reconcile / fortify with or refute 'genesis continuous' with this. Lemme know.

4 days ago - (*Jose Arguelles*) Dip Recession turns into 10 year Depression posted on 26/12/2010; Quran and 2012: Evidence Hints At Event Types and Locations of 2012

<http://www.heliwave.com/> Ali Adams - 19 code software developer

Quran chapter #55 has 31 repetitions of a 4-worded verse:

"Which of the bounties of your Lord do you (both man and jinn) still deny?"

at locations 13, 16, 18, 21, 23, 25, 28, 30, 32, 34, 36, 38, 40, 42, 45, 47, 49, 51, 53, 55, 57, 59, 61, 63, 65, 67, 69, 71, 73, 75, 77, with a sum of 1433. – Considering the current Islamic year is 1432 (2011) and the number of words in this chapter = the number of days in the Islamic year 1433, then God is maybe pointing to the year 2012!

If this is the caes, then every word in this chapter points to a day in the Islamic year 1433 and as the verse has 4 words and repeated 31 times then one can expect 31 events each lasting 4 days in 1433 Islamic year. The first event will therefore start on 14/02/1433 == 07-Jan-2012 and the last event will end on 23/12/1433 == 07-Nov-2012.

Now, I have the feeling that certain forms of wheel sieves
can help us a lot in understanding prime numbers.
I can almost find the next prime from a given number
and it has become almost boringly trivial to me, today.

If you can point to or find more-or-less interesting
properties of wheel sieves, that would interest me.
You can interpret these properties however you want
but what matters here and for me is understanding plain dumb Maths. yg, back to FPGA-land.

A new finding from the Quran regarding the year 1433AH (2012AD)... This is a theory which may
or may not be correct, God knows best, however, we see no flaws in the theory and therefore
the information must be made available to skeptics in order to give them the ability to disprove
the theory - should they find a flaw in it. If no flaws can be found we can reasonably assume the
theory is correct. This is REAL and involves no numerology or astrology. Is it straight statistics
which **God Himself** uses:
Quran 72:28

"So that He may know that they have truly delivered the messages of their Lord, and
He encompasses what is with them and He records the number of all things."

"Those who choose to dismiss the evidence without evaluating it first are not worthy of survival.
Evaluate, check and double check, and start warning people before its too late!"

About Ali Adams:

After graduating with an MSc in software engineering, Ali worked all the way from a software engineer up to a software consultant with Versant Inc.

In 1999 Ali was invited by the European Space Agency for his valuable experiment proposal to study the relationship between gravity and time dilation.

In 2001, Ali met the founder of a new physics theory called Helical Particle Waves and together they extended it to give meaning to highly-sought-after questions like what is mass, electric charge, and magnetic moment.

After discovering the prime number patterns in the Quran, and after reading the wonderful book called "Prime Obsession", Ali was led straight to the 31 repetitions of the Merciful verse in the Merciful chapter. This verse was the springboard for Ali's findings about 2012 in the Quran. All pieces fell together once Ali studies this oft-repeated verse closely --- Please follow Ali's journey as he tells it himself and validate all his claims before dismissing his research as yet another noise in the Islamic library. <http://emergentbydesign.com/2012/01/06/make-2012-the-year-you-learn-to-code/#comment-48362>

allow me to begin and end slightly off-topic .. but really ... how bird friendly is twitter .. is coding a knowtknit nettor debtor not code forageage?

helianthos (solar foil inventors) claims to have clean ultra-light solar ready to go but the money aint showin and so .. a situation threatens where they have to let it go to a Qatar party (you know, those really proggy folks who love desert regreening so much they go out of their way to help, remember them?)

yesterday is i was out the 8 paces to our shed* and had a 'snaprush' .. quite a few 'milling mind' layers lined up so as to afford more depth towards the interior.

* - bordering the stardard gate (would stop oncoming speeders .. but speeding is impossible here, and it will in fact 'serve' offensively, disrupting the subtleties of the kind Philip Callahan was on about) in this neighbourhood with backyards facing, all roofs slanting to the middle with their high and lowside ... and nary a tree, .. the few here are severely pruned back every year ... though the ex policewoman relative of mine, put some espallier pears inside her portion of the foldin form of gated 'community' (on the edge of a 15 mile free view in most directions from the limit a mile across all ways).

I thought of how Jose Arguelles would have come to the stage of matrix / symbol-code / grid / magic square production and faith he reached in the last decade of his life. He was hungry for multi-ficticity (*omni-fictovore?*) and invested (*faith*) in the facticity of profound truths every one of his code crops (*fresh one every year, and i mean a whole new set, 260, 114, 113, 441 element ones, just to name a few*) reflected and genuine patterns embedded in and suffused throughtout all minds and milky ways.

I tried to accuse him of claiming to aim for 'garden culture' with one side of mouth and yet distracting from it through the other.

He thought all code fashions distract from the mnemonic mental callistenics that need little more than paper and crayons ... which is real cheap of him .. kinda easy to forget staying compatible with stuff at the bottom of the stack you're tip top toppling.produce E-wastes to the tune of a few damned sites worse than cars already. So, .. dunno about that but i sure as hell hate the E-waste growing to the tune of a few damned sites worse than the car industry related pollutions already .. and both combined aint nothing in the face of our financial code blowing up the real economy but hey, if you can't or don't blow your mind with lsd in the water supply, there's other ways something like that will happen anyway right? If not (*the*) right, then the wrong and hard way around.

Can code/'compease' help us become aware of just how hazardous our own exceptionalist 'concockshuns' are when left free to circulate. A good part of my mission is to help friend and foe see the computer is/as the great destroyer of all (*the industry can be[[come]] just as good a war mobilizer as the oil one*) disguised as the compost heap/akashic record of the mind, the miniaturizer and cutifier of its grotesquities, ... a preserver of it (*as it outlasts and skips mortal memories stacked and squared*), .. as a quarantiner (*toxic debt*), as a reconstituter, crotchety nanonotchery, delivering on demand clean unsullied crease crimp credit bleepsheepbits to replace the vacated and zombified ones.

hard money .. firm grip, soft sell some compost pile segments cool while others peak and it's like a clock with hours left and hours taken.

But what choice do we have on the community front? The Jose inspired and viralizing(?) 'Crests'? Les Visible's Shangri-Las? Damanhur? A subterranean temple .. is a brilliant excuse to produce excellent dust (essential conditioning for vegpatch, orchard, compost, homestead backyard, socially serviceable commons, neighbourhood central bank, etcetera), clandestinely too (the virtue of quiet by the bucket increment, even as you could fill a 5 bedroom house with the stuff sitting there in plain sight alongside a

country road (not to mention they try subtly and undetectedly wow visitors with subtle trick of duh lightknobledge on paintings). Well they dabble in clay coins too so that would be my choice i guess.

all the rest of the places you linked recently in a 40 comment (superhero) thread offer expedience and improv after the non-confrontational OWS attitude fashion, dicate and stylistic. Dancing with stores (not their dumpsters but front doors, global in the flesh gaming, riddle solving, passage rite packed, grow a group (the fuckpool) up therapy atmosphere. Did i mention elite tuitions so you can afford your 8 mil hold out? I better not. The young naive and energetic (blessedly? NO! disastrously!) do not know they are robbed of and missing the kind of curatorial qualities i cultivated to the best of my abilities and despite obvious hang up handicaps, for 3 decades worth of lifetime .. to no avail, lots of twistors and distortors discernable in and through the corners of my eyes, but no plain takers, let alone thankers. These kids are on the other side of the same lifetime but the buffet paraded in front of them in hopes they break out the family fortune (or at least the lunch fees) has become kinda dangerous and resembles biting a bullet more and more. I don't envy them their position, despite the evil bonus perks they will be the beneficiaries of and use for the better ... clean out some tree nursery stock with .. secede with, or at best, prevent amazing tec from disappearing to Qatar with, .. cause then it would be squarely lost to the hands of the abusive empire. Then again, a film to stop the sand from blowing, catching all that sunshine .. not getting in the way of rain ... perhaps it will change the directions they are so dangerously sliding in.

The Dutch company Helianthos has been in the news the last few days

helianthos (solar foil inventors) claims to have clean ultra-light solar ready to go but the money aint showin and so .. a situation threatens where they have to let it go to a Qatar party (you know, those really proggy folks who love desert greening so much they go out of their way to help, remember them?)

.....and worth considering in, sending throughout and consideration by....

A gogglebox made of plastic and worse to look at and yet through, + , = A gogglebox made of plastic and worse, to look at and yet through,

.....which they are now, still green behind the ears.

Peter Champoux lives in Greenfield Mass and makes a big deal out of lots of places laying rings around the world that reflect aggregation state boundaries of planets and other, literally, farfetched stuff.

anyways, fun too see him do loooooong lines and clunky correspondences.

he plays on has name's audial similarity with shampoo and does bubbles lather and suds of 'strict observance' as Chico Kurt likes to repeat often.

wheels within wheels of various colours too, covering whole continents at a time. Free masonry and templars rock and money handlers alike seem to either take pride in set about securing the cutting edge of secrecy ... or be totally cagey and secretive (*Leedskalnin is the most spectacular instance of the latter .. though he was all alone, and exiled at that*).

youtube.com/user/snake85eater#p/c/803EEFD77E7B11B9 48 parts - Solomon's Temple icke gets to kick off this long harangue riffin on paranoia relating bloodlineage steerage to alien demonic devil worship stuff. He shows maps overloaded with arrows, huge logo collections .. sometimes sorted by totem bird ... culprit mugs that get strung INto each other via 'shotofopperty'

watched 15 parts, 12 was worst, all cut and past urban scenery snips in quick succession but also least pretentious (no words nor narration), then it gets into the superstitious hooey again that they set out to denounce (jews, templars, masons, djinn, magicians), they showed the theatrics of possessed and healers. There are much better playlists at this account but the holder is poisoning themselves with 'Solomon's Temple', stuffed with artistic imagination borrowed, collaged and taken dead serious. It's a very uneven series but all parts thus far are to me proof positive for the disservicable side effect of curating info gone wrong. These people are helpless unless restricted to studying compost, not doodles of the autist and artist.

LngsxULZvEM entertaining and slick but i say hoax alert caveat emptor. It's a 'best of' .. stuff by Haremein on saucers, a guy showing one at the back of the sun very amazing stonework, Icke discussing hybridizing and bloodlines, Dona showing an exact replica of the dollar pyramid and funny skulls from Equador near the Nazca lines, pointed to in precise masonry on fairly large and smooth river bolders someplace .. so their are parts of truth here (freshwater treasure map for pirates?) but on the whole we see tragically comics poisoned minds 'at work', like Pete Champoux admitting that 'his huge pleasure' experienced while playing with google earth (drawing long-ass straight lines) stems from him growing up with superman.

42 yo male

Thanks to a lot of useful inputs (*Eugene*), I think I may put forth a very basic introduction to the alphabet.

1 ? a the leader of the pack, and the fool. In greek, means without.

2 ? b the birth, the world to come, Isis pregnant. (*may be pronounced v*)

3 ? c in fact g for the pronuntiation, the uplift, the wheel of fortune

4 ? d the division, the tower, the delta

5 ? e calling, the emperor is calling out, E is a head with two hands waving at you

6 ? f or u stigma, digamma, sex (*hierophant*)

7 ? z creation, we're all zoo, word and sword, the lovers

8 ? h the fence, the chariot (?), like e but with hands crossed

9 ? (*thêta*) the shield, the strength, always keep your eye open, not a coincidence they removed the letter in the latin alphabet. And that they put ?eos under the carpet.

10 ? i a phallus, the hermit (*shagging ?*), the individual

20 ? k the palm, the writing, the sun

30 ? l the leash, the judgment

40 ? m the water, the sea, the hanged man

50 ? n the life, the snake, the death

60 ? x support, temperance

70 ? o the eye, diabolos

80 ? (*pi*) the feet, the empress

90 ? (*sampi*) the plants, the star

90-100 ? q defecating, the moon

100-200 ? r the head of man, the magician

200-300 ? s the backside (*no correct word in english, postern?*), also bow !?, judgment

300-400 ? t a cross (*ing*), the end, the high priestess

After that, you can have additional letters, but I'm not very versed in their gematric signification. When having a word, any word, just deconstruct it to see if it is consequential with its letters. If not, look at the history of the word, you may find very informative trickery (*truth the word in its real sense*).

"village treehouse" ... 44 pissfuckingpoor results .. the self mutilation of the insular speaking here i guess. Or it reflects the fact that most villages got started as a refugee base of some sort and the desultory mood under which it got going (*ma*)lingers.

<http://www.hippie-film.com/>

In 1969, Howard Taylor bailed out a band of 13 young Mainlanders jailed on Kauai for vagrancy and invited this rag-tag tribe of men, women and children to camp on his oceanfront land, forming an hippie treehouse village that lasted until 1977.

And what is that gal (*who played against Elvis in a famous Vegas movie doing now? Bruising herself making horror latex killer moves that's (t)wat, what did you expect*).

long thing from 08 by guy who loves ufos and claims they live within sight of him in Mt Adams.

it works like this: whities dis- and damn near replace reddies .. so after a while it stands to reason the ricochet blowback upchuck placetrade - like a role reversal of a lover who performs what he hopes to receive - regarding those whose place was taken as a fate bestowed will bounce and 'resurfumnavigate' to a fate received and suffered, as just such just give and take in things is demonstrated to us daily on both micro and macro levels.

low, fears arise, a similar fate will take a bit out of the occupation force asses .. and so the cowardly round about way of dealing with NATIVE AMERICANS is to place the problem at some remove and go all atwitch

and aflutter with mashups *(the rabble does another rousing rubble rumble and pretends it raises bridges across the gap between re- and preplay, trying to close that timegap so interest payment can be terminated and attention turned elsewhere, so we try hold that which is held inmost and held in most, that very stuff, up and out, far enough away to get a gawk, a gander, a glimpse, to end and expel the NotSee ParaSite).*

return of PM on Masonry and Templars What they supposedly dug up and carried or carted off might have been as enlightening and heady as a mere/principle, so light as to be virtually weightless, powerful cause it kindles gullible kinds of factfree faith like no other: secretiveness, irrespective of subject, valuefree in/as 'principle' and corrosive to real value - so an anti-principle really, the grand opener of the stackable scalable dimensions between bluff and trust, much like, .. exactly like .., an earlier foreshadower of fiat currency. The temple looks like a prostate man from above by the way, as per 2002 Tony Badillo

Now for a better 'openin' Take rock, look deeply into that, dig it up. It can't get "dark and sinister, demonic and magic" in there unless you dive in and bury yourself.

I say instead, shave and grind a little off of the surfaces (from such sterile insularity) and sprinkle what you gain by that effort on the compost heap through which you lead water in nice clay forms. Congratulation, your 'secretionotion' rewards you with hot water. THAT method tweaks and budge(t)s borders. THIS gets kept from public view and knowledge. All the petty puzzling regards the schlepping of marked borderstones and pet named paragons (pillow, corner, fallowsiever, whatnot) around through territory your dumb visual bias misleads you into claiming is a mere thread in comparison to the dimension of this limit to bioregions, levers to cultures.

<http://mormonmatters.org/2010/05/13/circumcision-rock-roll/>

The twelve smooth, rounded river stones symbolized Israel circumcised, analogous to the smoothness of the male reproductive organ after circumcision; a new spiritual beginning in a new land. The twelve rough stones taken from the dry land represented the uncircumcised male organ; placed in the Jordan to signify death to sin.

now really. i have throughout the eighties built pages about the shine/shade type divides and differences (which can vary from razorsharp to wide swaths of sacred land .. where you go to fast and feed the psyche, carrying gifts allowed, loot not).

Anyway, here's the pillowrock as formation under/vs/against the founding father's head as information unpack hardness - weigh down light, weave it green together over/past/through grey cloud and grey dust, both fresh into the compost soup to sup the plants. Presto.

i'd nevertheless give it a spin, it's a musical performance if anything. i visited with him a few times over the past decade .. he's a bit of an extremist in every way, the best of them.. and in some others i cannot follow him on.

Same goes for the menu put in front of the large AZK audience he adresses here. They are served one of them twitchy twatch hoor en wederhoor recipes (*in the interest of fair and balanced but the pivot/pillar this whole maresgoinground seesaw circus hinges on is taboo taboo trice taboo*), suffice it to say they flip from hysterical fears to overconfident superstition ready willing and able to make all sorts of false and unfounded care taking claims cause that claim alone is rare enough to warrant a high price, so high, all have to pay but since the claim is to serve all a ciclo is concluso even if it's a vicioso one no sane person would sustain. ... anyways, have a listen: Seilschaften deutscher Gentechnikbetreiber Monsanto auf Deutsch - http://www.youtube.com/watch?v=B_p38HxAar4 biotech-seilschaften.de.vu

I just freshly thought of his anti-GMO activities in a new light: don't they contradict the regular lefty staple multiculturalism? Ain't it a 'purity' meme that JB and his antifa buddies like to confuse with violence and prepare for the latter not because but before the others are (*for real before before the others* supposedly are*)? You point at a nigger in the sand and say, i have to go through all this trouble raising an army bycause of you. The possibilities to help (*regreen a hurting culture's soul and world*) gone awry. But his genuine convivial concern is exactly what makes Joerg a raging angel of vengeance, he says quite plainly: hunger is murder.

pretty good but really empty window dressing and substitutionalist, like taking pillars for trees (or trees for pillars rather): here's a little something made in 98: <http://poetpiet.tripod.com/foreword.htm> alas the gamble house pop up wars blocked me effectively and the lefties that scoffed at me for using this kind of 'free' server space (and U facilities) instead of their radical make shift stuff were right, even if they went on gut feeling and had no use for me either.

on Drew: the man obsessed with shit can't but cerebrally spout it .. that's why he claims to have his rise to his head, 'leak through his gums' etcetera, he needs to be loaded, it's the ammo that keeps his prowess boat afloat.

oops, just realized i confused abel and cain w jacob and esau ... guess i have to look at WIT's charts again but i'm pretty sure they sort n stack easily enough

first post .. so i'll begin giving the moronic mastadage a little notice: 'deny ignorance' .. what? Access? Access to what? Full rights? Right to what? Deny ignorance the right to ignore (in the spirit of disowning disowners, dusting dusters, take work out of people's hands, help out, obsolesce professionalisms and other idiocies? Right to work, look stupid, looka bizzie????

Now, Drew banned me around about a year ago but i got 4 solid years of diagnosage (diagnosiness?) in .. partly cause i recognize a lot of my own inclinations, talents and .. ehr drawbacks in him and partly cause i choose to care for aging parent also.

Just the last few days i get the devil around me ears to so speak.

most of yall proolly ran across truthiracy 1 2 or 3 (and as many times even if try run around him)

very emphatic about devil stuff, and a sroffy scrapper (martial artist of sorts, sounds confrontational in his vids but on radio with doubters & spycoollietours, hesitants and conectors he can be gentle i noticed last nite (hivemind1984 a full blown fabulist)

out of appreciation for the parts he got right and to offer supplementation if not completion i wrote him yesterday:

part 4 of jacob&esau by Christopher Lord, who makes them over into teeter tots, chinks and yanks, between sea/sun, water/fire, blue/red, winter/summer,features a picture of Norma Kassi, sami aigi, shown with large buck .. very close, friendly and beautiful .. couldn't locate a copy via google images ... and the one vid i found shows who Palin is stealing her thunder from ..

Frequency is a Western term already assuming sound as spatial distance. 90% of human history used the Perfect Fifth-Perfect Fourth-Octave intervals as complementary opposites so that is the proper "tuning" system -- just the simple 1:2:3:4 intervals and that's it.

The point of sound is to resonate into light as healing energy.

That's a secret that has been covered up since Plato and Archytas used symmetric math to cover up the complementary opposite noncommutative resonance of the 1-4-5 intervals.

Frequency assumes a symmetric measurement of space to define sound and so it ignores the time-frequency uncertainty that is noncommutative because the Harmonic Series diverges and so the Harmonic Series can not be contained symmetrically.

That's why the Harmonic Series is the invention of the Devil.

Reading and writing are left-brain dominant so they go against the secret of sound as healing energy -- reading and writing compete against right-brain dominance through nonwestern music.

So we have left brain dominance to blame for tearing into context with more and more ProTection necessitating savvy and not leaving Agbogbloshie any. The root of this devilish bait and switch deception is to, instead of prizing the dust carved out of rock, discard it in favour of (directing effort and attention to) the evacuated space .. then 'pry(ascry)ing' loose to portabilitate even the mere shape of it.

I'll go over that again, a little more slowly: admiring said markings and turning that appreciation of emptied / abstracted volume into a mirror flattened / arbitrary / sterile meaning and, yet further down that same trajectory, into a source of professionalism, arguing over letter shapes, sound and unsound signatures to assign meanings and convolute codes in order to sort the hi-rise substitution and

machination of stature, all in the name of accuracy and entitlement (a superstitious hope to achieve and maintain the perfect incontrovertible command via magic formulaicism .. the devil playing god).

All this dickytrickyness disregards the photosynthetically and vitally meaningful sounds set in motion by the original expression of the impression*: dust. THAT music matters (on a par with teeth in an apple) and if handled right, can echo and hold up for millenia (compost, soil familytreehouse settlements in rotations of thousands of years, some started and (parts of it) finished on every block any given day.

* - a church, temple or headstone construction produces 'waste' and a space to express a little faith .. and one wonders if it'll speed and expedite, inspire the impression of yet further rock. Noone stops to wonder if this type of 'growth' factor can possibly impress the yet unredeemed not yet converted rock.

robertinventor (*discovered yesterday, i think it popped up as youtube suggestion in that Barbara Hero vid Drew linked*) did loads of candy coloured animations with simplistic node/note lines or/and rings arranged in various configurations, complete with their own size bouncing ball.

He goes up and down them once, adding one (*speed/size unit*) per cycle for about an octave in most vids, he stacks them progressively in very neat and clean incremental and orderly growth fetish fashion ...One can argue whether that is for clarity sake or an indication of sterility that characterizes and alerts to distractions from truth.

right there ...

most methods of rock dust production for instance accomodate and by various means of classification and sievery work around size-mixes. for life health and happiness to distract from this truth we need harrowing poison indeed and it never completely succeeds. That's why the evil ones often make a public spectacle of torturing aspects and principles of this or that elemental common sense truth ... like mixin = good ... hey presto let's mix humans and species ... every neighbourhood a mix of invasive mayhem and unlikelike museaticompo. correspondingly stagger sized balls bounce back and forth on (to each his own)

'on'? shouldn't or mightn't that as well be 'against' (irr. compl)? Nevertheless, I resent your (title's) double negative (mind over matterite squared) visavis the statement of the most ethical repair admonishment possible and imperative in devastated and abused terrestrial environs such as we find ourselves in: reduce complexity. Yeah .. i may bring this up to the point of distraction according to some but that's to compensate for hordes of races who do the opposite .. and besides i change audience to not unduly burden them. I am a firm believer in hints and light touches when it comes to the hardest and heaviest issues/problems.

You are nowhere near indicating the fundamental and foundation levels in question, but assuming you don't deliberately distract, i will offer some incentive: (Bed)rock is complex (RoCOhmPlex) n Complete, rock mixed as widely as the ice ages and largest rivers have was prerequisite for taking abuse and feeding populations, even most fresh local rockdusts are eminently reducible .. with similar effects .. i know the oil crisis .. upon crisis .. blocks our views and grasps of the much much older, more (and more easily) solvable Soilcrisis.

All the above is a negative way of saying: give my 'crushing passion' playlist a once over and go me twice better providing a clear as a bell answer to the Q why the devil asked jesus to turn stones to bread?

Vital truth, even if it comes in at one millionth of a percent worth volume wise in big fat book (kinda like Joyce's dribbling a 'mugfulamud' into an ocean of intoxslurs) and on top of that is 'raised' as a spectre jesus luckily handled for us once, for all and good.

near the middle i am confronted with astounding sophistry, i guess you quote a critic:

"The partial (mous) trap absorbs base and resting surface into one, which constitutes a reduction."

wait, you want a base absorbent enough to lay your trap to rest in .. or a surface to rest it on?

reduction is here -- as with most of your detractors i imagine, used as a simultaneously accusing and punishing crowbar to test theory for leaks -- taken to denote an ugly, yet revealing, therefore hidden secret (takes one to know/make one) Like in this case the irrelevant conflation hard and absorbent, root, rest and mobility (a preoccupation of the migration guttheisser, take note). Since the turn of the millenium i have endeavored to stop 'multiculture' from usurping and pre-empting the more fundamental, honest and much needed root and role of complexity, as indicated and to instead, sanction and employ diversity of minerals; put that in your play and poke it. To see it is to see to it, vision to provision. Don't remain a blockhead about locked rock

your last words:

"leaving vastly inflated claims of evolutionist (hand pricks balloon - plop!), reduced."

brought on a scientology ad in the same colours you used there ... kinda scary .. but it proly was just coincidence.

Anyone have a good book recommendation?

their music will furnish the answer". The 'quality of music' is referring to the frequency, and mathematical intervals. After the post for Kin 157 was posted, Grayham 13 Eagle [privately] pointed out that Melchizedek's Merkaba does not conform to Phi principles; 432 is not a Fibonacci number... But the importance of frequency is well-demonstrated in this video.

grayham (02:19:20):

hello again a few points;

1; our sun is even closer to aligning to galactic centre around 2222 even though now it is traversing the galactic equator.

2; 432 is an angle of the dodecahedron, add the surface pentagram angles of one dodeca the total is 2160 number of years in an 'age' (*Aries, Gemini etc*), 12 dodeca or $12 \times 2160 = 25920$ yrs in a precession cycle.

3; there are 120 codons in the complete set of DNA not 64, once again this requires a shift from using the cocooned incubating cube as a reference to the open heart repenting dodeca, see here the expanded DNA <http://www.codefun.com/Papers/Dodecahedron.pdf>

its as simple as

its square to be in the cube, incubated, cocooned

six points define the Melchizedek mekaba (*fits snug in cube*), or 'i put a hex on you', meaning cut off from Source, but hexagons are useful, in music voodoo and trance music is 3 beat, think of those movies where a person gets fully entranced by African, Arabic drumming, useful it builds charge in the aura.

5 beat creates pent energy fields, repent, opens heart, spirals, accelerates, zooms right on thru the speed of light into no-time, ah home at last, the eternal now of cosmic co-creatorship

hilarious, these guys are infatuated with turning 5.15Miles into a radius .. errrr, i mean diameter

Willoughton

Willoughton - Knights Templar 5.15

Willoughton /Faldingworth.

Willoughton was an interesting discovery ,geometry wise, because the pattern is not the typical pentagonal shape related to other templar sites yet the geometry still has significance within the major sacred geometry patterns. Willoughton also had at one time within its geometry a hermitage as well as the preceptory, it was also the richest templar settlement in England due to its sheep farming activities.

Geometry, Caenby is a major feature sitting at the south end of the rhombus, as is the A15 going right through both circles cutting through the rhombus line that hits the south circle on the tangent. The A15 also goes through the centre of the South circle.

The major road junction at Caenby corner roundabout also plays a part along with the main road running east / west through it. This also runs with the line of the rhombus.

Willoughton's geometry also has a unique vesica compared with the others systems , one circle intruding more into the area of the other , yet just the perfect amount to create the required geometry. The North/South line of the west side of each rhombus go to significant areas if followed/continued South....one line goes to the Temple Bruer church, and the centre of the six pointed seal... the other to the cathedral at Lincoln.

FALDINGWORTH.

For a small complex Faldingworth is another interesting geometric system....on it's outer ring we have:

West rasen church - Eleanor wood church - Middle rasen church - Lissington church - Toft Next Newton church - Cold Hanworth church.....and ancient settlement, interesting to note the pathway from the SW triangle point where it meets the circle and the ancient village...the track following the curve perfectly, although not very clear on the graphic.

This also occurs with the Maltby complex , the Viking Way following part of an ancient track depicting the circles edge for quite a distance....It was this obvious curve in the landscape that jumped out at me.

The Toft Newton reservoir is also significant as is the origin of the 'Barlings Eau' being here, just as the Maltby complex has the river Bain starting near Biscaythorpe a very important area of the Maltby geometry.

. The above is based on a circle diameter of 5.15 miles ... 10,000 megalithic yards and drawn on the OS 1:25000

Drew page 30 Devil thread ATSecret

Drew: The Universe as a whole does the same -- it's origin is not in space but instead in a singularity of time.

So the Law of Phase Harmony is about this -- in terms of how when frequency goes to zero then time goes to infinity as phase -- and this creates reverse time by bending space backwards -- it is a white hole from a black hole. Reality is holographic and when we look out into the universe as space as black in terms of time it is white light as a singularity -- infinitely creating light and spacetime as energy-mass.

There is no "one" listening -- music makes us -- not the other way around. Frequency assumes some "one" is measuring the sound with technology.

The secret to the source of strange sounds is to listen to the source -- and this goes to a singularity.

Drew's resolution of space/time, bl&wh is really nothing of the sort, more like a denial and refusal to validate a sense of place - a stuckup lockleg blockheadiness that jives exclusively and reclusively with himself but, paradoxically, held up to the lights of and faiths in the emptyING) gesture flavors from around the world. Mister eclectic has done the deep reading it takes to sample from across the global incontinence project (*ilation*) spectrum .. and he does it as religiously as he feeds his burn barrel.

QiGong and the modern derivatives like updating martial arts into Choreografake theatricals to still the screenery hunger, Falun Gong (*a low budget grassroots sign symbolic of feilty to leisure, the moNOtheisms and everything [[from NOthing]] in between that has given us phony fights, phoney healings and mashed meme, you name it, .. count on SokalchumpDrew to say something pithy about it.*)

Yeah Rodin's geometric form is a torus -- which is the quantum chaos "double scroll ring" I had referred to previously in the work of Art Winifree for the secret nonlinear harmonic oscillation of the heart.

The heart is the secret electromagnetic brain spiritual emotional healing center that opens up the pineal gland -- it is the secret of the soul and the holographic singularity of the universe.

Art Winifree documents a singularity in the heart -- which means infinity -- this is also what CIA mind control scientist Dr. Andrija Puharich relies on for his ELF brain control and Earth ionsphere **control technology** -- Project HAARP. Puharich, of course, stated that slight changes in the ELF frequency were detrimental to humans -- and so it's a very fragile thing to work with. Then he claimed the CIA was out to get him because he tried to leave the CIA which you can not do. Then he died in a mysterious fire.

I corresponded with Persinger -- and he said Puharich's work was underappreciated and then he did a telepathy experiment the same that Puharich recommends in the book I was citing on ELF magnetic proton electron quantum relativity and quantum chaos. So Persinger claims to have proven telepathy by using a 7 hertz ELF wave on the right hemisphere.

So the thing about Chaos is that it's time based so really it can not be seen as a number. Consciousness as a singularity must be listened to as the source of sound or time - not by geometry. That is the basic Western mind control -- to measure time by space. So even chaos and Mark Rodin rely on symmetric based math -- the commutative property for Rodin's gematria.

That's why Rodin is not really challenging the Western mind control science.

.....

DenyObfuscation:

I'll check back when you're done trippin'.

.....

Haha. So you're either joking or making a claim about me personally without any evidence. haha.

Either way it's hilarious.

If you don't want to talk about consciousness that's o.k. or if you don't want to talk about nonwestern cultures that's o.k. also. But that's what this thread is about -- sorry to burst your bubble.

.....

The thing is, it's impossible to talk with you. I tried 7 ways from sunday to ask the same question to no avail. It just seems you either don't get it or intentionally run circles around the answer. I can't communicate like that.

.....

Well I've mentioned that in science now a person with depression can get an implant that sends a shock to trigger the vagus nerve and this increases the serotonin levels in the brain. Qigong works through the vagus nerve so that qigong solves depression naturally without any need for a microchip implant. But if people want to get microchipped -- then I suppose they can just get microchipped. haha.

Dopamine and serotonin are inversely related but the secret is actually the oxytocin of the heart -- so after the serotonin levels keep increasing from activating the vagus nerve as the trigger for internal bliss -- then the oxytocin levels of the heart increase and this then creates stronger electromagnetic energy for the chi healing.

Organism: Mae-Wan Ho Wisdom Jam

http://leyendomucho.blogspot.com/2009_09_01_archive.html

calendar post

<http://donsmaps.com/index.html>

very complete paleo site

Mae-Wan Ho, i am trying to say here, performs a science / gospel mash up emphasizing long views in the text to the point of a blur being the only way left to represent it visually (*but instead, images are sharp, abstract distant and up close natural*). It's a bioneer freak show ... a crowd still not over having their WEC root being intrigued and inveigled against, subverted and sabotaged by the space age tecnocritters like gmo and nuke industry soothsayer StewBrand .. still not shaken that infection/ affection.

A: decision/target, pounce, breach the living

B: precision/focus, squeeze, teach the dead to clean the clouds

A vs B = over- vs outreach.

visual bias vs visual blessing

red eye vs provision

A: short term, overstretch (*the luxury of turning love for moving parts, bits and passages into a hi performance sport that leaves destruction in its wake from/via willingness to sacrifice for it*) vs the opposite, the reverse, the inside out.

B: ...

This (*Mae-Wan Ho*) performance plays fast and loose with timeframes like the Matthew 7 passages, just before my all time fave (*wide vs narrow*) gospel text about intimate vs quarry, close vs prey, in vs out; door opening knocks coming fast on the heels of stone breading questions .. servants vs descendants .. but hey that's the fate poor chinklets and other asians have to endure. A crossing rife with censure, taboo, no no and 'left outing'.

On their urge to want to be accepted by the west .. placate their conquerors and subverters more like .. you could do worse than see Fekete's year old Silver and Opium piece to realize why nobody bats an eyelid when we *(sties)* continue to ruin them, this time we don't just deny them dollar redemption opps, the grounding they have earned by holding our paper *(finding few others as willing to, it amounts to a withholding, nor allowed to collect at source -- hey US treasury, can i have a little county or two here and there? This pile of dollars is bursting out of even the highest hi-rises ey? -- causing the artificial scarcity every trader likes but (the west continues to) ruin their chances of grounding even on their very own herkoemmlicher soil and territory, their continent, from the poor on up .. with E-waste!!!!)*

Lest somebody accuse me racism on account of asserting i am supposing they couldn't have managed finding a way into precision industries *(which miniaturize and massify, stuff they have experienced at various levels)* well enough on their own and had to be tempted and thrown i'll just pretend there's a hell of a lot to admire about the west and presto, proof *(as well as ancient subjugation recipe, hostage taking)*, their kids come to western schools. How soon they will be allowed to actual spend their credits on .. let's be modest, an entire province instead of a corner store remains an open sore ... i mean ... to be seen ... i expected a chinese showcase colony to begin on a greek island to make up for chasing them out of lybia but i was wrong.

I wrote much more today about how western music isn't all that far from Falun Gong in principle *(the latter hasn't had time to go from egalitarian grass roots to highly stratified and virtuose yet)* but this is long enough. Maybe i'll post that portion at ATS

sent to the corbett report

Drew, with nother few record breaking dribbles in the incremental series offering glimpses of Reiser, the mad Haarper:

Dr. Reiser states that we learned from Hiroshima and Nagasaki that not only does radiation cause massive destruction but that even those who survive "the baptism by fire" have children with severe birth defects. He then states that unfortunately that is how evolution works and that hopefully with the proper applied harmonic resonance of radiation then a new human

society and a new "World Sensorium" (*Newton's term*) will be achieved. (*Cosmic Humanism, p. 533*) The "World Sensorium" of Dr. Reiser is based on utilizing the radiation of the ionosphere and magnetosphere, amplifying it with high technology, and applying it globally to cause mutations. The effect is to achieve not only a higher dimensional reality but to harness the zero-point energy.

Reiser's ideas have been acknowledged as a formative influence on the work of Arguelles...." But the more disturbing aspects of Reiser's cosmic humanism plan as mass human ritual sacrifice radioeugenics are neglected by Heley who just states Reiser's book are "out of print or difficult to find."

It was on January 1920 when a numeration was issued for the first time: listed in alphabetical order, Hitler received the number 555.

In reality he had been the 55th member, but the counting started at the number 501 in order to make the party appear larger.

Math professor **Abraham Seidenberg** published three essays in the academic journal *Folklore* that connect his research to the Freemasonic ritual sacrifice origins of mathematics (*he references his other "ritual sacrifice" essays entitled "ritual origins of counting," "ritual origins of geometry," and "ritual origins of the circle and square" published in the math journal Archive for History of Exact Sciences*).

this is Drew under the influence of Zizek on Hegel

So the Emptiness is called "determinate reflection" in dialectics -- it means the opposite extremes reverse positions and then there's a fourth conscious reflection of this traumatic reversal -- the king is sacrificed as the conspiracy of spiral unity. Assassination of Paul Wellstone in MN is a good example. O.K. so the Emptiness still harmonizes everything. Conspiracy as "secret breath" means qi or kundalini energy.

McLuhan flippin over in his grave at this ugly kneadoughdiddle schloungeaslouch

77.44 9.28 he recovers and posts something more decent:

The Actual Matrix Plan means that the human brain makes the ultimate quantum computer -- so people living in cities and bigger population is good since it means more quantum computer powering for the new Global Matrix brain -- so there's Wifi and cell phone towers every where.

People think you're subhuman if you don't have a cell phone -- so that's how the mind control works. Next level is to think getting microchipped is "cool" and a good thing for various reasons -- health, safety, better shopping or whatever -- being a better consumer, etc. faster government transactions.

he then quotes a larger dystopian thing from The Science Network. April 17, 2007.

On my wishlist: a way to group subs under snarky tags, surround them with a tweakable colourspectrum, preferably linked to their horoscope and all point in time 100 years either way but i explicitly wish also, and before all that, for the whole computer industry to focus on becoming entirely compostable. Jose Arguelles prolly has the right idea.

ok, so the british were 'occupation' forces but americans are not ... nooooooooooooooh .. course not ... you sir are a laughable occupist and seriously misinformed about gold as the crude heavy drossy 'reflection of a mineral metabolismization process gone horribly wrong through toxic distraction *(ps: i meant extraction)* and standard shenanigans. Read Fekete at least. Looking back is all very well if you focus on how to get trees their standing and proper girth back ...

.. but you pick and choose from golden ages of privilege and exclusive secrets. Not a green bone in your body so you might as well carry on vying for kingship of the intermadhousenet here, don't mind me ...

ben padiah responds:

do not attack me personally for the views expressed in my videos. My opinions change, and you cannot know what I honestly believe. Now, as far as Fekete goes, I haven't read his works. I can google him and learn about his views.

.....

Now, voila, having done so, my reaction to "him" is this: if you want to try "real bills" in Canada, go ahead. We tried them? in the US as "greenbacks." When any bank backs loaned "IOU" bills-of-credit on ANY vaulted sum, it can lie, and then hyperinflation results. PEACE

An extremely small RNA molecule created by a University of Colorado at Boulder team can catalyze a key reaction needed to synthesize proteins, the building blocks of life. The findings could be a substantial step toward understanding "the very origin of Earthly life," the lead researcher contends.

The smallest RNA enzyme ever known to perform a cellular chemical reaction is described in a paper published this week in the Proceedings of the National Academy of Sciences. The paper was written by CU graduate student Rebecca Turk, research associate Nataliya Chumachenko and Professor Michael Yarus of the molecular, cellular and developmental biology department.

The Christian-Hegelian Comedy Slavoj Žižek

mary rose:

You have missed the point. It's your sentence structure that makes no sense. Adding more exposition on "determinate reflection" is irrelevant.

Yeah the logic of "corroborating -- only supporting" is based on time -- here's a good explanation of what I'm talking about -- how logic based on time changes sentence structure A CONDITIONAL CRITERION FOR IDENTITY, LEADING TO A FOURTH LAW OF LOGIC

<http://www.cheniere.org/books/aids/appendixIII.htm>

Gregory Bateson made the same point about logic -- but I already quoted him -- but this is also the same point as Žižek and Hegel with dialectics.

Ordinary logic does not account for the temporal aspects of perception, merely accounting for the spatial aspects. In other words, Aristotelean logic is a synthesis of primitive observation, fitted to the partial (*spatial*) reality emerging from spacetime after the imposition of the monocular (*one-at-a-time*) photon interaction with matter. In quantum mechanics, time is a parameter, not an observable. Hence measurement/detection (*of observables*) deals with primitive observation and Aristotelean logic (*topology*). Total reality includes nonprimitive observation - hence, non-Aristotelean logic (*chronotopology*) - as shown in Young's two-slit experiment. By applying temporal accounting to each perceptual operation, Aristotle's three laws can be shown to be self-contradictory and incomplete as written. That is, they are topological, not chronotopological.

MR (*on Bearden*):

He's not interested in sentence structure in his reference to time and logic.

And you're not talking about sentence structure. You're not addressing my question.

Instead, you're repeating your thesis about qigong and Western thinking.

Drew is really a satirist more than anything, he takes the piss while insisting on and assuring us that he is dead serious instead of keeping a steely faced pretense up .. about talking us out of our minds .. 'meditec' and 'meditthod' which usually goes/proceeds along the formula of directing attention to body parts, ushering breathing on instruction and command (*itself a self-consciousness arousing thing rather than the professed opposite*) and all sorts of semi-hypnotic singysongy droney drowse drownosies.

"We all have such an inner beauty. Our challenge is to see it, and to give it a chance to develop.

To achieve, we get a lot of opportunity's in our life.

It's up to us if we pick them up, and use them as food to grow...

We may trust our selves and enjoy our love and light in its pure form."

I am talking about music but not really theory. I am using theory to dismiss other theories -- because people have been mind controlled to think music as sound is time as geometry. Since light is based on time-frequency uncertainty then light as consciousness is an eternal process of creation and destruction. So the practice is the goal -- eternally. The truth is the process as the practice -- eternally. Again the biggest problem in the West is thinking of eternal truth as a static state of space - instead it is holographic as time -- so the future is reversed back into the past -- eternally. This is impersonal consciousness that's why it's called the Emptiness -- it is experienced in deep dreamless sleep that we have to get every night. So sleeping is natural meditation. When it is done while awake then it's true nature is realized as the process of making healing light energy as awareness - holographic awareness.

Here is a service you will absolutely love if you create your own videos and supplement your offerings with videos from sources like YouTube, Daily Motion, and others. Magnify calls itself a "video aggregation platform" -- meaning it is a place for businesses and individuals to pull-in (*or aggregate*) video content from their favorite video services. Then, all your favorite videos, plus ones you create, are in one place and you can manipulate and share them in a variety of customized ways.

Once you have your aggregated content from multiple sources, you determine how to assemble it, display it, mix and match, and reuse it, either on the free website Magnify gives you or your own. I often create playlists of videos culled from different places. When I'm writing a blog post, say on "how to add video to WordPress," it is now easy to include a playlist of video relevant to the topic, without extra work or technical difficulties.

Magnify has allowed me to become a curator, just like the stately little gentleman at the national museum!

Drew responds to poor Bible-hung nutter:

The Moon is the kidney energy that is white as fear but needs to be turned black as will power as yin chi energy.

The Sun is the heart energy as fire which is red from the blood yang chi energy.

So the Moon energy has to get above the Sun energy which means the sun must be turned black and the moon must be turned red.

That is the secret meaning of the bible quote you give.

9. CONCLUSIONS

As we can see, mathematics in music runs deep. The naturally pleasing ratios used in music are so pleasing **because of the mathematical principals** behind them, and all western music is based on the harmonic series. Modern tuning systems can be used to solve problems of modulation and consistency caused by the pure ratio intervals that our ears want to hear. Fourier Analysis is useful in modeling and **breaking up sound**, and the Fourier Transform opens up practical possibilities to model and define sound using Fourier Analysis.

yep, math applied to (*redeemed, justified by application to/derivations from*) breaking points of solids and proolly gelling points of fluids .. perhaps about their interplay once botany regains the status of revered instrumental prop (*bird prop, that kind of thing*).

The vid shows them red on white square crosses with little replicas in each quadrant ... which immediately brings to mind JA. how could he, who agitated against the church a fair bit, end up with something that fleshes out the rather evacuated version of the Church??? And is he not just adding barbs and multiple meshes to catch even more gullibles for the eager though jaded banquet gullets????

Funny that a lass (*hi cheaty*) retiring from a catholic school in one missionary position considers plans on doing some kind of hybrid tibetan divinativity (*get a whiff of some [[flattened* tibetext[[i]]]lure]] the 19th second of that vid*) on proly another church property 3 continents away.

Meanwhile nobody responds to my suggestion to find out just why Cernunnos is shown in the statue of a Rheims Museum, flanked by Roman gods.

I mean if there are elements of the (?) Jewish Messiah (*if that means anything besides the whole race or a golem lineage of some sort*), pagan sun gods, hunt-lords, Nemrod and Ceasar .. all mixed up into the Gospels, then why wouldn't such an accomplished person and/or archetype play a role in this maxmeshmatch???

and the following excerpt from that great Tek-Gnostic Saint, Hakim Bey. At the dawn of pre-history, it is said, humanity worshiped a Goddess who often co-existed with a male Deity, sometimes depicted with horns. Such figures represent humanity's elemental search for survival and meaning in mortality, a relentless quest for unity with the divine and the interdependent nature of the existential web.

Vividly decorating the cauldron's plates are scenes of war and sacrifice, bearded deities wrestling ferocious beasts, a bare-breasted goddess standing flanked by elephants, and a commanding figure with stag's antlers brandishing a ram-headed snake in one hand and a twisted neck collar or torc in the other. Most scholars agree this figure is Cernunnos.

NOTE: FairIP/CoopIP is not created for military use. If "Cool IP" scares "ugly" corporate boards away from militarization of AWE, that's really cool. Cleantech greenwash renewable-based "endless war" is a legitimate fear. An AWE arms race is already initiated by US military-industrialist profiteers, which will surely trigger the Chinese Regime to simply out-manufacture Daddy Warbucks. As Wayne German first called for, there should be a global ban on military AWE, just like the ban on military bio-engineering. Companies who base a biz plan on militarization without considering the risk of a ban may lose.

=====

Sept. 14, 2010 note: "Its hard to remember, but i think we gradually converged on "Cool IP" as the short term for all that is meant by our hybrid fair/coop/open-source IP concept It was somebody's typo or mistaken reading of coop that created it. It is flexible appealing & concise, a nice comparative term with all the other IP models. The suggestion is that CoopIP & FairIP concepts merge under the CoolIP tag." ds

Peter Beter fan ... with a stupid nick

abovetopsecret.com/forum/thread786954/pg1

4 page follow up thread to the 18 page long previous one on Peter Beter. The 'driver' thereof makes a big stink about him being real, conveniently forgetting that the overall characteristic of his work is unreality, or at least twisting and tearing the truth into unrecognizable knots and kneads, hyperbole. Overall aim and effect of which is to take folks travelling, to condone and promote great big leaps of space in order to remotate, remove and deracinate, to either acquire and/or prolong positions / traumata thereby obtainable in service of the circumcized: a jewified mindset that has no qualms about bridging distances, pastiches, running back and forth over foreign grounds trampling rights and livelihoods of those that happen to live therein. And that's part of the reason i can answer the following question asked by tbonethedestroyer on page 2 of this thread:

I guess I don't understand the overall point of the thread. . . It went from space shuttle tiles, to a Dr., to Ron Paul, to gold and now into the Kennedy assassination? What links all this together op?

well, easy, you see, the PowersThatBe (*scaleweightlifters*) like precision, durability and 'open' (*endless*) entitlement; they, in their, as do any and all egoic mindsets, like things to last ... and being so misunderstanding and out of touch, only succeed in making things 'blast', like taking things off the market and replace them with perpetuity pabulum. Money is then/thus, as in the Real Bills Doctrine, on the shaded side of sunny goldbuggery, no longer timed (*out*), timeable in real necessities no longer but in political (*propaganda*) cycles. Sometimes they blast off their planets altogether.

People like McLuhan did nothing but pave the way for/with shamelessly backhanded (*cutified*) blessing of weapons# via media savvy, part of and partial to jewified, ballistically and forcefully occupying idiots with aforementioned space bias. He nevertheless thought of himself as religious, while turning the disserviceable downside / mirror equivalent of the inner space LSD perks from in to outer.

By the way, exegete, scholar and extender of MM is Bob Dobbs, perhaps not coincidentally a big fan of Beter too.

= Rapid firepower is as celebrated as a legitimate source of righteous pride and proof they're on the right path as the length and spermcount of pornstars - lefty femme versions of that jewified usurabrubrubstubble crowd is condemned -

scaleweightlifters decided to become off the scale weight shifters and shipped our gold to the moon for easy safekeeping. NO water NO rust. Just kidding of course. ... The kernel of truth in all this is that gold

coins were (*historically*) despite the loss through wear and such, necessary to touch base, like taking a test bite to it (*pinch me, am i dreaming?*) not for teethmarks but to keep the much more voluntarizable money kinds in line .. hold them to their word. To understand all this Ulrich von Beckerath was essential to me.

Lemme attempt to summarize multiple millenia in one line:

A soldier is honourably out there defending freedoms* with as few coins melted down to turn them to bullets as possible .. in order to reach a state where gold, that tool of the distrustful, of the venturers and the polarized, lost and or stuck in a badly rocking dialectic between the much and no risk takers ... can just be turned to ornaments* since contracts and their enforcements have pendeled into formulas and formalities that are as easily as forgivably and inconsequentially mistaken for celebrations of success*.

Nowadays typical for soldiers fates however, are stories like this one:

OAj1Hlrbz0Q -- SustenanceNCovering op 1 apr 2012 -- 521 views

youtube won't let me check anymore but you might as well be the brother of the 'changedachannel' operator

this vid has the prettiest setting of the vids in my 'horrendous hell on earth' playlist so far (*27th vid*) .. if john galt ever arises he will hi-jack the monomedia to air vids like this one as a waker upper, i'm sure.

* = Utopia here (*and there ... at least*) at (*b*)last(?).

By then beauty is what issued from money that is let onto and into the ground (*what grew from that type of money* thus issued*). Study Cernunnos and compost. Mint coins from fresh rockdust*. Make bullets out of that for all i care .. just don't orphan them but follow up with water ... why didn't ghadaffi and his son divine my plans in this respect ... i could have ran an ex AlCIAduh permaculture crashcrushcourse with some manmade river water on a substantial amount of acreage .. instead of releasing them to fall back into their own traumas and western as well as all sorts of fundie semite hands????

I thought he owed me for having been there, been raped there, for discovering and admiring Barry Fell, for my championing permaculture ...

At this point ProudBird (*and Frater210*) almost convinced me to not go through with my momentary fancy of posting the above there ... don't wanna sully my good name you know. But wait, ... there's the gold bubble (*optimism [[tout court]], holding patterns, watertight measurement*) i have to say something about and Frater210's "Who wants to go next?" could cue/trigger my moon stuff yet.

Even more urgent is this: yall need to lend the meaning of the word secrecy that is most ancient primacy accordingly, so let's talk secretions as much as secrets, pollutions by better meat beaters, .. and how polluting meat can't possibly be better by any standard that's not slant and perverted, distorted, secreted and obscured, 'privileged' (*abducted*) off (*and away from*) public eye premises.

CHAPTER 12 MALDEK AND THE MOON169

TheAnonMessage - 75 vids ... i watched a good 16m one slick, vacuous, gratuitous co-optation and encryption of needed insight and practice ... the bit about 'multiplying infinitely' for instance is like playing dead or rock that speaks (*take your pick*), inviting squeeze and push against them, so their resistance yields .. fertility (*prosecution, demonization, going after the anons [making liberal use of that mask, one guy holding up a 'the beginning is near' sign] will result in constitutional liberty*). Still, the music is ok and the whole thing is in dark tones, the live shots are night ones even. They spell 'mobalization' (*east europeans proolly*).

The spoiling is needed to mobilize candidates; the willingness, voluntarity pretense must be kept up in order to blame the victim for the cruel slaughter. Warz of the genders, battlez of the races, wrangles of castes and classes, clashes of cultures.

So what do you think about TMQ's revamping of the whole sliding day issue?

good Q! why do dem damn dazies keep slidin n slammin into each other ... last nite i watched ozmoroid's very smooth delivery of 11 relativity vids with time factors grids, maps and whatnotplots, at times reminding me of Lehman's and the belgian's (*laetiusinpraesens?*) use of binarization (*I-Ching iow*), equal part division, in a attempt to share fairly hahaah!!! I'll stop here cause I can't possibly convey my feelings on it all anyhow, ... just flex widdit man.

just watched Higher Consciousness by 'finerminds' (*on remote viewing, personal growth, etc*), in one of their (*Vishen Lakhiani et al*) 118 vids (*seen 41thouX in about a year .. and a quarter already .. remember time is as fine as dust .. sometimes*)

How these Einstein admirers -- like ozmoroid who's plotting work reminded me of the 'heighth' worker's whose grids some of us ponder and pour, muse or bend over .. backwards too -- practically strafe Aldo Costa's update and scale up of an ancient idea (*to Ferris wheel size*) multiple times yet go on to try include the furthest reaches of chartable galaxies - i mean, .. go on to try capture quirky roastercollerspaces - in some formula or other, baffles the fuck out of me it's not as if their chores are done so thoroughly they have time (*off*) to do a max reachout and invite students in from the most unlikely places. Well, .. guess they aren't nor ever were out to release any prisoners are they?

physics, chemistry and mechanics???? All are metastatized abberations of beautifying rockfaces and beginning mini ponds /gardens beneath them ... that healthy permacultureful impulse got perverted, dumbed and numbed down onto the clockitdumb and rocketnumb disciplines which weaponized a gesture that could have been the crown and flower of earth (*lov*)ing

5UKa8yClRtM has the Achua (*Amazonian Indians*) appear in the 9th of 10 minutes.

are there maps or softwares tracking the trace and speckle show when planets and our very own sattelite shade, double and lap each other; did anybody plot such conjunctions into longass time lapses that can be revved and slowed?

I bet you not, too politically sensitive with puppet astronauts and fake terrorists thrown into and shot around all through the game as fund magnets and as if it were ... a blessing, like a permaculture seedball or something.

Now, to get from a to b we need to realize the personification of ballistics (*bullets, letters*) is what gets in way early, like you say. The little fight flight or eat love reflex, the fort da tickle, the toy guns instead of the fresh mudballs kneaded onto a willow whip and swoosh launched towards opponent / playmate.. we need a couples/groups balance that prevents going overboard either way into pornz/troops .. but then again, any place where rock and water and heat/light are available but miss weaving INTO and soil banking ON each other we have a wasted opp for duh farcical slapstick, an emergency. Nurture nature now!!!

NASA finds original Apollo 18 moon landing video after 40 ye.flv

youtube.com/watch?v=of9UQZZQ814

once again, a vid at a very small account showing vital stuff ... for a year already .. but ignored ... this is the splinternet effect for you ... crowded out and 'covered' by floods of sludge ...as in, obscured by manipulative and hidden/unnoticed by the tilted wilted stunted varieties journosies).

titu5al0n3 uploaded on the 17th jan 2012 -- 1038 views thus far .. and turned a comment into the vid description

Another funny fact is actually a sad one. A fake? documentary film titled "Dark Side of the Moon" is the source of the footage of Rumsfeld and Kissinger's "admission" that the moon landing was faked by Kubrick. "Dark Side of the Moon" was created as a joke and the fake evidence manufactured for the documentary - such as the "special unique NASA lenses" - has been accepted as real, as proof of the lunar conspiracy. How ironic it THAT?!!

If you really want to see some interesting NASA/Apollo images, do a search for "Lunar Reconnaissance Orbiter moon landing sites" . Have fun!

Thanks for the easy question! All you have to do is do a websearch for "Dark Side of the Moon (*mockumentary*)" and you'll find all sorts of links. The Wikipedia article is pretty concise. What makes the film work is how it throws in made-up stuff with real facts. For instance, Richard Nixon DID prepare a speech in the event the astronauts crashed or died on the moon. Happy hunting? to you and good luck! = TheStockwell

"makes the film work" ... as opposed to fun ... yeah, a piece of shite work too, in line with how evil jerks 'work'.

You know, the 'ones' who thinks themselves clever for thinking ahead and doing the stockpile thing ... but they don't stop at garden preserves .. nooooo . the fuckers ... they want the future and their 'discountdown' is gonna run right over you and everything in it's way. that means you too cause it's all in their way of being way off of what's fair and 'billijk' (*reasonable*).

This is how over generations, they mean and manage to get "throw in with" real foxes. Easy, you abduct, torture and artificiate the captives' lives till rage over disfigurement rises hi enough to weaponize it (*be very patient, keep score, find the leaks, defend the oasis, it's all par for the patricourse of Dot line volume 1 2 3*).

Now you have an edge to help you see potential targets & customers where'er you look; they'll alternatively adopt you, whince, then sell you their daughters ... then rebel ... try appease you again. GlasseyeSpinacho

1.24.12.7, Kin 8–Yellow Galactic Star

... The only purpose of the Galactic Federation is to increase awareness of God and the Divine Order, which can only be effected through subliminal feedback to input from the lower orders of time. –Dynamics of Time, 17.6

No shit sherlock

".... can only be effected through subliminal feedback to input from the lower orders of time."

don't let Drew Hempel read this or he'll pull out the Prince Phillip (*looking more evil and close to death by the day, his elephantkillin bloodlusttransfusion didn't cure him [[or was that a spanish royal? No wait, a Belgian one. What difference does it make]], entered hospital last nite*), Maurice Strong, his Baron pal, Reiser tandem spiel up again, ... automaton that he is -- par for public US courses for worked horses: PERforM!! in the sweat of thy brow and across the bones of those you hesitate not to kill and always resist remembering; it's the largest jew colony after the US (*they're downsizing you see*).

Reiser supposedly palled it up with Jose and is a radiogenetic changemaker, nine club member ... according to Drewbotboo(*s*)t.

Me, i have simpler gripes, that is to say, i prefer paring these headcase spookatronics down to whatever splinter of truth they hung and flung their crap on and go return it where it belongs, thus:

"input from the lower orders of time"

relates directly to Cernunnos, a genius who led and left a practice of which similarly woolied up traces can be found in the gospels but on the whole instead of turning deserts green it has been prosecuted by desert meme 'vectorushers' eversince.

input from the lower orders of time

.... simply means the practice of adding rock to soil, catchin carbon in and through it for better kitchen carbon.

i thinks this is primary an all good things come from above mindset would prefer the topdown appreciation, app reach approach.

Well, who am i to say dreams can only grow up and can't until after a vital component rains down from undefinably divine source? Mr Innumerable?

... you can be intent on touched content (*as in 'charmed existence'*) all you want, if it isn't summing to a just as practical as genuine intention to touch (*contentable itch to tickle and touch content*), it remains wishful thinking, a prayer, an empty gesture, no matter how complicated and pretty a ritual you make of it .. but the latter is a tell tale sign of luxury to space out, wow the gullibles, not a back against the wall need in the way a glorified visionquest was in reality a type of culling and/or gamble, groping for a new way.

the in touch (*intervention*) thing is a gardening instinct first and foremost. Don't let no book (*rule book lawbook or socalled, but fake, living word-book*) tell you that's off limits.

TreeFrog081 (21:47:07):

Hello, this is a message for Poet Piet. Hopefully he will see it here, or perhaps someone can send it his way. Regarding his statement that the Murals at the Evergreen Library were destroyed or removed long ago, this is not true! I saw them a just a couple years ago, completely intact. Perhaps Piet was confused by the construction of the new library nearby, which has a staircase with the usual offwhite walls. Also, the old library was under construction for a while, so this may have also thrown off the search. Anyway, they are still there and are valued highly by enough people that they shall probably remain for quite some time. Cheers & happy cultivations!

hi threefr how'zit blowin??? Happy Bloomsday.

Hope and wish you are right and i am wrong but i fear the worst.

Anybody care to dispell that and deliver a liddul .. you know ... evidence?

Several years ago I asked the peace vigil and occupy livestreamer Robert F. W. "Berd" Whitlock (*BerdWW on twitter*) who loves to take pictures ...

... after that i figured i'd never find a more likely person to snap the staircase

Hell not even you thought of arranging that did you .. a 'couple of" years ago?

Perhaps more couplinkin goin an than you care/dare remember, .. time flies remember .. been havin fun?

those are obviously fish with diving (*ehrr, ..waterfilled flying*) bells on, i saw one of them fishes i grew up with but hadn't seen for quite a number of years .. yesterday .. proly really pleased with the generous helping of porous lava gravel that lines the hardwood holding the bank at water and village edge ... a flat nosed superfast loooong predator with eyes up top, who waits in weeds to pounce on prey (*beaverslap type spectacle*).

maybe it's an octopus travelling cut up style ... speaking of which, i discovered a close relative born in the year of the flood (*Holland 1953*) is 8Sun and we share spell.

latest Stephanie (*South*) effort has the word garden in it around 10 times, permaculture none times, not one time. Lemme explain why i feel more inclined to write permies into my will rather than cresters ... the dreamspell is a globalization game that sheds all cultural clutter balast and restraint in order to roam. So far so good. It helps not so much pick and choose right and good time to associate and cooperative with such and such a personified part of (*other[[side of the]]worldly resonances as it does to recognize them when they show up ... quite easily, as if distance is meaningless, timing everything*).

The teamsort approach, to suitably suit you up and allot you this that and the other timeslot plus one or any other (?)wise syncable results or is said and anticipated to result in thoroughly rationalized tasks of

acquiring way more or reacquainting with way more senses than just one, namely the proverbial sixth.

I fear it will just rock the boat (*rather than boat the rock - rock into water rather than water into rock*) and result in more horrid extremisms than handy extremities .. the latter by definition from the fakinit faking knit world of out of touch publishing (*scratching one's prison walls is all that is, in the most sober as well as most exacting pointpinwin estimation*).

Wait you say, you haven't seen our party deco yet ... yeah yeah ... low budget furtive on the run pretense of meaningful relation to lights in all sorts of colours .. supposedly reflected in the cheerful grafitti ... such as a helmet cam of a rave deco guy in canada ... typical crowd the crests are aimed to become retirement w family life homes for i better stop before this gets too painful ... i haven't even said anything about the toxicity of that world. ... but did last nite, ... quoting myself:

19:25:55

apologies for my 16.55 yesterday ... a stupid mistake ... i really wish for a Crest, honest i do, prevents glitches like that to say the least ... 100 people on 200 hectares, a little watershed someplace mid EU??? What's the plan in Spain?

A piece of visual bias no amount of blind rock stacking (cleverly stacked blind rock), recognizable in a blink when granted the elevated status of mappery and piles of records. ...

Fuck that, you don't call a fish who survives the drying of his habitat by taking a flying death defying leap into a deeper one an space traveller do you, if mars wore and spun out we'd have had plenny of time to aim at the only possible place to go ... running a gauntlet for it too ... or perhaps that came afterwards. not in between, ... who cares)

The important thing to keep in mind here is that all that starmappery - as far as it doesn't serve botany but mass monocultural plantings instead, trying to separate into herd and varmint, in and outcrowd (all together crowding out everything) -was caused by taking symbols a tad too seriously and too far from home (for them to then still be 'valid' they have to be starbased ((/-struck)) but lose their roots evermore in the trade off, letting visual bias lure and suck us into the always and ever greatest biggest sweet and sour, beat and dour nothing. Thus epidemics of termitoid work ethics were unleashed with a vengeance, at a friction fraught fractility of Pandoroid proporZional (ratrote) rate (.... tadaaa!!! So, ... conclusion. What's your stupid universal constellation but a hype, a stunt? an argument could be made in defense of these 'galactists' as follows:

They try trigger becoming more social, aware and considerate, .. look further than and care for more than just your own immediate circles .. but as with most such attempts to scale stuff, the scaffolding is either dropped or taken to be used again further up, narrowing the range, i think economists call it something like 'prior advantage, head start; what all such rot accomplishes is neither cyclical nor natural, in fact it

doesn't rot, it poisons.

The visuals are very intriguing, the 666 ring of diamonds causing the cube to be divided equally 3 ways and a fleshed out star of david to appear are at the heart of it all and there's plenty other, less well known ones (they tend to tickle my collector gland, even this late in the game, close to the 'all is lost', no fairness and dynamics between the skyroot and earthroot people can possibly be set up anymore point), i'll soon use search phrase: "community of the cube"

Walter Russell did not obtain this information from studying Islamic Teachings yet they are identical at their core. This is proof of the divine Nature of these transcendent truths. The Universe is a Sacred Geometrical Construct with the Creator centering and bounding all

geometries from the sub atomic to the super galactic. All is one. As above so below. The entire Universe conforms to geometrical patterns based on the cube and sphere, which produce atom, solar systems and galaxies.

Let me be very clear about this however, since I have had to deal with fanatical religionists. I do not endorse Islam or any religion, I am endorsing Sacred Geometry and divine inspiration.

4th of july:

The Cosmic Eagle Moon and the Magnetic Hand Wavespell have already 'accomplished' several events and synchronicities.

The Cosmic Moon began with a sad and specific connection to the Thirteen Moon Calendar. The Totem for the 13th Moon is the Turtle who carries the 13 tones upon his back, within a perimeter formed by 28 smaller shells. The most unique representative of the 13 Moon Calendar died on Kin 27: Magnetic Hand {7.1} on the first day of the Cosmic Turtle Moon. [per TMQ] 'Lonesome George', the last of the Giant Tortoises died at the age of 100. "Staff at the Galapagos National Park in Ecuador say Lonesome George, a giant tortoise believed to be the last of its subspecies, has died...With no offspring and no known individuals from his subspecies left, Lonesome George became known as the rarest creature in the world".

"Lonesome George' alpha-numerically equals 166: 10 World-Bridger. It's Seal [6] and Tone [10] remind us of the precise moment of Valum Votan's Birth and Death: 6.10 a.m. Additionally, 166 can also signify 16.6 [6 Warrior] which codes Valum Votan this year [in spirit or ?]

TMQ resonates with Lonesome George's status as 'a unique representative of the 13 Moon Calendar' :) The 'Official 13 Moon Calendar' [as they refer to it on the Law of Time site] is linked to the Gregorian calendar. This means that the 7 Radial Plasmas shift each year, and twice in leap years. This increases confusion and irregularity, and weakens the intended telepathic link between the 7 Plasmas, our 7 Chakras, and the 7 days of the week. The 7 days of the week predate the Gregorian calendar, are more globally recognized, and synchronize more harmoniously [than the Gregorian] with the 28 day Moon.

Pacal Votan felt that returning humanity to the 13 Moons Path was important enough to merit his 104,000-year Samadhi 1352 and his 80 year incarnation, in order to leave the vital 13 Moon information upon his tomb. [details in previous post]

Valum Votan decoded that tomb and spent his life spreading the 13 Moon Calendar. He wrote many times that the first Radial Plasma DALI was always on Sunday, which begins every Week, Moon and Year. He and his wife Lloydine [Bolon Ik, kin 22] burned the Gregorian Calendar, to demonstrate it was time to replace it with the natural harmonic 13 Moon Calendar.

Why would Valum Votan shift from that stance, and begin linking the 13 Moon Calendar to the irregular Gregorian calendar? Why did he never write that the correlation between Dali = Sunday was now going to shift annually? Why did he never correct this writer in the approximately 20 times we met face-to-face? Why would he hand out the 7:7::7:7 Telektonon Revelation to 300 Kin from around the world, [Ashland, Easter 2005] without saying to ignore the DALI::Sunday...SILIO::Saturday on the 'game's playing board and 28 cards? Each time this writer would point out another article in which Valum Votan states "Dali is always on Sunday; Sunday begins each Week, Moon and Year", it would be removed...Why? Why [as recently described here] was the Long Count Date for December 21/22 recently changed from what is stated in the 7:7::7:7? [This 'Cosmic Question Mark' is a photo taken by Hubble]

....

For nearly 8 years, I have practiced the more consistent and harmonious DALI::Sunday alignment. The Day-out-of-Time [Cosmic Star] 2006 crop circle appeared 3 days early, in accordance with that system, just hours after TMQ performed the meditation which instructed us to ask for 'extra-terrestrial confirmation'. Other events, crop circles and synchronicities keep me aligned with the more harmonic 13 Moon Calendar. It is sad that my now public

adherence to that system has caused an unexpected rift. All who follow the 13 Moons in any form have so much in common; Let's focus on our alignment with the 28 days of the Moon, the 13:20 Frequency and the larger Cosmic cycles :)

He and his wife Lloydine [Bolon Ik, kin 22] burned the Gregorian Calendar, to demonstrate it was time to replace it with the natural harmonic 13 Moon Calendar.

What is behind the oft quoted stein phrase "there is no there there"?

The quote "There is no there there" appears in Stein's Book *Everybody's Autobiography*. When Stein returned to California on her lecture tour to the United States in the 1930s, she wanted to visit her childhood home in Oakland, CA. She records that she could not find the house. Hence, "there is no there there." –Sonja Streuber

Galactic Activation Portal Kin 39: 13 Storm codes Limi 13 of the 13th Cosmic Moon ----- 6 07 2012

CAUAC Kin 39
Blue Cosmic Storm

This is a very Cosmic and Synchronistic day! That feels appropriate for Kin 39, which the Synchronotron Number Dictionary describes as: "the coordinating frequency of the matrix of Cosmic Synchronization"

Happy Birthday to Neil Crystal Wizard :) Neil's 53rd year is coded by Kin 39, whose G-Force is Kin53: 13.1, Quetzalcoatl.

As the First Solar Witness [12 Wizard], Neil is the G-Force of Kin PVCS 60: Pacal Votan.

Tomorrow we will celebrate our birthdays on PVCS 40. Neil's name [14+5+9+12] = [SGF simple gematrical frequency] 40 :)

Even the Greg. Month [7] and day [6] equal 13.

The Analog is 20.13, and the Antipode is 9.13: Cosmic Moon, [9.13 is the G-Force for TMQ's year as 43: 4 Night],

and it reiterates this Cosmic day of the Cosmic Moon.

#####

Here are the Synchrontron numbers for this day:

Moon 13; Day 13: H: 15; V: 2; T = 74; Sp = 192; Sy = 57. Time TFI = 323

Space Matrix: H: 8; V: 5; Sp = 39; T = 154; Sy = 8.

Space TFI = 201 "201 frequency of kin 201, 6 Dragon, Rhythmic Moon-out-of-Time, 2012-2013 (*Moon in which old cycle closes*)

Synchronic Matrix: H: 4; V: 21; Sy = 39, T = 17; Sp = 316. Syn TFI = 372 "372: "Infinite mind wave evolves infinitely, vigesimal code 18.12"

18.12: Crystal Mirrorcodes the crop circle shown below, and most of the Earth as these words are written :)

323 + 201 + 372 = MTFI: 896. BMU [896 - 882] = 54, the SGF for LOVE. "54. 9 x 6, [This Moon: 15.13 + year: 14.6 = 9.6 = 11.11 + 18.8] 18 x 3, 27 x 2, root frequency lunar wizard, base of higher order of star codes. x 2 = 108, x 4 = 216, x 8 = 432, x 16 = 864 (*master time lens*), x 32 = 1728 (*12³*), x 52 = 2808, factor of velocity of God particle. 'discovered' this week:

<http://news.yahoo.com/god-particle-discovered-european-researchers-claim-discovery-higgs-101720774--abc-news-tech.html> 'God Particle' 'Discovered': European Researchers Claim Discovery of Higgs Boson-Like Particle (*ABC News*)

The respective Base Matrix numbers: 130 + 300 + 18 = 348. 348 29 x 12, 6 x 58, 87 x 4, 116 x 3, 174 x 2, Temple of the cosmic constant, vigesimal code, 17.8'

Today 19.13 + TMQ 18.8 = 17.8 :) Also codes A1d7r7, the Galactic Navigator :)

#####

Today's Guide is Cosmic Eagle, which codes the Second Solar Witness [195: Grayham] and this Cosmic Eagle Moon.

Blue Cosmic Storm

Red Cosmic Serpent Blue Cosmic Eagle Yellow Cosmic Seed

White Magnetic Worldbringer

I endure in order to create, transcending mind.

I seal the output of vision with the cosmic tone of presence.

I am guided by the power of self generation.

The Analog for this Cosmic Eagle Moon is Kin 104: Cosmic Seed.

104 years ago, on June 30, 1908, the huge 'Tunguska Blast' happened in Siberia on Kin 33, 7 Skywalker. Trees were flattened in an area of 850 square miles, and the skies of Europe were lit up for several days after a large comet exploded just above the impact site.
<http://paranormal.about.com/cs/earthmysteries/a/aa021604.htm>

Exactly 104 years later, it was 13.7 on Moon 13; day 7 :)

The G-Force of the Cosmic Eagle Moon is Kin 209: Magnetic Moon. 1 Moon is the first day after the 2012 Solstice in New Zealand, which is coded by Cosmic Star.

Dear Mystery Queen, wish you a very Happy Birthday and a year full of plenty self existing abundance. This galactic hoax from the star people reminded me on Eric Carle`s Caterpillar which has synchronistically to do with abundance :-). In the last blog you forgot one most important why! Why didn`t Valum Votan change his own invented calendar into Dali allways on sunday? When I started with the system in 1998 there where no plasma seals at all. And then as far as I know this current system was invented. Was there one in between? Which was changed

before or after VV's ascension? Hope you tune into the "One and real" 13 Moon system again soon.

Mmm, i didn't know about the Blavatsky, Levi, Lytton connection.

Still, the poem you cited just confirms my growing suspicion that composting is absolutely THE (most) tabooed thing of the present age. All and sundry try to steal it's thunder (cause it's real) but keep alluding vaguely only, nobody proud and fearless enough to say that composting is THE cornerstone of beauty. Caint get nuttin but dud magic without it. Stop all mediation, delegation and coNpost!

By the way, you can now wank over an entire book about Israel's Kidon assassination teams, Spies Against
Armageddon, if that kind of thing turns you on. It is unlikely to be any more informative than their previous
narcissistic epic, Every Spy A Prince, but it will doubtless be just as full of Jewish homo-eroticism, for the
delectation of lesser males – RB

i sincerely hope tmq will make an effort to go deep into the 19=260 material as it will be on the 109th
page, .. for a while anyway, after the next page set of posts pushes this next up and coming batch onto
page t2o (*page/0/ redundant formURLa for frontpage] which will then be at the freshly growing tip and
opposite, oldest end of the archive, page 110*)

Page 109 will be born just before and/or around the shig bift comin along right about nowhere ... hell to
pay if we keep getting it wrong and are unable to help those who have kept up getting it wrong, then defy
us with stuff like this:

Eretz Zen replies to me:

what are you talking about? The Netherlands has been already infiltrated by these jihadist pests.
Believe me, in 5 years from now, you'll be advocating for their eradication.

I thought of answering something along the line following but decided against it:

1: not if we cure folks from listening to the likes of you
2: not if we won't let you plant and perpetuate bias.
3: not if we can dam and stop the stream of victims who fall for scaremongering by the likes of torn and
split folks like you .. making them torn and split folks like you too. Not if we can help naive souls realize
there's nothing likable about you .. bycause A: you ignored all of that therapy i was on about and B: you
won't be until you have had some.

A distort aint served well enough with a mere retort

Pompous pontification on the edge of slippery slants, juggling toxic loads ought to spur all folks with more
sense to take measures that contain your reckless and not just death-defying but death invoking and
inviting thanatopianisms!!

For instance, it's seems to be all of the whole world of difference at first but in the rapidly oncoming end,
here before you know it, there remains but a small and inevitable step from recommending arms, buying
some for and/or sellin 'm to the side you're on at first, then to both sides only a few generations later. The
difference between being and doing, man and woman (*leftwist/rightwist racies*) in starkest contrast

The removal of fighters who go fight (*and don't really defend home turf at all, the estrangement and*

rejection between staybehinds and returning vets).

Warracketeer career / dynasty regression

Starting point is always what feels like the good side at first .. if you forget that the most important law in the land rules this bias: proximity and its conveniences. Intimacy so absorbing it leaves no time and resources to deflect and divert into defense preppery.

Another way to define the 'good' side goes:
those who take up arms reluctantly and for a cause.

Problem is that heavy industries especially have seriously generational effects and so when the circus has moved to areas with fuller pockets and hungrier eyes, they simply arrange to ship there.

When distance loses it's dignity and defenders to treasure and protect it, selling to both sides is next on the road to birth defect causing ammo, that's a long way from rock, spear and arrow tip, bullet, coin more bullets yet more coins live rite left right.. etcetera .. rockets roxtox .. end of the line.

Wars are over substantial resources with real or perceived value *(+A weighty thinks the simple folks can understand and tackle)* OR -Z ..) and many circle the same drill/mine / drain locations.
War buzz business is notorious for excizing feeling noble right quick *(reason are sketched out above)* and once in it, the desparate grab for the consoling illusion you help fair the fight will turn you into that mythically 'neutral'* jew *(the one who does not defend turf but sidesteps trouble, yet on closer look proves very secretly hostile to flows that don't flame).*

On the surface he aint picky nor rooted, a shallow opportunist
his opponents however will claim he starts trouble, then runs, leaving chaos and sacrifice behind after setting up payment and revenue flows for and from all the stuff poured into such brews to make them as hellish as they are.

The ExPellican

His minions and paid off upsiDowning defenders assert that, to the contrary, events, cause and effect, take the opposite course and go on to claim that expelling jews causes a country to collapse due to braindrain.

A warprofiteer's stance:

Wherever testy todods can be sold toy arms *(without their parents trying to expel one and prevent that sensible cull and prune effort)* one may later instigate war and profit from it

ps: no such thing as EretZen, nor CityZen for that matter, citification kills zen, cities are inimical and hostile to zen.

I mean, how noble of you to make solidarizing gestures towards the red and black races' reverence for dancing .. but i maintain we need exactly the opposite - not of dancing . or free dancing .. but of dancing free of roots, free of performance not in the sense of exertion, putting on shows, etcetera, but of bioregion maintenance, a dance that isn't overinvested like weekend church or holiday; dancing 'empty handedly' on the one hand and leaving offtime empty of dancing on the other. You and your ilk have managed to turn it into a celebration of privilege (*Ballet anybody? There's only so much pride and superiority you can delve from a trim bodymine all mine oh me ohmi*) instead of an integrated outed inner (*the ins of the out outed AND innered*) pageant/relief campaign - spin a flow, press a spin, grind a rock, use hot mud as an instrument, feed the soil ... it's the dance model i saw in visions from my early twenties ... then tried to pore over in thought, pour out in words and now feel i failed and even betrayed .. not so unlike the way i see others closest to it do ... through peskily distractive literacy ... even though i fulminates against all formality, formulaics, let alone magical ones, ... i nevertheless DID my wish to be someone's command ... and seeing how they stacked so well for all concerned ... and i left very very little out in the way of terrestrial stirrings believe me

Don't mate dance .. it leads to race mix and do a regression to matriarchal mass extasy.

You pretend to know how wholesome neotenous mobilizing is and recommend it. That makes you outright competition / and or potential pupil / seeker gone unsuccesfully astray and making do with delusional surrogates that require loads of headspinning faith to make a go if it, spreading over the top discordant hysteria, much like the horror vision you like to especially and targetedly dissociate yourself and free people from.*

Dancin ... prayin .. bondin .. 3 of the most problematically executed primalisms these day

youtube.com/watch?v=i31gGh9KcAo&feature=player_detailpage#t=674s

10.18 is THE most amazing dance move i ever ever saw ... so far anyways, looks like someone is doing aerial crocodile moves comin down to push himself back into the air 11 times (*at least, clip cuts there, it's in africa*) in a circle .. WITH THE SAME FOOT EACH TIME!!!!!!?!?!? Type of thing you won't believe possible ... even after plenny Bruce Lee.

*- Phil-Osophical is another such an incredibly lost disciple. His huge hands and slapped on dripthick 'goodin tension' (*remember i said that after i painted you the rock/drum images in words .. but what i mean here is Phil's good intention severely limited, not to say handicapped by the fact he insists on straining it through the medium of verbal expression, he voiceboxes his mental pictures, dream flashes and betrays the heritage that informs them, the orchardwork that made the hands of his forefathers big and stable enough to pass along*), i mean he does have the correct vision but sees himself the way i saw myself for far too long, doling out loads of home work, tips, roadsigns. And sure, yes, we ARE better at it than most but hey, there's a management class out there pre-empting us like all the sword wielders did Cernunnos' peaceful uses of metal back in his day. I say 'his' but of course mean entire tribes and peoples who had cottoned onto .. simple .. o so easily spreadable practice. And here we come to the painful necessity of having to note an instance of just how I and Phil (*plus proolly more of like mind than you'd manage to realize without shock/horror*) have proved largely ineffectual.

I am notorious and do well to remind myself of my hankering for and dependency on imagery, it's my drug / escape, outlet, way to get lost, forget my curses/blessings. On the other hand i remind myself just as often that imagineering is fraught with probs; a mindless but sound routine would be better, botanic knowledge can be had without hollywood right? Wrong (*for most*). One has to lose hollywoodism before one can begin to retrieve any such worthwhile stuff.

Again, thanks Phil for holding up that watchful eye and exposing yourself. What i see however is that despite presence, even abundance of the very best excuses to, for once, not do your limelight hog routine but *(if i had my way and any say, i'd send you to)* run around like mad, climb trees, etcetera, just to get the best shots of the most creative shelters and kitchens and vistas and compost heaps and/or sprout gardens, you pretend that all that will simply filter into your eyes only yet come out of your mouth and get into a viewer's heart stirringly. NO!!!!

Missed opp!! You just made a fool of yourself and got in your own way, not to mention our way, my way. Well, anyone on it is bound to get in it, ... no sense in staying so far ahead of yall.

Now, back to the dance lass:
mobilize rock, sensitize it to rhythm and movement, organize it, tie and bind it into the dance of vegetation. specially all those rocks that are like deep wounds and debilitations of a nurturing motherly matrix type geography that got seriously hurt/eroded *(dug into / dug down to / dug up after faithful service)*.

keep the beat as much as you like for all i care .. but can't you see the beauty, fullfilment and self-fulfiling proofsee, self-actualizing qualities of doing a rock moving move at the same time .. or on the side at least???

it's the work that justifies and lends meaning to what you make a phoney short circuited theatre .. much like considering white sugar crystals a luxury .. instead of something hardly even fit for emergency ransom ... although i'd like to stay out of the skyroot disputes dances and prayers. They're fine and good ladder climbing phase pace and stageable headspaces alrite .. but it the rungs lower on that same ladder are gone they're totally moot.

Ps: i think Drew Hempel would disqualify you from calling your shtick yoga, i think he'd label it restless leg syndrome *(precursor to and symptom of sexual predation)*. He agrees with you sexual energy must be used for healing though.

Shame on you to make folks kick up dust. Are you a fire-walker by any chance?

i revisit the iraqi guy who claims Khalifa cheated with his +1 trick

To the Submitters
Chapter 9 has 129 verses not 127 as he claimed. See the Quran Statistics table to the left. Either refute the evidence if you can or submit to Allah alone not Rashad Khalifa.
<http://tanzil.net/#15:87>
[Quran 15:87](#) which states Quran = Key + Message also confirms that chapter 9 has 129 verses with the additive prime number of 6229 verses in the Message *(Grand Quran)*.

Dr. Khalifa had even found the additive prime number 1709 as the sum of the GV values of the 14 initial letters but added 1 to make it divisible by 19.

Cult Leader Thinks He's Jesus *(Documentary Exclusive)*

Deep in Siberia's Taiga forest is Vissarion, a cult leader who looks like Jesus and claims to be the voice of God. He's known as "the Teacher" to his 4,000 followers, who initially seem surprisingly normal. Over time, however, their unflinching belief in UFOs and the Earth's imminent demise made this group start to look more and more like some sort of strange cult.

I did come across this account before, or at least a vid he has *(as well?)*:

Asi multiplicaban los Mayas.wmv

squarishing the psyURcoolation - squircle and cuigle ... a 3 year old circumpolar med. vid made in Brazil (first time i saw it, hence the gusher below), having it here now makes for a nice parallel to RQ's fresh blogpost; hope she feels honoured appropriately instead of copied/diluted and choosing the reject/whine route ...

My rant can't touch the artfully stacked pile of rocks she may be expecting as the minimal offering of respectful decorum but hey, those tombs are spun\out/dated now; Ai don't expect grip, but try go for hip at least.

To build on what went before is the decent and natural thing of course but if that previous, revered, worshipped and held sacred iteration was a substitution and surrogate to begin with, the UN-, OUT- and REDOwer(wirwar)war ... #

new and improved remix version compulsion drives, derives from and gets driven by skews and off kilters of all sorts, 'feeding' dire necessity, like erosion, obsolescence, fashion

Rock and Ponzi pyramids are of the samold saymold same old; the stone heavy weight pile 'preverses' the bankcredit bubbles, also 'shared' crossculturally, .. the latter (wo?)manAge to swallow even and ever more precious time lately; they, unbeknown to themselves, pretend to have loads at the ready (GigaGigAntic amounts); heaps of dust stored safely, conveniently; stacked highly and steeply yet not too tightly, most of the hard work done, all that's left doing is 'leave' it, carry it about, making it 'feel' hot light and cool wet; positioning it so that it scaffolds shuffle scuffle skeletates rain and shine ... THIS is the rainbow micro mes(H)sage!!

Imagine banks like that! Next to the Wessel hi-rises and Costa wheels in the land of poetic piety (yes, i am not an anti-hi-rise extremist) we can see the young fellas, like bee drones, hot bloods, on hand, eager and at the ready for a chance to go meet and make the most of nearby storms at mere moments notice; their spouts capable of stormcloud scrying their dry to the wet grey wed After all, the hop circle spiral squeeze crunch soak slop spray show can catch loveliest attention for each of them.

War = 'kapitaalvernietiging' = break to rebuild; the fundamental (barebonebasic) truth of which dictates giving deep rocks a crush -- like Damanhur did in secret, but with the usual sign/significance inversion, no small part of them being cagey about my questions regarding their lovely clean dustpiles, even when i pointed out what use it could be at their farm ... but (self)imposed paranoia (over covert invasion/excavestment) can go a long way to explain their playin[d]umb as well -- rather than rockfaces

smooth curves and polish .. which is fine by me

REDOWAR ... stops light from going green and UNsettles like the UN/Nato with Iz/maffia 'roots' running global corporate thanatopication is about to do to Syria now, as they did in Lybia; a looting action for develfuel addicts, and as they will go on to do UNdiminishedly, UNrestrainedly, as long as they are - but only until they are no longer - left 'alone' and UNimpeded to pounce on ravagables (weergaloos weerloos), fantastically defenseless ... mud and inhabitants .. of course ... this is where the prevolution provolution has really fucked up, 'thanks' (but no thanks) to the psychedelic revolution, entire generations steered into the empty gesture fields/(per- & in-)versions of rites and music making.

We need a rock emptying kinroute routine, no need to be rooted, but keep on rooting!!!! .. a keenrite; day out of time, dust out or frozen time, a URocktrick (on, in and out of rocklockery)

steen leggen = bricklaying | mason = metselaar | steen legen = rock emptying;
legen is a verb; leegte = emptiness - laag = layer | laagte - a lowness (of landlevels) | nothing a mill won't drain | geslaagd = succeeded | slag = strike
to mobilize/raise an army = leger op de been helpen .. can be tweaked to:
give the emptyer a foothold. He turns the cesspools into probverbal/preverbal rainbow's endgoldpottery.

Are there hierarchies and dynasties of logjam kingpins? Can they defuse, do they note and/or reproduce in-, per-, ob- and inversions as easily as they do cause it's a matter of recognition, not of acknowledgement and sharing but an attempt to exorcise and project???? I asked one of them and this is what she said:
So i plug the drain and then challenge everyone to get past me, go first, telling each and every single one, group, cluster and congregation to be great help on the way, after you, after yall

I invert pressures i cause with my very own but hard to own up blockage (building and building buildings to keep it building) and refusal to spend all i have on treenurseries, crests, sea shepherds, flotillas and the like (sacrifice as ritually as possilbe ((much raising of hands and voices and such)) the best books, utensils and gear for a moment or two of livestream eternity before the police eviction containers come swallow what rippers and tatters feed them), amazing footage and website profferers, whatever, ... i twist all that, into wishing they'd all follow and do after me .. which they do to anyways, given there are massively bigger biters than me ('she' a websighter be you see and you see bee; birchboot callin: bark bark ark hark).

then again, maybe that drain is as phoney as i think it really (like all those fabulous tales of travelling through the sun, .. sure, look as far away as possible from collective rot and try a reboot; in the beginner's mind was the word and word was godeluded goo goo kachoo shoe shuckernut.

I'd rather a great dispersal and thinning, a diffusion would take place .. in radial fashion .. around .. and away from me .. so that i'd be the magic center for as long as that magic worked.
Let's just settle on the tentative conclusion i'm far out for now, wether ahead or behind might make no difference.

this is the most elaborate and accurate way to demonstrate a truth which a child (*steeped in the mimicry phase of the old neotenous larnin abused for amassifoksups and equivalence clout enabled concentrate, iow, fist making*) understands in a flash: superstitions are catchy and spread like the weather, as fast as the wind, as fast as you ride it, as fast as you beat it, .. but they do not last a moment past the moment you kill

it ... and more and more of them are carrying killcharge ... killer superstition charge, they charge for them set in stone and 'soon' after charge rite into your bone; leave numonotions alone and go for innumeracy magic: supply all households with fresh rockdust, out and up the thanatopiante.

these last few days my fave count has been at 322 ... which is that infamous skull and bones number right?? Oops, should have hurried past that.

Arguelles vid from Brazil starts of kinda dynamic but then looses momentum and slows down terribly when trying to fit the weekday seals into the cubes.

19760 = 76 tzolkin

i have question, to both of you die-hards here. Can you explain what the 13 days out of time at the end of 52 years do exactly? I can see how it throws off any plans of beginning years with the same plasma unless they aren't any plasma or kin at all, just kin, .. rite?

youtube.com/watch?v=JJQVTPHdbJY

Vid from Brazil that is quite dynamic at first but then bogs down on them damn symbols ... ehrr ... plasma thingies. Also that diamond shaped stuff michelvee is tackling lately has'nt quite gotten to 3d stage yet; comes with the mind over matter is flat/plane territory that WRussell seemed to harp on. Meanwhile though the synchronotron borrows heavily from the catholic 4around1crossinsquare thingie. Onstott by the way mentions the 13x28+1 but doesn't make an awful lot of it, he's more into architecture.

Wow, Jess is a mirror

Happy Galactic Birthday to Pedrin 4 Warrior :) [Your images didn't come through on the blog, but one was of the two colorful beetles lying side by side on a leaf] Thanks to Poet Piet 55 for the beautiful Rainbow Bridge video. I wasn't aware of the 13 days out-of-time at the end of 52 years. Can you send me a link about it? Those 13 days would be the amount of Hunab Ku days in a 52 year spin period. By counting every day [a Day/Kin = a 24 hour alternation of dark and light] and aligning the Plasmas to the 7 day week instead of the irregular Greg. calendar, the issue you describe is resolved, and the Dali::Sunday::Crown Chakra resonance remains consistent. Happy 7 Storm New Year to all this week :) TMQ

The Star Larvae Hypothesis:

Stars constitute a genus of organism. The stellar life cycle includes a larval phase. Biological life constitutes the larval phase of the stellar life cycle. ----- X ----- Elaboration: The hypothesis presents a teleological model of nature, in which Stellar nebulae manufacture bacteria and viruses in their interiors as they cool. Biology evolves within an ontogenetic program that in its entirety, on- and off-planet, constitutes a generational life cycle of the stellar organism. Technology plays a necessary role in evolution. It enables biological life to emigrate from planets to weightless space. Postplanetary life manufactures the protons needed to create, then metamorphoses into, new stars. A prescient complex of celestial religious motifs expresses humankind's stellar calling. The star is the human imago. Nature's metabolism encompasses the organic and the inorganic in a continuum of anabolic and catabolic processes.

- he's in *(small)* class here *(with a handful of students, some of which do short presentations and others discuss jesus, virgin birth, etc)*

I should even bother to discuss this issue***

because i am exposing the lie he told any one can see it on wiki:

Khalifa said that he was a messenger *(rasool)* of God and that ****the Archangel Gabriel****

'most assertively' told him that chapter 36, verse 3, of the Quran, 'specifically' referred to him.

avoiding questions only proof you are hiding the truth and that is all.

more if you want to listen by him then watch:

watch?v=8u_jHZxZHro

orgolioitalia1 -- 2 maanden geleden

20th comment:

Mr Yuksel hasn't found time to answer this, too busy bestowing guidance on the EU i just found out. What you say is acknowledged by someone else who took Khalifa very seriously: Jose Arguelles *(believed himself the reincarnation of someone who communed with Muhammed (pbuh) - telepathically proly)*: Pacal Votan, who's tomb was discovered in 52.

Re last minute's distrusted 'purpose' imperative:

I am all for the lesser purpose of harmonizing primordial hazes, mists, fogs and indistinctions, to wit: combining wet and dry grey into garden culture, note, not purposeless at all but very specific, and it might one fine day just prove to be *(come?)* even more universal than vigesimality *(even)*.

Yukself brings up the illogic of the christian god concept:

'his' great temptation dangled in front of humans as bait cause he's really eager and chomping at his *(totally self-imposed, putting self on with self)* bit for a glorious op. to *(be seen/known and worshipping bycause he can and does)* forgive he's god after all YET has an only son - Yuksel says this formula will never run a computer but it's running lots of dupes who can run computers perfectly well, no matter how callous and lowsy the programming. And that's the point, To keep usurious book is a buybull symptom.

Linea thinks without religion we will end up doing lord of the flies live *(she says 'relive' even, as if it was ever more than depraved mindspin[in/of LAkeytectural planning permission contests])*.

the fun thing of matrixalization (*or matrologics in my terms*) is it always and easily suggests refinement, grinder even powdrier so that the drier may easier moist and wetten as we wet our wits and weave our waves ... as follows:
seal by seal in milliseconds
wave by wave in microseconds
quadrants+1 (*galactic seasons*) per second
all 5 of the latter jumping in unison .. which is in fact what we see here:

<http://synchronometre.blogspot.nl/p/onde-enchantee-actuelle.html>
it shows the castles writhing awkwardly and at first i thought unrealistically, until i realized that, all of them at once (*13x4x5 [quadrants plus central]*), simply means the software coder opted for 52 year jumps per second .. max effect in a way, puts the biblical adage 'nothing changed until it is all changed' in a new light dunnit?

also shown .. current wave ... all spelled out

OCCUPY YORE SULPHS W ONIONS, ARTICHOKEs & CROP CIRCLES

The 33/22 crop circle reminds of a type of 'bi-petalarity' (*iow, plants with lateral mono-axiality; the horizontal profile resembling bromelia; i am not using the correct botanical terms here, sorry*)

Imagine '1/2' of it rotated 180 degrees and tipped up (*90 degrees*) to resemble the army/Mandate symbol, a cup within a cup, then lower it again and translate it back to a plant too but don't reverse the first step; this plant won't hold water.

On the 29th of july last week (*.. koewek?, cowwake hah!*) i found a Sala w Arguelles vid (*.. perhaps [found it] AGAIN, .. that Sala gets himself entirely relieved of memorability.. forgettable, unlike say Miranda* [[and he, in turn, thinks me dismissable, no doubt for best effects also]] but i WAS one of his biggest youse(rve)rs at the corner of his big place (which had a chimney, old brick bakery) on the edge of the Jordaan*) where he ran one of if not THE first (*3 customer*) internet cafe in amsterdam. Sala also did a tv program with speaking fee eso manager circulating, trying to percolate ... something alchemtrollical while site rather than 'sight' seeing on the side i presume. the word provision works out to something like foreseeingness when reanglicized vi a dutch.

Miranda passed on (*or a few days before*) the first of july (*after a long struggle with emphezima, a disease many rainbow family members end up struggling with .. interminably until terminal*); hear her here:

her posting history

last major comments concerned Chris Hitchen's passing last year.

Sala's main hobby efforts went into braingadgets (*sold in a little store near his real workspot, a compie parapherna buzzbiz*) and he had a house nerd (*who was/is?*) into that numbering system on a 'human in meditation' silhouette with multiple plumbing going at odd angles and meeting at a node here or there ... i think it was called Human Design System or something, ... never saw any great art, let alone great artpaths, come from that.

The Sala w Arguelles interview is from 99 (*quite possible soon before or after i handed him the type of cryptication - on a smallish paperscrap, in a squat*) i now leave in comment sections, nicely aggregated by youtube, with a link usually, besides more than a few hints.

youtube.com/watch?v=GwdiGN_mThg

We were aiming for each other yet failed to 'hit it off' (*'ifferrybody wants to give, not so much take orders*) and dot the landscape with a revival of the rootsy bits from/in the Whole Earth Catalog extensive enough to both recall and far surpass it.

UNPOSTED PORTION

so mentally mixed up as well?

"Islam is mathematics"

She's even less 'standable' (*i can stand her even less*) than Sala. In dutch the word uitstaan is verb with both physcal and mental applicability (*head/hart; uitstaan/uitgaan*) a loans (*outstanding*)

b tolerance .. of a tabular kind no doubt, it is used speaking ABOUT (*note: not so much TO*) somebody; a person who can be forgiven a lot, another expression has it that someone with that sort of credit can come and break a few pots; obviously someone who brings fresh pots in amounts both copious as well as exceeding the numbers they break.

Transliteration of 'can't stand that person':

we can NOTstand that person OUT.

(*note negation, .. there's no form in use such as: we can yea [[instead of nay]] stand that person - in/out*).

i have been viewing loads of vids with black americans lately and the below applies not just to Tynetta:

= a type of bi-ped who ran past and away their own legs/roots too far to selfthemhelps to a library cure; cure themselves through a library ... only the last resort medicine (*which will be first and basic practice of paradise, thus punishment and blessing dovetail and meet nicely*).

as a sidenote, i found 'TheDoveLady' reading out loads of esoterics [Stuff like Walter Russell] that same day ... AND the squirrelady, Austin Tx Reikiist engaged in uncomplicated allout worship of the little guys, she glorifies, reifies, deifies and sanctifies them all day, in every one of her ; tries to ventriloquizzically guess their thoughts and fill their cheeks with her words; she actually has a house full (*urban expansion victims or does she coax them into breeding?*) and they seem to stay (*maybe not knowing any better ... life in trees ...*)

More time on earth ... more time to quiet this earth with, still it's thirst on more quenched rock to squeeze between your toes, leave to the kids safely master *(=obviate and forget)* all plumbing and plummeting probs. phase dem towers out and grow trees.

Knowable children gets us timely reception, time well received, get it to lengthen and grow out some? Switch words till the jump to child stilling is not running a gauntlet, hail of fire *(of off ire)* nor through noxious fumes, not across a precipice but over a shallow warm fresh mud pool you'd rather linger by anyway.

last nite i looked at susan schwenger and subbed her shy little channel, she stopped doing blogtalkradio in 2010 .. her first vids shows her holding up the numerology book she bought with her daddie (clockbuilder) in the dime store .. around 50 years back 'm guessing (her [[thuban.spruz.com]] ID thumb is 20 years out of date of course); she solicited help on the last (year old) one but doesn't do much besides jot down sentences with lots of numbers in them, wavering between Callemann and a host of other stuff, including astrology; .. and then there's the plain story telling admixture (trying to give the numophobes a way in as noble mission in life ... or spoiling the stew for both camps??) She's a double (back .. and forth backer, a forthwithness who turns pages at moment's notice) agent of sorts. the eXchanger, as she calls herself in the vids, (there's a slew of selfcaressagacity in her posts) either started or joined a network with likeminded and proly a whole lot looser yarn knot&ball winduppers&downers (in perp email - emotional turmoil - we have a specimen to demonstrate in our midst: transunit the 13night guy) which might explain her loneliness. Of course one brief look at her chatlogs more than suffices to see how the simple alphabet already nerdifies everybody into a corner (with perks and prestige the [[one way or another]] obligatory* lottery affair).

Compost Science? Seriously? Do you know what Compost is? I think not since you are listing this in a metaphysical discussion.

Composting is scientifically complex. The distinction of physical, chemical, & biological processes is to a large extent artificial. All overlap & all affect each other. Take, for example, the well-documented fact that the composting process kills many disease-causing pathogens

It has Nothing to do with any kind of Metaphysical discussion.

MrGoodNKinky

Why am i so not suprised a Bibliot, which you are despite attempts at heroic 'stand up to-ness' - separates meta from physical? Soil formation hygiene is centrifugal but the big 'unifiers', the ball uppers, the clutch & clumpers get all the attention.

The role all the Mayan cultural glyph sculpting dust product may have played in prodding the produce production? Did you ever hear it mentioned or see it pointed to before now? So, it's not even just desertified condition damaged folk who split mind from spirit, compost from deep profundity, dead from 'living' leaves.

Books are miraculous? Not. They are loose sand type compostphobic and organics resistant bibliographies. Pretenses nevertheless get based upon such leave bundles cause one can replace inspiration with mechanic morons, pretend it's 'of a piece' enough to claim great *(meta)* integrity for it on the one hand yet on the other, rage end of the range, a missile type 'hold up'pityness, a lethality also, holding and transporting clout across time and space; it's a weaponization of the alphabet, storage/memory; a securitization as it were, but a thanatopian one at that, all any mono-...ism amasses, amounts and then goes down to. I bet you're gonna assert weapons have nothing to do with garden tools next, rite?

The ancient Maya civilization of Central America left behind a riddle: an intricate and mysterious hieroglyphic script carved on stone monuments and painted on pottery and bark books. Because the invading Spanish suppressed nearly all knowledge of how the script worked, unlocking its meaning pose

8 -- Jenkins ... poor/low Views numbers

The fame and glory 'they' will attribute to Arguelles in a distance future may be comparable to the kinds of multiples he claimed for himself already; the very type of shrine adornmentlike multi-yarn riot of diverse provenance which we see get hung upon and attributed to say, for instance Nemrod, looking the other way (*into the past*). The latter might have also set a huge trend and have been quickly disguised and diluted by enthusiastic mimickers who sought to distinguish, outdo, set themselves off from and improve upon him. Hence the mythical reputa that becomes a Joycean tangle even in their lifetimes. Similar procedures prolly played a role in the life and times of Jesus and any other charismatic artist/pacifist neotenously nerdy savant. .

timecube.com -- Gene Ray iw (*was?*) an oddball thinker (*supported by overenthused young man named Richard, suicided around 2008*), their forum was active up to around then - one of his last post complains about death threats from NASA, this in contrast to what a, from what i can tell, nasty critic who might be projecting his own inclinations/distortions in their entirety, writes:

It's recently come to my attention that **Richard Janczarski**, the Australian webmaster of the fan site Cubic Awareness Online, has committed suicide by **throwing himself in front of a train**. This bizarre and needless tragedy may have been averted, had Gene Ray not threatened to sue Richard for "corrupting" the principle of the Time Cube by writing "false information" about it on his website. Richard must have begun to see Gene Ray as a spiritual leader of sorts, and Gene Ray's eventual rejection of Richard was too much for him to handle. He will be missed.

<http://dmitrybrant.com/timecube>

+44 starting in 05; a comment from early 2011 refers to this addendum/update .. comments dribble steadily into the present year

<http://www.cubicao.com/refutation.html>

Richard to Bryant

He has taken the time to make reasoned points rather than the "ad hominem" attacks and dumb anti-Cubic jokes more common amongst the web's disseminators of 1-corner viewpoints. One would therefore consider it appropriate to likewise take time and issue a response.

Bryant: Aside from the number 4, Gene Ray pulls other numbers out of nowhere, like 4/16, 2x4x4, and so on. This might indicate periods of more extensive synaptic degradation in Ray's brain.

The 16 in 4/16 refers to the 16 spacetime configurations, as explained in 4/16 rotation. 2x4x4 refers to these 16 (*4x4*) configurations, inherent to the 4-corner-quadrant rotation, existing between two static opposites, such as the North and South pole. It is irrelevant that 4 is not a cubic number, since it is used in connection to the 4-corner-quadrant division, and not in connection with the volume of a cube.

Dr Ray said:

"How many whites died while freeing blacks from slavery? Do blacks honor those whites? Blacks did not free the slaves. Ought not free slaves escape, or is a slavery cry enriching? Blacks are enslaving whites -and will soon extract revenge."

The point he is making is that the empowered blacks are likely to reach the same level of Cubeless selfishness as the whites that enslaved them. This will lead to blacks enslaving whites—the same unfavourable situation of slavery. Eventually, racial conflict may occur; or it could be racial mixing, which induces a racial slop. This problem would not occur if the races remained primarily in the specific geographic regions in which their specific racial qualities have been found to be most useful.

<http://jmscult.com/forum/index.php?topic=333.0>

However Richard's website had a superior presentation than Gene, and Richard himself a much more likeable character than Gene's vitriol hate and paranoia. This was likely the cause of Gene's later public denouncing of the website, threatened to sue, declared Richard to be a "stupid THIEF unfit for the internet" and "call[ed] down a curse" upon him. This was late January of this year.

Richard didn't really express how he felt about this but appeared to go through an identity crisis. He apparently converted to Christianity, but without rejecting Time Cube, despite Time Cube clearly stating Christianity is evil.

On February 13 Richard took his own life by throwing himself in front of a train.

Ray is a diagnosed schizophrenic. Seriously. The funniest part about Time Cube theory is that it's so revolutionary and Ray goes on and on and on and on and on about it. But let's just pretend Ray is correct. Is there any point? Does

One thing I found is an interesting document that talks on gematria, numerology and spirituality.

It is written by a scientist, and he talks about something they call Apophenia.

The term was coined in 1958 by Klaus Conrad,[1] who defined it as the "unmotivated seeing of connections" accompanied by a "specific experience of an abnormal meaningfulness", but it has come to represent the human tendency to seek patterns in random nature in general, as with gambling, paranormal phenomena, religion, and even attempts at scientific observation. (*See <http://en.wikipedia.org/wiki/Apophenia>*)

On this article (*<http://divulgamat.ehu.es/weborriak/TestuakOnLine/07-08/PG-07-08-Ibanez.pdf>*) this guy starts talking about movie "23", and then tells a story of an interview he gave on a radio station about this matter when he wanted to give an example of Apophenia and he "randomly" chose number 19, just to find later all what this number means to the Islam Nation and Rashad Kalifa's work about it.

— Interesting! Today the twelve seers are meeting outside their rooms! Residents in this house are transparent and direct in their appearance; by looking at their form, you will understand their nature. As they are, so they observe, so they reflect, and so they understand. When the twelve seers come together and unite their perspectives — some from the inside, others from the outside — balanced insight follows.

The seers on the "8x" ground floor — on the eight petals of the lotus-shaped veranda — represent the eight aspects of particular human awareness. The seers of the "8x" rooms have three parts, each of which is ? "In" or ? "Out", ? "Static" or ? "Dynamic", ? "0" or ? "1". These are the three aspects: Bottom-part — Physical Being; Middle-part — Emotional Being; Top-part: — Rational Being.

? For example (*Green*) — ??? or "010" or "In-Out-In"

— Physical: ? In; | Emotional: ? Out; | Rational: ? In.

This seer is emotionally focused: "Experience: Emotive Awareness".

? Opposite side (*Yellow*) — ??? or "101" or "Out-In-Out"

— Physical: ? Out; | Emotional: ? In; | Rational: ? Out.

This seer is materially and rationally focused: "Reasoning: Analytical Awareness".

The seers on the "4x" central floor — on the four platforms of the cross-shaped veranda — represent the four aspects of general human awareness. The seers of the "4x" rooms have two parts, each of which is similarly ? "In" or ? "Out", ? "0" or ? "1", opaque or translucent. The dynamics of the four higher seers will be introduced in a future episode — first orientation is with the seers on the "8x" ground floor.

Go meet the seers and see how they come along together. If you need to convert a number like "100" or a polarity like "???" into the form of a seer, simply turn it 90 degrees anti-clockwise; or turn your head 90 degrees to the right; there you see the seers. Here's a quick table of seer archetypes for reference. See if you can see them inside with insight.

?????? [?] — Unmanifest Undefined: Void of Awareness

?????? [1] — Dynamic Expression: Specifying Awareness

???????? [½] — Potential Undefined: Paradox of Awareness

?????? [0] — Static Impression: Unifying Awareness

???????? [11] — Oversight: Universal Self

???????? [111] — Fulfillment: Clarified Awareness

???????? [110] — Reconciliation: Integrating Awareness

???????? [10] — Interaction: Comparing Self

???????? [101] — Reasoning: Analytical Awareness

???????? [100] — Challenge: Claiming Awareness

???????? [01] — Foresight: Observing Self

???????? [011] — Expression: Expansive Awareness

???????? [010] — Experience: Emotive Awareness

???????? [00] — Introspection: Embryonic Self

???????? [001] — Orientation: Emergent Awareness

"quran code" tzolkin

MrTripDawg 5 weeks ago

I was adopted before birth, my original long form birth cert has my name as Baby Boy Fix. In Jewish Gematria this equals 1172, in English Gematria this equals 666 and in Simple Gematria equals 111. In English Gematria "Baby Boy" equals 432, while "Fix" equals 234.

My birthdate is 10-5-1965, which equals 9, and the first set of numbers for the coral castle code are 6105195, same numbers with only the number 6 transposed.

Oh yeah, Y-H-V-H is 10-5-6-5, missing the "19", which is the primary number in the Quran Code. Talk about coincidence and synchronicity! :)

'our' Kesar (*sace9991*) shows up on this page also and speaking of Tiber (*Kesar Ling, a leader 'my' overlong and reluctant mentor Arnold Keyserling fancied himself a reincarnul[[t]]ation of*)

Dear PoetPiet 3 Eagle; Thanks for your attention and this prompt. Like your comments, my blogs grow long - then need to be reduced because they weren't posted in time. The 'current one' was first titled Kin 197, then was meant to be posted for Kin 9.11: Second Galactic Spin since V.V.'s death during the year coded by 109 [5 Moon] and also the end of our Bardo for Christine 133's sister Laura. Thanks for all of your input during these past 19 days; my 751st transmission will follow soon! Love to All, TMQ

A sample of copal containing a few termites Copal is a name given to tree resin that is particularly identified with the aromatic resins used by the cultures of pre-Columbian Mesoamerica as ceremonially burned incense and other purposes.[1] More generally, the term copal describes resinous substances in an intermediate stage of polymerization and hardening between "gummier" resins and amber.[2] The word copal is derived from the Nahuatl language word copalli, meaning "incense".[3][4][5][7][6] To the pre-Columbian Maya and contemporary Maya peoples it is known in the various Mayan languages as pom (*or a close variation thereof*),[3][8] although the word itself has been demonstrated to be a loanword to Mayan from Mixe-Zoquean languages.[citation needed] Copal is still used by a number of indigenous peoples of Mexico and Central America as an incense and during sweat lodge ceremonies.[9] It is available in different forms. The hard, amber-like yellow copal is a less expensive version. The white copal, a hard, milky, sticky substance, is a more expensive version of the same resin. Copal was also grown in East Africa (*the common species there being Hymenaea verrucosa*), initially feeding an Indian Ocean demand for incense. By the 18th Century, Europeans found it to be a valuable ingredient in making a good wood varnish. It became widely used in the manufacture of furniture and carriages. It was also sometimes used as a picture varnish.[10] By the late 19th and early 20th century varnish manufacturers in England and America were using it on train carriages, greatly swelling its demand. In 1859 Americans consumed 68 percent of the East African trade, which was controlled through the Sultan of Zanzibar, with Germany receiving 24 percent. The American Civil War and the creation of the Suez Canal led to Germany, India and Hong Kong taking the majority by the end of that century.[11] East Africa apparently had a higher amount of subfossil copal, which is found one or two meters below living copal trees from roots of trees that may have lived

thousands of years earlier. This subfossil copal produces a harder varnish. Subfossil copal is also well-known from New Zealand (*Kauri gum*), Japan, the Dominican Republic, Colombia and Madagascar. It often has inclusions and is sometimes sold as "young amber". Copal can be easily distinguished from genuine amber by its lighter citrine colour and its surface getting tacky with a drop of acetone or chloroform.[12] [edit]

The twelve graphic types of complementary pairs, which sum up to 17. The arrangements of the

fourth order, first published by Frenicle in 1693.-- Bernard Frenicle de Bessy was a French mathematician born in Paris, who wrote numerous mathematical papers, mainly in number theory and combinatorics. The Frénicle standard form, a standard representation of magic squares, is named after him. He solved many problems created by Fermat. He also discovered a taxicab number and in 1693, he described all 880 essentially different normal magic squares of order 4.

Like Fermat, Frenicle was an amateur mathematician, but he still corresponded with the likes of Descartes, Huygens, Mersenne and also Fermat, who was his personal friend. His major contributions were in number theory.

<http://www.2012hoax.org/will-black>

Will Black in an English anthropologist and journalist with particular interests in the anthropology of religion, medicine, mass media and anthrozoology. His postgraduate work placed Jose Arguelles' Planet Art Network and Dreamspell calendar in the context of both 2012 mythology and the history of apocalyptic thought. Considered alongside the history of religion, Arguelles and his movement looked rather superficial and inconsequential to Black.

Consequently, Black was been extremely critical of the focus of PAN and Arguelles' followers, arguing that such shallow New Age appropriation from the Maya not only distracts people from understanding complex Mayan religious ideas but also deflects attention from the brutal realities of contemporary Central American life, including the drug wars tearing communities apart.

By de-sensationalising 2012, Will Black seeks to concentrate attention on the plight of those who the calendar has been "stolen" from and on real possibilities of revelation in a world where a single tweet can lead to a revolution and important ideas can be disseminated in a way that would have been unimaginable to the most ambitious prophet of the past.

Messiah Complex test tailored to and targeted at me via Arguelles (*see Drew Hempel's ideas regarding the*

Puharich / Reiser crowd he claims JA was influenced by or something. the only 'raakvlak' i see is interest in 'frekwintsees') who points to dates of Hiroshima and 911, the very same fraction apart that puts me in full resonance with such evils.

If this is indeed the game here, why me? Why didn't they choose Gary (*the antinatalist 'inmendham', a 'worldgrump'*) for instance?

cause i am a comprehensivist ... varying my interests in order to make my braindome, my seat of rational 'superEmission', my geodesical house of thoughts and concepts a sturdy one indeed ... and the price of that is to be a true king in the old nordic peace prince type sense, master of disguises, the unseen benefactor, the only myriadfold agent obsolescing, pre-empting and preventing all double agent dealings with a train full of 'zindelijke' (*potty trained*) colleagues, loyal to the land.

... bycause i am a comprehensivist ...it figures i am quite a bit more of a challenge (*and a bigger prize*) for them, Gary will act out his complex without any help but to tease and/or scare an actual not a techno Messiah away from the magic any road whereon travellers go and can keep going several directions at once, spread themselves and 'others' not too thin but very much thinner (*i used to repeat thinning rocks /homes and trees ... choose the trees to house and start collecting burying composting fire hazard from far and wide around to it*) must be something sick people would like to boast of and pride themselves on.

If/when one cyphers oneself plenny 'phar' away most times (*the dilution, not the deletion brings potency, old homeopathic insight*) one may succumb to the mistaken impression one's work is invisible, ineffective and doesn't take ... but given a choice between bombs, hi-rises and global rites on the one hand vs diffuse lo key humility i'll go with the latter.

Hell yeah, i take some credit for the occupy movement even though i told them and continue to tell them to not do their thing in the middle of cities .. if i ever search them out again ... sigh ...

Main objective: never let yourself be too sorely tempted into acting out despotically ... demons in one's own breast must be kept dessicated and dormant until the way to dismantle them is clear.

Gary is the way he is bycause of sordid insights into his own family line but he consistently generalizes them and despite thousands of hours ... well ... i mean .. i have yet to catch him revealing even a glimpse of such personal circumstance. He obviously figures he simply cannot afford it, it would interfere with the unassailably pure & above it all imagery he hold up of himself (*and dunks underwater, slowed down to racing snail's pace*)

i could make this longer and go into: the genders IN and/or AS one flesh conundrum ... cue Andrew .. cue the effort to make me work me my hands .. honestly ... not with books, all demonized except for the 'one' ...

.. into how women like to pick fights they can win, step it down into pettier levels, unlevel, dishevel the fields to battle for.

1. Again, this is all about individualism. In a world where I feel so small, I can't stop thinking Big. We do not know what the world is. What we as a global society have become. We do not know what is going to happen in the next 10 seconds, although we do expect the worst. Can we have any more of this? Can the world take any more of this?

2. If we are to prevail, what will be the change that will help us survive our own destruction? We do not know. But we do try to figure it out. While we try to create the world in our own image we are creating ourselves. But are we instead diluting ourselves? We pick up scraps of cultural garbage to build our identity and keep it glued together with our ego. And of course, the image of the world will be flawed.

3. And we keep on trying and wasting all of our energies always with the best of intentions, but to no avail. I think the noblest proposition for world restoration was the Occupy Wall Street movement but we fucked it up with 99% label, a belligerent and discriminative standing. A new world will never emerge until we put all priorities in the rights of the individual above those of the collective. Peace.

don't give up on us yet. the economy of the future IS Art, beginning with the Art of Self, as this vol 3 describes. As for the PTW, the next few months will see them implode, the media open up, sleeping masses around the world will shift into Knowing....and perhaps the galactic alignment and superwave in December will clear things out. 3D is just an illusion, and there are other dimensions to play in. Abrascam: Followers may fall, but the snow must go on + 30 comments

I am not the first blogger to write the sad story of this talented artist, who followed Abraham-Hicks in the last years of her life and used the name "Ari" (*which is her son's name*) on some of the Abe forums. She was very active on these forums, and when she took her own life in the summer of 2009, a few of her fellow members who found out about it wanted to discuss the matter on the forum. But moderators of the official online community, The Abe Forum, made a concerted effort to squelch the conversation.

She was financially strapped at this time, but trusted she could rely on the abundance that was sure to flow in from her art work because of Esther's teachings.

Karen's last posts revolved around her excitement over her son's upcoming wedding. But this excitement was marred by financial concerns and not being able to afford a nice dress. She was also uneasy about seeing her son's

dad, her abusive ex-spouse. It was all apparently too much for her, and finally, after leaving the wedding, she ended her life.

this language sure is hard to learn ...

i am in holland near R'dam, no dreamspellers close S'ace (22) does kweakspell and so he doesn't count, comments at 2013andthemysteryqueen, herself frowned upon .. over some (day)shiftiness i don't fully grasp.

I have met a handful of the folks involved with the dutch websites ... but that was years ago already; karmaofthecamera (youtube) is yet another personalizer ... but, apart from a brief todo years ago w Stef&Rietje is a noshow ... they are at the northernmost side of the country 4 hours driving .. i have the wheels and the gas money but not the desire ... grounded with old mom ... perhaps when she's gone i'll try to make a go of a Crest with some buddies (neuezeit.info) in Switzerland.

I would love to find someone who does the 19=260 a once over (once or twice); looks like the 'confession wars' are far from over.

Sorry, Victor, to post this as a reply to your post, but I couldn't figure out how to comment on? my own. Thanks for the compliment btw. - Ahijab, get rid of that link to David Icke! He's a complete nut-job, he thinks these grail and viking descendant rulers of today are reptiles! You really piss me off, get rid of this link or I will delete THIS version of my movie as well. David Icke is a lunatic, I want no connection to him.

.... as a passing thought i wondered if Arguelles is a discovery extremist, seldomly returning to earlier schemes and constructs .. cause it wouldn't be a new discovery ... he takes more pleasure in spontaneous generation, the stand alone version, brandspank & newshine ... no vulgar or mundane dross accreted, no mechanical progression ... virgin art he don't have to resort to entry level trash collage and configuration.

i noticed something similar about heady guys like the late Arnold Keyserling www.schuledesrades.org

them liddul VVz with the colour and bars are the exception *(soooo much like the famous missile thingie logo as per 911 by the way)*

So, .. will we ever know if and how the synchronotron numbers match&measure up to/with the weird chapter - word - verse count jumble in the 'Queknowhathid'?

Anybody think finding heaps of corrolaries, piles of parallels and hole syncurs worth of numberecalls numoricalcs & newmiracles would help bring/take us back towards garden culture even a single stemp .. ahrr, a frickin step, let alone in step????

Well if any of such bodies would please step up and step it up; on that score i can see i often have the disquiting thought that it makes complete sense to think i am jesus as much as Jose Arguelles was Pacal Votan think of it; yall following my youtube feed page comments right?

If reputes of '*(as)*similates' like Nemrud and Jesus can bleed into and fuse with each other, why not that of Cernunnos and Jesus?

Once the roads had penetrated the forests, sun and pagan royalty concepts 'completed' the pro/confusion* it became easier to get larger and larger hordes too hot under the collar to stop themselves from rolling in the corral aisles to try a collective cool/bleed off

* - aggravated the aggregation .. and upped the mowing machinist employment opps of course, that 'branch' has many a vacancy should people try to stop the 'protox', multiplication of plastic trash mowed into a multiple of their bits and pieces at each pass, side effect of cut-up media, gratification delay ... and ultimately .. at the bottom, cut to the chase and foreskin. As is though, we're on our way to the globalized one flavor unfits all: plastic soup --

In past years i used to mention a book named 'King Jesus' *(by Robert Graves)* a lot, actually own about 4 copies picked up at fleeEee markets over the years, something i'm deeply ashamed off seeing i haven't managed to establish and run that ideal library i hotly desired. Which reminds me of something to heat

If Jesus was hybrid roman/jew *(like nemrod was the offspring from 2 of the vastest empires of his day before him, his repute slowly merging with this next in such a family/familiar line/lineage)* and, as written, a lost sheep of iz 'gatherer' he surely travelled, which has 2 major implications:

1 - he had an eye for jewish assimilee effects; how genes 'dive' and 'drive' into others, hide in 'm for a few rounds, and might have known that this was often instrumentalized to serve the dominance of jewish genes over others - hollywood run by/on the prejudice of the darkest dankest of orthodox bias; a paradox indeed - and knew there'd be a slew of mixrace folks about as problematic for the real jew as obomba is for blacks; braininess weaponizable at the drop of a hat; before the end of a one line threat *(anybody else notice Obama shaken & unsettled after his first CIA briefing?)*.

2 - he would have known Cernunnos and might have learned, practiced and preached the lifestyle associated with that phenomenal, highly pedigreed fella ... not symbolic for the matrimite (*/ primatrimate*) hunter's disguise or bloodlust or any of them satanic theatricals he gets borrowed and abused for/as frequently so much but, instead, or rather, on top of that, a thinking version thereof, capable of

harmonizing and fusing of economics and health/fertility/vitality / diversity/democracy (*liddulest organism cared for*), the socialization of the most machismic of muscle bundlers and bundle bundlings BY THE ELEGANTLY SIMPLE MEANS OF DUSTIFICATION!!!!. A prince of peace in the truest (*and since most[[ly]] suppressed [[misunderstood even more]] kind of way*).

Jesus was perhaps, i mean, juuuuust might have been .. his ambassador, prophet/messenger.

The bible's genealogy is really the run up to the racialization (*racistication?*) of patrist expansion and clash, up from it's merely tribal stages.

Loads of liminality, derivate, slippage, enabling, tarnage, proppery, poster childishness .. in one word: neoteny, inclinations and leantowards it, default reflexive and kneejerk selfish like all childishness of course, but way worse, easier to get, and therefore more often weaponized.

The bibles, the perks, the numbers ..
bad habits are as the living dead and innocently reflexive once (*kept up long enough to get*) given genetic burial, a tarnish/va(*r*)nish precipitate.

Kinda like Peter Lamborn Wilson saying (*in 2002**)
money is the sexuality of the dead; he cites Franklin or Lincoln (*some usury opponent or other anyway*) saying: "money begets money"

* - Episode #135 - Spirit, Freedom and the State (*Peter Lamborn Wilson on Spiritual Anarchism*) <http://altruists.org/unwelcome>

in conclusion:

a clear parallel was detected, argued for and considered sufficiently established, namely, that proof of/for collegiality between Muhammed and Pacal is as thin, veiled and farfetched (*zerfetzt = torn&tattered*) as that between Cernunnos (*flanked by 2 roman gods on a plaque/statue in a Rheims [by Paris] routine money to ground '(s)ender'*) and Jesus. This freak chance and unlikely coinkeydunk turns to a stellar levels of unlikelyhood in an instant if you throw me and Jose into this equation. Not sure we shouldacouldawoulda.

ps: could you (*on top of matching the above of course*), elaborate on the Complex Gematrical Frequency [System [A=1; Z= 800]

don't you mean the z = 260 one?

i do want to caution yall that this is THE most dangerous path to go down

1. To look at clothing habits of the modern man and make comparisons with the clothing habits of the Aboriginal Continuity gives great perspective on individual and collective psychology. Modern man's perception of self is not centric, he is de-phased, separate and is always looking at him or herself from the illusion of being watched.

2. The need for acceptance of the modern man is his motive. He or she will wear only what is socially acceptable, even if it is rags and piercings. For the modern man, clothing does have a meaning, symbols not just of vanity, but of social value, social status is everything for the de-phased human. Cars are not tools for the modern man. Modern man wears a car as a social value. They wear their house, their religion, they wives and children.

3. The men and women of Aboriginal Continuity do not have the need to create their identity. They already are. The clothes, the make-up, the jewellery they use are an extension of the centre, a conscious act of co-creation. They are the source, and creation is adorned with jade and Quetzal. Aboriginal Continuity is in phase. There are no crowds in the Aboriginal Continuity. Peace.

The "Z = 260?" is the alpha-numeric system which was introduced in CHC 7, with no explanation as to why it was replacing Votan's original one introduced in an earlier CHC.

The two alpha-numeric systems mentioned by Valum Votan are the widely used "A = 1; Z = 26?", which I call the SGF [Simple Gematric System first used in the 'definition' for number 198 in CHC; 198 equals Synchronotron]]

his more advanced system the CGF [Complex Gematrical System]

Here it is:

A – J = 1 through 10 ---- a1 b2 c3 d4 e5 f6 g7 h8 i9

that woman at 1:44:44 is annoying

at that point McKenna argues humankind is being born (*expelled from earth*) .. a woman prefers

embeddiment .. polyvalence and a palette of choices

a conciliatory remark (*best of both world*) is offered by someone who can imagine himself 'in a space station

waving goodbye', this gets a tension relieving laugh.

19th (*last day of the dreamspell week and month, kin 114*)

McKenna wields his McLuhan bugaboos fatalistically, resignedly, maliciously around 1.52

Jose speaks 1.54.14 briefly .. something about greeting politely so as to earn a little protection for the

turbulent passage, he's in a bottleneck mode also.

2.05 monologue resumes

2.10 he punches hiroshima into his timewaveware

2.20 = jose's enddate gets punched in .. 16th day of 8th month ... remember this was before the HC

weirdos so??

As far as i'm concerned he is the immaterial counter part to the change/chance apocalypticus known as

Adelson - zionist, if you wanna be stealing that much from folks that far away you simply have to pay

membership to that insuperable, imperial force of the age - whose fortune was made with 'cookies'

(*gambling industry in China*) and is large enough to buy the next war candidate outright by installing a ...

ehrr, i mean continuing the already shot full of holes and semi-transparent liar's regime (*prolly within a*

year). He'll prolly do that if he want to make his gangmembership an 'honorary' one, stage a statue

cheering or whatever, corral a crowd and call it a party.

Jose goes on a while but says little; his buzzword is detoxify (*was this not very long after emerging from his*

alcoholic stupor phase?) .. a plane does a little drop to idle and rev up again above them ... one does not

hear the sea.

T contends mushrooms grew our brains yet fails to mention the strong contender for causing that:

cannibalism ... this isn't credible Terence .. but it gets worse (*citing Joyce the grabgarble gasbag again*): man

will become dirgible .. dirisible .. dirisable .. taking a fucking drunk as guide .. good move T

the one thing he says i strongly agree with is calling laboratory rats, i mean professorz and personnel alike .. i forget already (*next morning*) .. something offally awful /1

i saved that picture after a chuckles and (re)named it: that oltime religion arts again

.. it's the line that just went into RQ's latest FS post, i mean, into her spam filter too apparantly (*unless i am blocked, not impossible*). http://1320frequencyshift.files.wordpress.com/2012/10/528612_199929330127201_1794233388_n.jpg?w=584&h=399 .. wonder if Marshall McLuhan would have appreciated this kind of imagery? He understood the technosphere as the mime and surrogate for a metastasized desert folkmore-meme (*the refugee as covert missionary*) that parasitically blew Eurasia bare as well as recruited portions to become the elect oltime 'occupist colonialization vectors (*always ready to jump over, across and off of .. 'stuff'*). No amount of toxicity ever made an impression on him in his lifetime, as far as i am aware .. but therein lies the thanatopiality which brings on the urge to leave it all behind (*while pretending to go forward*).

I'd rather revive and older than old time religion: Cernunnos as a soilbanker ... there's an anti-natalist on

See any handy handedness to bicker over (*A creationism fighter named TheLivingDinosaur has 33 vidsworth up*). I mean, what do you want jubilee to look like? Steve Keen to replace Obombabummer as king of OmerryCrime? Will that get us to some hot mud under giant lenses and the babes who slop it around and plot the pathways in order to create crop circles that are in reality orchards and will be revisited every few years ... as we plant stuffs that take a 1000 year to ripen is that an aspect of the 4th reich that got (*'it' going as well as*) absolutely and succesfully censored i wonder????

can somebody explain why not much is made (*in the 441 intro linked there*) of a few numbers that stand out (*in the synchronic matrix*) to numbing resistant sidelong, furtive or even reluctant glancers like me: 76 (*152 : 80-4 doubled*), $260+160=420$... and then discounting the squaring cross which leaves the tzolkin total minus 12 and 20 or 13 and 19 = 227 .. i took time and pleasure in doing a quick and dirty look meself and ... well, fuck me ... that's me mom's crystal dog value .. the very one i felt imprisoned and recruited by, unable to serve and service, protected, tainted and liberated by, ... rinse repeat ... committed and shackled to .. any ideas on how to tempt her into a Crest (*as brand new babe*) or is it best to keep supplying rainwater very patiently, for her to dole out the ration that keeps the rootcrampstatus quo on her decency display (*modesty facade and showcase window silly*) up and alive? There's always hope, one of her staple stories is to have been early adopter of electricatree powered bicycles .. which her and hubby crossed the country to get someplace up north.

441 introduction (txt portion):

© Galactic Research Institute of the Foundation for the Law of Time – lawoftime.org Synchronotron Introduction
The system of Synchronotron is a tool for learning the mathematical language of telepathy, which is coded into the Law of Time. It is a teaching from Sirius that contains the language of post-conceptual mind.
Sirius is a binary star – Sirius A and Sirius B. It takes Sirius B approximately 52 years to go in an orbit around Sirius A. This is the basis of the 52- year solar galactic cycle (*and why the galactic compass is also called the syrian wheel*).
Synchronotron refers to the compendium of the practices of the 441 (21×21) cube matrix system. This mathematical system represents the minimum fractal of totality cubed: 21×21 being the prime statement of totality (20) + 1 (*unity*). $1 + 2 + 3 + 4 + 5 + 6 = 21$ (*unity of totality*).

This system was revealed to José Argüelles/Valum Votan 18 years after the discovery of the Law of Time (1989). It began with a dream initiation at the beginning of the Resonant Moon, Red Magnetic Moon Year (*January 10, 2007*), Kin 117.

I was collecting Deb Frisch related stuff into one file at the time ????

The number 441 was heard in a dream instigating an on-going process of decoding. He discovered that this 441 cube matrix is a living system of information transmission that is always occurring; the cube is being transmitted to the larger mental field of the solar system and then into the planet. The second stage of this transmission occurred eight moons later when a cube crop circle appeared at Sugar Hill in Wiltshire, reported on August 1, 2007 (*Magnetic Moon 7, Cube 1, Kin 54 year, Kin 60*)

We are the extra-terrestrials. We are among you. We are those who have advanced into galactic time. The Earth test is nothing other than the ability of the Earthlings to advance into galactic time. The Nine Lords of the great star Sirius hold the Council of Judgement. The Arcturians, Pleaidians and other members of the Galactic Federation await the human response.

RQ tacks art onto the post wherein she quotes the above which illustrate my point but not the quote.

And while you digest that i suggest you switch from thinking of aliens as last straw desperation sparked highest heaping hopes for help and liberation to the other side of that coin: alien who attack; which is what the establishment; darkest of hitecno prowess cabal in area 51 hinted at Roswell beingwhile removing all the evidence; it was Japan. Good thing Douglas Dietrich, that liddul JapArmwHorican got some besides access to details he dutifully destroyed until finding out the warriorclass got the corner cutting treatment in the niggely dime turn over age just like anyone else, and he got royally pissed off over such sleighting of his dad's war efforts.

tmq it's nothing less than tragicomic somebody with as richly faceted a cerebellum as you would consider computer basics too far beneath you and nothing to waste your time on while writing the most 'counter'productive plugs for a return to garden culture possible.

Anyway, i am a distractivist 'rite' alongside ya sis, ... so here goes ... your brain is unoverstuffable:

With this article I want to show that there is a connection between the Mayan Long Count and the Hebrew and Greek gematria as presented on the Internet by the research of Vernon Jenkins, Richard Amiel Mc Goug and Peter Bluer. The scientist of ancient arts, Charles William Johnson has with his linguistic and mathematical work clearly shown the links between ancient Egypt and the Mayans and presented the Long Count from many aspects. His basic work and his encouragement have helped me to find my way in the Mayan labyrinth.

In part I and II of The Code Behind the Mayan Long Count (*CODE*) I suggested that there was a code connected to the Long Count referring to a specific Mayan count for a synodic period of Venus. I also found proof for my assumption in certain geometric constructions that among others mirror synodic and sidereal orbits of Venus, Jupiter and Saturn. In my work I have mainly used the Pythagorean rule for basic and special triangles, the golden number (*Phi*), and different calculations for Pi. Having laboured with the Mayans figures for a long time I finally found that the figure 1 314 is the code of the Tzolkin Rectangle. In Part II of (*Code*) I showed that when the four Mayan main counts, the Tzolkin (*260 days*), the Tun (*360 days*), the Haab (*365 days*) and the tropical year of the Mayans (*365.2420 day*), are multiplied and then divided by the 1 872 000 days of the Long Count, then the "twin" figure 6665.6665 comes up when using decimals.

tittle tattle tale theify feminotions

what if the drying up of females and the blocking of those hot eager and yearning to tap knowledge from older partners is THE prime cause of a lot of troubles that stack up in the ways that find expression in/as prionization????????? The birth of tec as defence against rape (*Drew believes that*) is primary not to say primordial femit(*h*)eclysm

Drew Hempel seems THE, triplefold, most obvious case: both parents alcoholics, a good spur towards antinatalism but Drew made is only as far as woowoo taoism, believing the sexual energy can be raised to the eyes and leave as a healing force ... or sent through phone lines, he likes the asian martial arts choreographical capers and equivalent of american wrestling, etcetera. The only good thing one can say for his lock leg lotus faith is that it made him apathetic rather than paranoid. ... if you need help retrieving his erased blogs in order to help you realize that his repetitiveness and rote (*keyboard*) performances, never cut and paste, always with a subtle nuance (*he was a child recitalist*) are a hell of a lot like and rival Douglas Dietrich and Bob Dobbs to name only 2 of the specimen i know, let's throw in another radio buddie: Les Visible, just let me know.

it also struck me last nite, that Douglas applies the very same tricks he accuses his targets of not specifying what and when breaks are taken and audiences left with automatic pilots, replays and worse robotricks (*out of a sense of duty .. schedulity the siamese twin of credulity*) ... Americans do seem to derive perverse delight from such play on .. not words but robots (*quite the same thing when it comes rite down to it i admit ... give or take a few ratchets in the metastatization bullshit voltage over base touch boltage*).

A 64/66 COUNT

http://www.earthmatrix.com/temple_quetzalcoatl.html
this one sources Jose

quoting

In The Mayan Factor, the author, José Argüelles, treats different aspects of the maya counting system and discusses a possible link between the I Ching and the ancient 260c calendar known as the Tzolkin. Mr. Argüelles cites a series of numbers derived from the I Ching and the magic square of Benjamín Franklin, which yield linear sums of 260; the same count that corresponds to the Tzolkin.

Arguelles indulges with wild abandon in exactly that which the muslim took umbrage over from and murdered Khalifa for: writing himself into and recognizing himself in code extracted from holy scripture, uncovering proof, trace and purpose for and of himself, chasing his own tail. This process has been accepted and known forever; it's merely the cerebral and even divinatory variant of getting expert on hometurf; it's a form of attraction, reputé, fame ... it sets you spinning around and around a more and more familiar course to the point of loosely following, directionless riffraff (*including baggage and all their stuff*) gravitating towards you and shaping their act up by molding it and plugging it in to yours ... presto ... dreams of unity, unicity, truth, justice (*the ruler alive and well in a crystalclear crystal [[y'ol' unfacetious]] and cover born once again as always*).

it completely derails at 4.44, claiming the bulk of the bible was prophecy and came true

he debunks the protocols, McKenna, Icke and lots more as well

conclusion: this is purer and more boring grade run-on deception and run (a)way pabulum than the dynamite theologization of socalled genetic science by the likes of evoGen

Boulder Weekly:

Letters | Race in the U.S.A.

Among Ward Churchill's trademarks (*snide remarks, long-winded pontification, deceit, pompous jargon, etc.*) is his delight in guilt-tripping white liberals, ...

Lucero: A one-man wrecking crew?

His TV spot begins with images of Churchill and a voiceover: "Remember Bill Ayers? Ward Churchill's friend? Little Eichmanns?"

18

????????? Ward Churchill?

basic: 1st quintillion (*input, 2-5: store, process, output, matrix*); the tone sequence make a lot less sense to me keywordwise (*they mix music with physics and dreamspellers never list flaw, drawback, or vice inclinations*) ... but crystal (*tone 12 = dedicate, universalize, co-operate*) puts you next to the central column in the tzolkin ... where syncs come comfortingly, astoundingly fast and thick
you are 'surrounded' by crystal warrior (*complement/in front, analog*), lunar mirror (*occult/beneath, unexpected*), crystal skywalker (*behind, antipode, something you come/get around to eventually*) and crystal eagle (*your guide*)

persons vs particulates .. meet in the fold out center ... at hinoon ... and not well past live and sell by, trot out, display and do or die date ...

ipaFr6ukZ1A .. Gary McK in his own words about the 'extraterrank (*lingk*)s' with tools as crude as he alledgedly employed ... they saw him coming from an extraterrestrial mile away and just opened a few doors he knocked on ... to feed him a little bullshit ... this is the same crew that wants you to believe Roswell was real aliens instead of prisoners of war committing suicide - a particular pygmy tribe of japan employed on dirigibles that sailed the jetstream .. etcetera ... listen to Douglas Dietrich.

19

<http://pan-holland.nl/>

i just noticed only 5 seals have a tone that hits the spot, all the other tones sorta fall in between the seals.
 $5 \times 54 = 260$: $5 \times 13 = 65$... every 4th seal . $4 \times 13 = 52$ 5×260 the guide jump seems to be a function of the $260:28=9.3$

YEP, 'twaznt duh butch NaZis who won after all ... the dress up shape up

beam up femme ones are still fighting back fiercely; fall out so bad the aliens are backing away as fast as they can ... even the ones that were foolish enough to leave before us - and are homesick - like we're fixin to do ... they might be our only hope but theirs is prolly figuring out how the hell to compost us safely.

ps: the supposed Roswellian shown 0:43 - 0:49 is a relic of an ongoing satanic campaign to hid war crimes against the japanese - check Douglas Dietrich a Sino-USian on that.

Check out Recollecting Tibet, a 45 minute documentary on the current state of Tibet under Chinese rule. Often using hidden cameras to avoid prosecution, and spending 3 years working on the film, the filmmakers wish to stay anonymous in order to continue their investigative work in oppressed countries.

Windhorse vid is made by Ludovic Segarra for France 3 TV 1995 and claims

a miljan casualties, 1 in 6 tibetans .. in only the first 10 years of occupation ... almost all of the footage is jerky ... but it hits hard with full-on realism and the intermittence of commentary is well done none of the comments on the first of their full pages are threaded -- suprising for a 1:10 ratio .. but there seem to be sino-machinators on the prowl which may still get counted even when marked spam -- and **none** mention either the middle east, palestine or zionism which i find even more suprising since it's clear to me that the chinese took a leaf out of the rotten sections of western 'play'books and did a nasty, cruel and yes, simply satanic occupation of its own .. alongside allowing industries to pollute with even greater self-harming impunity, building hi-rises and such rot for 'good' measure; to show they belong, the inferiority complex of a giant .. due to not noticing many of the folks i point to*, let alone me braiding them into greater tensile, pacific, better and more overall strengths than have ever been displayed in our section of the universe .. as well as, i like to carry on thinking, readily and really really mainstream palatable.

* - Arnold Keyserling, laetiusinpraesens, jose arguelles ... the classic soil book by King, John Liu these are the most appreciated one:

62 Tibetans; young and old, monks and nuns, farmers and nomads, students and businessmen, have set themselves on fire since 2009 protesting China's continued occupation of Tibet. The group expressed "grave concern" over China's response to the? self-immolations and charged them of "exacerbating tensions" in the region.

GONPOKARPO 4 dagen geleden 13

Despite China's "escalating repressive measures," the group said Tibetan resistance is "stronger and? more diverse than ever."

"The Chinese government is discovering that a display of force is unable to prevent self-immolations, mass gatherings or other diverse forms of resistance, including displaying posters and banners, recording video messages, communicating through music, literature and expressions of national identity," the release noted.

i would add a caliz (*in radiation*) in order to harmonize with and indeed honour (*through sounding of*) terrifically 'terrestic' desire, lest we, looking up, keep our terrific stumbling 'up'.

just before the 40th minute JA likes to smear blogging as loony babble cause of the wordage disconnect from the "root power of sound and number" ... well, i think his own wording clearly shows that the problem he diagnoses ails him also, a slight tweak sets it right thusly: rockfriction -- through solid prayerwheel disc, level & story stacked as hi as you like and turned by wind sweat water and combos thereof -- is the 'sound' part which begins the sounding and the innumerizing of singularity (*how many dustspecks in that piece, how many off of that mani stone?*). You get the idea .. and if you don't yet, visit my account and dig around for some rooting pow (*D*)er to sound the sacred. You're a moron if you can't find it. I thought a slight slip of paper i handed JA when he was in holland would integrate this grind/g(*o*) rounding aspect but alas ... he preferred priceless rare lipservice payments to 'garden culture' though clearly his followers are into it way more than he ever was ... thankfully. And so am i.

for the first time i understand that Vernadski's law about constants applied to tribal times but NO LONGER ... as long as the amassing massing and marauding bands keep milling about (*hah!!*). i should have known a man with an eye for broken treaties should compare them to laws of his buddies breaking down.
"applied correct standard of measure"

24th minute has the first mention a mysterious 'instrument' he don't mean my take on it, merely a knowledge i used to turn that word into 'strewin ment-ality' (*to try evoke association with and point to the spreading of wealth and blessings, iow, compost after ingredients got collected and processed*).

he says the use of this outlook and application of the standard (*not 'such standards' as if the aboriginals all related to the sun and so had to agree when comparing notes as if it's a global[[ly standardizable]] 'think' to be tribal [[hello splinternuts!]] as much as a tribe can't help going global .. i mean he uses it to*) relate to a singular sun ... but at other times he attempts to point to the fact that our yellow glow and seething broil brought to us as heat and light is but a speck in a wholesome soupbowl full of such ... anyway. application guarantees the reset and survive .. and only that can prevent vaporization.

25:37 'vaporized' 25:43 'would only be bycause the correct instrument was applied'

HET DODELIJK VERZWEGENE my father perhaps more than my mother, but basically both, made me feel like i was an enemy withing the gates and they were prepared to give me what some of the migrant workers get if only they move on and piss off. Emigration was an integral part of their mentality realizing full well stability is the bias and luxury of looking at only half the story.

Mystifies me why he made no more of an effort to reach out to me ... i am so clearly the dust guy though putting up with the Luc Sala in 95 -- when i did slip him a piece of paper i was hoping would blossom into a full on relationship and why not, his standard of measure being so close to mine -- who provide(*r*)d me with my earliest internet access (*and ran an A'dam tv cable tv station along with computer shops ... and had some sort of morbid attraction to things native .. mind-machines were his thing for a while, a private hobby he called 'ego-soft'*)

9/11 gave dust a bad name the same why all the jesus like people in the world got sternly spoken to and admonished to 'submit' and 'believe' (*rather than act out similarly*) cause he did all the work and besides, it's the kind of work that gets you crucified. He was 'made an example of' (*mind the meaning flipflop*), not the once and for all scapegoat, halting that line, obviating the need for sacrifice .. but rather .. the end of the good road, the deterrent (*add a g and you have one of the greatest probs of today, along with paint and booze*), a spectre with reverb forwards, something modernists have spun and tecced up to global threats, the fate of the earth hanging by the thin lines between fingers and buttons, triggered by any number of mad men's minds.

ps: in that video there is talk of tetuacan ... how far is that from palenque?

An Iz man will not leave 1 piece of fruit to the palestinian for every hundred he steals, he prefers to raze the orchard and invest in rockets a hundredfold of what the palestinian can afford to spend on what amounts to little more than a token of protest over such colonial injustice. An integral and insurmountable gap is not existent within your research erudition...Namely, Valdamar (*Val*) Valerian's brilliant works. From MATRIX I, II, III (*both volumes one and two*), and the extraordinary MATRIX V GOLD EDITION materials (*three volumes plus*).....This work is vastly superior to and negates many of the books and researchers you do cite (*many of which are highly questionable within not only their content but also within their character*).....A true dimensional meditative and contemplative foray into this realm is irrevocably deficient

without Valerian's materials being properly assimilated and integrated.

Bernhard Guenther

October 19th, 2012 at 11:27 am

There is disinformation in Valerian's books (*which I've read*). Here's more on that:

- Critical Notes on Val Valerian

<http://cassiopaea.org/2010/09/18/critical-notes-on-val-valerian/>

Here's also an exchange Laura Knight-Jadczyk (*one of the researchers presented in our video*) had with Val Valerian: cassiopaea.org/2012/03/14/the-wave-chapter-64-crossing-the-threshold/

"...and negates many of the books and researchers you do cite (*many of which are highly questionable within not only their content but also within their character*)"

Until you can back up your assessment with facts

(*which would include reading ALL the books you question before doing so, so you can address the material as a whole, addressing each point without taking things out of context or over-generalizing with hasty conclusion/assumptions*) and without ad hominem attacks (*character assassinations*), what you state is simply a fallacy.

Lastly, despite its length of 1h 50min., this documentary is simply an overview, hence the book list at the end. If you'd read those books, you'd see that Valerian's work is mentioned in them in depth as well as many other works we haven't mentioned in our film. It would take a 6hr documentary or more to include all the data that is out there. Fwiw.

dude .. stop fucking yourself with your hardass maniacally mechanical anti-intuition tude and see if you won't like it ... have you no shame? recommending we join your IN (*to comic books*) CROWD deeply to become worthy enough and of hi enough status to deign to adress you? Is that your ideas of being generously inviting for a game of catch (*up impossible, prior ficsins and riginz declared off limits and unbudgeable*).

Vermiis resonates my feeling enough to join in.

why did MT disappear after threats and why have none of his tapes (*fairly well distributed judging by the stacks of free writs he left around santa monica*) ever yet shown up on youtube?? - Is that one little article Laura quotes and tolerates a token/alibi type deal to hide she knows more (*i mean .. what's with the rumour Laura killed somebody*)???

ps: as per Douglas Dietrich the Roswellians were Jap prisoners of war .. although he isn't quite plausibly explaining how they can commit harikiri during a demonstration without normal size bodies falling along with them .. that whole payload thing is kinda confusing and his size complex has a lot to do with the comic book disease .. it's pure weaponization of intellect in order to distract from the realization one is a huge factor in a continent wide despicable occupation .. in order to cover a tiny one at the most ancient crossroads in living history ... just to make matter s more absurd

the 30th minute has his first mention of the 86 Khalifa thing, before that he recounts being a renowned author and imprisoned for apostasy the second, and militance the first time. around minute 16 he's on about a hi-jacking to go fight in Afghanistan but i wasn't giving it my full attention; he sounds like he had way too much coffee or something.

@57:00 He is wrong again. The research he is referring to were talking about how clay could have acted as a catalyst for abiogenesis. A catalyst is not a building block. So it is stupid to say based on that the first cell was made from clay. Also, not to mention that "clay" is a vague term as it refers a huge variety of compounds.

Besides sura 15:28 and 55:14 reveal that God is supposed to have created Adam from clay much like how a "potter" works. This guy is full of shit!

"a few verses that shouldn't be in the Quran"

is too strong a wording and proof of sloppy homework ... i recommend packing a sense of humour before tackling this interesting puzzle.

imagine a bookcover with clickbuttons ... after many openings and closings one of the sets lets go of the socket instead of it's twin, voila, a transposition and the link missed here ends up extra over there. Folding by the way is of the utmost importance for a potter.

J&T: No, the #19 miracle literally requires the removal of 3 verses from? the Quran

"From the missing Basmalah of Sura 9 to the extra Basmalah of Sura 27, there are 19 suras."

There was a time when the calendar change folks at lawoftime dotty org - who are the main catalysts for the popularization of mayan calendrics (*21/12*) - integrated the 19 factor in their calculation ... but rather than deepen this work (*06?*) the meanwhile deceased mastermind went on to a 'synchronoton'. Not even folks like Yuksel made much of it.

Hi Poet Piet, i thought that this blog was like an abandoned house that i was visiting and writing a grafitti on a wall, it seems im not the only one here and is good to know that you are still working on whatever you are into which i dont get to understand but ill see if i find some time to whatch any of your videos
Hope we all meet in the 21.12 Rainbow Bridge mindwaves !

Thanks to A1d7r7i and Poet Piet for your e-mails and recent comments.

It was never my intention to pause for so long, and there have been many unfinished posts since the one that disappeared.

This week, two other bloggers I follow also mentioned they had lost posts as they were about to publish.

The domain issue seems to be improving without acion on my part. Today, Melovia 12 Moon was finally able to access this blog for the first time in awhile.

Your input means that I will actually manage to post my current blog-in-process, hopefully for Kin 191, which is one Week before 12/12/12, and one 16 day Cube before 12/21/12 :)

Love, Harmony and continued Patience to all, during this intense, long-propheisied period we have all entered.

VV (*in 08, from bulletin 12*):

Well, this morning, I did salat prayer and read a few verses in the Quran from Sura 8. So then I used these few verses as my meditation. So I read Sura 8 verse 65 and 66 that have the 1320 coded into them.

If you put the numbers together it is 1320.

Then I did the mathematics on the verse $8 \times 65 = 520$, which is 260×2 . So this to me confirmed the victory of 1320.

[8:65] O you prophet, you shall exhort the believers to fight. If there are twenty of you who are steadfast, they can defeat two hundred, and a hundred of you can defeat a thousand of those who disbelieved. That is because they are people who do not understand.

[8:66] Now (*that many new people have joined you*) GOD has made it easier for you, for He knows that you are not as strong as you used to be. Henceforth, a hundred steadfast believers can defeat two hundred, and a thousand of you can defeat two thousand by GOD's leave. GOD is with those who steadfastly persevere.

HUH??!?!?!?!?!?

factor of 10 and factor of 2 somehow come to 1320??

20 200 100 1000 = 1320 ... and 520 (*2x260*) .. the important thing is of course the 10fold ... whereas the next verse has a 2 fold

100 200 1000 2000 = 3400

better check on 528 .. not in the numolist ... but it's that number worshipped by the tuning frequency guys

i had forgotten Keith Hunter's name already, .. end of last thread here had him as a fresh find which i hope was not the cause of the long silence. Here's a few notes/reminders regarding this numonoid in his own right and i was entertained by various podcasts and vids he did (*'lightdescent' on yt*) over the last few years.

He seems to not be rooted in dreamspell at all; but one learns a thing or two about the long count; at least i did; here's my note from december 2nd, kin 188, 6Star

1559 the Aztec ceremony was interrupted by the Spanish
18th of december: earth and ceres conjunct 120 degrees further: merc and venus

Both venus (*in transit, on*) and mercury (*underneath*) aligned with our sun 1.15 the 20th of december
venus / saturn sharp at 17.30 the 21st

all this resembles what happened in 1859 - if you ignore the difference of about 35 degrees in the 2 sets of conjunctions - when northern lights went crazy all over the world and all satellites would have been a permanent loss had they been there then.

perhaps a kin more willing and better able to follow the man's leads into the thickets of decimal points

(bring at least a stick and don't take it all down, choose a path wisely - well clear of birds nesting and better yet, before they do) and make himself at home there will come up to me and say 'it's via you i first learned about ... this that or the other, pay back time!' .. and proceed to assault me just kidding.

parada13.com is broken -- xochipilli is following through his odd mix of spontaneity and rote formulaicism during a double wave with an undisclosed number of participants in Perun northern Spain.

In sharp contrast to the pics at his place of occupy inspired, amassed masses close packing and thronging themselves down the Spanish boulevards, his 'ride board':

<http://piratepad.net/6wLN6K3QsM>

... is quite deserted .. but perhaps people get there other ways. I hereby offer lifts to any bodies willing to pay for gas and speeding tickets from Holland.

xn0r.deviant art (*calls himself sadukan on the 72 page long Rodin thread at icke forums*) does oddball stuff ('Herubic Chromotion') he obviously doesn't think through very far but hey, all depth starts with superficial mimicry ... and reverts there as soon as the chainlinkKin goof off too long.

i could dig around more if anybody wants more for instance about the slew of unfortunates involved with, not to call it 'tangled up in' reincarnation.

I CHING LO SHU ANCIENT WELL"

The TRUTH will be revealed by Ed Witten and the SATOR Square NOT IGNORANT little Lee who fails to realize the SWASTIKA is the ancestor/the elder to the Lo shu and I ching.

Nope its Author Paul martyn smith and you would not know if you choose NOT to read his free online book. How little weight your words carry is beyond a joke. The four directions of the H To Yellow river map produce the values of time as we use it today and the great year- eons etc. Ralph has NOT READ the workings so understands VERY LITTLE indeed therefore as you are all used to Please ignore his uneducated in I Ching math snipes as he doesnt even have a clue how it works.

The 4 directions create the 5th Element that is a representation of all Heaven and Earth counted reflected and Paired from Binary images [trigrams] to mod 9 integer symmetry. Also we have the metric in $1+9=10$. 10 as 5 are found in the centre of the ORIGINAL HO TO Yellow river map with Elemental pairs in the four outer houses. 1 6, North, etc in the coming together of all Hexagrams we get the 5th element. The 5th element brain box keeps promoting for us- thanks Ralph. Paul discovered this all down in his free book to share openly for 'consideration' The saying goes the proof is in the pudding- we say 'the proof is in the eating' Those interested will be happy they looked. Its much deeper though easy and i can help in any way.

Paul is a gentleman, where as i obviously and unfortunately bite back to ignorance such as Raphs blinded comments that are weightless-, so please do not tar Paul with my easily provoked brush. Same work though he is a true researcher and has connected all ancient systems through the bringing together of the elements as indstructed by the oldest book of law- the book of changes I Ching and ho to the well and lo shu.

Yes the swastika is involved -maybe- so what?.

Vortex math sticks with it re pairs = 9 and mirror- until we use the metric $1+9=10+5=15=6$. progression up THE 9 STACK MOUNTAIN.

These functions complete the math 100% as shared openly with all in his book 'the sum of things'

fact is Lee Burton VBM clones are a dime a baker's dozen.

get a grip Lee

BEST thing you can do at this point is try to merge your pathetic Lee Shew THEORY with something etched in STONE found in Pompeii called the ROTAS/SATOR Square.

Statue of Widukind in Herford, Germany, Coordinates 52°8? ----- So what do Barack Obama, Einstein, Ed Witten and ole RaphaHELL all have in common with healing our DNA?

<http://kachina2012.wordpress.com/200...hero-widukind/> The statue of Widukind, the last Anglo-Saxon to oppose the Pope is located also at 52.8 degrees latitude. so I now know exactly what it is that I need to do.

Contact Ed Witten ... why Ed Witten? 2 very good reasons. hope you folks realize I am making a beeline, going straight to the top, going to see the queen bee himself? Ed Witten and Roger Penrose designed the Twistor String Theory together, or at least RP started it and EW picked it up later. ::::::::::::::: Ed Wittens birthday carries thr CODE 11 2 5 8

Quote:

Edward Witten (*born August 26, 1951*) is an American theoretical physicist with a focus on mathematical physics. He is a professor at the Institute for Advanced Study. He is a leading researcher in superstring theory, supersymmetric quantum field theories and other areas of mathematical physics. Edward Witten is regarded by many of his peers as one of the greatest living physicists.[1] He currently is the only physicist to have received the highest honor in mathematics, the Fields Medal.

8 26 1951 11 2 5 8 and 69* So why Ed?

Ed Witten's theory, the notation he uses to express his Twistor String Theory is a perfect fit for the SATOR/ROTAS magic square found in the ruins of Pompeii, and the source of this magic square is in fact unknown.

THIS SQUARE is the purported TREASURE that the TEMPLARS found...?

YES!

I really FEEL it is, and here we have another profound prediction, made by me, that Ed and me shall PROVE to be true, wait and see.

It even bears their name.

The Knights Templar Magic Square, source unknown, found in Solomon's Temple.

Sure I can buy into that, the ROTAS Square heralds from the Solomon Temple era?

Did the Templars find gold or a GOLDEN RULE within the GOLDEN SPIRAL found within the ARCHitecture of Solomon's Temple? All of the same letters are used in the ancient SATOR/ROTAS square and modern TWISTOR STRING THEORY? Only the two vowels, the only two vowels used in the 5x5 magic square, the A and O, the Alpha and Omega, are NOT accounted for.

YES the astute will immediately see that $5 \times 5 = 25$ (*marko's cosmic blender*)

The first deity he consults through the oracle is Nechung, who is known to be an unenlightened being. This is very
fascinating also. You can read about the wordly spirit Nechung here: <http://dorjeshugden.com/wp/?p=5609>

<http://www.youtube.com/watch?v=yKKpPjFFcmE> 5th m of 37 w tranlated RQ talk and slide she notes and laments the fragmentation as we are looking at 'her' tomb. Anybody who is following the blossoming of my being, guided by the way i placed the markers, cuts, biforkeytorkeys in the stream of my consciousness and is aware of the new banks and pools in it's luscious rivers and steep narrow dams up stream upfall will not be supriised to hear me note: once again and as always, a schizophrenia fully surrendered to .. with Stockholm Syndrome type abandonment will always mirror perfectly, ... along a unified single plane of reflexion ... making the job of reality unveiling quite simple: turn it around ... and so at

4:11 closing of the cycle, there's still many fragmented energies floating around everywhere.

nothing about this is at all remarkable; one can find samples of this on the street from the mouths of 'zorgmijders' (*care avoiders*) as well as RQ, tDL, etc.

truth via inversion is in this case: piles of substance being fragmented too little .. sacred sites, megaliths, ancient tombs ... i'm convinced many of them are stores of supplies brought from a long way off waiting patiently to be taken the last step, distributed, assimilated, made into soil

compare this next note and quote to the comment i wrote yesterday on RQ's use of the black/white metaphor .. or to be more precise, the ABuse, the psychologization of it in both cases ... appropriately enough, the application 'fits' either extreme of the warrior worrier spectrum; one of them shoots guns, the other goes 'inwards'

.... i guess i should have put a vertical version of the colour bars on my old front page right? Might have gone a ways to prevent and remedy these kinds of (*despite use of the same colourcontrast metaphor, wildly diverging*) 'inspired' moralizations ... i just kind of left it sit .. even though pretty much all subsequent ones i did were the horizontal variety .. to reflect the laws of gravity better as i was putting more and more emphasis on my numbering / colouring schemes growing from the 7 basic rainbow hues to 9/11 with the greys appearing almost simultaneously with bl&wh. But i never realized this could be a major break off (*rather than through*) point, .. and besides ... rainbow has both vertical and horizontal parts to it's curve and the rest ...

the gun as the substitute cross and the traffiC REDdened loadright roadlight

guitaoist scolds folks like AJ does ... he wants hemp .. and i agree it would be great for a great many things but has drawbacks too; take his colleague calendrist hemsplast Ital Iman (*chilam balam - Naahnikki*) who's latest 20m vid includes a few photos of him in Chaco Canyon with a few friends, he went there for the timeclickswitch and is disappointed nothing happened, remarks on the passing of same sex marriage laws and a mass killing at that time instead ... then, sort of by way of attempting to legitimize his choice of location claims that Olmec and Chinese combined to create the Red Indian, then some went to become aboriginals and when they came back, recrossed and added/became hopi. He also shows a bunch of very feral caribbean rastas, most of them schiz up to their eyeballs with magic wands at, if not in, hand.

you know, guns .. atomize the social fabric ... at least under a top down system that prevents bottom up scaling*.

* - a specialty of mine and i mean, right where it matters most, just me .. unfortunately i'm quite tired of pointing at the leads i miraculously found (*and tried to pass on, limelit and buffed to a shine*) with odds oddly stacked in both dis- and favour ... on the one hand 99% of all faiths are directed towards it yet rudder- and clueless (*ever saw 'King of hearts'?*), on the other the roadmaps are so twisted and quirky in themselves already, with odds veritably gigantesquerading on top of that, when 'uitgerekend' (*=of all*

people) liddul ol' me finds a bunch and pieces a few of them together (*as if by the luck of the draw; doable once you discount that scaler of scales: reincarnation*), ... aaaaallll that makes it hardly any wonder i find [and have found nearly] nobody who claims to understand and applaud me, and worse, certainly nobody who likes to work it out with a few rockedge cutting tools!

if i explain why i am working (*if being on youtube all day can be called that*) with a laptop that was fast in 2006 even though i have plenty of money, the tale becomes more unlikely still ..

As i said, guns atomize the social fabric ... they go .. or went rather, with rugged individual (*ism*)s ... and so works exactly opposite to the claimed, Jeffersonian -- 'an old and decrepit republic hungers for the blood of tyrants, perfect revival serum' -- yarn, already an oxymoron ... cause the faith they sell you along with the hardware (*again, the other way around really*) is that the gvt is afraid of gun owners and so toe the line. It simply is false security, a perpetual, distributed false flag if you will gun owners put no store by close community & tight ships of state that don't let the gamblers in and abuse any part of it; they avoid it not until but SO it becomes a problem by definition.

guns are meaningless without local autonomy wether or not scaled up and federated. A gun is the pretend secularism of at heart still, deeply relidiotic 'cross' eyed missionaries, mercenaries, colonists, working for the resource hungry desertifying empires from way down the crossesladders to the very first traffiCREDlight necessitating CROSSroads, now a windy and dustgusty place.

I believe AJ is rilly reali reli about his "50" guns, literally .. and they 'function' as about 7 (+1) substitute menorahs ... just as useless for deterring tyrants; in fact guns and proolly all 'relibols' (*including prayerwheels*) encourage ..and even presuppose!.. tyrants cause guns were conceived FOR & steeped IN occupation pretending to be individualism. Supreme Primes: 7, 11, 13, 17, 19, 23, 29, not 31, not 37, not 41, 47...

- Supreme Primes are distinct prime numbers in which you can input any number or digits in a specific symmetrical method and it will always be a multiple of that prime number:

(1) Every Supreme Prime has its "total number of digits" except for 13 in which it is determined by the prime number itself reduced by 1. This applies to all Supreme Primes.

(2) This should always give you an even number in which you divide by 2.

(3) Then you can input any digit from 0-9 in each individual digit group symmetrically.

(4) Finally, you concatenate it back to form the initial "total number of digits" which will be a multiple of that prime number.

Example: 7 is a the smallest Supreme Prime.

(1) = xxxxxx a total of 7 digits reduced by 1 totaling 6 digits

(2) = xxx | xxx separated the digits by 2.

(3) = xyz | xyz {123 | 123}

(4) = xyzxyz/7 {123123/7=17589} Voila!

You can verify yourself with the other prime numbers I put in the title. There are infinite amounts of Supreme Primes.

Click on the link below and it will direct you to an excel spreadsheet that I made in order for you to visualize the beauty of this discovery.

On the left, you have the digits in which you can input from 0-9 and it will automatically change the cells associated to it and apply the formula which I described above:

Just this simple code in MATLAB generated 1000 random 25-digit numbers. All the 1000 numbers are multiple of 19.

So, this is not a miracle. for i=1:1000 x = floor(random['norm',1e25,1e8]); residual(i,1) = floor(x/19)*19 - x; end

alivarmaghani (*2 months ago*)

Hi. I am Muslim, and definitely I believe in mathematical miracles, but statistically, when a number gets very huge (*e.g. 20 digits*), the number is a product of many numbers. It is veeeeeeeery highly probable that it includes 19. No?

Jesus in Comparative Light and the book "The Secret of Christ" by Christian Lindtner

An address by Lars Adelskog at the International Seminar "The Sanskrit and Buddhist Sources of the New Testament", Klavrestroem, Sweden, September 11, 2003 (*final version*).

THE FALSE MAHATMAS OF MR AND MRS ROERICH

by Lars Adelskog

In his book Nikolai Rerikh. Vestnik Zvenigoroda. Kniga pervaya. Velikiy Plan – "Nicholas Roerich. The Messenger of Zvenigorod. Book the First. The Great Plan" – published in St. Petersburg in 2002, Russian researcher Vladimir Rosov presents many important data on the basis of archival studies he has made in Russia, the United States, and India. It is evident from the facts presented by Rosov that what principally guided the activity of the Roerichs in the 1920-ties and 1930-ties was Nicholas Roerich's "great plan" of founding a Buddhist utopian country in Central Asia, the "new country", Zvenigorod, which would include parts of already existing countries, such as the Soviet Union, Mongolia, and China. Nicholas Roerich cast a covetous eye in particular on South Siberia and adjacent Mongolia, which in 1911 had liberated itself from China, but since 1924 was a satellite of the Soviet Union. The proposed financial basis of this project was a corporation, Belukha, which was going to acquire from the Soviet Union concessions of cultivation of land and mining of valuable ores and minerals in the area. Therefore, it was necessary to establish an intimate collaboration with the Soviet

2

regime, and by this time, in the spring of 1925, Mr and Mrs Roerich had made a sharp turn from their previous manifest anti-Communist orientation. The Roerichs now declare unequivocally their sympathy for Communism, and the communications from the "mahatmas", of course principally from Allal Ming himself, consistently praise Lenin and the Soviet regime, and let it be known that the new teaching, which is supposed to unite mankind, is an amalgam of Buddhism and Communism., "Everything has changed – with Us is Lenin...", as Allal Ming declares on the 29th of May 1925. This message was put forward in no uncertain terms in the third of the many books that Helena Roerich compiled on the basis of the communications received from the "mahatmas", Obshchina (*"Community"*), first published in 1927 in Urga (*present-day Ulan-Bator*), in Mongolia.

It proves impossible, of course, to realize these megalomaniac plans of a Buddhist- Communist empire radiating from Siberia, Mongolia, and Tibet. That expansionist urge into Central Asia, which the Soviet regime displayed in its initial phase, is fading by 1930. This coincides in time with the Roerichs' directing their attention to the United States instead and starting cooperation with American capitalists. Louis Horch becomes the financier of the Roerichs and Maurice and Zinaida Lichtman become their close co-workers. Both Horch and Maurice Lichtman, however, are simultaneously agents of the Soviet secret police, the OGPU (*at the end of this paper there is a reproduction of Lichtman's identification document with the OGPU*). During this time Mr and Mrs Roerich associate with, and advise, the President of the United States, Franklin D. Roosevelt, and his Secretary of Agriculture, Henry Wallace (*in 1940 he was appointed vice-president*).

By now the Roerichs' sympathy for Lenin and Communism has vanished into thin air, which is evident from such facts that in the new Russian editions of Helena Roerich's books, containing messages from the "mahatmas", all praises of the red tyranny and its leaders have been expunged, or that the painting that Roerich brought to Moscow in 1926 as a tribute to the memory of "Mahatma Lenin", has been removed from the collection of 15 paintings that are exhibited in Riga, Latvia.

our presiding officiator had sudden toe trouble; me mom's is on the opposite foot and chronic, reflective of how she can't touch, understand, flex, move, use and enjoy another part of her: me. The lady that both protected me from lots of coarsenings, abrasions and bruising which the - subject, subjugate and exploit (*de- or employ*)- disciplines dictate had me as off limits (*shielded, what her name [hilda] means*), rebellious appendage she 'portActed' yet could nevertheless NOT go along with too conspicuously lest she be viewed as a traitor.

There is lots more in the mix .. not least of which is daddy the aryan married a jew in order to show the assimilation process, the rooting of jews was possible .. and he paid the price ... instead of jew on jew having world record offspring numbers, a jew sent to if not stop at least divert, slow down and deflect aryan Durm und Strang, stopped him from seeing his patrist dynasty consolidated for even a single next generation; he had a lightning fast calculator in his head and everything he had no time for got and/or observed on and off to the side got doled out in 7 different directions 4x a week on the phone; generous man he.

He wanted to make the nerdyist (*but not nerdyest*) genius legit once again (*no brute slaughtering of intellectuals; just cure and at least balance them, a frequent topic of conversation*). Surely a noble undertaking and one which one could reconcile and harmonize with the other eurasian attempts to turn rolling stones into spinning ones, grant them station, standing, legitimacy, birthrights, roots. Toughest job on the planet, Stolypin in Grandest Russia, and Hitler in Greatest Germany both failed .. but a general idea can be gleaned from 'Das Deutsche Volk in schwere Zeiten' by Rudolf Hans Bartsch 1917. The author, an Austrian officer describes a concentration camp he toured as a place where temporary migrants come earn a little money and the green thumbing skills to remigrate and become leaders with back home.

If Sandy Hook was a mediated archetype tale, set up by the gun industry for a lark, a bet ... (*and*) to lighten the mood of the bombers being bandied about, it's theme script was about something similar, namely the battle mummy will put up for sunny ... with the reversal/twist of her matriarchal hedging of him bested by the sunny to wrest free or, my anti-natalism and feeling i am me mom's jailer sometimes, trailblazing for the people who will have to keep way worse jews behind walls and strictly to their permie rations and chores for generations after me --- expressed as the jealous fit over not being paid attention and all absorbing, short shrifted & circuited as a once and for all spasm easily hit upon in a climate where guns are seen as a solution.

If Sandy Hook was ... triggered in roughly that manner by the first comment i made here in this vein i apologize ... couldn't get much worse and phonier so i look forward to seeing what this one will prove capable of.

Dutch proverb/rhyme: a donkey doesn't stumble over the same stone twice and the cornerstone theme has been popping up lately too.

he was obviously using the names of the week as an example for the radial plasma was too advanced in 1999 for the 12:60 mind....and it seems they still are!

This is confirmed in the Picarquin meditations held on the same year at chile where it is clearly documented when he said that we would no longer be using those old names anymore.

This statement that what you offer is a more harmonic 13 moon calendar is an insult to the memory and work of Jose Arguelles and to every person that might by mistake falll on this blog.

I still wonder about the magnetic attraction of the error, maybe thats the stupid reason of us in this planet,...and obviously on this blog.

Jannis and A1d7r7i know and are 100% absolutely sure that what has started here since last year is an ego trip by its writer and still they seem to appreciate her because of the hard work she does on behalf of the 13:20 frequency so continue to come back again and again to see if by the grace of the cosmic light did sometime things got back to their track, they even change names to try to persuade Clair to stop abusing this information stream and release this bad obsession, but every time they find that this whole stuff is going nowhere, and this project of global 13:20 cyber community has long time ago gone mad.

Even when infinite proofs had already been stated, like those pages on CHC vol 5, Claire still sees what she wants to see, and she denies the absurdity of her belief.

Her system presumes to be more harmonic than the other but it forgets the importance of the day out of time which is NO DAY OF THE WEEK OR ANY MONTH AT ALL, the day of the galactic freedom, which equalizes the power and free will in every kin granting them their place in the cosmic gameboard, a power she try to use for her own sake, trying to reach a status, distorting things, and ridiculously trying to impose a new calendar over those few who had tried to change the old calendar in first place, so she is trying to make a minority out of a minority and she succeed about it, they are 2 kin!!! plus one another crazy fella who keeps assuming to be Bolon Ik and is promoting yet another calendar, this is so spectacular!!!! i cant wait to see what happens next!!

2013andthemysteryqueen | January 29, 2013 at 4:14 AM

Beloved Kins

If this writer was "trying to reach a status" or to have a following, she would have long ago stopped preserving/promoting Valum Votan's pronouncement that 'Dali [First day of Week, Moon and Year] is always on Sunday'.
[and she would also be on Facebook and Twitter, etc]

Chac Le is certain that: "[Votan] was obviously using the names of the week as an example for the radial plasma was too advanced in 1999 for the 12:60 mind" in this 1999 interview.

Valum Votan had already produced the 'Telektonon' and "7:7::7:7? , with their consistent DALI SUNDAY connection on their boards and 28 cards.

He gave about 300 Kins the '7:7::7:7? game [actually a 4th-dimensional learning tool] at the 2005 Easter workshop.

Would it not make sense for him to mention to these kin, gathered from around the world, that in fact, all of the cards were wrong, and that Dali would shift to a different day each year?

In the interview Chac Le provided today, why would Votan state that each Moon and Year begins on Sunday? Without confusing the '12:60 mind' with talk of the plasma names, he would have said that each Moon etc. begins on a different day each year. In fact, he has never written or said that, not even in many conversations with this writer.

Sadly, few people are currently following what Votan said and wrote, and the 'official' 13 Moon Calendar is now linked to the Gregorian, instead of to the globally recognized 7 day week [which obviously precedes the Gregorian] But in 2006, this writer received confirmation that the year ends on Saturday, from the 'Star People': I did the 2006 DooT exercised suggested by Votan, on Saturday. We were instructed to visualize the Roerich Peace symbol and to ask extra-terrestrials [Star People] to respond to our telepathic call. The next morning, headlines "Day-out-of-Time Crop Circle Appears Three Days Early" and a few weeks later Votan published an article with that same title.

Just as all the places Valum Votan wrote that 'each week Moon and year begins on Sunday::Dali have been removed from the internet, just now I see that all mention of the Day-Out of time crop circle has been removed from the internet [including Law of Time's site]

But, here is a photo of the Crop circle displaying the 'Roerich Peace Symbol' along with its date of July 22, 2006:

http://www.planetartnetwork.info/events/day_out_of_time.html

These are some of the reasons I remain true to the two Votans [who put such work and devotion into bringing the 13 Moon Calendar back for Humanity, to the Star People [who also laid the crop circle of 28 circles/Moons {and its 9/11 and 'Time and the Technosphere' correlation} just 20 miles from my home] and to what I believe is true.

"May the 13 Moons of Peace Prevail!"

Dear fella kin ..

In this period serendipiëthical rules govern just for a sun cycle initiating 2014

This is the message the Telektonon Cards brearhed relying on Bolon Ik spirit .. which is a messengers task to affirm that in 1 or 1000 or even more kin that challenged those cards as if reasing the i ching , oracle book of changes. TELEKTONON is aware of forces obscuring the natural process by rhe planetcas a being, as a true space traveller passong the time and revitalizing generations of spirits to gloridy their achievements at a vast wave, say zuvuya.

Serendipitime just means to affirm the baby born from yr mothers spine.

Breath that on the pelvis as a well and sense the adventure for building relations that deepen the planets ur .. , its meaning and pendilant role in a great game .. not Lucifer as a Match but as an inspiration that communicates the common health

This is how a treekweak spell got anchor on the ship thumblng through barriers and frontiers .. sense its vibration and care for a cure aeon.

3 years of 364 and the foirth as 364 plus 5 evens its traveling .. and invites for a great reunion ..

The 9 daya in kweak moon repeat 3 times on a 9 base

The 28 th daya just symbolizes each daya , each breath , each moment of joy to partake .. It is just a daua of moon expееience .. evening them knights.

Paving the path for one clock time on the planet ; in 3 phases :

Dawn

Noon

Eve

Night disappeared inherently .. as each awakened individual ..
teletransithor | January 30, 2013 at 6:34 PM

22/7 indicates pi .. and is in the Life of Pi movie ..

It initiates juli 23 as nooyearsday ..

This was already minifest at juli 23, 2009 ..

See how 22 is bolon ik kin in dreamspell ..

Also the 220 fractal on crystal sun in a moon 1 year

Summed in treekweak they signal 2x11x10 or 2x2x5x11 elemental

2x2 is a relationship by 2 spiritual beings ..

5 is the serpent at high respect for its inspiration to survive ..

11 is again symbolizing 2 single beings in a relation ship ..

It refers to the rainbow tone Spectral ..

Then 10 is the planetary manifestation ..

Chac Le | January 30, 2013 at 5:41 PM

If you are promoting Valum Votan's statement, why do you miss the importance of the Day Out of Time NOT BEING
A DAY OF ANY MONTH or WEEK AT ALL ???

Neither Valum Votan had Facebook or Tweeter and nor the Red Queen does so why would that demonstrate that
you are not asking for attention by not having them too?

Yes, the 7:7::7:7 still have the days of the old week in it, but it doesn't dismiss the day out of time, every year begins
on Sunday, yes, even when every year has 364 days + 1 day which is no day of the week so, it falls from mature that
it is NOT the babylonian week that its being talking about.

"Would it not make sense for him to mention to these kin, gathered from around the world, that in fact, all of the
cards were wrong, and that Dali would shift to a different day each year?"

Oh and wouldnt be even a bigger mistake not to mention that all the synchronometers we were using were wrong
because DALI was supposed to be on Sunday??? oh wait no, he left that to the Mystery Queen who, after his death,
was supposed to fix this mistake and become a new channel for the very few followers left after the 21/12/2012
failure.

Yes the 7 day week preceds the Gregorian, they come from the Babylonian, just as the Julian Gregorian does, it
comes from the same old mind who wasn't even aware of Uranus, Neptune or Pluto, who gave Saturn a sacred day
(*more power*) and who left 1 Sunny day to have a break from the 5 day working week.

"Just as all the places Valum Votan wrote that 'each week Moon and year begins on Sunday::Dali have been
removed from the internet, just now I see that all mention of the Day-Out of time crop circle has been removed
from the internet [including Law of Time's site]"

Nice conspiracy theory : we all try to defeat Claire!

Jannis 7 Moon | January 31, 2013 at 11:22 AM

There were no plasmas printed on 13 Moon calendars in 1999. I can remember being "disappointed" around
2000/2001 to find those symbols on the calendar. I didn't know what they mean. This was new and honestly I didn't
like it.

The 7:7::7:7 is a NYING-THIG Terma and as described on page 10 and 11 the first transmission happened on Resonant
21-28 the Overtone Seed year, which was Febr.1998 and 21 Tzolkin Rounds "prior" to now. But the full power of the
7:7::7:7 as described on page 11 was not complete after 4 moons later. On Bolon Ik's 55th birthday, 15.05.1998 it
was Kin 77 and Jose detected on page 77 of Masters of Meditation the 7 Verses of Phadmasambhava. What
followed was an entire revision of the 7:7::7:7.....he does not write how long the revision took. But he wrote on
page 10 that the "Book of 7 Generations" unlocks the "Seven seals of Christian Revelation" and this is the reason
why the Japan earthQuake happened on Kin 77 - (*11.03.2011*) 18 Tzolkin Rounds after Bolon 22 Ik's 55th Solar
birthday. This was a sort of Karma release program from previous worlds. If you count 11/03 as Magnetic Jose left

this planet on the 13th day after the Japan quake.

The master root- teachers of Jose were Pacal Votan and Pahdmasambava. Also named Guru Rinpoche who comes in a direct lineage of Lord Buddha himself.

Phadmasambava was also known as the master magician who tamed the dark deities and forces in the northern land (*Tibet*) and introduced the path of the middle- Buddhism- into Tibet.

The Lineage TREE of the Nying Thig Tradition is:

Lord Buddha

Samantabhadra Dharmakaya

Vajrasattva, Sambhogakaya

Prahevajra

Manjushrimitra

Shrisimha

Jnanasutra

Vimalamitra

Guru Rinpoche, Phadmasambava

The power of Synchronicity is finally the same as that one of Vipassana, it is the highest form of Dzogchen teachings. Confronting yourself with yourself. You can also make a 21 day silent retreat or a dark retreat where you confront yourself with visions rising up in your mind. (*The father of Michael Ende who wrote Momo was a dark retreat painter!*) The root of it all is the uncreated ever expanding emptiness of the white light, no time, no space infinite Buddha nature, from which the Rainbow 5th dimensional body is derived from. This white empty space is middle time. You really don't need any calendar then, once you reached middle time.

But before entering you have to give up all, all your fears, the biggest of all is Deathfear. This is done with the help of Vajrakilaya- the -dark- power/deity of Vajrasattva.

I was once in summer 2000 initiated into both Vajrasattva and Vajrakilaya meditation, an intense two day retreat in Switzerland. So it is the direct lineage to Phadmasambava and Valum Votan. :-) Certainly at this retreat we were not focusing on -creating a rainbow-. But when the retreat had finished and all beautiful people left the place, we saw a mind blowing triple Rainbow. The most magical one I have ever seen. So bright and colorful you can't imagine. We were already on the highway and all cars stopped at the side to jump out of their cars and watch it! So please stop this discussion and create Rainbows.

Dear Jannis 7 Moon;

Thank You for your beautiful comment :)

You made some very good points.

This is the first I've heard of a TRIPLE RAINBOW!

A quick search produced this:

"Sightings of tertiary rainbows, or triple rainbows, are so incredibly rare – only 5 reported instances in the past 250 years – that many scientists had started to doubt the possibility of even capturing one. But armed with the knowledge of Lee's method, two photos have surfaced in the past few months, both showing a tertiary band and one revealing the first-ever captured quaternary band"

find out something. (*I'm also curious about the day Kin*) The number of the road where the initiation happened was
379! :) Can you remember when I once sent you a photo of me and Lara sitting in a hammock. So yesterday on 1
Magnetic Star I searched for that photo, because another beautiful Kin had asked me to send him one. I
remembered looking "good" on that photo as it was holiday and I was relaxed and right now it is winter my skin is
pale, some more hair on my head is missing... :) uff I really need holidays. Anyway I checked the date of the pic, it
was taken 13 Cosmic Blue Hand.

And so 520 days "later" I saw a Rainbow while driving in my car.

Did we create this Rainbow?

No!

We were lying lazy on the beach, when my partner 13 Star (*who thinks I'm totally crazy with my Mayan stuff, and who thanx to god is absolutely not interested in it*) said: Oh look there is a rainbow around the sun. Maybe SHE had a
pure thought/clear intention just the moment before, and created it.

But as time is radial and not linear, it was a message for NOW and it shall be a symbol for all Kin`s, all nations, all
religions:

Don't unite....

What shall I do with the telepathic bla bla from 144000 Kin`s in my head?

Be colorful ...

Understand each other, respect each other, every perspective out of every vast universe called "I" is different. And
create Rainbows instead of "Virtual Time" in front of your ego machine called computer.

The only other Sura with 78 verses is Sura 55, the "Most Gracious." Like Sura 22, Sura 55 is a multiple of eleven. Pacal Votan was the 11th in the Dynasty of Palenque. The last two verses of Sura 55 read:

"77. Which of your Lord's marvels can you deny?
78. Most exalted is the name of your Lord, Possessor of Majesty and Honor."

Certainly, the mathematical coding of the tomb of Pacal Votan is one of the marvels of the Lord. If you add 22 to 55, the result is 77. Sura 77, "Dispatched" has for its theme the "Day of Decision:"

"This is the Day of Decision. We have summoned you and the previous generations." 77:38 (19 x 2).

Without doubt, by the opening of the tomb in AD 1952, Pacal Votan was summoned for the Day of Decision. This is the grand theme of Sura 78, "The Event," whose number, of course, corresponds to the 78 (13 x 6) code of Pacal Votan's tomb and prophecy.

the next page begins:

The second of the 28-verse suras, 72 is entitled "The Jinn." While the Jinn usually refers to the purely etheric entities, it also means "alien" or "foreigner." In relation to the Arabs, Pacal Votan, a Maya, would be a "Jinn." At the end of the 72nd Cycle, AD 631, Pacal Votan was 28 years old. Because of the superior telepathic knowledge of fourth-dimensional time known and practiced by the Maya, Pacal Votan possessed jinn-like powers.

jinn-like = pranky, practicer of 'monkeyage' and joax

page 52/53:

in light of the tomb and the mystery of the stone which is death, it is interesting to read verse 260 of Sura 2, the only verse 260 of the entire Quran:

"Abraham said, 'My Lord, show me how You revive the dead.' He said, 'Do you not believe?' He said, 'Yes, but I wish to reassure my heart.' He said, 'Take four birds, study their marks, place a piece of each bird on top of a hill, then call them to you. They will come to you in a hurry. You should know that God is almighty wise.'" 2:260, p. 27.

As the product of the factors five and thirteen, the two prime numbers epitomizing the "fifth force" and the "power of time," then 65 is the number of the four hills upon which God commands Abraham to place the four parts of the dead birds to be revived. Please also note that four, the number of self-existing form, is also the key to the formula 4:7::7:13. (See below). Note also, as we have demonstrated above, that by antipode correspondence, Abraham = Pacal Votan (graphic, page 90).

tmq comment ON THE 11TH??

I venture to say (*think it safe to reckon*) that our 'sjeesDuHwees' has been severely impacted by another savantoid dutchman called Gert Kramer, obviously ... and so i am suspicious over his failure to be open about it.

GK runs thesharingociety.com and is a spiral dynamics (*that's Wilbur i believe*) fan a fanatic magic array plotter AND .. he did a lot of '999' tuning vids, comparing grands in front of audiences packed into the storage spaces at retailers of such ...

meanwhile, yet another 'combiknowtrician' (*Mark Collins, more about him in a minute*) just jumped across my visibility limiting horizon when i went looking for the "24 thrones of spiral dynamics" image i saw in Gert's latest vid

Nine Pointed Star - Revealer of Order in Chaos and Oneness of All

.. youtube tells me it's 22 hours old and seen 20x

he twits also but gave up blogging last summer it seems ... <http://sharing999.blogspot.nl/> .. and hasn't bothered to link his youtube account there even: thesharingociety .. grand piano vids galore like i said .. and hey .. 2 vids with the phrase i was looking for '24 thrones' (*of around 40 total at Gert's place*); here's number 13 and 14, a 9 and a 14 minutes long one (*i am giving the pinpoint link where the 24 are explained*):

112 3 584 3 718 9

887 6 415 6 281 9

note the very 'simple' (*single fold/mirror*) trick .. a balancing one (*meant to convey the dynamicization illusion*), disguised (*"enhanced"*) by using 3 colours ... of course exhausting the combinatierocks one gets to the point i watched a german 'friend' (*space race fiend*) make a month ago (*qualifying him for my meanwhile 116 vid long 'savants' list*)

the 14 vids put together by Mansoor Shaukat under the nomer 'collective behaviour' .. contains this one (*might all be slides borrowed from Gert's work but delivered in silence and without all the bonhomie and aphorisms of the Lichtenberg / Walter Russell type vibes*) by Mark:

pqxkyS1KTe4 ----- Homeobox

oldest of the 3 from the 3rd of feb, w 235 views already, his channel's Vz total far exceeds the tally of the vids visible so he'll have privatized a few (*.. dunno if erasing a vid subtracts it's views from your totals .. but those tallies are in flux too for '(U)sure'*)

<http://www.youtube.com/user/collinsmarkd01/videos> (*3x, short, mute slideshows*) ... the one i watch is called 'DNA FOLDING', blurbed thusly:

Our purpose is to redefine, revitalize and redirect current methods to decipher the meaning of the human genome. Color is, and always has been, based on context. Trying to differentiate structure in a genome assuming each DNA or RNA nucleobase has a "fixed" color impedes the effort to find the deeper order and connection that is there. Once in place, context driven phonemic Dna codon color will allow accurate and more detailed comparisons between billions of current genome sequences; requiring less resource, speeding up analysis, reducing the logjam of undeciphered genomic data, and suggesting new and rewarding areas of discovery.

<http://collinsmarkd.blogspot.com>

Bell Labs Trained Certified Information Flow Consultant

... has only one post from last may and a subtitle:

Assigning a 'fixed' or 'set' color to DNA nucleobases (*like what is shown above*) is both mathematically and physically incorrect. Doing so is impeding the deciphering of the genome. A standardized binary (*base2*) color template identifies the underlying rules of DNA communication behaviors, based on the nucleobase color context, before 'DNA makes RNA makes protein'.

<https://picasaweb.google.com/112080540663364281006/PhonemicHomeoboxToolkit>

Mark D Collins quotes omitted

... meanwhile i remain skeptical and wary .. sjees, Gert, Mark (*both seem to have run into iging81.de [besides each other] by the way*) and the dozens and dozens i collected previously practically none of them have green thumbs and most not even an explicit wish for nor even awareness of their work leading to 'garden culture' resurge ... meanwhile talents their ilk posses are easily (*busily, eagerly, callously*) weaponized (*by duh patriarkey either in it's own 'right'/name or as the weaponized form feminism manyfists*) as historians who are at all honest must admit to their shame.

that's the question

to simplify incredible complexity via a diagram (*... a trace in visual space*) or via a blow to a rock so as to not just remarkably mark it but to totally disappear it (*a trace too, but much more 'one' made through and into, practically AS(!!) time (ash time) .. audible too*).

to simplify is to 'complextualize'

to improve your aim and focus is to make rock, even just a and/or every single one you see fit, innumerabilate, go fine, distributed and anon .. at the mercy of molding wind, hand and/or whatever else can 'gettuit' and comes first

to achieve the singlemindedness that is key to solving paradoxes is key to reopening paradise ... which was never in danger of having rocks go on strike and stop weathering till we were good and ready enough to behave.

i'll tag a little something on by the guy who pretends to have extracted the universality cure-all aspect of RNA and he's beating all the monetizability out of getting there first he can while he still can ... not very long if it really is a key applied and therefore code crackable nearly everywhere. Kind of perverse to to charge an arm and a leg for supposedly vital advice; something that needs to be a universally respected and applied birthright, moral make up aspect and mental arsenal ingredient .. not to say crowning glory.

These are the plotted fractal elements that appear in each of the first 32 Dna codon cross sections in a balanced context driven phonemic six place base2 color system (0-63) with its mathematically correct color. There are three color pairs per line. Each dot represents a codon behavior. There are eight unique codon behaviors and patterns per color. I award a 'B' to Bob's "Bob Dobbs Response to "Anna Livia Plurabelle" on Facebook:"

Bob does a good job dealing with the tradition of joke and grievance by translating the Chaplin-esq play on mechanization into an electro-bio mechanization. But he falls short of being Mennipean. As my student Theall might say Bob posits flight into fantasized futures.

I award an 'A+' to Sue's "Response to Response to "Anna Livia Plurabelle" on Facebook:"

Clearly Susan Bone gestures a full embodiment of the ludicrous. As poet Sue is cynically presenting the abyss or vacuum – (*Hail Bob*) but living through the present in the faith that transcends understanding and the guiding light of history and tradition.

19 codes for Code 19 cult

Azly Rahman

Apr 24, 06 2:19pm

Twenty years after the phenomena of the emergence of the "Code 19 Anti-Hadis" cult, transplanted from an obscure masjid in Arizona, bodies of knowledge to crack this DaVinci-like code have emerged, aiding Muslims in understanding why Malaysian intellectuals studying the Quran remain good followers of this sub-altern cult. This cult is first obsessed with "mathematical truths" and next with "calling each other "messengers of Allah" when Prophet Muhammad (PBUH) had completed his task for humanity and warned against "false prophets".

I hope the themes below will stimulate the brain cells of the members of this cult that is keen in exploring merely a post-Cartesian and cybernetic view of "truth verification".

<http://www.answering-christianity.com/fakir60/mond.htm>
quoting Stefan Makowski

After each 18 years and 11,33 days recurs the corresponding eclipse-constellations ". The moon is obscured while she is located in front of the sun and covers his surface to 1:1.

Earth ,moon and sun forms a row. Every one can easily check, that the Sarosperiode corresponds to a number of eclipse cycle-years; and the relationship of 65875,79 days to the length of 346,62 days eclipse-cycle is exactly 19 eclipse-cycle years.

China is incurring huge expenditure in transferring and consolidating the Chinese population in Tibet. Massive investment has been made to build a network of modern highways all over Tibet. China can also boast of having laid the highest railway track in the world that connects Lhasa with Beijing. In fact, China often complains that its civilizing mission in Tibet is costing the government and people of China large amounts in terms of subsidies to an under-developed region. According to official Chinese statistics, the level of annual subsidies to the Tibetan Autonomous Region (TAR) in the late 1980s was around 1 billion yuan or \$270 million. However, all the infrastructure that China has built in Tibet has not made the lives of the native Tibetans any better; it has only taken the exploitative apparatuses of the Chinese government deeper.

2013 and The Mystery Queen

An Asteroid from Maldek Lands in Russia on the 13th Day of the 8th Galactic Moon

by 2013andthemysteryqueen

A 49 foot wide Asteroid from Maldek; 24.5: Fifth Planet out from the Sun, now maintaining it's orbit as The Asteroid Belt] entered Earth's atmosphere traveling at 18 kilometers per second). It impacted near Chelyabinsk, Russia at 8:20:26 a.m. on Feb. 15, and the energy released by the impact was in the hundreds of kilotons. One report said it had the power of 30 Hiroshimas.

"The size of the object before hitting the atmosphere was about 49 feet (15 meters) and had a mass of about 7,000 tons". This asteroid was brighter than the sun, and it's tail was visible for 30 seconds. Over 1,000 people were injured as a result of the shock wave it created. The meteorite exploded nine times, starting at an altitude of 55 kilometers.

"The Russia meteor is the largest reported since [June 17] 1908, when a meteor hit Tunguska, Siberia" "...that so-called Tunguska event leveled 2000 square kilometers of forest."

During the 48 hour period that contained the Chelyabinsk Asteroid, there were mass sightings of powerful asteroids/'fireballs' in several places, including South America, Cuba, Japan and the west coast of the U.S. The Asteroid captured the attention of astronomers, who are now working on equipment to detect the increasing number of meteors and asteroids approach Earth. Inevitably, there are others who are seeking to capitalize from this escalating phenomenon:

"The value of being able to capture an asteroid cannot be overestimated, VKS scientists say in this report, as one single asteroid in our solar system, 241 Germania, alone has an estimated mineral wealth value of \$95.8 trillion, which is nearly the same as the annual GDP of the entire world." {!}

The Chelyabinsk Asteroid has spiritual value. In the Mystery of the Stone, Valum Votan describes how the cherished 'Stone' from Maldek occupies the Cube in Mecca, to which 1 billion Muslims direct their prayers 5 times each day.

That precious Stone, the recipient of so much devotion, now has at least one sibling from Maldek on the Planet. Before it was shattered, Maldek was a most harmonious and happy Paradise. Maldek's fragments still maintain its orbit between Mars and Jupiter, as predicted by Bode's Law:

"The orbital ratios of the planets in relation to their distance from the Sun may be expressed as a harmonic set of numbers."

The Telektonon tells us that Maldek [Bode # 28] is the "Lost planet, lost chord, cosmic 4 x mystic 7."

This asteroid from Maldek serves to remind us [page 50 of The Telektonon Instruction Manual] that "The sum of the nine intervals between the 10 orbits equals 384.

384 + 64 x 6--the number of lines of the 64 Hexagrams of the I Ching and units of the DNA code. These number ratios confirm the biotelepathy of the Telektonon codes."

This significant Asteroid from Maldek arrived 8 days before the 26 Year Anniversary of Quetzalcoatl [Super-Nova 1987 A], which appropriately is coded by Kin 11: Valum Votan. The Pleaidians call that 26 year period of time the "Nano-second" during which intelligent life from other galactic systems are focused on 24.3: Earth.

Valum Votan/Jose Arguelles wrote that the Time of Prophecy: The 26 Years of Harmonic Convergence began with the arrival of Supernova 1987A "Quetzalcoatl", and the Harmonic Convergence, August 16-17 1987.

The second-largest Asteroid from Maldek landed on Kin 3: Electric Night, the 13th day of the Galactic Night Moon. Galactic Limi Thirteen alpha-numerically equals 198, reminding one of the year [1908] that the largest piece of Maldek arrived. 198 = Electric Mirror [same Kin and alpha-numerics].

The PSI of Galactic 13 is kin 145: Lunar Serpent, the G-Force of 9 Storm, which codes Princess Diana. TMQ's birthday falls 145 days after galactic 13 --galactic 13 is also the address of my oldest operating e-mail account :).

Other 'Eights' of Harmony" appear during this 8th Galactic Moon of Harmony. CHC II: Book of the Avatar was

referenced in a recent comment from "Galactic Federation" [at the penultimate blog; Welcome and Thank You] Galactic Federation pointed out page 59. Kin 59 codes this 13 Moon year. Seven pages before page 59 is "Pacal Votan's Book of Harmony" followed by a pull-out map of the 'Eight Wisdom Cycles'

The 'Book of Harmony' states "Three perfect numbers unlock the solar Mystery: " ...
EIGHT is the number of rays, evenly placed...
THIRTEEN are the tones of GALACTIC order...
TWENTY are the seals of becoming and return..."

The Asteroid from Maldek arrived in the Greg. year that contains 20 and 13, and on the 13 Moon date [per TMQ] that contains the 8 and 13.

The Eight Wisdom Cycles of Becoming and Return began on Crystal 10 of the Solar Seed year. On Galactic 11 [20.13, Kin 260] we began the final 260 day cycle of the Eight Wisdom Cycles, we are now in the 37th Galactic Spin since 1987, year of Quetzalcoatl's SuperNova return, and the Harmonic Convergence which was initiated by Valum Votan.

Page 53 of CHC II begins with: "Wisdom is Harmony. Harmony is Wisdom...The Eight 520-unit Wisdom Cycles uncover deeper aspects of knowledge and wisdom that are functions of the Synchronic Order and the Galactic Mayan mind Transmission...Each octave contains a plethora of information...What was the enlightened point of view that brought aoo this about?...In this sense, "Wisdom" is Theophany, the presence of God shining through the details of the design of His [Her] creation."

TMQ met with the First Solar Witness on Lunar Wind [Valentine's Day]. 12 Wizard wanted to convey the importance of "Eight". I told him that this was the Eighth Moon, and that I knew Katherine Neville while she wrote her masterpiece "The Eight". He asked the name of its sequel which she wrote, and we pondered the $8 \times 8 = 64$ units of DNA , the 64 squares of a chessboard and the 64 Hexagrams of the I Ching.

Afterward, when he and his wife 4 Skywalker returned to Cable Bay, they had to wait two hours on Cable Bay Road while 50 firemen and two helicopters extinguished a large FIRE [which melted everyone's water pipes, but caused no injury] On 4 Seed, I e-mailed 12 Wizard the name of Katherine's sequel to 'The Eight': "THE FIRE"! That, and many other synchronicities stemming from our 2.2 discussion finally caused TMQ to realize/remember the significance of the EIGHT PSI PLATES.

The middle of the Second Mystic Moon: Galactic Night Moon of Harmony and Abundance produced the second largest asteroid from Maldek, and the largest Abundance of Dolphins:

Dolphins usually travel in pods of around 200. On 5 Serpent [February 17th] a Super Mega-Pod of dolphins was spotted off of the coast of San Diego.

There were 100,000 dolphins who covered an area of 5 miles by 7 miles!!!

<http://theextinctionprotocol.wordpress.com/2013/02/18/changes-in-the-animal-kingdom-super-mega-pod-of-dolphins-spotted-off-coast-of-california-vultures-swarm-nc/>

'Dutra estimated there were about 100,000 dolphins swimming in the area. "They were coming from all directions, you could see them from as far as the eye can see,"

May these two rarest of events signal a Return of HARMONY and LOVE.

i penned a comment but i am not about to become a member just to post it there, so i will bother you all with it (*wiiiii iide grin*).

Yyesterday the northern dutch Cresters who have such a lovely page

<http://www.crest13.org/profiles/gardens/netherlands.html>

.. wrote me back not to bother .. they already know me plenny.

This after i sent a visit request, pasting recent convo with our 22jsees about clientelism - rates as intro/reminder .. which i untactically .. forgot to express being flattered over by the way ... i focussed on being the trouble not to be troubled with/by (*unless compensated*) aspect, not the willingness to work and expected ability to pay on his part which i hope is equally indisputable .. far as the latter goes .. actually mighty perspicacious ofya sjeessie!!

at first i thought not to write back at all .. now i'm thinking i should help them feel it's quite plausible to put up with me, reigning in resentment, excercising tolerance and good humor at my constant compulsion to make bad jokes, seduce them into visions of being able to sponsor 5.5 as many (*but contrary to the Hi-C flyin seedy seeder*) hotly desired but penniless participants, since i will pay them 5.5x the going RAYts (*which is only 10Euro, a steal!!, let's all go*) .. all succesful mediation will get a percentage (*5.5*) on top of that.

Of course i could start a crest of me own where all ufo takeytalkie is strictly VERBoten.

i wrote a huge tale about toes (*me mom's all touchy and angry pre 2112*) triggered by RQ's bleeding from the same one (*well, ... hers .. her own i mean*) weeks ago .. but it's for prosperity (*if we prosper at all*) i guess ... for now, here's what i promised a few lines back (*it's prolly the main reason no CRESTERS anyplace on earth are gonna take a liking to me, ... at least not for any length of time .. i mean at the longest until right after i bring this projection stuff up, that point at the latest, jig's 'upNup'*):

rant triggered by the photoshopperie of a black square in front of the sun:

selling ufos is just about the easiest of co(*i*)nz(*idunks*) innit .. wish i could smile over it like over less unreelly innocent fun ... but alas ... tis not also but fundamentally even, THE most cruel deflection of ethical introspection and truth documenting imaginable; WHAT an occupation cunt&crook's horse cur(*s*)e (*transliteration of dutch proverb meaning drastic measure, coarse and callous*) to distract them from the degree of critically amassing concentrated self-awareness necessary to 'launch', lift off, find relief, lose weight, 'vacate' (*never mind repair and return*) either violently taken over spaces before returning to and fixin the paces your ancestors left and betrayed as well (*you know, those ones to stop being so stubbornly alien about; the ones left behind and betrayed - miss you too you know*).

PS: stop ignoring me, i'm beginnng to think even being crucified feels better. Just kiding, i'm not a sado-maso and actually quite proud of the effects i HAVE had, though they are awfully subtle; homeopathically so (*dilute, diffuse yet potent*).

psII: long and short, learn seeing native americans, tibetans, etcetera, .. and all the fever dream aliens will disappear, graciously cede space for peace, all yours.

psIII: of course i am no stranger to despair (*regular costumer, discount bulk rates, the whole fleet*) and CAN take comfort from JA's assertion he can help better 'from the other side'. Well, .. gotta go .. anyway ...

Happy Magic Turtle Day to all--It's now Galactic Star here in N.Z.;

Thank You for your wonderful comments :)

Reimar 13 Night, I loved both of the sites to which your comments linked us.

Here is the site from 143's second comment, posted on the 'Magic Turtle 255 blog:

The rainbow video was so beautiful; Did you notice how the sky 'inside' the rainbow is a lighter hue?

Priscilla 6 Wizard, it's great to have you 'check in'--and I love your beautiful gravatar :)

Cosmic Serpent, thank you for putting these two unique [in our lifetime] events in their proper sequence, and for sharing my excitement at their significance.

Galactic Federation [kin?] I appreciate the way you illustrate the synchronistic numbers associated with the Maldek [13 x 28 = its Bode#] Asteroid which appears to now be named "Chebarkul" after the frozen Lake into which a large chunk left a 20 foot wide hole in the ice; and with Neptune, represented by the 100,000 dolphins:

"Neptune 300, Frequency of oceanic memory, 300 is the triangular of 24 ($1+2+3+4+...+24=300$) Kinich Ahau (Sun) is designated Velatropa 24. This signifies that the power of the cumulative memory of V24 is kept in Neptune, planet of oceanic consciousness."

Welcome to Skywalker Cosmico, who 'Liked' the most recent blog, and began 'Following'.

Dear Poet Piet 3 Eagle,

Your prodigious comments are greatly appreciated. WordPress shows statistics for the most recent 1,000 comments, and you are number 1 with 149 comments! Sometimes I struggle to keep up with you, and am currently looking forward to reviewing the latest videos you shared.

I was very sorry and disappointed to read that the Crest didnot 'open' themselves to you, in a 13:20 fashion, and seem closed in a 12:60 way. V.V. wrote so much about CRESTs during his move to and stay in New Zealand, and it is my 'Galactic Dream' to manifest that for all. That vision is becoming clearer.

In 3 days, we celebrate 11.11: Valum Votan's 'Galactic Birthday' on the 26th year anniversary of The Return of Quetzalcoatl in the stunning SuperNova 1987A.

That day will be Galactic 21, and the Combined Dreamspell Kin will be 13.13 :)

Today, is the 25 Moon anniversary of Valum Votan's Disincarnation.

Timber to Tibet

2003 / Nepal / 28min

Producer: Rabindra Pandey

Director: Mohan Mainali

Nepal has produced many success stories on forest management. However, Nepal's northern most region has been facing serious deforestation for a decade. Neglected by the center region and lacking economic opportunities, the villagers who are conservationist by culture and tradition are now felling trees. They sell the felled trees in Tibetan markets across the Himalayas in order to buy salt and other essentials. The film deals with the compulsion of deforestation and its impact.

February 20, 2013 by 2013andthemysteryqueen

The Second Magic Turtle Day of the Second Mystic Moon: 8 Star codes Day 18 of the 8th Galactic Moon

Kin 8: YELLOW GALACTIC STAR is the Guide for oUR alactic Seed Galactic Synchronization.

It's Challenge; 18.8: Galactic Mirror mirrors the 13 Moon date: 8.18.

'Eight' [49] Star [58] alpha-numerically equals 123, the Hidden Power of Kin 138: 8 Mirror.

Today's Analog is 8 Monkey, a reminder that on Galactic 21, 11 Monkey [Valum Votan] codes the 26th anniversary of the Quetzalcoatl 1987A SuperNova that ushered in the Harmonic Convergence organized by 11.11 Valum Votan/Jose Arguelles.

Today's Hidden Power is 6 Skywalker, the Seal of Quetzalcoatl that denotes Equality.

The G-Force of Galactic Star is Crystal Wind [2.12] which suggests a Round Table Gathering of Spirited Communication.

Today's Guide is Galactic Human, and this writer's Challenge is now to UNITE as many 'Galactic Humans' as possible for the Galactic Synchronization/Harmonic Convergence Week-Out-of-Time that begins on Sunday, [7/22/2013]

Today, in The Harmonic 13 Moon Calendar [which counts each day- instead of excluding the 365th day and Leap Days] is the 18th day of the 8th Moon, which today is the 25th Moon since the Disincarnation of Valum Votan on March 23, 2011.

Today also marks 46 Moons since the first transmission of The Mystery Queen on Magnetic 18 of the 4 Seed year. That day [8/12/2009] was the 178th Birthday of Helena Blavatsky, whom Valum Votan called the Key to 2012. {12.8, Galactic Human, is today's Guide}

The 'Galactic Signature' of this blog is Kin 21: Galactic Dragon.

Synchronistically, Kin 21 is the G-Force of 11.11: V.V., and the Analog of 18.8. Twenty [107] and One [34] = 141, and the names of Valum Votan and Claire DeMoulin [the 18.8 who writes this blog] both equal 141. One purpose of this blog is to disseminate the knowledge uncovered and expressed by Valum Votan.

This beginnig of this blog was triggered by the 7.1 Earthquake in the land of my Birth.

The night before Kin 149 [which fell on 2/22/2011] TMQ realized that 149: 6 Moon [combined Kins of 11.11 and 18.8] plus her own kin [18.8] equaled 7.1: Magnetic Hand.

I awakened on the morning of kin 149 to the news of a 7.1 Earthquake in Christchurch [=138: 18.8]

She had led a Rainbow Bridge meditation at 11:11 in Christchurch on the GM108X Day-out-of-Time several Moons earlier.

The 2 year anniversary of that Catastrophe is in 2 days. Christchurch has endured more aftershocks and strong earthquakes than anyone on the planet.

There have been 1,500 demolitions since then, and heart-breaking intentional destructions of its reknowned Cathedrals, for which it is named.

This week, an extremely unpopular decsison regarding the closure of many Christchurch schools has finally [in the words of a person interviewed on the evening news] done what so much destructive action failed to do: "Broken their Spirits as a community".

In 19 days, it will be Kin 27: 7.1.

Today's Challenge [18.8; C.D.] has been increasingly Challenged by wordpress [force to write the most recent blogs in a very akward format that won't allow images, colored text, etc.]

That, along with the synchronicities and anniversaries noted above, suggest that this , TMQ's 767th transmission, should be the last post in this particular format.

On the next '7.1 trigger' [3/11/2012] there will be a different sort of transmission from a new site, geared towards oUR Galactic Synchronization and the Harmonic 13 Moon Calendar

The 'newest' example of wordpress occurred during the writing of this Magic Turtle blog. There is currently a comment from Poet Piet 55 which is in my e-mail awaiting moderation; there is no response when the 'Moderate' button is pushed, and [for the first time ever] his comment has not yet appeared at the alternate place to 'moderate' comments; my 'dashboard'.
The comment addresses a question to Priscella 214 regarding camping and calendar study at a Netherlands Crest, and I'm curious to hear her response :)

The lively discussion in comments is very appreciated, and I will continue to participate there during this transition period of 19 days.

Counting the one just described, there are currently "21" comments at the 'Maldek' Moon 8 Day 13 blog :)

The difference between today's two Anniversaries is 21: 46 Moons - 25 Moons = 21 :)

Just now calculated the Synchronotron numbers for Kin 8 on Moon 8; Day 18: The Master Coordinating Frequency Number for today is 566.

That reduces to a Kin Equivalent of 46: 7 World-Bridger. This reminds me of today's 46 Moon Anniversary, and of Kin 46 which coded the day [9/11/2004] that the Synchronic Readout message magically appeared on my computer, suddenly propelling me upon this path. The CDK for that day was 18.8! [6.7 + Moon 13.2 and Year 19.12 = 18.8]

Today's Gregorian Date is 2/20: These are some of the numbers that add up to 220:

The S.G.F. [Simple Gematrical Frequency is V.V.'s term for alpha-numerics A=1; Z = 26] of TMQ's full Birth name.
The C.G.F [Complex G. F. {what I call V.V.'s more advanced alphanumerics; A = 1; Z = 800}] of TMQ's full Birth name.
The Harmonic of Polar Light; [144 x 2: 18 x 8 = 144, and its G-Force of 12 [12 x 12] = 144]
The Thirteen Baktuns [which TMQ asserts ended on December 22]
December 22 [the 2012 Solstice in New Zealand; coded by Cosmic Star]
The 2013;
The Mystery Queen

Several pertinent phrases that also equal 220 will be revealed in the next transmission.

After realizing new synchronicities while writing this 767th post, this will be the final transmission at this site :)

767 - 520 [A PSI Plate of two Tzolkins] = 247.

247 = 19 x 13.

21st of februari - 21st = 9moon = 155 left

In the comments to the pen-ultimate post on this blog -- the one before this one here .. where a comment below this here one of mine will soon reveal the new site's name (*? top secret as yet*) -- there was talk of a Dutch Crest
i meanwhile found out that yes there is a forum at stichtingtijd.nl/ ... but as is typical for work from the moment (*'era'/time's vortex*) of it's inception, one must register to even find out whether it's a great big dud or a party nobody came to be the life of ...or not (*let a thousand forums die, announced but never happened*). I didn't even take the change to make very small change finding expectations confirmed in this regards. I am approaching my limits regarding the absorption of linearly lined up letters anyway, . after decades of voracious prioritizing, i seem saturated .. and so ... very pleasantly suprised with yesterday's prettiest find and compromise ... i shall repeat it for you here now:

... alas it is kind of exceptional for that blog also ... nothing close to that imaginative can be found there.

Could somebody send me a translation of what those circularly arranged and stacked sentences amount to besides being the loveliest of trellises, fruitpicking perches, sleeping places ... etcetera?????

searching with the artist's name is more rewarding:

www.google.nl/search?q=homa+delvarai

Jose Votan's efforts are, like the one eyed king in the land of the blind, certainly in the upper percentile (*uppermillionary 's well as upper millenary*) of succeedable dreams(*pellage*) beyond wild; so onto better and better slippage due to tighter and tighter grippage in a next iteration of keeping counts down from holding sway (*from too far away*) and going over too many head(*c[o]unt*)s.

an hour worth of 15th / 16th century history with paintings, pictures, ambience (*birds, crowds, weather and the lovely music pieces by Ernst Stolz who uploads new short pieces almost every day which i save into a dedicated map, that's how soothing i find them*).

Check the weird shape of that men's chastity plug of an island in the midst of water bird paradise at 15 minutes (*not so sure about the tree reliant ones, this is a history about militance after all, those who value bullets over a commons where users have the 'enrich the soil' goal in common*).

just under /before that 15 minute mark we see crossed and checkered banners (*in 2 colours*) known as 'coat' of arms then 'dayz' .. or 'crests' ... the vid focuses on the 'dars' of doze dazes of course ... but for the next 4 straight the soundtrack honours are given to a song bird chorus.

the 20th and 21st minute have audio, totally genuine, of strain between wind, wood and rope, hemp, connected with the expanses woven thereof acting like cloudcatchers and mimickers, going among them in disguise as it were, also shown in paintings from that era.

the vid is extremely amsterdamCentric

check out the old owl sigilogo shown from 24:29 - 24:35 (*on a book and later on the back of a ship 54:38*). The ambient soundman has meanwhile to my delight, added surf to the mix.

The parkpath grid in DC that resembles an owl is kinda central to the growing awareness evil deeds are lined up along a bunch of straight lines ... go to Curt Lindahl's account (*survivalcell*) and be astounded of how this man like any others don't tire of riding their hobby horses, trotting (*truuffing?*) them out again and again.

Lately there have been redos of bad medicine wheelladeeling; geomantic murderousness .. like the "pentagram of blood" which i noted has them eerie connections with croppie culture ... oh ... i said that already didduni? Oh well, .. once more then.

Imperfect 'corrolaringz' turn more people off and away then good ones on

the ol' owl vidders don't tire of connecting TO .. and take (*as o so suggestive*) for, flag & hail AS .. THE give away to the way evil men come out masked (*mascotte 'guarded'*), proud and in the open: the BomGro MasshHootMass-Acre RituSacr complex ... all summed up in the minimalist depictogrove conjuring an owl's face!!!! I'll have you know though ... that greeks took it for sign and mascotte of their wisest and to me of course, with the benefit of acquaintance with the very finest of dutch culture, it will be forever connected to Dorknoper (*famous bureaucrat in lowland comics, famous for their high grade reality quotient - quota / content*), and past him to real statemanship as Jacob Cats illustrated, GFKnapp stipulated and UvBeckerath elucidated.

a post from 2009 by Cullinane <http://log24.com/> who blogged all sorts of puzzles between 02 and 09 (*born 1942, harvard email adress*)

Note of January 6, 1989 showing
the 64 hexagrams in the von Franz style,
in the arrangement discovered by **S. H. Cullinane**

The Cullinane sequence of the 64 hexagrams:

01 13 33 44 14 30 56 50
10 25 12 06 38 21 35 64

61 42 20 59 41 27 23 04
09 37 53 57 26 22 52 18
43 49 31 28 34 55 62 32
58 17 45 47 54 51 16 40
60 03 08 29 19 24 02 07
05 63 39 48 11 36 15 46

never knew Marie-Louise von Franz was into hexagram arrays and arrangements she turned me off way back with her condemnations of behaviours she saw only the narcissistic seeming surface appearance of .. and dubbed 'puer aeternus' and peter pan or shaman-like, never getting to depths and matured social, peace making stages of it.

also mentioned as active in these 'fields':

Peter Loly .. and a socalled 'Karnaugh property'

seems our Tubal Cain (*comments at RQ under that moniker*) who has a DOOT (*northern netherlands*) vid up on his (*self-censored - down to 3 vid*) account called 'karmaofthecamera' isn't really quite so original as he had me believe (*calling it uChing and sending no other refs in return after i offered an exchange [[sending my guiding lights reference list, HD folder names basically]]*, by way of back up if nothing else) after all ...

sampling the handful of external links i revisit an old familiar:

... OK OK, ok .. say no more .. can't take it ... take much before getting thoroughly turned off ... i find SHC liked an already departed SF writer who has the face of a man but the coiffe of a lady ... **early pollution victim of some sort i am sure .. and it's no wonder victims of whatever calamity clamor for more of the same .. of what made them (*possible*) in the first place.**

..... but, .. turns out it's not really about SF:

Curiously the new "theory of everything" of physicist Stephen Wolfram is recognized by Steven Cullinane as having its "poetic precursor" in The Gameplayers of Zan [77 novel by M. A. Foster <http://log24.com/log/2002-06-12-game.html> very short]. He quotes part of the following description of their challenge in travelling through hyperspace with their spaceship that could not be turned off:

The kind of space that the ship perceives, operates in, is to creatures such as you and I, chaotic,

his log24 is now

m759@post.harvard.edu ... lists PA as region of residence.

he seems to repeat stuff compulsively punctuated with citing others and berating them for note taken nor credit given of his precedence .. but like i said, he more than makes up for that, dredging up and dusting off his all time faves like a super expensive store keeper who moves a piece only once a decade ... he is already 71 years old now .. so i mustn't knock him.

Harvard-educated mathematician Steven H. Cullinane includes Henderson on his page of Literary Links
(September 20, 2000):

This page furnishes some links to areas of literature that I have enjoyed [Wallace Stevens, G. M. Hopkins, R. M. Rilke, Hermann Hesse]. The links at left are to classics, while those below are to some twentieth century authors [Mark Helprin, Alfred Bester, Zenna Henderson] I think are underrated. Bester and Henderson are particularly good at fictional accounts of telepathy. The noted Harvard philosopher W. V. Quine doubts such a thing exists, but I prefer the "There must be a pony" argument.

dialing the weird back a bit i found another take on 'stone' yesterday and though it's more like to little than too much for me ... i just have to share .. while it's fresh

Anthony Judge: Transforming and Interweaving the Ways of Being Stoned — Imagination, Promise, Rocks, Memorials, Petrification | Open Source Everything | Scoop.it

The author is a belgian veteran 'combinotion' writer ... he's gone crazy on both linear and spacial sign of (f?) life gifting (*he admitted as much in 2003 when i made my first note about him -- (I-raQk my brain says anthony judge on dc.indymedia)* --- i have returned to him about twice a year for the last 10 years (*skipping 04, 09 and last year*) and managed to catalyse him into responding to me once if i recollect correctly ... but the hoped for exchange of the intensity i often manage to generate, NEVER happened .. perhaps due to my lack of persistence .. My patience for those with insatiable urges to chew concepts to a verbal pulp was quite large at one point but has withered rapidly. AJ is between 'ship and shore though, he tosses a daily concept salad only to slap and knead the outcomes into different molds and shapes, then dries and juggles them with varying arcs and sequences; i just found out he put himself on a DVD along with similar low key 'backgrounders'.

He cites a book i never heard of for example:

Jing Wang. The Story of Stone: intertextuality, ancient Chinese stone lore, and the stone symbolism in Dream of the Red Chamber, Water Margin, and The Journey to the West. Duke University Press, 2000

he actively posts on a scoop.it sibling: phibetaiota.net .. their 'open source everything' logo shows a clover

China: Stop Forcing Tibetan Nomads Off Their Land

21st comment: this is a truthful video pointing at urgent problems and i am fully behind it ... however, it is not complete. There is such a thing as 'nomadwrongs', easily studied and understood by looking up a few vids by sinoUSian John Liu. Cosmic Serpent posted her latest beautiful, informative video at my 'penultimate blog' about the Asteroid. Check it out.

And here is the latest on that amazing arrival from Maldek:

"The asteroid chip that became the recent meteorite came from a spot in the asteroid belt near Jupiter, about 2.5 times further from the sun than Earth is, according to NASA."

sott.net/article/258899-Astronomers-calculate-Russian-meteorites-orbit-find-it-has-80-million-cousins

Astronomers estimate that there are 80 million asteroids the size of the one that landed in Chelyabinsk, and about 2,000 asteroids of at least a kilometer wide.

It still amazes me, that the fragments of Maldek faithfully maintain their orbit.

very very low viewing numbers here .. and her rant is only half sensible with reasonings going something like this:

bankers are blind to reality cause their idea of growth is expressed in numbers, fast moving and risk taking ones being even more unstable and requiring eyes are kept glued onto them; speed and transport are king and queen due to costliness confusions

..... and/or ever since jews invented the wheel??? ... well ... she don't actually say anything like that last bit ... but HER blindness on THAT score is obvious when she blames deregulation after the threatening in-, then exculpations noted above .. unable to discount western reaction due to and among politicized (*empire-bent*) jews (*eastern vs western ones, comparable to eu vs us sensibilities*).

2 days ago i put it this way:

butch/femme : army/hollywood : commie/capi : comby/capy

it's understandable jews (*the very fews that blows your news, turning bread into drink since early days of surplus management*) would be out to revive the memory of bennies from being the dedicated specialized administration caste/class of the once lush Babylon ...

Sad the bankers get blamed much more and quicker than the toygun manufacturers talk about enviably inviolable cycles of violation remember, alphabetization, and num(*b*)onoization (*nominazionizm*) especially, are weaponizations of the mind and diseases that spontaneously generate when the dusty ins and outs of im- and expressions are sights lost, lost touch with, lost sights of and lost feels for.

... ah yes, ... shangri la, paradise, the crossroads of asia and africa

[before the war specialists were created by calamities like comets causing chain reactions of displaced tribes .. there's a wonderful documentary tracing the vagaries of a southern german tribe exactly this happened to]

.... organic, beautiful, with plenny of buffer and fold to tuck the occasional foreshadowment of by now nearly normal tox-up, autism and genderbend victim choke ups ... hormone household - or is it called hormone economy or h-balance in the anglo world? - fuck up effects reaching into more and more remote regions.

Ergo, more failed, mistaken, ineffective, misunderstood, substitute and surrogate, magically and ill thought out kinds of TRACE ELEMENT COMPLEtaMENTATION attempts .. derailing into sacred site erections and installations with rather nasty side- and after-effects. .. yet more on that in a minute.

simplest solution of course is to voluntarize the cross-territorialization, corporatism, profit, transport .. earmark-enable taxes now!!!! ... and it will all go green and wonderful... what speed and what (*else/differently*) in the meanwhile ... at rest .. or claimed by a GOLEMiclutcher?

Not a word about proper scaling .. instead we see, in the 47th minute, some cute scenes of Detroit (*Charles Simmons*), with a veggie garden in front of a tumble down barn roof.

and now for something not so completely different

The Dream Of Life Part 6 - Under The Spell Of Intellectual Property

51 minute long vid - 5thou Vs since last april - which opens with a weird wisper rap to beat w Alice in Wonderland illustrations, kinda tweaky

next, in a loooong monologue (*delivered in a pleasant even keel rote [rut, rotten?] intonation*) Arthur slags any and all attempt at informing choice through precipitate, code, make believe [[p]re)presentation. iow, the freemen and sovereignist style argumentation at work .. which has an undeniable and definite relation to my releaf/relief, impression/writ, graven symbol/meaning, letter/'detritus' argument, as follows:

value vs fallow ||||| value vs fall low

significance vs excavated and discarded cornerstone

cumulative effects of leverage bundled vs fractionating mechanics thereof

baby mistaken for bathwater complex

Arthur doesn't even touch on rocky aspects of structure, laying all that burden on intellectual properties; a concept that could not possible hold and bear such a load up and will not crumble but certainly buckle fold and crumple under 'it' and the sooner the purer 'it's' grade. E-waste spreading speeds are prolly not much lower than the less (*'valuably'*) doped up and adrift plastics. Where's McLuhan when you need to retrieve, recall and repair this, he had a stroke before he could recall, correct or complement any of this, let alone in my sense. His religion kept him captive on the side of the globalizers .. suffering the onslaughts of and raw materializations for galactifyers.

... ahaahhh, .. at the very end (*as that nice song rolls again .. and after a section, at least as long, where he loops a single line: 'where were you'*) he goes (*txt on screen*):

we are al responsible for the rolling stone & it will not stop until we stop it or until we have destroyed everything

how far is this from spinning rock on rock as i can see happen more and more clearly .. in our lifetime.

Answer: very, yet close to the single schiz of ol' dover holdover enough to have hopes you might grasp what i'm driving at:

how far is this from spinning rock on rock prayerwheel fashion, enhanced with poles, bearings and canvas, and as a way of getting the long haul thing right ... finally ... sacred site style .. kinda .. but with completion, growing soils, not monuments .. do the money and flour thrown into the air (*tibetan festival and pilgrim rite*) with fresh dust 'instead'.

his synchronotron seems an integral new language only he spoke fluently; it's like a weather forecast .. but it matters more wether you have compost on/in well watered ground ready to receive what sunshine comes your way than knowing exactly what emphases, accents, over- and undertones come with it. He was short on that (*his native garden culture advocacy was never elaborate*) and long on the preachy peptalkie stuff (*up*) .. an ailment all americans have in spades .. to distract them from the sordid foundation 'their' (*by them occupied*) lands and so they too sigh and suffer under/from/thru.

Shown are the 8 different hexagonal perspectives of the light cube, which is composed out of six 3x3 matrices, which includes one electric oscillation from each number map, and each 120 degrees out of phase with each other (*Tesla's Polyphase*). This creates an 18x3 matrix which can be broken down. There is a stationary nine in the middle in which everything pivots around, so **55** numbers in total (*which is also the number for **the combined three levels of sphere packing: 1, 12, & 42***). Ideally, this cube has a flat surface and forms a sphere with six sections and eight points, akin to the merkaba points on planets, stars, and lifeforms. The interweaving of these eight perspectives is what will yield the boundary map for time. The number it adds up to is 270, but if you are only viewing a monopole of it, it's 135, plus the center nine, is 144, the harmonic number of light. Oh, and thank you Fifth Element for some comic relief :)

seethrough cube on white (*sides have numbers, each in a different colour and the whole thing spins bach and forth laxily*) .. and here's another slow pulser but now w black background: 7zNjcxKtHTg

The Perspective of Space

GregorArturo85·156 video's

409 x s 29 jan 2011

When the viewer is made the singularity, the 9 perspective, then the inner view of the cube reveals a celestial sphere of the platonic solids.

These are what I have picked out of it so far

Six squares = Cube

Eight triangles = Octahedron

Six squares, eight triangles = Cuboctahedron

Four triangles = Tetrahedron

Four triangles x 2 = Merkaba

Twelve diamonds = Rhombic dodecahedron

Truncated cube = Six octagons, eight triangles

An outward perspective allows:

8 hexagons, 6 squares = truncated octahedron

On the inside, the faces (*squares*) can also be seen as octagons. The sides could also be seen as pentagons as there are 10 numbers to the border of the diamond.

8 hexagons, 6 octagons, and 12 squares make a truncated cuboctahedron, a 26 perspective shape in terms of faces.

A truncated tetrahedron consists of four triangles and four hexagons.

The truncated shapes allow for honeycomb tessellated structures and can also be seen as an overlap of the regular shapes to form miniature versions of the whole. For example, two truncated octahedrons next to each other would create a standing wave node of a smaller octahedron.

Oh, and more Fifth Element for comic relief, so people don't take this so seriously. Enjoy space and the room for the love it provides!

... this one is a lot harder to grasp as the sides themselves are dissolving and reassembling in colour patterns that are complexified also

How much do i owe you for trying to read my emails

i hope i can get a discount for good hugs and stuff.

the soundtrack is even more moronic than on the first, hollywood SF dialogue on weapons.

i break up tree limbs faster than anybody, ..

[simply cause i know where the vibe from the bumps and knocks i am able to give them against rock are to be concentrated and focused (*hint: it's like playing harmonics on a guitar*) ... blunting no blades at all years of rainbow family experience taught me i am quite exceptional .. but never for long, being such an eye opener of a cheering example (*the disappointment over the non-acknowledgment is what makes me skulk and fret*)]

... and tell all to limit their firewood requirements to fallen limbs and live among living ones (*treehousing projects now!!! - the 1000 year king('s canopy)dom rite now!!!*) and choose very dry the only ethics that can keep a forest wild .. if you do not want to make the effort to shape it and pleach it and so on

The Transport Sector was hot topic on the radio news this morn .. rife and replete with bemoaning the falling status of dutch national pride (*amongst mercantilists, employers of the not non but at least not suddenly killing mercenary career choices*) the transport sector (*attacked by the free lance thievery branch even rolling along!!! now THAT's inroads*).

Of course, from tranSPoRT to tranSMiSSioN ... as in the fitting bit, the perfect teeth, the right gear, right moment count, counts and counted on core actly. Up from the count, counting on yall! is no easy tranSiTioN.

From 'burn-outs' of spinning wheels and smoke ... as if you can play rider on steed pawing the ground with hardware ... to the prayerwheels that are not only large but feature mill arms and slowly, dependably polish up and off huge loads accumulating piles of dust and mud puddles in season around them as long as they are tended to and fed rocks by pilgrims that faithfull show up and sow the finery out again (*solids in, softened out ... like a dick set on repro . except a little less on the run .. more of an anchored mode*).... then to the mobile ones that will create terraces around sheer rockfaces whereafter, with the aid of plenny glass and whatnot get a mountainside earthshipshop going

Numbers in Color -- GregorArturo85:156 video's
1526 --- 16 mrt 2011 ----- Vortex Based Mathematics broken down in color revealing the three family groups as either a form of additive, subtractive, or neutral lighting. Also shows some other animations such as standing waves, merkabas, and triadic knots. For more info go to vortexspace.org, a wiki for vortex math (*My personal space is under Gregor Arturo*). Music brought to you by DJ Doboy, may his music live on in infamy. As a note, I feel the octahedrons can also be in phase so they spin in the same direction like a whole octahedron while the merkabs all spin in the opposing direction. In the animation, each octa/merkaba set alternate in directions.

* - The Cross as the War Horse Jesus rode excavated and tunneled through hell with to wring a blessing and free captive from the dark like jacob wrested with the light for them.

Barky barky, bite and spar key

The cross of course is an awfully great load like that treelike cross with a man seeming to ride it or the more radially oriented, seems to recline and lean back on reading the stars perhaps; i am speaking, of course, to borrow your terms, of the image chiseled into the Tomb-Lid of great Mayan King Pacal Votan (*discovered in 1952*) and which many, not just Jose Arguelles who dubbed himself Volum Votan, interpret as a type of Vehicle .. in the spirit of your penchant for fabuloid SF poorhips?

beautiful (*ly brief*) biblical collection of distortions and disfigurements regarding the message i am for now, privileged to point out and to fairly unambiguously .. but give it a few generations.

I am cultural (*iconical*)ly (*speaking*) a Cernunnos guy myself but have an unusual interpretation -- no takers yet, except for Miranda Raven, a rainbow sister, deceased some years ago .. one of the very few i exchanged really warming words with during a 16 year long career in sniper and cultural incarcerate filled frigidities of inner and outer, spinner and spouter digitalia .. she was an angel as you can hear (*lofi*) on archive.org.

christian comfort: jesus is number 1, not first and last but only one ever :::::::::: question: ... only one?? of what natural phenomena is there ever only one??? :::::::::: answer 1: if you happen to catch the last living specimen of some species or other :::::::::: answer 2: a first child of the first negro X eskimo marriage ever :::::::::: is any of that useful, celebratable, a salvage of something or other .. let alone the only possible salvation?

Has he taken the pain of his kind, people like him and people past and future who (*learn to*) like him upon him and is that something for them to dump their troubles on and have same recycled returned like the ultimate combination of scapegoat and heavenly banker to dump and draw upon rolled into one?? The fist big enough to end all fistmaking and fill that game full.
Buy this bridge or have your mind blown?

-- believe me, i believe the jesuslike are not exterminable, short of ending mankind -- this is just a hormone thing ... evolutionary pressures predating gender itself (*look into Andrew Lehman's neoteny.org for clearing this up*), something the messiah (*as personalized by the christians*) is famously reported to have taught something or other about. I basically think the truth of writs that old are irrecoverable to the point of causing more trouble than they're worth, no matter what culture we are on about ... the effects of a shower and/or an ice age last until a fresh one is needed (*give or take a few timeframe notches and tweaks thereof*) .. always closer at and more in our hands (*dependable and calculable, more quantifiable*) than meteoric and (/X) solar climate effects; which ones are more dramatic is an open question as yet.

Dangers into opportunities, disease into strenght, lowest leak into fortified base line and guaranteed minimum.

The belief in "agression needing to be expressed" (*Douglas Dietrich, 9th of march, Firing Lines, while discussing gaming merits*) for fear of worse outburst from pressure built after a bottle up and reign in???

Answer A:

A last resort is up when all before got passed up and were gone past and the better ones of those seem and are diametrically opposed to the eventual calamities as final destination of, for and at the hands of those who 'care' to wear, keep up and on extending reactionarily linked missed change chains, called final solutions, end alls be alls, imperatives, mandatory, inevitable, budget balances and what have you .. but none are any of that and instead, of course, merely further 'descents' tonesettings (*'appy' minin folks, that's all!!!*)

Answer B:

Not only does this doctrine distract from wondering about the causes of [people such as he, including the 11 miljan american lambs led to the Vietnam War slaughter] just exactly who bears what brunt of irate expression and why ... it discourages doing anything about it in the sense of prevention, decreeing high degrees of inevitability denies (*the model follower*) performing the whole thing effectively (*also, additionally, check the reciprocity block here*), the efforts to establish peace, straighten dangerously leaning 'pillars' of justice (*pillars being a perversion of living tree trunks of course, a discussion from shallower levels of hell we insist on digging ourselves into*).

now, the cross rider, sword wielder substitution doctrine, is a manifest invitation and indeed requirement to not concern yourself with the same thing going on and on before and after it. Pretending .. scuse me, believing it was a 'once and for all', THE only instance when it COULD be and WAS done effectively (*'perfecting' redemption of all in the blink of a single lifetime*).

It was not, a la Golden Bough, just another annual defeat/sacrifice of the solar king but turned around and over into not only survival and procreation .. but a win over evil .. all of it, anywhere in and for all time.

The most positive message i manage to extract is that it is no use playing the hero, scattering coin as if the temple was a field and it seed, no use to go for protest culture and indulge extatic occupy rites which for lack of isolation like on Iceland will NOT give them the numerical advantage and ultimatum lever of taking leaders by the throat or taking the time to almost leisurely, luxuriously besiege them a few days and weeks in a festive mood -- this due to the amounts of law enforcement that can be mobilized from neighbouring areas covered by a too arrogant to walk away and big to fail centralizer clique.. after which the kitchen library and sanctuary complex gets torn apart and disappeared into the eviction force containers.

So the public outcry and activist strategy Jesus practiced began to die with him indeed ... ever wonder why the jews hate him?* ... uprooted from the pagan origins of red bull out, black bull in, old sun gone, now year rising, spoiled king out, fresh fellow

* - a certain Dudeguy (*9th of march Firing Lines on Freedomslips*) down in Florida -- with the most depressing outlook on life gets to pronounce the funerals rites for a history program (*or at least ruin it for me while he is on*) by bemoaning the loss of a personal pet .. and abjectly sanctifying the getalongability of abject Torah and Talmud following gays he lives amongst there -- prolly doesn't either.

To call all the jesus-alikes (*seem alike*s and *semi alike*s) fake imitators, doing something that not only was done already but could only and need only be done once, is another effective tool of the powers that be ...

[PTB = conservative, innate, default feminism which has used priesthood cabals forever to get demography numbers cranked up by hook and/or crook. Leslie Fiedler for all i care, a jew literature prof who lived in Montana].

= Far as digs diggings and works of darkness are concerned .. begin reading the short essay "mine" by Laurence Rickels and then .. by the time you note his take on satanicization (*or did you say satanization on that interview with Hilder?*) of the (B) movie industry ... slowly rising to the top as we speak i will hopefully have unearthed (*extracted from a hard disk that fell ill*) my notes to his 'devil's notebook' --a compendium of that movie genre with a few revealingly flawed comments, showing that his analysis is far from complete and he needs to bend a lot harder before he can fuck his own self good enough on the redouble entendres.

guess .. and she stubs her toe accordingly ... at's what you and anyone gets for not watching where we're goin ... can't blame her for not knowing .. where she's headed .. quite forgettalbe really, specially with all these crossroads between here and there. Not even my own mother can do better, can't touch it almost, not even if it manifests in her own (*eagle*)toe .. we all forget about the jesuskoin on our hands .. around the corner. The comment .. by wild guy between paris and oregon a few months ago was it .. about anger issues was quite astute (*though i fail to see ...oh wait, ... working with crystals DOES have .. even EVERYthing to do with anger management!!!*). Speaking of dangerou angles, ... to my astonishment Douglas Dietrich has moronic hang ups about agression too. I've become a faithful listener of his, he has what the RQ has in much more modest proportions.

Am i the only one who actually succeeds / can afford to prevent, sublimate and preempt agro plausibly enough, at least in my own (*admittely pro*)visionary eyes including the millarmcloth and stagger logistic budgets as necessary as near at hand or am I the one who luxuriates in avoiding it. Can i go call peace in Syria?

priiiiitty incredible, around the 13th minute, a caller to the 'Firing Lines' has an anecdote about lifting his own coffin lid and scrambling out.

Funnily enough, this first part of the nearly 2 hour long was missed/past as i began listening very early here this morn and i just heard the youtube file .. but i had already went on to do a big comment and posted it as my first google+ thingie at the host's account, inspired by his picture there. In it i mention Pacal Votan's tomb lid.

the call ends totally paraweirdical by the way

chinayak.com/Panda/Attractions-around-Chengdu/Serthar.html

Serthar ("*Seda*" in Chinese), is a Tibetan pasturing area situated in the northeast part of Ganzi Tibet Autonomous Prefecture of Sichuan, featured with grassland, lakes, rivers and Tibetan atmosphere in the plateau above 4000m in elevation. Serthar means "Golden Horse" in Tibetan. Legend has it that horse-head-shaped gold was ever discovered in the vast beautiful grassland around, or there is a golden horse imbeded underneath.

Serthar is a place where the Tibetan Buddhism is centralized, very well-known for the Serthar Buddhist Institution ("*Larung Gar Buddhist Institution*" or "*Wuming Buddhist Institution*") in Larung Monastery.

Besides, there are some other small monasteries around. All belongs to the Red Hat. Seke, a town 1.5km from Serthar, holds the annual memorial ceremony for the tallest Buddhist Pagoda in the area in end of July of Tibetan calendar.

The weather in Serthar

The average annual temperature is -1C, with sufficient sunlight, long winter.

the apostle paul was not the first anti-Christ since he did not attack the core christian doctrines in the first place. the first anti-Christ would have to be ... nameless - whoever changed and published the gospel of Barnabas.

comforter -> paracletos not peryclutos (*greek*) from peryclu (*maltese*) = danger (*english*) = peligro (*spanish*)

bibliological = A word he uses in a very Sokalian sentence (*for which he is roundly chastised at that Google Earth group*) which ends thus:

producing a set of 39 verses of the Qur'an which complement the number of books in the Hebrew Bible.

evidence that the so-called "Gospel of Barnabas" dates over a thousand years after Jesus, as scholars unanimously agree.

there's a bewildering 107 page work on scribd that i managed to get a few snips from [even before my registration went through and] before he parked the work out of sight by ticking the 'private' box in the last few days.

even more glossolaliazoid and patchwork perfectly cheerupish is this:

Since Surah Mudhdhaththir barely gives a hint about a vigesimal system through the Arabic idiom "baynaaydeehinna" as most women generally tend to possess digit-wise and only Surah 73 Al-Muzzamil and ArRaad possess extra-temporal Ayahs that can only be tied to Mayan apotheosis through a complex graphic - shiaforums.org/imagehost/?di=3DHN - that disagrees with (*or basically switches*) the chain of order of descent of Surahs eighty-seven and fifty-five, than there can be no doubt that many lam ligatures in Al-Mumtahina, twelve are related to re-appearance of the palm trees that were cut-down as narrated in Surat-ul-Hashr. In English, the emergence of the Dajjal - Adam's arch-villain.

the link in that passage is dead by the way ... it's the last paragraph in a 1Mb pdf half of which is an appendix with laaaaaaarge numblings called:

List of Surah Names and their numeric octal conversions for a 6213 Ayah Qur'an. -Refutation-Ayah-12-Surah-Mumtahina-Math-Proofs

he's pulling a forgery discovery comparable to the late Rashad Khalifa one JA championed.

... after all this (*hours and hours*) i come to the realization that i got 1.79Mb from that blog now blocked on the 1st of october last year.

looks like i discovered his previous youtube account: traistation, where he seems to have tried his hand at designing burkas (*5 vids*). In 2011 he did 3 tumblr posts, one of which has an intriguing picture of guatemaltecan cloth patterns/colours. i didn't mention he use of (*unexplained as far as i can tell*) colours in numbers yet .. but he does ... and now i did.

Feb 21, 2013 Public - A 6236 Ayah Quran: change it back into a 6213 Ayah one. The last displaced Ayah (*in a 260-skip count, see attached link*) will be index 6012 (*Al-Balad 90:13*). If we take 90:13 and concatenate (*9013*) and multiply by 6013 (*Surah Al-Mumtahina, sum of Ayah concatenated*) equals 54195169 that divided by 356 equals 152233.6207865169... just food for thought.

it used to be on the web, it's 20Mb

... i am not sure about the exact reasons for it not being among the large and diverse body of work Jose Arguelles still readily available (*could be sheer coincidence*) and i am unflattering about the now leaderless in(&/or after)crowd enough as it is; i'd rather not give them an excuse to accuse me of being antagonizing ... like LisaMarieWonders, an ex of the hilarious Brian Marshall (*is god*) 'crowd'. Check him out, he has very numbonoid material about distances between places (*he and his close relatives moved to*

and between) all resonating with Bible numbringz ... yada yada. Lame excuses for not renouncing membership in a supposedly ex-colonial trans (*NaZionalist*) mission which continues to occupy in force if you ask me.

Anyway, for the very finite fraction of sign&symbol addiction variety collectors like you and me it's the finest of fodders, i'll just attach a copy right here .. and if it becomes immediately public i'll blame google+ how's that? .. Eh, guess not, no attachment button ... i'll send (*it*) you in a mail.

You prolly know -x- via Smelyakov -- lol, Carnivale has a mysterious character by that name in it's intrusively and stubbornly reccurring [recurrencied, regorged, regargoylcoilsprung] past!!! .. sorry .. just being a shifty git havin a snaky hissiefit (*on*) --, his cartner in prime Stray, Jenkins, etc. -x- that the author referred to himself as Pacal but did you know that an event just as 'inevitable' as 911 (*on a double 28 solar year cycles with Nuking Japan and the 'distributed', inescapable, immergent ritual known as the Harmonic Convergence*) was this: his last partner stubbed her toe at 2112 someplace around the RQ monument and the eagle in her dreamspell oracle's outcome/direction position happens to have my number .. ouch ... lol ... perhaps all of it helped me somehow yet more clearly realize (*something did .. right around that time*) most monuments are aborted complementary trace mineral distribution projects / piles / leftovers ... 'recycled' (*repurposed*), made 'significant' with im- rather than expressions ... abstracted ... appreciated for the shelf life, sturdiness of the stack up schemes ... etcetera. And what begins a slight and easily forgotten slide is dying in it's own thanatopical code generated E-waste autotoxaway.

A: looks like a schnapps drinking moron B: i found something the other week that i now 'resee' at his website ... forming the only 1 of 2 full colour exceptions to formalistic puzzle-cut theory, almost all depicted as colourless diagrammatics; it's the magic square where the numbers are expressed in heights and a sport is made out of keeping the lowest numbers inside and the highest ON the ring so that it would hold water if it were a basin. Right back to Wittfogel and biblical parceling / selling land i guess.

Time to pay homage to Drew Hempel who maintains Arguelles is up to no good and right up there with Puharich et al.

Einhorn didn't wanna play and went to jail.

I realized today that Jose 'is' not only Pacal but imagines he is Abraham as well.

I COULD put all this in a very evil 'landjepik' (*honestly bought and paid for colonization, occupation and straight up conquest ... not much of the latter to be sure*).

Hey Piet,

You like a good ramble, don't you???? What an astonishing range of info and postulates, although I can relate obviously as I am in a similar vein, as it were. I loved Arnold Keyserling and miss him, and John Michel; Arguelles was a little too one-minded for my tastes. My color ideas are influenced by the fact that I am an astrologer and architect with an interest in physics, therefore looking for hidden logics, like the wavelength dynamics of the spectrum (*hence my support for the King Scale of Color, pushed by the Golden Dawn and brought to modern computer charts by me*).

www.atmann.net/kingscale.htm

The I Ching was a real labor and took me years to discover what others also found decades if not centuries earlier. Obviously that was the hexagrams around the circle and in a square. The colors are the ones mentioned in Wilhelm and, although they don't make a coherent logic, seem to be appropriate.

Check out my mandalas, calendars and other graphics, all of which use the same color logic.

Chinese have fallen for Tibet

Chinese have fallen TO Tibet would have been better, but no, it's the worst possible variant: Tibet has fallen to China.

Chinese have fallen for Tibet. Growing numbers of Chinese now practice Tibet's form of Buddhism, fill their glasses with Tibetan booze and consider a jaunt on the high plateau a badge of cool. Many of the Tibetan practices they ape can be as tacky as white men in redface doing a rain dance. Yet given that official propaganda has for decades blamed Tibetan culture itself for keeping Tibetans poor, ignorant and not above suspicion of cannibalism, this sudden interest shows the government's decreasing ability to mold public opinion, and the growing independence of Chinese trendmakers. "More information about Tibetan culture has come available, so more people see its value," says Zhao Jia, a travel executive who next month will release an off-the-track guidebook to Tibet's farthest reaches.

Given what Chinese have learned of Tibet for the past half-century, it's hard to believe they would venture near the place. Eighth-grade textbooks omit mention of Buddhism, emphasizing instead that before China's army "peacefully liberated" the province, "it practiced the darkest, most barbaric system of slavery in human history." Films like the 1963 *Serfs*, seen in childhood by nearly all Chinese, show venal monks digging out people's eyeballs to settle debts and stretching the skin of dead serfs over drum heads. Communist propaganda vilifies exiled spiritual leader the Dalai Lama as a "splittist" seeking to restore feudalism. Such images die hard. Yang Bo, a 30-year-old Chinese tourist who absorbed many propaganda films on Tibet, recoiled while visiting one of Tibetan Buddhism's holiest places, the Labrang Monastery in Gansu province: "It was dark, and the spinning prayer wheels sounded savage."

Official propaganda hasn't changed? Tibetan song-and-dance troupes still pirouette on television to folksy ditties like *The Communist Party Turned Bitter to Sweet*. The change comes instead from people like artist Li Bing, whose father once oversaw Chairman Mao's travel plans. Backpacking through China, she grew enamored of Tibet. After studying its language for a year, she spent six months on the plateau in 1998 and later produced an exhibition of her work featuring Polaroids of Chinese and Tibetans next to their overlapping handprints. Since then, travel to the Roof of the World has become as common for artists as a paint-spattered studio, and many galleries peddle their renderings of noble Tibetan rustics. "Chinese who go to Tibet can't help but see it as foreign," Li says.

Neither can consumers, who suddenly face an astonishing variety of Tibetan products, mostly from Chinese state-run companies. Last year's new goodies included Tibet Grass brand ginseng-berry juice, a sorghum liquor called Tibet Fragrant Spring and Tibetan Highland barley wine. "Chinese like our drink because of Tibet's mysterious feelings," says Zai Shudong, who bought ads on national TV for his company's sorghum brew. Trendies in Shanghai can shop for Tibetan jewelry at boutiques just off the glitziest commercial street. At the Traditional Tibetan Medicine Hospital in Beijing, director Renwang Ciren spent a recent morning tending to the ailments of six air-force officers. He says 90% of his patients are Chinese, a vast increase over past years.

Not satisfied with merely importing Tibetan culture and commerce, Chinese are increasingly making the tourist trek to Tibet itself. The region received roughly zero non-Tibetan visitors at the start of the last century, but last year 420,000 Chinese tourists inhaled its thin air, up almost 50% from two years earlier. That means opportunity to people like Ouyang Xu, a cocky 33-year-old entrepreneur who opened the Himalaya Travel Agency last year, and took 700 Chinese to Tibet in six months. They multiply the impact of the many Chinese who have moved to Tibet in the past decade and now constitute more than half of Lhasa's population. Tibetan exiles argue that the influx dilutes the culture. Ouyang counters that Tibetans "don't want to be something people buy tickets to see." He says Tibetans want Chinese things: "If Chinese don't sing karaoke there, Tibetans will sing it themselves." He plans to import a fleet of Land Cruisers for touring Tibet's most forbidding region, known as "The Uninhabited Zone."

Interest in Tibet comes at a critical time. The Dalai Lama is 65, and it's unclear if anyone can unite the fractured community of Tibetan exiles after he dies. The identity of Tibet's second-highest religious figure, the Panchen Lama, is disputed. The Communist Party is promoting one 10-year-old boy and detaining the Dalai Lama's choice, making him the world's youngest religious prisoner. Next in the ranks, the Karmapa, is 15 and stunned Beijing last year by trekking through the Himalayas to India, where he warned that "Tibetan religious traditions and culture now face the risk of total extinction." He has become the exile community's greatest hope for leadership.

Photographs in the main hall at the Labrang Monastery convey Tibet's plight: of five portraits on display, the Dalai Lama is exiled, three others are dead or their identities disputed, and the last, Labrang's abbot, is barred from living with his monks. The local party committee hung a sign calling the spiritual place "a center for patriotic study." Even so, Labrang teems with 2,000 monks and many pilgrims, who are often Chinese. "Older monks feel differently, but I didn't go through the Cultural Revolution, so I welcome them," says a monk too young to remember China's 1966-76 decade of chaos, when ultra-leftist Red Guards took sledgehammers to monasteries.

China has become a nation of spiritual seekers in the past decade, as faith in communism waned following the 1989 Tiananmen Massacre. Wang Ze, a 52-year-old consultant for frozen-foods companies, became a Tibetan-style Buddhist four years ago after meditating to the Tibetan mantra for compassion, om mani peme hum (*which Dadawa later turned into a pop song*). He and his wife converted one of their four rooms into a shrine. At the time, they didn't know anyone else who practiced. Recently, he says, "we hosted an initiation ceremony for 17 Chinese." A senior lama in Beijing says self-organized student groups from the city's leading schools began seeking him out two years ago to ask religious questions. The lama concedes that nearly all Chinese believe that Tibet is part of China, but says: "More are starting to support not independence for Tibet, but greater autonomy."

Yet the trend toward Tibet Chic hasn't always been smooth. When Dadawa released her first album in England in 1995, she angered both Tibetans and Chinese. Tibetan independence activists accused her of exploiting the culture; some protested outside the London office of her label Warner Records. Back in China, her songs became a sensation among Tibetans when they heard on the background track of her biggest hit the voice of a woman praising, in Tibetan, the current Dalai Lama?the government discovered the track two days after awarding Dadawa its equivalent of a Grammy. She had to recall and re-edit her album, and her videos are still banned in Tibet. Today, Tibet Chic has grown too hot for Dadawa. To avoid looking like a follower of trends, she vows, "My next CD will have nothing to do with Tibet."

Richard Cook
Classical Chinese Combinatorics
2006 UCB

STEDT Monograph 5:

Classical Chinese Combinatorics: Derivation of the Book of Changes Hexagram Sequence ----- Richard S. Cook
The first and most enigmatic of the Chinese classics is the Book of Changes, and the reasoning behind its binary hexagram sequence remained an unsolved mystery for some 3,000 years (*according to the tradition ascribing it to King Wen of Zhou, d. -11th c.*). This Monograph resolves the classical enigma: Richard Cook provides a comprehensive analysis of the hexagram sequence, showing that its classification of binary sequences demonstrates knowledge of the convergence of certain linear recurrence sequences (*LRS; Pingala -5th c., Fibonacci 1202*) to division in extreme and mean ratio (*DEMR, the "Golden Section" irrational; Pythagoras -6th c., Euclid -4th c.*). It is shown that the complex hexagram sequence encapsulates a careful and ingenious demonstration of the LRS/DEMR relation, that this knowledge results from general combinatorial analysis, and is reflected in elements

emphasized in ancient Chinese and Western mathematical traditions. This copiously illustrated 660-page volume presents a detailed introduction to the classical problem, an overview and in-depth derivation of the solution, an extensive terminological glossary, and computer source code formalizing all aspects of the derivations. The conclusion of this work situates the major findings in larger historical context.

fluoride removal: diatom, iodine and hydrogen peroxide supplements explained

Posted in the egida, the techneion | 4 Comments

Born in Berkeley, California in 1953 on the cusp of the water snake and dragon years, m1thr0s has been a dedicated student of the I Ching, Qabalah, Tantra, and Esoteric (*Spiritual*) Alchemy since his early teens.

His art features many classical elements from mystical traditions around the world such as the Kabbalistic Tree of Life, the charismatic Flower of Life, the Pythagorean Tetractys, the I Ching Hexagrams, the Lo Shu Magic Square (*and subsequent Magickal Squares*), the Abrahamadabra Grid, the (*Hidden*) Diamond of the Tree of Life, among others. He defines himself as a *Talismanic Artist* whose objective is to facilitate dynamic transformation in viewers through the simple act of viewing these powerful transcendental images.

m1thr0s's art is tracking the *star* thesis of human evolutionary potential through exhaustive analysis of The Body of Light in lieu of Abrahamadabra, as revealed in Aleister Crowley's Liber Al vel Legis (*The Book of the Law*) in 1904. While not strictly a devotee of Crowley, his work often vindicates the best of Crowley's own insights and provides us with the freshest window into *star alchemy* available anywhere in the modern world.

The groundbreaking synthesis of astrological, alchemical and geomantic elements in The Mutational Alchemy Tarot Deck are all his inventions and provide a rich and fertile ground for the viewer to explore. The art of m1thr0s affects subtle changes in us at a molecular level as is indicative of the highest examples of talismanic art.

The Mandate of Heaven: Hidden History in the I Ching

S. J. Marshall August, 2001 Paper, 260 pages, ISBN: 978-0-231-12299-3 \$28.00 / £19.50

The mysteries of the ancient Chinese text known as the I Ching continue to fascinate scholars and enthusiasts alike. While sinologists rely on historical criticism to explain the meaning of the work, those who use it for divination tend to accept without question the traditional account of its origin and purpose. Whereas modern scholars are generally dismissive of the book's reputed mystical significance, traditionalists often resent academic research into the oracle because it seems irreverent or iconoclastic. In The Mandate of Heaven, S. J. Marshall sets out to reconcile these opposing approaches. He plumbs the book's numerous, hidden historical

references, reading them against other sources, and discovers that the oracle has far more narrative integrity and basis in historical fact than anyone has previously appreciated.

The Mandate of Heaven focuses on the story of the I Ching's origins. The book is attributed to King Wen, who died before he could succeed in overthrowing the tyrannical Shang dynasty. His son, King Wu, eventually triumphed over the Shang and established the Zhou dynasty as the legitimate royal house. According to the tradition, these events are in some ways alluded to in the earliest layer of commentary in the I Ching, but no sound historical basis has been discovered to substantiate this claim. Consequently, since the 1930s sinologists have discounted the value of this tradition. Marshall uncovers an account of Wu's conquest in an important, previously overlooked passage that tells of a solar eclipse believed by the King to have been an omen from Heaven to immediately march against the Shang. Marshall is able to match this account with a scientifically verified solar eclipse that took place on June 20, 1070 B.C., just one of his many historical readings that show how the earliest layer of the I Ching has preserved a hidden history that has remained undetected for three millennia.

An I-Ching Archetypal Approach to Homosexuality [PDF]

A ludicrous 'post Jungian' attempt by Professor Chang Wen-cheng of Yuanpei University to explain homosexuality through the I Ching, although much of the paper is given over to a potty theory that certain phonetic sounds are homosexual. Hard to believe this person is drawing an academic's salary. Still, this is a good example of how modern psychology in China has seized on the Yijing to pad out mediocre ideas. *(If you have difficulty opening this one in a browser, right-click to download directly.)*

how anybody takes all this to be proof of some sort of God's hand in compiling, never mind writing or performing this way too thick book (*all of which that size have the effect of thickets, one get lost, tangled, torn and goes to pieces*) is beyond me. What is, to me, obvious is that it is a cabalcollab, a type of crossword puzzle sport / fad ... where savants were packed off and bunched up to both specialize and converge ... infinitely less harmful than the specialize and diverge ones nowadays after all .. but still, .. they are tasked to mask, distract from and sugarcoat very evil content.

And whatever is nice about a 'chronicle' of that size is either buried in every sense of the way, or if 'lucky', 'held up and out,, waved about, hung and dangling outside like a Potemkin town shingle to attract innocent prey who don't see the shackles and chains on that lure, limb-tied and kept dumb or at least under duress and always captive. Case in Point, the work of Ulrich v Beckerath, kept 'alive' by a white man who earned his living as the jailor of aborigines.

i know folks trying to relate the calendar AND dna AND the iching to sura sizes and sequences so the employment opps for savants are legion ... and those of the machos who are slaughtering present talent, yet breed w hi-T lassies, will get exactly that 'reward' (*victims / repressed return via their very own loins!! -*

see neoteny dotty org for vitals of ongoing drama).

Macho boys pretending to do the right thing for their softer brethren is heroic and double tragic in the case of Syria cause it goes for both sides and is claimed by both sides, having them do so with self-defeating tools; therein lies the tragedy. And this crossways doubling (*recipe for the so-called jitterbug in Fuller's geometric terms*) has a tenaciously flexible structural stability .. and this must be why low intensity sectarian wars rank amongst the best 'ethicidal' employment guarantees, black budget and stockmarket boosters around; a violent adventurer's paradise.

Once the gun-status collapses though (*debate rages in the US*) and it has to before any anti-colonial extrication from occupation can take place (*federation of subnational collectives also known as connectives .. ConNActives KinActives .. anybody ??*)

Once the gun-status collapses though (*debate rages in the US*) and it has to before any anti-colonial extrication from occupation can take place, we'll have room for subnational collectives federalizing as connectives (*the whole transnational judaicizer project all over again, except this time transparency as key ... The nobody who seems to know more than everybody in these the end of the daze about how to connect the dots? :wink:

I probably should have kept going down down down the hole, taking the 7ME with me, as Inanna did?

I mentioned this fact of life that they spiraled in two directions to a Peruvian fella giving tours at the aqueducts.

He had never noticed that peculiarity, and he was rather surprised when I immediately pointed that out to him.

I noticed it right away because I had already began my spiral journey in 2004 and because truth is truth is truth!

The kind of TRUTH that transcends time and space, and it is everywhere, and once you go looking for it, watch out you might just find what you went looking for...first you will be shocked and then you will say awe shucks, how humbling.

Ancient Egypt, Science, and the Evolution of Consciousness

fatuma.net/text/r.a.schwallerdelubicz-ancient-egypt-science-and-the-evolution-of-consciousness.pdf

This is a FANTASTIC book from my POV.

I have recently been drawn into the work of this legend, R.A. Schwaller de Lubicz. Who had some controversial idEAs, which might seem like prophecies in retrospect.

This book was published originally in 1949.

But take note the authors interpretations of the Egyptian hieroglyphs suggested to him in 1949 'brain asymmetry' which was not confirmed until the 1960s when split brain operations were yielding many AHA!

Did the Frenchman Schwaller know about Wilder Penfield poking around the brain? But but but for me where Schwaller's work collides in a most wonderful way is simply demonstrated by what he wrote here:

then it descends into hell citing scientists on doping chips to influence chirality ... as if it matters wether you get left or rite around stir crazy but i shouldn't knock it too hard as long as i sit here typing onto my very own chip here ... and that's cause i am not succeeding to make it clear all of my stuff should be sorted, printed and set up to form the crystallizing core of a collection house that leads off to spin it's various tentacles and tentatives into tangibles, a home for all who come, a sanctuary for deserters and inviolably permanent at that. The rainbow family promise come true.

Of course i must have recorded my irritation with him before *(his disgusting behavious on the [[over a hundred pages long]] Rodin thread at ickeforums notably)* ... though proly thought 'what's the use' and passed over listening to him *(on a podcast many months ago)* in silence; suffice it to say he is in the illbred juvenile class or preachy one at best; coming off much like the guitaoist in his comments *(both also more palatable when they speak funny enough, .. and what's more, they both think of themselves as totally unique prophets which causes them to have supremacist denigration fits they take out on others).*

the lama govinda *(whom JA mentions)* foreworded book is available from aurora press for 12.50

Fig. 2 above shows the side hidden in fig. 1. Photographs of the actual prototype of the 'I-Gene Cube' made by F. Johnson Yan's wife appear on the front and back covers of his book 'DNA and the I Ching'

ReViewS about these 3 books:

There seem to be three books on the subject of the correspondence between the genetic code and the I Ching:

[Martin Schonberger,](#)

["DNA and the I Ching: The Tao of Life"](#)

Johnson Yan and Katya Walter's

"Tao of Chaos: DNA and the I Ching".

Schonberger's book is showing its age. It was first published in the early 1970?s *(and no, it wasn't Schonberger who first noticed the link between the genetic code and the I Ching; it was Carl Jung's disciple, Marie-Louise von Franz who first wrote about it in the 1960s)* and there has been

considerable evolution of thought since the publication of this title. Of the three, Katya Walter's shows the most insight to this link. *(Interestingly, von Franz, Schonberger and Walter all identify themselves as Jungians. Yan comes from a syncretic traditional Chinese/modern scientific point of view.)*

Unfortunately, Walter's book is out of print, though it is still available used on Amazon. By all means read this book, but if you find yourself feeling at the end, "But isn't there more?", read Walter's "Tao of Chaos".

calendar dates for the Maya leaving their city Mari when it was destroyed

The Maya left Ur in 2029bc when its 1st dynasty of 177 years fell (*2207-2030bc*). And they went to Syria to build Mari (*2029bc*). The Maya had lived in their city Mari for 129 years (*2029-1900bc*) having deserted Ur these 129 years before the rest of Ur (*the Hindu*) had left 3rd dynasty Ur in 1900bc to live in Babylon, or to go explore, pioneer and settle as India. Abram had deserted in 1943bc when Amar-Pal became king.

alt.religion.jehovahs-witn Abram believed in earth resurrection not heaven because of grandfather's suicide --- 1 post by 1 author

Elijahovah 7/12/09

When Jesus brought the hope of resurrection to man, he did so by resurrecting his friend Lazarus from a tomb. He did not call him down from heaven, but rather he rolled away the stone so the man could breathe when he awoke. Resurrection for Jews had become tainted by Greek belief that the dead are alive in an underworld awaiting to ascend to heaven. Half are tortured, the other half have a subterranean paradise as they wait. This concept came from twisting the words of old texts of astronomy describing planets setting and then rising and claiming they were resurrections of people. Therefore Jesus had to contend with Jews who were taught Greek religion no matter how faithful their mother was in truth handed down from Abram.

his most recent message there is about 5.5 waves old (*from jan 21*), here's the whole thing:

Elijahovah - Jan 21

detectingdesign.com/carbon14.html#Making

This link says 21 pounds of C14 are estimated to be created each year.

So if Jehovah creates 21 pounds per year,

then Jehovah killed Peleg in 2030bc from 2520 pounds to 2730 pounds of carbon 14 added to the whole planet in 120 years to 130 years.

Peleg was born 101 years after the Flood and in 20 to 30 years

his body protein DNA was formed from AMOUNTS of C14

during 2269-2239BC, as was also his son Reu who also died at age 239 having his first 30 years 2239-2209bc.

Thus the amount of C14 from 100 to 160 after the Flood is

2100 pounds to 3360 pounds world wide.

Doesnt sound like much, but in DNA its enough to effect longevity of all organic life. Imagine how many pounds of carbon exist in every living tissue on the planet and then only 2000 to 3000 pounds more of it drops longevity of all life by 12 times.

The good news is that it shouldnt be too difficult to dilute it

with volcanic carbon when Jehovah erupts all volcanoes and all faultlines from the astral impact that puts 40 feet of water back up 52 miles high on top of the atmosphere.

we better get a hold of this guy before he slips and falls into IONuttery or sumthing.

So with venus & Jupiter rising out of solar conjunction, (as regards the biblical belief that all astronomy started with Babylon) one might think this may be why the news recently reported signs that Saddam Hussein is again reaching for Kuwait. (as I had warned in 1990 seven years ago). This is the 7-year sign in which people expected the global ruling anti-Christ to be so clearly undeniable to all citizens of earth. The Jewish Kabbalistic tradition seems to have been imbued with Pythagoreanism as the gnostic systems that, like it, were fertilised in the rich spiritual soil of the late Hellenistic period. Indeed, the association of Jewish esoteric tradition with Pythagoreanism goes even further. Josephus tells us that the Essenes were Pythagorean; Philo of Alexandria is known to have employed Pythagorean numerology in his biblical exegesis [Leet 1999: 75] And in fact assigned the Greek sound harmonic principles to Abraham as the father of sounds: "For Abraham, which being interpreted means the "The Elect (*Great*) Father of Sounds"; for language when uttered sounds, and the father of language is the mind, which has attained to what is virtuous. * -- Here is an anecdote about my activities as timely actions over the siege in Toulouse, France on 21-23 March 2012 in relation to the earlier massacre of three paratroopers (*ethnic and muslim*), school children and a Jewish Rabbi by an Islamic extremist. Whilst enjoying a walk, I made some appraisals of the most probable cause of the event before it was disclosed as public news. In that the 7 murders which occurred as terrorist activity were in part being attributed to abuses as starvation of Palestinian children due to an inability by the menfolk to pursue their livelihoods because of a confiscation of their tools of trade at border crossings in Israel. And as a consequence of my comments, as actions of goodwill and regard to European friends, I found my words as ideas (*unity of being, dignity and discrimination by the State versus the animalistic behaviour of the perpetrators*) being uttered from the mouths of the French President Nicolas Sarkozy and a Jewish Rabbi in Israel which were subsequently reported on the news.

In querying the political motive of UNICEF workers in the street (*of Sale, Victoria*) that same day, I remarked that not even Kofi Annan would be able to take the "King" of Syria (*President Bashar al-Assad*) out of my hands--and indeed that is so today as Russia, China and America are all indebted to my intellectual property associated to governance.

There was in response to my calculated statements as provocations made towards the Republic of France (*on*

alt.France) in their time of great need, an attempt by some person (*René Groumal*) without any remorse or apology, to falsely and slanderously characterise my public Internet statements as being fascist or neo-nazi. I am categorically neither. The source of my ideology as autonomic doctrines of unity, co-operation, freedom and democracy are not derived from Adolf Hitler. But that my prophet is Moses and therefore I am not anti-Semitic.

I did not desire to participate in the attitude of silence as others have promulgated to this very time, and neither did I consider, as others did that subterfuge in the use of language was the only applicable and acceptable answer to such questions: "Vous êtes sur un site francophone. Yez la politesse et la correction de vous exprimer en français." That as a matter informal research and intuitiveness, I was able to contend, against both neo-nazi and extremist Islamic ideology, as considerations of public and present concern to a number of nations at that time and I did so from an earlier Chapter titled "Being & Time: Spew out the ugly slime of the Seine. Speak German, O You German!".

Therefore, given these my activities of mind in which I engaged as a former member of the Victoria Police relating to timely actions over the recent massacre events in France, while I waited for the owners to procrastinate [by indecision and their own affections, a contrary and changed intent]: "it is well within my capability to take legal action against the owners for their impertinence--but I will restrain myself.

Those costs will be met by other parties and not yourselves. Thank-you."

took me over 4 hours to find this eh?

I find that the problem is an interpretation of what Jesus said about feeding. Where does it say that Jesus finds them feeding as they should be. Jesus asks it as a question which is presumed by GB to mean which of those all claiming to be a slave of Jesus is then the real slave who is doing this? Thus showing one is appointed and the others are fraud christian churches. However, the emphasis on those who claim that role versus the one who actually takes it up does not actually say or prove they are feeding properly. Who is feeding at the proper time is rhetorical, especially if the one chosen by Jesus is sleeping like bride and bridesmaids when the hour is here already. Examples. 2005 onward are posts of FWB (*friends with benefits*) yet 2012 and articles are just coming out for 18 year olds who were 11 when their friends at school pushed for these orgies. So too now you have 3-ways on TV (*Men Men & Half*) or at the theatre with Streep. How many years before marriages are warned by article? and yet what about all the single people who watch this and think it must be publically acceptable to seek 3-ways all week. Jehovah & Jesus do not see nor understand how a GB who can not print an article on the purpose of genitals in marriage being one that forbids fudge packing and yet they can enforce who must get a marriage license (*or define it as fornication*) while others in the USA they give a license to marry against court order to remarry due to child support not being paid. I see this as Jacob reinstating the DFd Joseph only if he apologizes to his 10 brothers, and confesses of his pagan priest-wife (*divorcing her*) or Jacob refuses to move to Egypt.

For 48 years (1991-1943bc) from 27 to 75 Abraham journeyed back and forth from Ur to Harran. I see no evidence that he made contact with the Mayans of Mari Syria so i would not refer to that as identifying with Abraham. Babylon destroyed Mari in 1762bc so that these Mayans were captive in Babylon for 137 years to 1625bc and they went to India. I would not doubt that Jose has had contact with Mormons. Or that he is typically influenced to thinking his DNA genes are derived from Abraham. Sorry but i seek truth, not prestige. I have no blood in me from Abraham but rather i require adoption by the Jew Jesus and i find it disgusting those who wish to boast as both as if they get double blessing of being favored even without Jesus.

that's two mormon counts in 2 days ... and i am in the Netherlands ... should count for sumthing .. so ... meet Kevin Blanch .. Utahnite ... who just oploaded a vid yesterday that mentioned his great granfather who spoke 5 native languages ... and today i found Ike Potter in what well may be a penny novel but we'll see; i asked KB about the languages right away but he hasn't gotten back to me.

So the mayans have what exactly to do with SA ones?

They went to Mexico via India???

You should not pretend being ultra humble when the internet is filled with your failed prophecies and general usenet kook status ... as far as i can judge a lot less justified than say Dolf Boek's ... but still. You take the Bible very seriously ... that's enough of a warning sign for me; bloody sentiment hiding under the sober count keepery ... won't fly with me except for entertainment, not entrainment purposes; it humbles the whole human race ... at least in my eyes.

Well, just because Mormon belief inspires them to learn all the Mexican languages doesnt make their bloodline. The DNA has already been tested and there is no Jewish blood in Aztecs or Mayans. As for chronology though the timeline of their Armageddob countdowns does follow Babylon and Egypt to India then China.

As far as your usenet kook crap there are four illegal-legal lies about me that i could sue for but such people like to hide by the fact you cant find their address to deliver the arrest and warrant so sadly the devil exists in not just the whoel world who thrives on the net but in Netherland morals who love to read and believe.

America the outcast like Neder Land the outcast

Americans started as the criminals that Britain and Euro wanted to get rid of. Good people who wanted to flee the bad control of bad church and bad government in Europe came here. But those lands also rid criminals by putting them on ships here. And many criminals fled the law by coming here. It is the same with the Neder Lands being treated by the Germans as the outcast world, the swamps in the cold north to send outcasts too. Though of course like America those good felt they would find saftey going there to hide among the bad. All the USA refuses to use any word but Germanic and German to refer to this country of Deutsch Land. They refuse to say Dutch and Deutsch are the same word and that your language divides off from Germany. Did you know that the 1640bc journey from Hattusa Ararat in Turkey to England passes thru Germany where there are identical places of Stone Henge ?

Stonehenge was built in 1554bc January 4 to count every 56 years to the year 6000 of Adam. All of it are their attempt (*like my attempt*) not to claim which year is 6000 whether 365-day or 360-day or lunar or solar or sothic JULian or Gregorian, but rather to find and see, and know when that asteroid is going to strike that kills anyone who didnt prepare. So scream all you want about prediction or failures, whether i live or die, my hope is to save those who survive it and i have no pity nor love for those who dont because the times get so rotten that those deserve to die. Did you not know the homosexuals of Sodom had wives and children, and their sons had sisters. They all died. They weren't all ass-poking men.

The netherlands is now like Las Vegas. Just because people go there to party doesnt mean it is good and will exist when this all happens. From what i know you have no mountain to climb.

have you made any videos i could add to this list of mine?

Look buddy, the guy lied and said i was fired from Chrysler for bible stuff in 1996.
I was on a layoff that got called back in 1997 and received my retirement pension in 2007. When i attempted to find his address to sue him, he proclaimed it as stalking. People look this shit up like you do and i should do all i could to sue his ass and every web connected with this.

you'll find a true brother in spirit in such respects in Dolf .. but you may not want to bother .. he's gay ... and has this odd way of spouting this holy language and totally fractured 'key-clipping' supposedly relevant to what he does ... he even automated it ... but he's as litigious as fuck when it comes to what he perceives as incorrectness. Rather than stay away from it he jumps right in again and again.

Mr Collins cut his channell back to 2 vids and put up a version that doesn't seem to have anything changed to it, except the description:

Apr 4, 2013
In every gene we have studied -- C.Elegans, Drosophila, and Human Chromosomes 1 and 14 -- the total number of Hox codons has dominated the codon occurrence counts in the gene, homeobox and homeodomains.
Each of the 64 codons that code for an amino acid are as unique individually as the 20 amino acids they create.
Combinations of Dna are produced by changes in the mode of interaction of lower centers; higher centers within the organization tune or adjust the interactions at lower levels suggesting that the homeodomain (*within the foregoing style of organization*) consist of acquiring a convenient synergy, thus lowering the number of parameters requiring independent control.

Dynamic preexisting fractal Dna patterns regulate the homeobox internal degrees of freedom. The Rna that a Dna codes for is what the Rna consists of and appears in at its fractal levels

Published on Apr 6, 2013 ---- NS.1.25.9.21 — Kin-43 — Blue Self-existing Night ---- Chapter 27 — "The Shock That Wakes You Up" ----- After a lecture in a bookstore about Chinese spirituality (*yesterday*) it is now the day that Sieger Galactic Skywalker and Juryt Solar Night go a mountain called Montseny. Here they will find a selfsustaining former Buddhist retreat place, the house of Nuria Cosmic Skywalker.

This is a special day for Karma of the Camera, this flowmovie project started exactly 2080 days ago, that is 8 times 260 days or 8 Galactic Spins ago. We are at this specific location in Barcelona close to the Gaudi square to pick up the little girl Nayawa Galactic Moon and to wake up Tony Solar Storm. The uChing workshop will start tomorrow and he seems to be asleep. This beautiful house is owned by Isabel Lunar Earth, Kin0197 and Counselor of Peace. We remember both her and Lwx Magnetic Dog from the Sirius Council early 2012 in Australia.. this flowmovie is dedicated to U !

U and the Original Matrix Attained ----- # 27 Exactly one Solar Ring ago, 2012 March 27, Sieger and Juryt where guests at the Galactic Research Institute in the Southern Hemisphere, bioregion of the Night. On that specific day it was Electric Mirror and uChing chapter 28. Now Sieger and Juryt are here in Spain during Eastern to celebrate the birthday of Arayagua tomorrow, she is 27 en will become 28 tomorrow.. a reason to give a uChing workshop in her own language!

7 april:

This is what i do all day home alone. Maybe i should wear furs and eat locusts.

This chart was created seeking the 137 years in Japan chronology.

In doing so a while ago this year, today i enhanced it by title and by clarification of what makes a 360-day calendar year sothic.

This topic is handled by no one else because the only scholars to even touch or seek a 360-day calendar is Mayanologists.

[youtube.com/watch?v=tppAGtWRWp4](https://www.youtube.com/watch?v=tppAGtWRWp4)

Chapter 59 — "Being Alert and Prepared" ----- Today is the birthday of Arayagua Electric Seed and the first day of the "How I Became U" workshop. It is the day of the arriving of the people to the house, they will stay for five days. Sieger-73 and Juryt-243, together Arayagua-224 are making their preparations for the structure of this story, "Being Alert and Prepared," yes and then Nuria-13 saw the miracle as first to announce this Cosmic Prophetic Message.

All the uChing chapters describe 64 numbers as 64 archetypical situations that we all share as human beings. Now the uChing includes the one missing chapter from history. These 0—64 chapters perfectly synchronize with the 65 days of the Galactic Season, and in these upcoming days we will learn how this works.

To feel the meaning of the numbers, which are qualities in stead of quantities, the 65 different situations of life are archetypically described in the words of the oracle. Today it will be the first time we present this oracle in Spanish, so we put the codes on the wall. You see in this movie how we build the new Great Wall of China, it has an answer to every question there is.

Radiohead speaks about Karma Police, you know, in the meanwhile we show the new order of chapters in our Genetic Code 20+1 groups sequence, this is the order of the Amino Acids and the sequence of the new upcoming practice in the Galactic Seed almanac of the FLT. If you take a good look, you see a big key on the wall and a door that is open.. Timeship 2013 is ready to be launched!

The Earth Wizard house on Montseny of Nuria 13/13 is the perfect location for this new and upcoming (*Law of*) Time Tool. After our careful preparation on this special day, we will see the result immediately, perfect as you can see in the next movie.

I find attempts to associate pure mathematics with the words "magic" or "mystic" rather nauseating. (*H. F. Baker's work on Pascal's mystic hexagram is no exception; Baker was stuck with Pascal's obnoxious adjective, but had no truck with any mystic aspects of the hexagram.*)

The remarks above by Clifford Pickover on Collins, Dürer, and binary representations may interest some non-mathematicians, who should not be encouraged to waste their time on this topic.

For the mathematics underlying the binary representation of Dürer's square, see, for instance, my 1984 article "Binary Coordinate Systems."

Those without the background to understand that article may enjoy, instead of Pickover's abortive attempts above at mathematical vulgarization, his impressively awful 2009 novel *Jews in Hyperspace*.

Pickover's 2002 book on magic squares was, unfortunately, published by the formerly reputable Princeton University Press.

3rd and 4th (*also last so far*) sentences at Mark Collin's blog (*the Madison Bell Labs man*):

Combinations of Dna are produced by changes in the mode of interaction of lower centers; higher centers within the organization tune or adjust the interactions at lower levels suggesting that the homeodomain (*within the foregoing style of organization*) consists of acquiring a convenient synergy, thus lowering the number of parameters requiring independent control. Dynamic preexisting fractal Dna patterns regulate the homeobox internal degrees of freedom, creating unique homeodomain segments of bottom-up and top-down synergies.

Cullinane in an april 6th post cites Pickover showing Collins binarized Duerer (*in 2003*) and then achieving a 2 way fold symmetry, very important if you study DNA and protein is it not? And it plays a much more prominent role than 'magic' as you say, doesn't it?

<http://patternsinbase2systems.blogspot.nl/> has only 1 picture ... and no apparant link to his large collections of them (*collated later prolyly*) here:

collinsmarkd01 = youtube handle .. no vids right now but i downloaded a few meanwhile discarded versions he appears to be tinkering with.

his blurb there:

Our purpose is to redefine, revitalize and redirect current methods to decipher the meaning of the human genome. Color is, and always has been, based on context. Trying to differentiate structure in a genome assuming each DNA or RNA nucleobase has a "fixed" color impedes the effort to find the deeper order and connection that is there. Once in place, context driven phonemic Dna codon color will allow accurate and more detailed comparisons between billions of current genome sequences; requiring less resource, speeding up analysis, reducing the logjam of undeciphered genomic data, and suggesting new and rewarding areas of discovery.

S J Marshall <yijingdao@gmail.com> wrote: Hi Piet Poet, Thanks for your poetic email and photos, I didn't 100% understand it but I got the gist. I couldn't see much information about it on his site. Do you have any idea what it is? ----- all the best Steve

No Steve, no clue what Juryt is up to, except tweaking (*subverting*) the dreamspell movement by assuring them it's all perfectly 'synchronotricious' .. most of them never could and never will catch up to the raging 'recombinatrant' Jose Arguelles.

i did discover that Duerer binarized -- as Mark Collins did, noted in turn by Pickover in 2003 ... shown me

this week by Cullinane (*who prolly needs no intro or link with you*) -- allows a fold symmetry which Arguelles seems to have given a place in his numbler tumble fitafold. 13lunas.net/synchronotronen.htm

That man truly was an epigon of eclecticism.

Collins tries to fit the folding trick across colour and proteins and seems quite conflicted about either his content or format (*the latter surely flawed badly in his first vidding efforts, but they got tolerable and i downloaded a few ... but he has taken them all down again*).

Juryt meanwhile, is in spain, instructing other reliremixin, newsewagers on how to use his funny boardgame (*bor[e]dgame?*).

his new youtube account has adventure vids trips to Meso American rock piles ... excuse me, formalized and firmed up trace mineral storage stacks otherwise known as temples.

this is what i went to retrieve in order to bounce it off Juryt (*he hasn't gotten back to me yet ... but he's waaaaay busy now - see below*) ... and lo/behold, S C had just remarked on my noticing and posting about both at a blog in NZ

Protein organization exists in multiple levels of relational space. Using just the energy level of the protein does not allow for the ability to see the protein shape or amino acid sequence, in relation to the dynamic structure and organization of other proteins. One fractal (*of any element*): one space. Preexisting pattern in the homeobox suggests a path that is dynamic; meaning organization on each level is inter- and intra- related. Combinations of Dna are produced by changes in the mode of interaction of lower centers; higher centers within the organization tune or adjust the interactions at lower levels suggesting that the homeodomain (*within the foregoing style of organization*) consists of acquiring a convenient synergy, thus lowering the number of parameters requiring independent control. Dynamic preexisting fractal Dna patterns regulate the homeobox internal degrees of freedom, creating unique homeodomain segments of bottom-up and top-down synergies.

About the Islamic Culture.

The prophet Muhammad (*S.A.A.W.S.*), founder of the Arabic Islamic culture, was the final
prophet for mankind and jinn-kind (*another kind of intelligent being we humans cannot see*). From
the Islamic culture came many doctors such Al-Razi (865-925 JC) and Avicenna (980-1037 JC) as
well as geniuses such as Geber (1100-1150 AD) and Al-Khaldun (1332-1406 JC). If I were a doctor
at the time of the Prophet (*S.A.A.W.S.*) I would diagnose his early-passing on to the next world
(=*akhira*) due to internal hemorrhage from partially ingesting poison. Such early passing on into
the next life left his followers in a political schism since by the late 6th century his grandson
Imam Husayn (*S.A.*) passed away in the infamous Eid of A'ashoor in the first month (*Muharram*) of
the Islamic calendar (*that's lunar in nature [[Cf. numbers 10:10]]*).

About the Mayan Culture.

According to Howard La Fay (*N.D. 1975, page 3*), "Their origin is found in the depths of mystery and also in the
mystery remains the fall of their singular and splendourous culture. Mayans call them the erudites, but among them
they knew themselves by other names, in their majority already lost.
During nearly fifteen centuries they flourished in wild and inhospitable zones of Mesoamerica." Translation from
spanish mine.

13th comment:

No, the SAA INTENDS to fight T (*and i believe they fully mean to*) ... but using the wrong, even terrorist methods, of course attracts more of what they like to do away with and without. How about trying to cure it????

Create sanctuaries where everything is possible for deserters, mercenaries and soldiers alike, as long as they leave weapons behind; they can challenge whoever to fight to the death and together with those who accept organize worldwide wagers, ..

.. plant gardens a la John Liu (*please watch his vids*), etcetera. Guaranteed income for abstaining from weaponry, acquiring (*re*)greening skills; it could be an option next to the satanic bombing missions the SAA flies, .. and satanic they are, not just as long, if, when and while aiming at fellow spawn w bigger sponsors yet lower budgets - trying to look restrained .. after lybia triggered ows - yet hitting innocents, but even when they get a clean shot and nothing but potential 'terraRousties'.

this one here is a close - but not quite* - copy of Dolf Boek (who has only lately resorted to using his name in the urls he handles) in that there's a usenet history of the type of digital formation compactions hurled in an effort to reach that mysteriously bouncing light INformation status -- wannabe shitflingers and mudslingers who oddly have nowhere near the pleasantly composting after glowflowgrow effects ... pure E-waste is more like it.

* = can't remember what/who this refers to 6 years later .. sorry ... but i did bracket this there: they never ever overlap and always always have despotic traits - deal with it, don't 'like', praise, monetize and/or ignore it, most of all, don't imitate it.

LisaMarie never remarks on the entertainment value of the open institution ... people can't get their head around the fact that Formation and inFormation are as open source is to pretty strong encryption, ... rock vs light.

jesus taught how to make rock go (go & grow) from one indivisible to singularly innumerable, from one to the many applied to rock, physically and not mimed, not abstracted, nor performed mentally or any of that mankind urbanifying shite ... let alone applied as (in the sense of) one for all and once for all, final and absolute even, the one and only as well as last scapegoat fashion, ender of time and karma.

Sherrie (*kin 99*) objects to kabala and cypherments, cryptication and spellery ... yet you, oddly, get away with it.

You turn backyard truth - which jesus learnt up north but failed to sells as an add-on to his homies - into an abkra cadavra of your very own personal distance history .. and now even your chromosome counts.

Most people are all comfy right now because it's just the "Muslim extremist terrorists" who are being treated this way. That's how they lull the masses into accepting these police state tactics. They disassociate the target from the common American. Well, the next time, they might use these tactics for a serial killer. Then a drug dealer. Then a bank robber. Before you know it, they will be shutting down cities in an attempt to capture/kill someone who merely disagrees with the government.

the postlude is on Vernadsky, a 'constant' concept which at the time struck me as a hoot and a howl worth of ludicrasy .. eh 2fur1 ludicracies ... eh .. ludicrate ... an apostate is apostous after all there's a huge yawn of a gapegap between his rule 5 nad 6 here:

5. The living matter of the biosphere is a single corpus, governed by a common genetic code.
6. The single corpus of the biomass is a constant: "The total mass of living matter has never differed considerably from its present value."
7. Evolutionary sequences are highly varied for different species, ocean and land, but the sum evolutionary interactions may be considered as functions of the biogenic migration of atoms in the shifting geochemical give-and-take of the inert and living corpus
8. "The evolution of different forms of life throughout the geological time increases the biogenic migration of elements in the biosphere."

he seems to be working up the courage to say that ufos are organic .. well if that aint the certifiable rot of a type that will and can trigger impatient types to go try mutate earthlings in attempts to fast track taking flight trajectories out of their galactic embeddiment (specially if their childhood hurts has them perceiving such sit'ions as prisons i'm not sure what WOULD constitute better evidence .. so maybe Drewboy wasn't quite so slanderous after all).

Still, i don't believe i'll try compost it if i ever find a crashed ufo ... i'm too oppressed and hemmed in on all sides by hi-jacked, enslaved, abducted and weaponized metaphors to do much of anything let alone look for craft other than the ones eager for some recognition and to deliver evidence funding them is money well spent. a skeptic chats (quite antagonistically at times) with Brian (*God incarnated; heading a tiny cult with his wife*) who he has studied fairly closely while remaining a total skeptic

between 40 and 45 (*of just over 50*) minutes Brian goes from a 3x identical number of days age difference days between 3 generations of women he was close to (involving 2 wives, as if to escape bloodline bias libel) to the number in miles of the circumference at the latitude of his present house, to the place that number gematriates into a word found in the bible. This, a chronicles txt, gets taken as a prophecy he has the mathsmarts and every right to apply and take as pointing to himself. For emphasis he tops this brilliant string of arbitration off 'powning'* the total number of words in the king james concordance which reduces to his birthday.

This is just a sliver of all the other stuff that 'figures' ... into his justification for calling himself God and verbal performer and/or indicator of divinity as concentrated forms of synchronicity ... manifest ... er .. ing in the distance between the 2 houses he built in Canadayadayada

In short, long excuse for calling yourself a 'feestvarken' (celebrated celebrator - hi status numanoid).

i don't see how this man and following is any less trouble than the bands of young drifters; together they just destabilize and spin roadsigns and labels or clog and blow the crossings up altogether; words of divisiveness either way; let me try show a way to divide, part & open that unites and creates bonds beyond world (*wether buzz or incomprehensibly complex*) .. but first i'll explain why this man is extremely unhelpful.

We're not dealing with an ideology except as an overlay, a type of uniform, a mental shame, barrenness and void hiding veil; fundamentally we're talking hormone levels; hi-T boys who were restless after no efforts were made to give them responsibility over life and death (*which begins with giving rocks a drink and turn them to soil*) and so set adrift, got lured by and fall for, then ultimately from, weapons - still a life/death connection but a mercenary bullet & blade whore one, they get the whole flow the exact wrong way around, falling prey to the schizo weapon industry that will inflame aspirations with freebies up front as per usual.

Is it cause i am percieved as the unlucky charmascotte of what the allies fought for* for them to closely examine my thought trains?

Am i still, after looking closer, one of the duds and fails with the feminists pity industries can fuel the welfare state?

Do they HAVE to hold me for a fool instead of a logical result of an easily negligible and if not pitied, demonizable percentage of the assimilationist, integrist ideal and efforts crops popping up more and more

as more jewish blood assimilates all over the place? Yes, no and no. The allied empire wants weaponizable nerdiness but not the populism i have grounded my thoughts in since going door to door in a small farm setting aged 6 and 7

judi bari was 9seed (*9seed year, 4th owl moon*)

michael hasting's 4ahau (*7th monkey moon in 13Wiz year*)

together makes 208, 101 kin *(31 years)* apart, both bombed by the FBI protecting rapacious polluters, callous exploiters and worse, she was 41 when bombed *(survived it 7 years)*, he is *(was?)* 33 and either undergoing plastic surgery for a new life *(after either playing the honeypot for the FBI or genuinely trying to stay out of their hands)* or actually, brutally murdered *(and maybe so publically on purpose)* cause he called attention upon their wayz, bringing those wayz upon him, which, not being in a people's protection program *(Rolling Stone, whatsat?)* he soon fell victim and instantly succumbed to, once professionally targeted, something his last communication points to.

Ps: apropos incommunicado, today i get a new post notification from S'Ace .. but received no answer to my skepticism expressed regarding the ex army base PAXX building in Ede occupied and used by one of the little outrageous genius clubs he is part of.

wijthorbecke.nl proceeded to fill a space there with brandnew black and white plastic chairs *(wtf! sure to trigger the suspicious in the land of intello clubbery)*.

One of his pals has written a bunch of books:

then came 'showroom' *(as 'showroomviewer' at youtube)* ... or was that before it? ... and since then we have slightly more mainstream folks via 'man bijt hond'.

There you have it, the ExpressHistory of Dutch Hollywood and till further notice ongoing, Hollywood by the way, where Michael Hastings supposedly died in a crazy inferno, after his engine was bombed out of his car *(not a little subaru like judi's)*. Better believe it ... or else.

The next 13 Moon year begins one Moon from today, on Planetary World-Bridger; 6:10, which encodes the time of Valum Votan's Incarnation and Disincarnation. 3 Eagle Poet Piet is immersed in the 13:20 Natural Time lifestyle, and knows more about the planting and care of SEEDs than most.

thanks for the kind words; funny enough i began collecting good seed sources (*catalogs*) in the early 80s and planned to plot out the best water air people combo to settle and order them to/from ... but evil and, much worse, overdone prudence-precipitated fearz & expectationz of evilz kept me from committing to 'zuch zroots', some sort of hang up / ideal i have [nevertheless .. as yet]. I comforted myself with the thought one can be 'zrootING' anywhere. Rock grinder on the run / rockface gutterer / polisher on the land .. on the landmark .. on the landmarkertrail

This here late in the game i have to admit / face i failed (*utterly*) to attract/direct students to my work with my smarts and wiseass fingertip tapping, .. those who could benefit from it and are jonesin for a paid gig better hope i command/bribe them into it with money (*go ahead, try ply me to become desperate and stupid enough to**). Beat the crowd to the baiting list, .. i mean, start one, enter my audition waiting list contest yesterday!!!!; i will send the unpublished stuff to anyone proving to grasp what's freely available (*though to no avail thus far*).

Like, .. it ain't hard to find out i advocate these 'oc-/recurricular' ingredients:

- number grids and water holding capacity calculation game ... '3Deeify' them little square gri (*t?*)discs (*hophop sivciv*).

-- the Aldo Costa type ferris wheel (*w shifspoke and/or shiftweight plus the slant rub/grind heave/load surface*).

--- hempcropping for windmill canvas and rope to set rock/massive boulders to grind/ spin/ pirouette on rock/massive boulders (*iow: rock-gauntletry; spin'm, roll them across the lateralizing spokes of the wheel, etcetera*)

----- in that order .. and so on

----- treenursing, ... perhaps yall (*Cresters, Permies*) could send me addresses / ID / sites of organic seed (*ling*) farms near you; cite size of available space and the numbers of/amonst you able and willing to contract / commit a few 'tzolkinnekinz' to hauling the water necessary to nurse whippy trees through no doubt upcoming critical times.

I can then resume weighing (*relocation*) options (*at least a few blocks once my mom moves .. on .. departs*)

including preparing an emergency one for my own peace of mind as much as your benefit .. i'd rather blow my stash on trees in all directions at once, than have the irs / fed types take it.

All taxmen [IN]famously commit this mistake: failure to offer a choice to earmark in such directions *(or any for that matter; we taxpayers get to suffer them feeding state terrorist false flag warmonsterismz with it)* ... i hope i can see them coming in time to act .. but yall can help me make the button pushing complexity a little ... bundlier.

Jacques Grimault uses Jim Alison's work in his 2009 feature on Egypt as cross roads of Globespanning Monument line ups .. but very briefly, clumsily and too furtively ... showing the Equator as if/when the Pole was in Anchorage a lot .. but the latter not so much, check 1:14:00 on E7_SSsZM2E .. and only in a 131 post thread of late last year does he admit the obvious. Is Jim alive does anyone know?

ps: nice tune, i formulated a response in my mind like: isn't it common courtesy to provide 'beeld & geluid' credit?

But, then i got to thinking, are credits any kind (*of*) 'courtesy' anymore this late in the game?

share freely? that hype has gone .. badly wrong

it tripled our workload, we now have to free the market and free the shares, on top of trying to free the palestinians

Is it common courtesy to provide 'beeld & geluid' credit any longer?

Who wants to know? Often it'll be a thief asking for directions?

Will the real John Galt please arise, it wasn't Osama, not Assage, not Snowden, Hastings is dead ... and countless countless folks before him.

Haven't most 'credits' been inducted and devolved into a pretense that social ties must, can be and are obliged thanks to and by way of them.

momnote saved for laduh

Money works? .. yeah .. even still, despite of their present affliction .. even in the most remotateously privilege pole/star positions evil twins of John Galt seem to get to work at and themselves into? Are disengagement rethinks in order?

.. we live in a world where bits and streams of them (*bundled or beamed, every kind of repackaging technique adding more layers of tox*) are as repute & representation distorting (*'dishonestified'*) as money itself (*surreptitiously siphoned - phone[[]]y[]our psyfoen up today!!! [[]]=0 [=]=1 - away from good people and used to storm back against them and their interest; rate this AJ type eviltowncryer spectre scenario you suckers!!*) .. so where's the courtesy if names are not used to seek them out as pilgrimage destinations or 'sites' to take always welcome acceptance of plenitude in gratitude opportunities ... but instead .. to go after them.

Last week i realized more clearly than ever that - via the electronic throng mob and masses amassment gimmick (*tomorrowland clips did it**) - some sort of sixties aftershocking' **share freely' hype has gone** the way of holy books and monies as the mental hygiene medium - emotional bathhouse fragrance.

* Taking stock of each other appreciatively is a youthful urge ... it kept roman armies on the march for a bloody long time .. forwards, towards downwards adjustment of expectations - indulge till precipitous

** brace for a snap, snip & clip up followed by a quick 'pair' down to the very bare 'pheromony minima' of costcornercutting matrix mating.. when a lemminglike crowd does their carpe diem thing unaware of the past-sell-by-date-boys their behaviour 'means up' in aggregate

*** affordable deoderant club membership proof deliverable upon arms raising and roaring time, at step up of beat deafening, the last one signaled by fireworks requires extra volume to beat the 'speacurse' but of course they are only playing with and off of you and you antejew too cutesie cutesee tribe for a day forger ... eat it up .. and return .. to routine daze ..to continue and remain unprepared and unconcerned .. to end war .. , --

But the 'share freely' hype can also take shockingly macabre shapes nowadays, .. of camera phones held aloft pointing at the scene of a lynching in unison, as tokens of immunity, proof of E-waste caste membership, casting it away upon the helpless halfway around the world and hoping it won't come back to bite us back casting evil eyes and ears about. Will we make the casting this time fellow auditioneers??

Again i ask: Are disengagement rethinks in order?

Doesn't scaling down serve diversity AND turn most risk into joy????

I regularly engage in stuff 10 years before the crowd comes along and all my hard work is overgrown and invisibly suffocated by fresher more incomplete attempts but they 'cover' me in massive numbers ... please tread on me i guess come to think of it, i fancied becoming rich and famous enough to build a pet model thingie that would be like pyramidal coils hollow springs box foldouts, with slits for your contributions and spouts for your needs tashi dele

I have new enigmas to worry about on this front; how come there is nary any overlap *(at least none i can discover with my crude searching skillz - patience fuse growing ever shorter too, finding so incredibly little about the likes of Dee Brown on the net should make even the most trusting person suspicious).*

Pane Andov 2012hoax.org – Pane's response to small insignificant group of distorted individuals

quoting someone quoted by Andow (*whom i have heaped mild scorn upon in these here pages before*):

In contrast, Bill Witherspoon wrote an article that appeared in the Leonardo Music Journal Electronic Almanac, Vol. 12, No. 6 (*June 2004*) where he described the Oregon Sri Yantra as the first in a series of experimental art projects. The first page of the article (*available online*) describes how the four people worked over the course of 10 days, and how a rain-storm on the final day erased the footprints that so troubled Andov by their absence. Andov goes on to claim that this was a "classic shadow government cover-up"

what the SY (*p*)reminds me of (*a dynamic version*):

you've seen the type flower that have a huge stem sticking up out of it right?

Now imagine a huge metal one swayed to move with wind and water power.

Imagine now, a flower stem, pistil type lever / pestle sticking out of a flowerhead (*bloemkelk in dutch*).. cone within cone tapering in thickness and into each other, ..

... the transparant picture at the top here:

<http://www.sriyantraresearch.com/>

should help quite a bit ..

then the stirring movement makes the boulders into chunks, the chunks into gravel .. the gravel into grit and the grit into fine fluid clay coming out of the finer meshes at the bottom of a series of them ..

feedloop backing ... the hollow cones, like wedges can be slid around the top of the 'axle' / spoon .. call it my fallussee or your very own pet name for all i care .. and shot down into the uppermost (*cauldron within*) cauldron .. can you see the musical and rock music 'realitizing' potential here yet folks?? story (*with largest sizes*), to free the ones that get stuck and insist on refusing to break unless we come up with a few touch bass base ballsy boys to have a go at the top layer tasked with in motion setting, initiating secretions and moistures (*SAA vs FSA competitions would be best rite now .. or them together against eyebleusemijew fantastic even. Till that unlikely then, i fear we might have to learn admire Iran for doing what Russia only feigns to do*).

Stop all killing for powdered and floured rock sake!!! Why leave me be the only one to conceive of this replacing all war in a hurry??? Sprinkle one, .. just one turd with an innumerubbed pebble, bury it shallowly and watch what happens for a season (*provide moisture gently to prevent dry out, aid trans- & reduction, etcetera, if necessary*).

i went on a diversion through 'schuledesrades' (.org - in german) at this point .. but had originally meant to say: don't you think all books that are too fat and borrow elements of each other - since they are in the business of calling beats; predict the appearance of hairline fractures in the fabric of time before others can see them and long before nobody in his right mind denies them - can only sow discord and the division that nevertheless keeps the illusion of lost and reattainable unity alive? Not the division that disentangles, disengages, demobilizes .. de-escalates detention industries ... apropos of which Max Keiser had a horrendous anecdote. He 'guestspoke', via Galloway, at the House of Lords conference room (*from which, by the way[[way]], two thirds of prospective attendees had to be disappointed cause they could only get the second largest such halls .. and still no member of parliament in attendance*). Max tells of the prison privatization contracts which stipulate that the state guarantees 98% occupancy. Max is really old school though ... he ties capitalism to hard currency and therefore can get a rise out of his audience over gold sales .. bubble babbles and graphic little anecdotes comparing debt to dung and claiming 10 pounds of it cannot fit a 1 pound bucket. But he forgets, conveniently, the morph / equivalence aspect to which gold only forms the emergency backdrop, the insurance clause; as it happens, today's money = blips = infinitely compressible (Bob Dobbs like to claim, pompous as he is, it 'disappeared') .. at least it seems so for all practical purposes .. until you look closely at 'IT''s logistical footprint in wider contexts.

yesterday nite i heard JA go on, the 4th day of his week long italy thing, about 999 (*the date at that mo,*

and refer to the bulgarian group [laszlo] planning for 10/10/10s and 11/11/11s as well as 12/12/12s)
he mentions 13/13/13 but doesn't make much of it ... now, that date obviously fits the 13 moon calendar only and not the others, so we make a switch .. but where to start the damn thing, an equinox, solstice, a 4ahau (*obvious connect with 3113 after all?*) ... either way, a year plus 29 must be special. On that same day he goes into how the sun's equator spins faster than it's pole 29/33 if i remember correctly ... also the speeds and spins of sirius B are given attention

perhaps the biggest service the work done by Jose Arguelles affords us and performs flawlessly* is giving us the opportunity to criticize the type of mindset (*mindmold is a better word, specially when taken in the darkest sense as well*) that deliver the storehouses, stockpiles and denudations (*gullies, wind erosions, the wars, etcetera*), face values, theatrical antics, deceit/receipt jugglery ... the machinification of art into 'productive' rather than beautiful work, in 2 words bean country throngery and crowdedness ... collective insectification (*out- as opposed to inbreeding*).

Very machinable language, like Keyserling's. All these vices added up has been subsumed as resistance to alcohol and usury .. but the latter's 'usefulness' to amassment and massification processes has won the day and era many times over and cumulatively.

We can however, thanks to JA's excellent and admirable instinct to stay away from the bible, torah and talmud (*going for Quran instead*) now criticize the numonotionalist mind without being accused of anti-semitism ... at least in the conventional sense ... The Quran, like the new testament, can be regarded as earlier attempts at exposing and healing deep injuries of the prehistoric Stockholm calibur, but in as far as they partake of the regrettable traits, utterly fail to escape it's grasp as well.

9narnias, Brian Golightlys .. and that's only the lastest of dozens and dozens i found over the years ... 'the sky is falling' kind of panickers

* - fractions aren't ultimately necessary .. once we learn to navigate by whole numbers .. he claimed on the 2nd day of his weeklong italian seminarm

As it is though, JA is more likely to be taken for a space age promotor .. that, rather than the effect he expected and claims to have worked for and towards, namely resurgence of garden culture, will be his 'counterproduction' instead.

hey terry, would you mind going through the ripening of my thought on drumming? My kit went from fingertips to tons of rocks, barrels of water, bellows of air and plenny of compost 'completioner' for the audience to take home and feed into their homegrown production lines, .. from hollow to whole .. get it?

ps... took all my confusion over the 20 20 20 5 rhythm season openings divided over various tones of my clan (*i got 10 out of the 260 of them .. or .. wait... 7 years = 3557 days : 65 = 40 (give or take) x 4 (that 20 20 .. etcetera) but some only got 2*) out to a file called 'JA notes aug13'

all the famous heptagonal sigils in the 23rd of 66 minutes

Gee complains to the 4400 vid uploader that he 'jumbled' the sequence ... whereas it's obvious the biographical tedium got interspersed with the more abstract (*as well as void of soundtrack and colourless*) 'work' (*waste of time when it comes down to it*).

halfway we see the 'heptarchical bonorum' by Dee (*49 mechanical time generated name coinages*) got 'rechristened' (*and tripled*) by Arguelles as holomind perceiver

48th minute he says 'intersortment' .. what. an. interesting. word!!!!

same minute we see his colourcoded cube (*golden dawn like*) ... an adaptation to which a good few pages in the Master Code book from 07 are dedicated ... or, if you prefer, TO which a good few pages VIA an adaptation OF which in the Master Code book from 07 are dedicated

at 1:02:17 there's a colour version of a pic i pried from one of his pages (?) of them close fit but not touching puzzle squiggles on the 'watchtower' matrix which goes to make them nonsense Dee names for the 12 tribes or something

from 1:02:00 forward we see colourcodes per LETTER
91 of them; here's 3 whole and 3 partial samples:

DEO: Genadol: Arabia = LiL Occodon
ZIP: Oddiorg: Assyria = ZON: Samapha
LEA: Lauacon: Ethiopia = ZIP: Doanzin

what a clown, just about the last minute he mentions april 20 1587 as the date Dee reconfigured, reordered, reshuffled, the 'order', iow, the sequence, something Jonathan Gee pretends and proolly managed to convince himself he knows a hell of a lot about ... though if you ask me there's no hope he will get his priority choices made and arranged into even the remotest semblance of those EYE can respect. However, kudos for the coloured letter eye candy. It's intent is pathetic but as a flower arrangement or rather, a piece of art substitutive thereof, it's quite nice.

note the 420 year difference between the Dee date and the one i started this day with

a glance askance at 'matrologists' (*'groupertrouers'*) as a 'gro(W)up' (*short for grow up group*) not everyone is looking to (*grow up*) .. - a dark room grope has no attraction for a tribal child . rummaging through the 'grabbelton' by touch blindfolded is dark enough stick with a few board games but become the alpha; set the scenes change the rules ... loose the root lose the r and go for fiction instead - stick it to the hollowhoax hex halo sticks .. and do not listen to the likes of Arthur Kroker singing the praises of Philip K Dick in his linear fashion ... not that there aren't any takers for subverting the meaning of BLUE

Digital Poesis: An Imaginal Interpetation of the Digital Era

Jeremy Johnson · 266 videos -- 1,596 ---- Streamed live on Feb 12, 2013 ----- Here, I present

some of the findings of my two years in the Consciousness Studies program at Goddard College.

There is much debate over the impact, or effect of digital media on intelligence, childhood development, and culture. What is seldom explored are some of the far reaching, and deeply probing dimensions of digital media's impact on human consciousness. This presentation argues that the new media environment we surround ourselves with, and in, in contemporary culture is

coinciding with a tectonic shift in the psyche.

By drawing from cultural philosophy, depth psychology, imaginal and mythopoetic lenses, I offer an interpretation of the digital age as the resurgence of myth and the polycentric psyche.

New digital-material spaces re-define what we mean by "real" place. Avatars and online identities challenge traditional understanding of the self, shifting our orientation from singular identities to constellations of personalities. The ubiquity of this new online-offline space is liminal; we are constantly in borderlines and crossroads, hopping on and off line with our cell phones and laptops. Virtual space becomes just as important as material.

Finally, I suggest that such a tremendous psychological and social transition taking place is part of a shift, or mutation in human consciousness. An evolution of culture and psyche, as defined by Jean Gebser, William Irwin Thompson, and other cultural philosophers. This new psychological, and social consciousness is marked by a resurgence of mythological thought, "big picture" thinking, and new defining relationships to time and space.

Special thanks to: Francis X. Charet -- My program director, and head of Consciousness Studies at Goddard. --- Hillary Webb -- My second reader and encourager.

Ralph Luttz -- for honing me in, 3rd semester!

William Irwin Thompson -- for illuminative discussions and muse-filled writings.

John David Ebert -- for his expansive conversations and books.

Topper Quote: Personal Reality Creation

topic posted Tue, February 6, 2007 - 4:55 PM by Charlie With personal reality creation the underlying structure of current processes and mind/body coordinate alignments whereby an "I" is strategically nucleated over-against a field of potential "others" challenging the temporalized integrity of that "I", remains unquestioned, is never touched, persists as the governing mechanism through which such intentions aquire any meaningfulness at all, underwrites and reinforces all the activity organized about such intents and is reinforced in turn by the resultant response-patterns conformably reiterating- and inferentially endorsing -its bracketing premise.

The Big Spin

First of all, Drummond (*and all readers*): an "overswelling ego" would take its own limit of comprehension as sole evaluative standard, assuming automatically that what the writer wrote was just unintelligible. An "overswelling ego" wouldn't write in further questions but rather a declaration of dismissal, then roll over under the covers with a volume of Seth (*blanketed by the conceit that such material is somehow "easier to understand"*). An overswelling ego

doesn't creatively review the principal points so as to ask intelligent questions developed from the balance of present comprehension. Thus an "overswelling ego" would never find what it sought nor even extract whatever potential might exist within the framework of some such idea as "you create your own reality". But the one for whom it's all a creative Riddle, who pursues it diligently and like Jacob grabs on to the leg of the Angel declaring "I will not let go until you bless me", that one shall understand.

So we will answer that one, and that one only at this late date; for as we've written in privately printed materials, the current minuscule numbers of spiritual adepts are performing a service of spiritual triage at this time, i.e. as in emergency hospital practice working through an urgent economy on those still able to breathe, so as to register encouraging life signs. The rest must be let go. *(As was expressed in another R?)*

source—not that of Rueckert, McCarty and Elkins, but Gladys Rodehaver, the beings of this earth dimension are unique in their presumptuousness to the degree that, even in the afterlife state they carry forward the attitude they already know it all, already "have it down" so that inner plane adepts who do approach in order to wean them from their insular/self-created [astral] environs and take them toward further instruction, are stopped by a barrier of arrogance and must leave such souls to languish.)

Let's back up a little then, Drummond. I haven't dismissed technique, merely tried to point up the limitation of technique with respect to ultimate Transformation. And after all, you did ask the \$64,000 question. Technique *(i.e., decreeing, positive thinking, confident imagining)* works to the limit we've discussed.

And in our several essays we've merely tried to show

why there's an inbuilt barrier to the degree one may receive the purely positive benefit and uninterrupted continuity of confirmatory manifestation. *(As you'll see, there's also a limit to the extent mere oscillatory "backlash" recommends—or produces—the "spiritual", through the vehicle of material accomplishment.)* We've tried to show it's not just because you're failing to understand the "you create your own reality" principle completely enough. The principle itself is defective, and not only with respect to the situational context of embodied spacetime beings of 3rd density. Our argument has consistently been that the "YCYOR" counsel comes from transdimensional states and planes which necessitate an oblique intersection into our shared domain on the part of any "disembodied" or higher-density consciousness wishing to be helpful. There's something about our shared situations such consciousness can't clearly perceive or comprehend, and couldn't unless it were embodied here as well: thus the unique value of incarnate spiritual adepts, i.e. those who do share this plan

the bible out of it guarantees evasion of poxy clips ...

page about a book that came out in 2009 (*+ a few nice pics*)

Directly downstream from the "New Spiritual" seekership of post-traditional milieus exiting the sixties, an
alternative spiritual movement would become apparent in the cultural output of a compendium of salvific models,
utopian dreams, poetic tracts, visionary art and millenarian predilections of the likes of Terrence McKenna
(*Timewave Zero*), Fraser Clark (*the Future Perfect State*), Jose Argüelles (*Dreamspell Calendar*) and Robin Cooke
(*Australia's Earthdream*). I suggest that this movement drinks from a reservoir of what I call the technocult:
discourse and practice possessing futurist:revivalist and revitalizing: inscrutable trajectories concentrated in a
milieu of techno-tribes and dance-events networked in the global trance community and influenced by the ideas of
these figures. Adopting the Dreamspell calendar, variously committed to 2012, and self-identifying as members of a
"global tribe", a compassionate trance-formation has invested in an obscure revitalizing movement the contours of
which are outlined here.

.. huh?? ... are my own set to private???? Nope .. must be an old preference effect ...

make identically named ones at ..2 ... or no .. you have to do that first no .. bullshit it allows new names right from the transfer site .. so skipp all that ... let me start over:

enter playlist url / title *(unique enough?)*, 'search' *(should be at the top of a 400 piece list)*

it runs off and collects them as easy as 2 clicks

then duplicates the titles also .. automatically, changes can be done beforehand or afterwards at the account of course

the vids on display after you click a list in the search results are not clickable,

after about a thousand vids you have to share/network *(/brag)* to earn fresh tokens before continuing

i tried sharing on google+ again after it got me an extension of my free run once but it either can only be done once or once daily, like the 200 tokens you get free per day .. 1000 for 2 dollars anytime.

which answers my first 'share' remark *(and first at this new google+ account)*: nifty service ... how long can they repell the bribery and stuff if they begin an enviable revenue and/or donation stream somehow?

last message at my account's 'discussion' page says:

i remember looking it up and finding nothing of the kind i had asked for/about *(the japanese wooden armor shown on his 'empire' series)*

Mother of Life is Venus? Revolt1680 · 203 videos ---- 478 — 23 views - Like 3 Dislike 1 - Published on Aug 26, 2013 ----- I was surprised to see that "Broken Arrow" (1950) had some accuracy on the subject of a girl's puberty ceremony - I laughed about the headress though. Her name was Morning Star...how interesting. Watch for advancement ahead, huh? During this rite of passage, each girl takes on the identity of their spirit ancestor, also known as "Changing Woman". Illumination signals change, and much will be learned, not only by the girl, but by those participating in her ceremony. Physical exhaustion has the same effect as psychotropics, and ceremonies of this type are very difficult and both physically and emotionally draining. For these rites, medicine isn't necessary, the fatigue alone will allow you to enter a daydream where you are even exhausted and collapsing inside the dream; that fall to the ground signals the beginning of the vision. A French western called "Blueberry: L'expérience secrète" (2004) had a very realistic depiction of the electronic, nearly digitized feel of the messages and energies encountered while there. It's a foreign film. so forgive them. We know that natives living in the Southwest would have had no geographic access to ayahuasca, but peyote is sometimes made into a tea.

It is said that Venus was born of primal Chaos, dancing on the water. The serpent coiled himself around her, impregnated her and she gave birth to the Cosmic Egg. Ophion wrapped himself around the egg seven times and stayed until it hatched Creation.

for great venus - earth - mars (young - prime - old) info go to john calder? hardy's tiny and elegant cosmology page called 'genesis continuous' .. and for Ricky the venus and other clod cyler's take on the originz of Maya (Ur - apparantly J Arguelles identified strongly w abraham but know no specifics - via india) see galacticspacebook Dcom/photo/laydeeees-and-djentillmennnnnn

in the interest of mutual and friendly correction if necessary and individual freedom where possible ... iow, FOR ALL YOU COUNT JUGGLERS OUT THERE ... I GIVE YOU .. NONE OTHER THAN RICK SCHILLER (Wisconian if i am not mistaken).

But the lunar date of venus for this 1625 nov 23 matches that of 1900bc dec 2 being venus as 32 years 8 leap days before 1868bc just as the last Amizaduga date 1625bc april 8 as adar 28 matches 1900bc april 16 as adar 28. Thus 701bc Hindu conclude that their dwelling 1200 years in India (fleeing The City which is Ur in 1900bc not Babel) is 1200 egyptians years of the venus tablets wrongly presumed to have 1900bc origin instead of brought b these relatives joining them for refuge). This is how Noah's 1200 from birth (2970-1770bc) becomes 1200 from Flood (3102-3101bc) has venus rise of 3100-1901bc.

In 1770bc the Tamuz date of Mars is july 10, the venus atoned rise date is july 10, butthe 584 day calendar dat is aug 9. The rising new Thot Marduk for Mars is Nov 9 as well as for Thoth Venus Ish sTar.

The 3744 year Armageddon countdown uses 584 day Venus from this Thoth as it passes thru the true 3192am (834bc march 20).

The mayan thoth (Phoph or Pop) of 1770bc regards Adam as 3600am on Pop0 and Pop1 (oct 23 and 24), created 2256 years before Flood 3114bc by mistaking the 1299 year Adam Venus cycle (1626bc = 2400am) as being 1770bc Hamurabi's venus in noah's year 1200

there's plenny more mentions in passing - a fairly recent had a longer expose - as that is the mediumsmessage most kin will ever need .. but like the joker .. supposedly roaming through the pack and like the king in disguise, always helped along by an enormous and gigantically loyal retinue ... kinda like the Greenberg family in the eyes of the infamously clownesque youtuber calling himself DallasGoldBug ... he claims a cabal is leading us by the nose with crisis actor management involved multiple key media figures played by the same persons a task that gets increasingly difficult as a little fame gets you under private enterprise paparazzi surveillance ... as i said, like the joker he needs a little manouvering room ... in order for supplies to come and go in a dynamic fashion, you can accomplish only so much with stage diving. A crowd has to breathe and so does the stadium/pyramid ...

the inspiring actor / spook .. androgyn appearance juggling multi-linguist or silent guest .. leaving heaps of duh firewood, fresh mudpools and astounding biodiversity in his wake is none other than that slandered white god hidden by wars paved over by peace and lied about on lamestream ...

Juryt nixed my pointer to tmq's 198 strand tracers????

pretty sure it took cause i am receiving someone elses supply (*an act that subs you to the threads there automatically*); instead i find this there:

Postscriptum: this photo of me was taken by Kin 53 at the Mount Shasta retreat last summer in US. She took the picture to send it to the maker of this necklace. The synchronicity of today in this story is that this necklace has exactly 52 jade stones and 1 „Abalone” shell a.k.a. "Ear of Venus." Now 52+1 is not only the Kin of Juanita (*who took this photograph*), 53 is also described in the Book of the Cube (*2011*) as the frequency of „Sirian Rebirth,” which makes 212 (*4 x 53*) as the "Measure (*4*) of Sirian Rebirth (*53*)!" Now on that first Christmas evening in 2012, the day I had that meeting with Kin 198 in San Cristobal explained in the story above, I received this necklace on Kin 212 (*4x53*) !!

Why is 212 the Magic Kin? And how does all this MatheMagic work?

A way to slander the Madonna/Messiah - DuhNew Matriarchal over old 'ManAgeMint'*)? and the (*so far*) largest bared pyramid complex (*tecopatepetl?*) is that (*numbin*) x thou miles ... but i might not .. remember correctly, nor do i feel inclined and aligned to repeat the cheater/goalpost moving company that keeps us captive with theatricks right now, suffice it to say that extending the line goes to balbek which is undoubtedly the present target of the largest evil collab to date .. and either way, i care nothing

about learning about even more conceited and prestigious manifestations of such godtaunters, .. confident they will be bred into being if the kkkristian jewslave will continue ignore the 'assimilease' (*assimilees*) like me.

who is behind that crop --- 2013andthemysteryqueen | August 30, 2013 at 10:09 PM

At least one of the Cube Crop Circles was created by Valum Votan who claimed credit for the 'Metatron Cube crop circle on August 1, 2007, coded by 8 Sun. I later determined that this day was also Pacal Votan's Solar Birthday, his 27th Solar-Galactic Return. [Amazing that VV and I were living in the same city [Nelson New Zealand] for that special anniversary]

Valum Votan wrote that he formed this 'Inter-dimensional Signal' by a single-pointed focus through his Third Eye. The next time I saw him face-to-face [at the Waitaha gathering where he, Stephanie 185 and I were 'adopted'], I confirmed that he did create that Cube Crop Circle. [and others, I suspect, such as the 'Time and the Technosphere 28 day Moon' circle 20 miles from my home]

The 'Star People' [or Votan] demonstrated telepathy, when the 'Day-out-of-Time' crop circle appeared '3 days early', hours after I did the Roerich Peace symbol visualization along with the other Day-out-of-Time meditations Votan had suggested. Perhaps one day, the crop circle makers will reveal all! -- May PEACE and LOVE Prevail

----- ps... i lost that profile with proof about 117 days countdown created on 18.07.2012.. searching 117 days and when i saw that crop start first to know is that not photoshop ... second share terma and yes what is all about now what happend with Timeship Earth why we still have clock so many is all but nothing happend

those tricks include the mightiest media reversal NaZi (*onist*) managers of masses in recorded history have set in motion via their Godfather who instead of being celebrated for putting the david star on the map by hi-jacking and weaponizing an industrious people, is blamed, not for his victims but the other way around, the guilts and debts burdens for and bycause of him get put on them, are for them to bear#; a mechanism that has metastatized into ever more diabolic wars to this very day!

- iow, the BolshPC question is always (*endlessly rehearsed and necrologically 'undeaded', such as today on sunday intello national [Dutch] radio*):

how could the germans allow/enable him?

... but the question is never:

by what deviousness was he and those behind/backing him able to install such abuse, steal the efforts of the world's best steelworkers and divert efforts away from peaceful application while holding the realsteel thing hostage and under wraps?

i want these trotskist globalist multicullkilltourists to be hit by stinking turds in a pit for a month and given enough rock in advance to work into dust and neutralize the smell quickly with, once it arrives (*and i would be glad to 'observe' the hurly honours to the entire personnel of VPRO, BBC, Fox, Al Jazeera, Debka especially ... and the like to boot*).

Cybernetics and Holism
Panel with: Avery F. Gordon, Lars Bang Larsen, Laurence A. Rickels
Moderated by the curators: Anselm Franke, Diedrich Diederichsen (*22.6.2013*)

Avery F. Gordon is a Professor of Sociology at the University of California/Santa Barbara and Visiting Faculty Fellow at Goldsmiths' Centre for Research Architecture/London. Her work focuses on radical thought and practice. She writes about imprisonment, war, and dispossession.

Lars Bang Larsen is an art historian and curator, whose works consider aesthetic and theoretical questions related to counter cultures from the 1960s on. He recently completed his PhD thesis in art history, A History of Irritated Material. Psychedelic Concepts in Neo-Avant-Garde Art, at the University of Copenhagen.

Laurence A. Rickels is a professor of art and theory at the Karlsruhe Academy of Fine Arts and teaches media theory and philosophy at the European Graduate School. From 1981 to 2011 he taught German literature, comparative studies, art, and film at the University of California, Santa Barbara.

From eco-psychedelia to Internet neoliberalism: The conference THE WHOLE EARTH. California and the Disappearance of the Outside revolved around questions of the legacy of the California counterculture. How did some of its concepts become global principles of new capitalistic "frontiers"? Roundtable discussions explored the historical sources of, and connections between, discursive and political issues such as the ecological movement, cybernetics, anti-conformist cultures, new artistic practices that dissolve boundaries, and the transformations in these areas right up to the globalist network capitalism of the 1990s. Thus, the

conference investigated the background conditions of the discourses that today, in the framework of the Anthropocene, are being negotiated, updated, or -- in some cases -- forgotten.

Current animation of how Genesis becomes Jasher (*and Ussher*) ::: by Rick ::: to: jerald, World-Mysteries, Katriel, gilead.net, gileadinstitute, info, Lenny, Carl, dansward99, proyectomaya, JW, dlhedges9262, mike, me, thepropheticye, GospelPlan ---- Subject: BEST update5 - Current animation of how Genesis becomes Jasher (*and Ussher*)

This chart conveys Esau's Marduk moved from Babylon's 52-year Mars to its 13-year Mars.

The true Book of the Righteous One (*Seder Yasher*) is Genesis the book of Moses.

However, whoever wrote or found the Book of Jasher in 1522 AD had a source that stated AmraPal lived 215 years (*not the 500 of Nimrod*). This is how Jasher is constructed from the data of reality. Work in progress. The minor years within the chart are not shifted in numeric print yet.

Jasher's Amrapal (*Nimrod*) is not yet shown here when this animation shifts. Using a 2349bc Flood (*as Adam's 1556am*) like Ussher (*Adam's 1656am*), modern negligent sources published are saying Jasher has the 4004bc epoch when it has 3904bc because its Jared is only 62 not 162.

Jasher's AmraPal is born in 2096bc then king in 2066bc kills the wrong baby Abram born in 2057bc (*the year 292 that Ussher has Haran born*) and then throws both Haran & Abram in a fire when Abram is 50 and Haran dies at 82 in 2007bc (*the Greek shifted Marduk 2009bc*). Because AmarPal is Amar-Sin (*9 years 1943-1934bc; Abram 75 to 84*) if he hasn't died before Ur is destroyed in 1900bc (*Shelah's death*), then it means after a 43-year presence in Ur, he went to Babylon to live until he died. The Shelah of a 2349bc Flood dies in 1879bc instead of the correct flight of Ur to dwell 1200-year Venus in India (*1901-701bc*) deciding the Flood-year ended 1200-year Venus earlier in 3101bc.

Evolving out of the militaristic economy of capitalist patriarchy in the aftermath of WWII, the Macy Conferences (*1942 and 1946-1953*) sought to generate new connections between engineering, biology, mathematics, psychology, psychiatry, and all the social sciences.

Sponsored by the Josiah Macy Jr. Foundation in New York, the Macy conferences attendees developed and disseminated the idea of cybernetics - the science of control and communication in the animal and the machine, in society and in individual human beings - as a model of understanding and controlling the world.

Macy Conferences attendees consisted of mathematicians, scientists, engineers and leading figures of post-war social science, some of whom had contributed to the construction and use of nuclear weapons, some of whom went on to carry out CIA funded military research into the psychological effects of LSD and its potential as a tool for interrogation and psychological manipulation in such projects as the CIA's MKULTRA program and others who took ethical positions and subsequently rejected military funding of their work.

Beloved Kins; In New Zealand, it is now 1:44 a.m. on PVCS GAP Kin 211. I was moments away from publishing a post for the 'Total Magic Turtle Day: Lunar Dog on day 17 of the Lunar Dog Moon. I planned it for a week [because there are so many synchronicities, and spent all day writing it. I included quotes from page 210 of each of the 7 CHCs.

A few minutes ago, OMA [my cat, named for Original Matrix Attained] somehow managed to erase it!. All that remains is the word count [1,147]

Will now go to sleep. Do not know if I'll have the time and the heart to rewrite this special blog [which marked the end of 9 years since I "entered the Mystery of the Stone" -according to the 9/11/2004 message on my computer.]

I can only believe what I see, and I've not been to China. But I've had brushes with mysterious hooded youth, in front of you one minute, gone the next, leaving me to search for answers. I'm not sure they're human and if not what exactly they are. They say art imitates life. I think that's true. Perhaps not in your world, but how foolhardy does one need to be to feel their experience defines all? My opinion is mine on my own channel and no one has to share it.

rick Schiller:

it is true that this whole block of images could fit Ussher's layout such as 243-year Venus as Flood 2348-2105bc where conveniently the Flood of 2348bc looks like it has connection to Jewish Seder Olam Flood 2105bc as the Nannar Pyramid of Ur because it is Meskiag-Nannar's 1st year in 2105bc instead of Flood 2370-2127bc.

However, this then also makes first king Reu A. Anipada as year 163 as Flood 2348-2185bc instead of 2370-2207bc, when 2207bc is crucial to sothic 1460 in 747bc Era to honro Chaldean kingship.

So gain one thing, lose the other. Yet it seems clear that the 2nd century Seder is based on the same as the 17th century Ussher, or clearly Ussher trusts the 2105bc Pyramid of the Seder going thru the Seder Flood.

It is also true that Nimrod dying in year 599 (600th) at age 499 (500th) is Flood 2349bc to 1750bc so conveniently Hamurabi's death as if he is Nimrod instead of dying in 1770bc twenty years before Hamurabi dies

Subject: dead Jack Finegan rights

Well i dont think i need rights when a man embellishes on a source and he has a very big error.

I am a person that i catch all errors in books.

But perhaps since you have no desire to publish any further submittals it is a dead end spitting at God as Facts On Files did for 30 years with the Book Of Calendars (*Frank Parise*) whose family kept paying to have mass releases of the same garbage for libraries to buy new copies.

The UW Parkside verified every one of 200 to 300 errors i found, and now i see one in Jack Finegan published by you that i am going to expound on when i find a publisher.

To see my Book Of Calendar errors go to Amazon.com and note the pages i posted 3 years ago. Okay forget that, powerful families with many like to get things removed. Sad. Well onto Jack Finegan on page 145 table 61 Eupolemus if 5307bc Adam and 2738bc Exodus then allows only one avenue of figures.

The error is 994 AM = 4313 BC (*does not equal 4037bc*)

and error 1270 AM = 4037 BC (*is not 994 AM from 5307bc*)

neither being the Flood because

5037bc Adam

+1662 = 130+105+90+70+65+162+65+187+188+600

3645bc Flood +193 = 2+35+30+34+30

3452bc Nahor +79 = LXX

3373bc Terah (*son Haran born at 70 in 3303bc*)

+205 = 70 +60 +75 = 130 +75

3168bc Abram born 3373bc, is now 75 +430

2738bc Exodus

Further the 2738bc Exodus places Israel in Sinai in 2737bc as 100 years before Chinese calendar whom Africanus places as Flood 3258-3257bc +600 to 2637bc. And considers the Chinese 2637bc as the year 2400 of Adam using the 1200-year calendar. Wow I just relaized it is my support for Amizaduga Venus as year 2400am in 4025-1626bc.

Clearly Eupolemus realizes the 6000 is not 3600+2400 but rather Adam's 2400 +3600.

So anyways if you wish to tap into what i know and publish it, fine otherwise i can continue without you. And soon.

Thomas Thurman: I am rather fascinated, because this is very reminiscent of the ideas of David Wynn Miller. From the Wikipedia article about him:

"According to Miller's teaching, the addition of hyphens and colons to one's name turns one from an ordinary, taxable human into a non-taxable "prepositional phrase." They are distinguished from the names listed at birth in all capital letters (as on a birth certificate), which he claims turns one into a taxable Person (Corporation). (e.g., DAVID WYNN MILLER as opposed to :D avid-Wynn: Miller.)."

So what I'm wondering is whether Wynn Miller was influenced by Tyldesley in some way, or whether they both suffer from a particular mental illness that causes them to think of the alphabet and punctuation as magical.

Why is the notion that having one's adrenal glands removed, eliminates the fight or flight adrenaline response of FEAR, and magnifies and stimulates the endocrine system, increases endorphins, which subsequently activates the unified brain and the synapses between the right and left hemispheres are increased, and stops the aging process?

Do any of you have any evidence to support that this is not so? If not, then this hypothesis deserves to remain open if and until it can be reasonably debunked.

In 1869, an agreement between the Ottoman Empire and Prussia permitted Germans to buy land in Jerusalem, and Matthaus Frank, a Templer, purchased plots of land in Emek Refaim. His house was the first to be built in the Colony, in 1873, and that same year, the Templer Committee decided to build the movement's spiritual centre in Jerusalem.

There are a variety of Ikin (*sacred palm nuts*) that are available, but only 4 "eyes" ikin must be used for ifa divination. The Ikin (*sacred palm nuts*) are grouped in one hand, then the diviner attempts to shift them all to his/her other hand at once, and counts the remaining Ikin left, hopefully to discover that either one or two remain. (*Odu, which are the foundation of the binary data, can only be marked with either one or two palm nuts, remaining in the diviner's original hand. As this process goes on, the diviner marks single or double marks in wood powder spread on his divination tray until he or she has created one of the 256 odus that are available*).

In Millennium Book of Prophecy, I present 777 predictions from over 100 seers throughout history. The first half of the book listed their collective visions of doomsday. The second contradicted the first offering up prophecies of "bloomsday" for the human race. In that vision there is Homo Novus (*the New Man*). He and she will bring a golden age to this world after understanding surmounts the travails of this century.

Responses to "John Hogue Interview – Astrology, Prophecy, Syria, etc."

Salty says : September 7, 2013 at 11:13 AM – "Saturn The Tax Man in Scorpio Cometh with the Bill".

John Hogue was a Sannyasin, his guru was Bhagwan Shree Rajneesh, now known as Osho who was born: December 11, 1931, died: January 19, 1990. --- The spiritual name given to John Hogue by Rajneesh is Swami Dhyan Arjuna.

--- I remember a lot of stuff being in the news in the mid 80's about Rajneesh, his Sannyasins, and his ashram/commune in Oregon. --- Here is a link (*not the good link I mentioned*) to what they have to say about what went on, but what they, and the cops etc, did was much worse than it says here.

In 1979 the Shiva Lilas, a "nomadic group that worships children" descended on Black Bear like a parasite and started taking over the ranch. One member recalls, "Their practice was to drop acid and hang out with the babies." Footage shows they were clearly dangerous and deranged.

mm, .. must have missed that 'footage' *(pic link coming up)*

NYT:

Weirdos came and went. The chronicle's most bizarre episode is the story of Shiva Lila, a nomadic cult of acid-taking, baby-worshiping hippies looking for the perfect place to bring up children. The group, which one person compares to the James Gang, was ousted when 100 people mobilized and demanded they leave. The cult moved on to the Philippines and then to India, where several children died in a diphtheria epidemic.

rosototata =short for= RockSoilerToil TaleTattler

i fully intend to make that name famous for yet another dutch 'race' (*vacating space compulsively?*) victory down under .. but not with a solar thingie using all them toxparts or in the daytime; instead i use rock to power this thing and have will have power to spare and crush yours with, line them up in my path and cheer me on.

i offer a partnership that comes with a moniker:

rorotro, short for rockrollingtroll

101/202 and 334/97

oops, switched number/name sets there..

I found very little on that Gridley character (*kinda like Art Kleps and in a different ballpark, more suspect also, since he was a historian: Dee Brown*)

http://www.youtube.com/watch?v=y4usysWYHKk&list=UUFAK4h150HCKclW_9LWC23A&index=15
i noted the source vid (*for that first realist section*) well over half a year ago here. It shows more of the
grounds and multiple angles .. seeming real enough, a great help towards taking the whole rainbow
phenom seriously, greater than in this vid, which veers towards artistry and artifice (*arousing suspicions along with the admirable tricks of piecing and collating together the on and off crosskeyhole impressions*)

The description offers several additional tales ... including quite miraculous ones. The type yarn (*which*)
several strains of Taoism and Buddhism thrive on
The allure to pimp and fairy dust prettify tales, the desire to arrest, anchor and permanently tether

consciousness to the purity and innocence of the child stage in the development of consciousness is worldwide and made quite unambiguous in this version ... the kitch /artistic section follows the real one. When that allure becomes intent and doctrine we witness the birth of several and severely femocratic pimplifications of pimpalerhood (*magic spells, passwords, etc, formation of in- and outcrowds, elites, mass sacrifice PCfications .. hey that's a great find ... google finds 4, all obviously unintentional misprints of specifications*).

xu97scZQakQ == RQ urges to adopt (*or at least fake?**) a faith noble enough to make it so, make it's objective just so in this google hangout vid from florida what is it exactly though, to spell out a dream? Is it:

A: a glorified command structure, --- B: wishfull thinking or --- C: genuine farsightedness?

* that would be the Bob Dobbs strategy .. making inroads on truthteller media with 'RNAdrop' snakeoil

I am inclined to think the bulk of it is nothing more than a desire [to tote the dick rather than soften the rock,] for positions of authority (*set very strategic bottom line boots on the ground ajostle for them with a word, a mere wink, a secret gesture*).

Note how in RQ's latest appearance on 'bridgingheaven' (*over 600 'all is one love' type shlockvids*) Crest or something aint mentioned even once ... but the framing (*intro and outro*) there feature angel dust garden scenes.

In short, the sorta magic RQ betrays her life for both desires and tries to cheerlead towards but in such 'omfloerste' termen similar to the timeline and commemorative symbols the maya carved into stone while spending no time whatsoever to tracing all the dust and grit they chipped chiseled and ground out of rock to make the symbols in the first place ..

.. she urges limitless indulgence in the envisioning and t[H]rusting [towards] the gr[E]ater updater ... and ironically accuses those around her of slipping into doing the 'opposite': indulge in social media.

where do humble household chores fit in here? to me it sounds like a cargo cultic passtime of hi expectations (*best possible, all timely and shit*) while a pile of rock and another of shit grow skyhigh .. not missing but certainly lacking the energy to unite (*optimize intimacy*) of their own accord. 3 guesses which one of these 2 is by nature most impatient and begins to throw up a great stink instead and lose lots of valuable green thumb powers for lack of green thumb powderers????

With RQ and the like (*lefties, fundies, alties, oddies, sewage onto newage churners*) there isn't even much of an effort to unite the wish with the deed fullfilling it, with banal matters at hand like your next drink of water and at least adapt very slightly to the painstakingly slow start of incrementality that rules reality

Just a few CD's of music etc from me that you can do as you wish with(including pitch and toss into in the canal) --- thank you forever , kristin

thank you in advance (and in hindsight even more!) Kristin

My mom passed away on the 22nd .. oddly enough the date i thought was gonna be momentous over half a year ago .. which came about as follows (chain of thoughtwise): you perhaps have noticed the global action dates 10/10(/10) a kind of earthday ... 11/11/11 owned by the more eso inclined (and powned by the feet on/in the ground squarer heads) 12/12/12 .. some calculating splinters and portions of esos and maya calenderiasts made their datefix into the final one of a 9 day festival i guess

The ones i engaged going on 6 years or so now, 'dreamspellers', pan people, cresters .. 'synchroNOtronizers' .. and additional characterizations by myself taking care to choose the monikers so they cut across to precedents and remote parallels .. difficult to do cause they arise and afall too fast to leave easily traceable traces often enough

anyways, these numonotionalists .. and again, other coinage i have shared around but not seen come back to me yet .. to nick is to earmark, conjure, engender .. but wether exile, supporter or bill of goods or mere wish/prayer (cry for help / praise), the floods and drains come and go in shrouds of eyemist and 'i missed' ... stupid little things i done wrong struck me w forceful hindsight clarity.

all other times i noticed my mom getting in between me and something i wanted to pay attention were mere rehearsals for this big blow out .. and this time i could have helped her more than ever by making clear choices

not for another futile attempt to draw her in but for sticking by her. One of the last things she told me refers to my passivity, letting others to the dirty work ... bit of an inversion of my benefactor being but there's a little truth to it also. i realized afterwards just how much i had abandoned her to those very pharmaffiose rituals i was holding a series of protest and run (from) actions against; delivering orders instead of seeing to at least a good start. Oh them dastard pills my mom has a lifelong history of swallowing unprotestingly, willingly yet she did rely on me more and more exclusively towards the end ... refusing my suggestions to have the homecare come and look also.

anyway, 13/13 (which would be cross over between the 13x28+1 Jose Arguelles calendarchange movement clique's calculations on the one hand and the regular Gregorian calendar on the other - JA himself wasn't averse to making cross-over quips, he grew and dropped fetish fractions as quick as facehair)

would be kin 252 and .. oct 22nd.

He cut slabs of time into different size regular pieces in order to have an excuse for a naming and ritual / gathering. The art is fairly intriguing (Tibetan style) but carries many dangers, even to the point of this 'catalyst' working out to nothing of the sort but instead becoming an end in itself .. a style and taste .. posterchildren .. for which all sides of the countrysides are scoured till 'found' (such 'figures', 'promoted' from rooted person to a certain number in a dependable lineage .. pinnacle specimen of which figure big [enough] as the one to cover all that ground) .. reincarnation and monastic life as the hunt for talent ... the traders, haulers, travellers, making a mockery of the ones who have failed to dance on and built fences instead, quit following herds and loving birds.

No wonder all that causes revulsion in reincarnation / compost averse technocratic multiculturalist obsessed with purity (chinese and zionists have lots in common)

256, 26th of the Gregorian month

only last nite have i realized mom died on the day i gathered would be significant *(10/10 to 11/11 to 12/12 to 13/13) = every 365+30 = 135 a heptad gate number and 5eagle (at the bottom of the middle handle/bar/pillars of the tzolkin, a pivotal spot good as any of course, .. but prolly lots better).*

How to arrive at the minority honouring, enhancing and protecting sort of majority rule, the so far more often than not tainted promise of democracy, equal yet plural and including all so far vote- and voiceless beings by and with definition. How to constitute the emission of money in an honest competition leading to fair unification and cleaned up co-operative capitalism?

(1998), description on the keywords file ([and meta tag on the one called 'priority issues'](#)):

In order to honour, enhance and protect minorities by majority rule - the so far more often than not tainted promise of democracy, equal yet plural and including all so far vote- and voiceless beings by (and with - paragon) definition - 1 must simply have/make the latter count ([BIODEGRADABLE COMPUTIN!](#)).

Family home in converted streetcars, DIY treehouse / cob huts ---Kirsten Dirksen - 602 videos ----- Claudine Desiree was raising 3 young boys alone in a one bedroom home built from old streetcars *(from 1920s Santa Cruz)*

last part about the treehouse is .. a 'jew/(w)/(w)/ill' ..

When her son moved out, she started renting it out as a vacation rental on Airbnb. It brought in \$11,000 in annual income, until she applied for a parking permit for one longer-term renter and "stupidly", as she explains, wrote that she was renting out the treehouse. The city sent her a notice that she was violating codes and she was forced to alter the treehouse so it can't be lived in, as well as pay a fine and the hotel taxes for using it as a rental.

i wondered why things went so quiet on all fronts ... it's been like this all of october .. the time i thought might be awful momentous a la Arguelles since?!?!?!?!?!?!

first consideration leading to pinpointing kin 252 as an important date went something like this on the 10th of august:

yesterday nite i heard JA go on, the 4th day of his week long italy thing, about 999 (*the date at that mo, and refer to the bulgarian group [laszlo] planning for 10/10/10s and 11/11/11s as well as 12/12/12s*)

he mentions 13/13/13 but doesn't make much of it ... now, that date obviously fits the 13 moon calendar only and not the others, so we make a switch .. but where to start the damn thing, an equinox, solstice, a 4ahau (*obvious connect with 3113 after all?*) ... either way, a year plus 29 must be special. On that same day he goes into how the sun's equator spins faster than it's pole 29/33 if i remember correctly ... also the speeds and spins of sirius B are given attention
9th of july 2014, 252 5human

but instead of this helping folks to FINALLY find, acknowledge appreciate and invite me (*hitchhikers lalaland escapist fantasy i developed in the States and haven't been able to kick despite returning to childhood EU village*) .. it became .. the exact date my mother died after a 2 month medical ordeal i handled atrociously (*leaving the part palliation conarts - ancilliatory to opium warriors of yore and present* - played aside. Peter gives his view on the healthy integration of the fast-growing Islamic population in the Netherlands. He does not agree with the ethnocentric solutions offered by Geert Wilders and other "right wing" politicians. However he believes that they provide a useful service in bringing the attention of the previously complacent post-modern political elite to the need for Holland to have a healthy identity, strong structures and conscious, world-centric strategies to make a success out of immigration whilst defending democracy, freedom and pluralism.

and i quote the last line in a comment:

"He is optimistic that the Netherlands will provide a positive role model for other countries in this respect."

that last line of the description runs exactly counter to my latest rant (*gaddafi vid*). Buzzwordy-word-aff[L]ix@ion ... reeks more of the Dolf Boek type model as far as lowland (*PerpL*)export (*also a Spiral dynamics web spinner by the way [[huge biblical software developer and constantly litigious ..]]*). *Disgrace to honourably executed trollery of which he gets only 1 part right, not taking no for an answer*.

idiot savantry .. if not immediately weaponizable can still go awful pretentious, religious 'purity rule bookish' and dictatorial, managing masses by stringing these manic phases together; Jose Arguelles did this .. though loosely .. jumping continents and methodologies yet so cosmically rooted it seemed perfectly natural .. specially to refugees and those halfway rehabbed from artificial time space and assorted ingredients.

Mister Merry proly serves an earthier portion of the same audience the artsy fiery party crowd forms part of also (*jetset rainbows ... they use name colours rather than earth, fire, air water*) ... in fact he IS a perfect model poster boy for emergent resilient athrival asf societies, shinily insular spikes and pinnacles, singular stops at the sharp reverse tops .. like co-babyface Rob Hopkins .. founder of transiTowns, as in guideline performer preacher style, featured on resilience.org, only site showing the connection between permaculture in china and john liu .. according to google's searchterm shoveling robots from/in/for hell on earth.

RH killed my hopes stone dead. Poked myself in the eye painfully the nite after being rejected on his hometurf (*Schumacher College*) as he was preparing for a new wave of students (*none around at the time*) with posters. And he had seen me in the permie section of the Big Green just weeks previous! Then again, i shouldn't blame him for not going through my notes a little more carefully .. which would have landed me at nearby Land Matters no doubt.

10:42 "monk[ey] using bible to explain the internet, that kind of a difference (*making a gesture about the difference in height between 4 and 3 stacked bibles*)

Same difference made. None. Bad memory.. in the precipitate 'sense' i rail at/against as well, the E-wastrel one that is.

from 'evolution to volution' says PMerry, ..yeah .. the old fasioned waste (*minus E-*) was a lot easier to deal with.

Mark Zuckerberg Illuminatis

JMJHS1.1 video -- 5

Le 2 juin 2010, Mark Zuckerberg, le créateur de Facebook, se retrouve face à Kara Swisher et Walt Mossberg, journalistes au Wall Street Journal. Gêné par les questions embarrassantes des deux journalistes, le jeune patron de Facebook, mal à l'aise, transpirant, répondant comme un robot, accepte d'enlever le hoodie (blouson à capuche) qu'il ne quitte jamais. Et là, surprise : ce gilet n'est vraiment pas comme les autres : c'est en effet un étrange diagramme qui a été imprimé à l'intérieur de l'habit !

"embrace the darkness"

is that translatable to squeezing a rock and rubbarubba rubarbwiring it until soft and swimmable ... good stuff to clear the air and lure (conjure) darkened principles back up into the light of day??? In other words is this pimp good medicine for pragmatic sites such as remineralize.org seercentre.org.uk ??????

i finally take in the Zuckerberg docu (just listening mostly) .. the logo has a clear and obvious octa & JA connection .. and the interview was on exactly a 65 day season opening date in 2010, .. my birthday. ... just months before i am photographed standing up on a tandem with a long fishing pole and line at the end of which my octa trick is wildly spinning and the pic snaps right when it has perfect symmetry and encapsulates the back of my head and that of a german motorpoliceman in his green leathers looking at me in his rear view mirror ... he has long hair also

clear case of tragicomediosis ... they don't go on compost and soil focused missions to free dust with a rock bust but want a dustfree crack at coding the next best inside black 'trackces'; the 3d octa is obviously stolen from me (poetpiet.tripod.com/Blabsabs_Index.htm) or straight from Bucky (a source for many WEC spin offs and outs); it resembles J Arguelles meets and confs opening prayer and pledge to have that open lie potential his tribe is famous for producing at a 1:1000 rate and up ... welfare statism taking care of the

unmonetizable fall-off nerds and sexual deviants every time they wipe out until they are finally extinguished enough to carry on at a pilot on low jaded coastery clip .. all for the good upping entitlement quotas cause (and if it can double as casus belli, fine, triple disguised as prank even better)

Ok....First it began with being the end of the Tzolkin 13 Ahau, Then the astonishing find of the perfect trinity between Earth, Venus and ISON! Then the perfect Cross once the Sun was Added....And now this , To find out that hidden this whole time was the fact this date is 13/13/13!! CRAZY!

The actual mayan calendar does not use this configuration, their main calendar has 13 months of 20 days each. Actually I didn't search that much but there is a chance that at some point in time the they used the 13:28, since they haven't apparently used only one calendar all the time. ----- For the 13 months 28 days calendar:

$364/13=28$. --- $28 \times 12=336$

Dec 3rd is the 337th day of the year, the first day of the last month if we consider 13 months. 13 days later is 15th/16th december, the 349th day. This is 13/13/13. ----- <http://www.13moon.com/faq.htm#Q8>

19th of nov - k20 / 7sun, day 5 of the fifth moon,

The email said that "About 2 weeks ago I posted a negative review of Andis Kaulins' book "Stars, Stones, and Scholars." on Amazon.com. Kaulins has responded by threatening me with a libel suit, even though the bulk of my review was quotes from his own journal. I'm not worried about any suit, but I feel this bully needs to be poked with a stick.'.

His scholarship has been criticized by Eric C. Cline (*From Eden to Exile*,) and researchers at the University of Chicago: [...] Kaulins may have a few valid ideas about depictions of astronomy by ancient man and the importance of the Baltic languages, but they're getting lost in his shrill denunciations of mainstream academia. Read his bio, his own academic background is in law, not linguistics or archaeology."

This is a worrying development. Of course, people can post negative reviews.

Therefore both the Mayan and Persian systems of time converge through utilizing a 33 year cycle. The average year length of 365.2424... being woven with the 260 day cycle of the sacred Tzolkin. Its also good to note the matrix of the Tzolkin is made up of the ratio 13:20, which was seen inherent in the pattern of days through the sequence of Spring equinoxes, and that the sum of the numbers $13 + 20 = 33$.

'BOUT THAT MEDITATION ICON HERE

i think i mentioned messing with octahedra from the 90s onwards, check 'Blabsabs_Index.htm'

1998 webfrontpage .. inspired by the bucky update of an old Leonardo multiwheel thingy *(like a clock but with the sprockets at different angles instead of oriented the same at slight offsets for the transmissionary 'zealottree')*.

i've gone on the visualize skewering and winging rock in order to stack and spin them .. or get giant Ferris wheel size circuit boards set up and switched in such a way that rounded boulders roll and revolute for the force that loads a spring and/or fills airtanks through clever switchment and ventilation and served.

i see yall have subtly tweaked *(brightened)* the 'lockleg behind ray' placement encouraging icons ... not getting ansy areya? case of patience inflammatience mebbe?

here's a few more layers from the stack of problems i see with it.

belief in reincarnation and the effectiveness of formulaic pleadings and placations should not be taken to extreme substitutionism, iow, to the point of neglecting the simple friction crystalline aspects and underlayers *(properly understood)* which, will and do mimic and speed the quelling of sentient needs .. *(hot mudbath anybody? Floorheat via cellar compost maybe?)*

.. although we as a race of races, are known to stay well ahead and away from such satiety by demographic overspill .. incontinence .. overrun ..oversaturation ... delivering markith and kin onto the demand creation altars of our era *(sure)*.

Similar thoughts did strike me as i watched another docu on Tibet yesterday. A rimpoché travelling with 20 foreigners past places that had be cropped pruned, lopped and blocked by chinese authori .. i mean occupiers, into near quiscence, even that famous courtyard whence many a yard of footage - with handclapper monks who sound just like trying to break gravel barehandedly - made it into music videos *(perhaps after the relaxation .. not sure when this docum was made ...)*

<http://www.youtube.com/watch?v=R6Us78BJ8ic>

? *Mystic Tibet [Full Documentary] - YouTube*

either way, i couldn't take in more than half of it ..

Let me say i can understand the Chinese.

China for instance and after all is .. suffers from, 'sports', devotes itself to it's own dominance *(multi*)* culture, including it's drawbacks .. like the revulsions it suffers *(/'sports', devotes itself to)* in the face of woowoo.

Conservative vs new age

soldier vs peacenik

clearcutter vs forest defenders

i have a playlist i called WheelHe vs GripHe

* - China's multiculture has existed for long enough to somewhat homogenize and become more singularly purposeful, fixated, Orwellian, monomassified *(and you thought monotheism was bad)*.

Now, imagine the revulsion a pragmatically minded culture like the mainstream multicultural and dominant type .. which the Chinese for instance and after all is .. suffers *(/'sports', devotes itself to)* when faced with and trying to 'help' a deeply charisma and devotion based one that has lagged *(fallen)* behind .. put & kept on the best hold that a near constant freeze at nearly constantly frigid heights can provide.

Jose's most seductive attempt to make and present a rigorized impression of all the woo and fulltime wishful thinking .. foolyourselftime .. wishfoolery not just some of thinktime .. often convinces me but more often doesn't, specially when i look at his competition, the field he had integrist *(and splintagravelly)* command of if not over. Speak of competition. Nothing outdoes the monotheismz.

it's all downhill after you suffer the lack of a climbing tree rack some trunkery situated upside down ... my treethinning fantasies have not been incorporated into any 'game' yet i take it? I use the Qmarks cause it's far from a game and losing it there leads to armed confrontations. thanks for your hard work Ian, to think that localizing power with pure clean weight and perhaps a little hemp canvas to help spin rocks up n out into mudpools any day now (consulting fees very low here; in fact free, rite here: ... spin 'm on and into some siblings (little metal [a skewer .. or two .. counterrotations anybody?]) and no tox needed) ... spinning huge amounts of weight slowly and IN PLACE is the energy .. mixt metefar ahead .. 'winnage' wave waving ballistics before the long future goodbye. Kinda like the collective cathedral building effort but not as amplifiers for big mouth bull blasters but pure solid earthiness .. massaged meshaged, softened, 'soiled' ..

i introed a passage left in the blogmix thus at kin 11 post by tmq:

441 days ago i wrote a f(irst f)ew passages on a guy who's gone steadily more [IN]famously

'polarizionalist' .. in France before and since ...

Alain Soral = underdog / hard knock victim champion [boxer AND bookpublisher .. dragged into court by the french equivalent of aipac, the licra] as well as very sharp analyst IN ONE (it's like Jeffrey Blankfort on steroids ... JB is active still but much older); in short, fastest speaker i have the honour to know .. and apparantly the privilege to understand just a litle better than other liddul splinternettters in the hide of the Moloviathanic 'system' ... since /owing to the fact his kin (117) is in my own synchrotronic make up someplace .. as you all know .. off course. ... speaking of which ... do you think the sun will blow that comet to an all colours or an all killierz shower.

Never mind what we deserve now, pretend someone looks after our needs more than tallies up our deeds.

i've come to conclude the black peter controversy, playing up every year like jfk's death, is much like christmas.

But back to Soral:

Last nite i couldn't sleep and spent hours running a few vids with him in it. Quite the range. His genius can only compare, in my experience that is, with the likes of Craig Cobb ... who's cometary trajectory is threatened to crash and go down a years long backburner stew and seeth detour trail – he went walking with an iraq vet (skinny dude, polarly partnered with huuuuge moisture retainer) through the derelict semi-ghost town 30 miles from a reservation armed and got arrested due to tensions brought on by his buddy's self-medication w alcohol during a town council meeting apparantly ... i am still afraid to watch the footage of it.

since my remarks then dovetail with a quote at my most recent buckspacenook post linked nearby, i'll repiet/premier them here:

i have no doubt at least 10 peaces (i mean pieces) of that list will have disappeared since i last checked .. and will continue to do so just as reliably and just as long as 'izra' continues to clamor for war ... over the same biblical type grudge that caused persians and arabs to pitch battles and disappear ground cover along w their friendlyer climes, much much friendlier than they have left at this point.

Last nite, Douglas Dietrich (that 255) who i continue to listen to, claimed that nothing causes as much of a rift as gender, not class, not race, nor nationality .. but the inhome micro management susceptible and (mm) sensitive stuff.

My name is CeCe, I'm 21, and live in North Bend,WA. Right now I don't even know how to begin this letter. So I'm just going to tell you about myself and my life as briefly as possible.

I was born June 4, 1979, to a mother that was just diagnosed with MS, a very debilitating disease that attacks the nervous system. My father had left and we had no immediate family. I took care of my mother from an extremely young age and was able to do things that most people even in their teens couldn't do. Actually I pretty much ran the entire house myself. From very early on I was different, I didn't know why, I just was. My thought process sometimes scared me and still does. I always knew things that were impossible to just "learn". They were things you just had to experience to understand.

vladimir shCherbakis a kazakh

Roman arithmetic required the use of a counting board, the ancestor of the abacus. shCherbak suggested that a primeval counting frame was responsible for the origin of the genetic code.

He claimed the genetic code contains "the zero, decimal syntax and unique summations" and that this refutes "traditional ideas about the stochastic origin of the genetic code."

shCherbak, V. 2008. The Arithmetical Origin of the Genetic Code. In The Codes of Life: The Rules of Macroevolution. Barbieri, M., ed. New York: Springer Publishers,

whatabeginning

A final word from shCherbak

"Physics and chemistry are indifferent to the internal syntax of numerical language of arithmetic and, in particular, to the number system that this language employs. All they require from arithmetic is quantitative data. Absence of a privileged numerical system inherent to an object must therefore be a necessary condition of its natural origin. Recent research, however, has found an exception. That object is the universal genetic code. The genetic code turns out to be a syntactical structure of arithmetic, the result of unique summations carried out by some primordial abacus at least three and a half billion years ago. The decimal place-value numerical system with a zero conception was used for that arithmetic. It turned out that the zero sign governed the genetic code not only as an integral part of the decimal system, but also directly as an acting arithmetical symbol. Being non-material abstractions, all the zero, decimal syntax, and unique summations can display an artificial nature of the genetic code. They refute traditional ideas about the stochastic origin of the genetic code. A new order in the genetic code hardly ever went through chemical evolution and, seemingly, originally appeared as pure information like arithmetic itself."

[the abstract to his "The Arithmetic Origin of the Genetic Code" which appears (2008) as a chapter in the book "The Codes of Life" ISBN 978-1-4020-6340-4 (*Online*)]

Clearly, shCherbak has particularly in mind the eye-catching repdigits 111, 222, etc. which so frequently appear in the particle counts as described above. These represent multiples of 37 only as mediated by 10 in the decimal place-value system of numeration. And that system has only become known to man over the last millennium, or so; and only universally recognised and used by him within recent centuries. It must follow that the genetic code is an artefact. Whether directly, or by a process of infinite regression, its true Author must therefore be the Judeo-Christian Creator of all things. Significantly, the logic of shCherbak's argument is not extended by him to encompass this final step.

Conclusions

The reality of the appearance of 37 (*now including its numero-geometrical analogues, 7, 13, 19, 61, 73 and 121, besides its multiples, 666 and 703*), among the various particle counts of the 20 canonical amino acids is now supported in the writings of two experts in the field of genetics, viz. shCherbak and Rakocovic, and in the writings of a significant contributor to the nascent field of bioinformatics, Boulay. Clearly, these individuals have independently stumbled upon a matter of supreme importance, viz. that of directly relating the Creator with certain of the modi operandi of His Creativity!

So, on what rational grounds will Richard Dawkins et al continue to preach militant atheism? And, our team of investigators having inadvertently provided proof of the Being and Sovereignty of God, on what rational grounds will evolutionists continue to insist on 'dinosaurs before birds', when the Creator has clearly declared, 'birds before dinosaurs' (*Genesis 1: 20-25*)?!

Vernon Jenkins MSc -- 2010-03-22

.
.

Observe that 11 is the root prime for 2-digit repdigits, just as 37 is the root prime for 3-digit repdigits. Extending into 6-digit repunits, the entire set of [7, 11, 13, 37] is involved, as $111111 = 3 \times 7 \times 11 \times 13 \times 37$. Interestingly, the sum of the CVs of the Bible's first eight Hebrew words is 3003, or $3 \times 7 \times 11 \times 13$ - 77th triangular number.

""There is a complete set of information symbols utilizing the decimal syntax 111, 222, 333, 444, 555, 666, 777, 888, 999 in the genetic code. Each of these symbols consists uniformly of a carrier (*balanced nucleons*) and a meaning [the decimal syntax]."

Of course in any billions-long sequence of numbers you're going to get lots of sets of 3-digit repeats. The string 666666666 appears in pi around the 45 million digit mark. Must be work of Da Debbil! The whole thing looks to be another Dembski 'Bible Code' debacle.

The only real question is how this got published in Icarus, which while not well known is a legitimate scientific journal. Icarus specializes in the planetary sciences, and it seems this article is way out of place. Looks like the authors dressed up the woo with an introductory statement about SETI which may have led an unwary editor to let it in without proper review. We'll see what happens in the next few weeks.

Note also that each of the 64 hexagrams of the I Ching has 6 lines and so there is a total of 384 lines in all.

(life 23) + (thread 23) = 46
(father 4) + (mother 42) = 46
(Adam 45) + (Eve 19) = 64
(sperm 277) + (ovum 107) = 384
(male 227) + (female 157) = 384

XMS and Genetic Code

German medical scientist Dr. Martin Schönberger is attributed with the initial observation that the 64 hexagrams of the genetic code are analogous to the 64 codons of the DNA genetic code. His book, I Ching and the Genetic Code: The Hidden Key to Life, is regarded as the inaugural work on this topic.

Other authors have convincingly discussed the similarity between the I Ching and the genetic code, including Steve Krakowski, whose work borrowed from Schönberger's, as well as Mark White M.D. Both these authors' work is cited by the current author.

Now, within the crystal, draw in the etheric rainbow bands of the Rainbow Bridge down into your crown chakra, where it is heated in the furnace of the Dali plasma (*which is thermic/heat force*). Turn up the heat! Practice the kundalini breath of fire if you are familiar with the technique. Now beam this blazing rainbow energy out your third-eye (*Gamma pacifying force*) and into the toxic waste quarantined in the crystal. Visualize again this pacifying/peace-making and blazing hot rainbow energy counter-spinning against the spin of the toxic waste energy until it is fully transmuted from radioactive waste into radiosonic rainbow - use your imaginal will to conjure up colors you've never seen before! When all the toxic waste in your crystal quarantine has been transmuted into rainbow, let out a collective "Ah", channeling the energy out of the crystal network and into the environment as atmospheric radiance.

the Guge episode proves jesuit meddling .. as well as a healthy instinct against it on the part of Buddhists .. but the docu portrays it as jealousy .. even though the worldly authority / expansion was hemoraging due to climate change .. and so must have been easier 'prey' for the woowoo otherwordlians ... however, Buddhism is proly responsible for Bhutan being organic and you'll see 'permieizzmz' (permaculture) take off the day B adopts it .. there's militants among them as well so changes are far from held back and down to microavalanches of coloured sandgrains at a time...

Wasn't the Guge kingdom long before Younghusband???

My first presumption was that the 163 years was false data derived from the shifting of true data to false about Nimrod. Source Wikipedia Arabic records.
But upon building this chart, it led backwards to Reu's year 163 being 69 years before Marduk Street, which in many chronologies is presumed as Nimrod's death.
The awesome thing about this is that it proves Reu was born 163 years before Marduk Street (*2009bc*). $32 + 177 = 209 + 21 = 230$ from 2239-2009bc.
 $230 = 161 \text{ years} + 69 \text{ equals in } 360\text{-day Reu's } 163 + 70.$

The effect of adding another zero

The ultimate Eamesian (*previously, twice*) expression of systems and connections, Powers of Ten explores the relative size of things (*previously*) from the microscopic to the cosmic. The 1977 film travels from an aerial view of a man in a Chicago park to the outer limits of the universe directly above him and back down into the microscopic world contained in the man's hand. But in 1977, this view of the world in leaps and bounds was already 20 years old. Kees Boeke, Dutch educator and pacifist, wrote the essay Cosmic View, which provided the source for Powers of 10. The whole essay was put online 41 years later, and it's still online, if you can't find a physical copy around.

While That's About the Size of It was broadcast in 1975, two years before Powers of Ten was released, work on PoT was started in the 1968.

Unfortunately, physical copies of Cosmic View are selling for over \$100 USD.

a grey headed man speaks a few excellent lines beginning in the 5th minute

this vid replaces an earlier effort upped last august

translation for one of the spoken segments:

soil minerals wear out, which isn't widely known but nevertheless true; the resupply cycle is cut off by the canalization stopping floods and precipitation of silt 'residue'/deposit. In 1934 the dutch Ag U promoted its last geo agronomist and a steadily declining soil vitality is reflected in all organisms depending on it.

We are happy to begin offering a service in Holland which, in german speaking countries has been a given amongst organic farmers.

pacifist world leadership nowadays can't even cheer on swale ditchery and composting as a rule of hygienic thumbery ... first line of defense against erosion and disease; best we got is the Dalai Lama? Really?

My estimation of his understanding depths and clarities are on a par with how far and/or little a brilliant idea penetrates on initial contact ... and how long before it sinks in .. towards and into the central position it deserves .. perhaps the part about marrying into far off but felt influence centers by allowing your brood scholarships, a euphemism for ransoming, kidnapping ... the root of multiculturalization so so much of which goes very very wrong.

Anyway, .. iow, i think the DL's 'enlightened' state regards the promotion of pacifism among his fellow / colleague leaders is on a par with the slow maturation of my grasp on just how very very important the principles of a practice i encountered in the 80s really is ..

Not until seeing Lawton at work in Jordan some years ago (where his wife is from) and in recent months via a reacquaintance with Ben Falk (quite likely the same man i saw writing about Vt rockdust experiments in the mid 80s; would have been a better destination than Mark Williams perhaps).

This is perhaps one of the oldest known films on the Keyline concept filmed on PA Yeomans' former farm 'Nevallan' circa 1955. It's somewhat remarkable from a few perspectives:

It was produced by a Bank

It was made at a time when fertiliser technology in agriculture was promising subsidised fertility out of a bag as opposed to conscious design and management of the natural elements

i vehemently and fundamentally DISagree with that Douglas.
What, i cannot lobby/campaign for a ban on hardwood imports?
I can't promote permaculture? That term by the way should perhaps be dissociated from proximity to
sperm and renamed waterslowture or something .. to not get detracted by cheap jokers too much ...
though the hardcores are proolly immune to innuendo about exhaustion, though apparantly spared the
'test'; they seem to manage just fine keeping a strenghtening meme in play, rather than the poor captive
bull who gets to copulate on demand.

Yesterday (searching yak vocalization) ...

www.youtube.com/watch?v=nZ_zm5oOuLc

fresh mama going for some finishing touches on cleaning baby yak

.. so yesterday i find Minnesotan yak farmer Hooper, one of 3 listed at iyak.org and today i get a glimpse of even more dignified greyness, on his wife's head. He explains how to make yaks a friend for life (same way you do any and all animals) .. but what 'eYe' saw .. was a man infect his captives with stockholm syndrome.

It especially enraged me to see a WHITE man claim 'his' yak (native and at home among RED peoples half a world away, on RED land a quarter of the world away from his own hail heritage .. are eminently suitable for small farming cause they eat so much less than ordinary cattle (4 or 10x i forget which) yada ... but the asshole forgets to tell us how much more trotting they are used to / feel happy with / need to maintain cadence ... and so you are likely to need more rather than less land ... unless you wanna rob them of the freedom within fences as well and tie them into a treadmill. I got quite mad, yet ended up crying before the vid's end cause of the soundtrack he chose.

I boldly plead with all americans and white africans to come home and do the right thing: ban pharmaffiose product .. go organic produce and paint and soap and ev'ry thin' completey ... cause this wish is not clinging to fairy tales (much less fabuloser SF), not born out of whiney shirky or jerky complaints and excuses aiming at being excused, disengaged, not aspiring to absentee meddler status or sourced from other such refusals, nor does it express a desire for unattainable purity and a losing proposition cause most such sentiment is native and most of them are at least conservative of soil if not actively soilbuilders ... infinite win: excellence and simplicity within reach ... most always handiwork. Ancient chinese craft, Niponian E-waste and anemia, all show the danger of diminution and detail which all aesthetics taken too seriously lead to - miniaturization of mass society ... humans replacing the noah balance for each human so and so much of such and such ... a matter of diversity and risk spreading as a sound farm policy .. not a once and for all and/or once only absolutistic monomaniac mythologization; a fashion is a failed suprise or good one gone bad by turning it into a factory job .. You want clocks and detonators .. or as i said yesterday:

gotta run rock(/earth) to run/trot time out(/let water soak in) eh?

this in response to a litany of (Big MSM) quotes (about 50 of them!) containing the phrase 'Time is running out.' through the decades (referring to Palestine, collected by Max Blumenthal and sited at Rowan's, who i shall once again have to forgive for calling MB a 'chinless wonder', out of jealousy i am afraid)

Zach's "Rockspinner" piece in Atlanta has been getting a lot of press recently, and for good reason. The giant 22,000 pound boulder is mounted on a bearing that allows passers-by to slowly turn it around. "The idea behind the Rockspinner" says Zach, "is to make a plaything, an object that allows you to interact with a mass equivalent to 10 tons. One of the most satisfying parts of these sculptures is seeing the amazement of people who come up to a seemingly immovable boulder and find they can move it."

here's a few notes continuing to raid entrainment of thoughts along the lines i began inspect once i began to take a closer look at Tibet in light of reconstituted knowledge - i used to just stick with the Oscar Kiss Maerth view that Tibetans are the only ones unashamedly admitting humans were as cannibalistic as any widespread animal. That's the demographic breaks eh? What emerges after a take on 'runaway money' and running a meme meshmash on the runnier ruins ... well here's the latest:

ooh oh ... oh .. wait, ..this is NOT gonna hurt them o so venerable extreme lefty museums given to and insisting on running the aesthetic 'branch' of the 'entartete economy' - how many clicks did this take or is asking this about handweaves and wampun type stuff a not done thing while eating nuts and sitting in a 14 story treehouse of an eco resort?

who's numbers who saves and which save who exactly .. then, when numonotions make you feel nominated enough and they are on runaway breakneck clipperdiclap clap bonk bonk boom bassline frequentage, it's possible to reach innumeracy .. if you can 'figure' out a way to reach your hand into a mere single rock deep enough that is ... give it some thought/time .. set a few up to spin onto & into each other, ... apply additional pressure according to wits X impatience and don't do it too far away from the compost heap ... saves carrying efforts, the weight shouldn't have changed much unless you are sloppy and chose a windy spot ... in fact better to weight it all down with fine mist rig; we humans can't as yet afford to be as generous / messy as volcanoes.

PV 27th Solar 'Galactic Return 8-1-07

07 year of kin 54, kin 60 *(JA birth kin in the old count 11-11)* crop thing shows 18 of 27 cubes *(2:3)* if the pattern holds throughout *(with the center/corner left out)*, 18×3 faces = 54 ..would be 57 with the center one filled in but it's not.

if the larger composite cube were to be taken as a shell type construct we can count the same number minus ... only 1 ... in other words, the center stands for 2 corner and one center cube left out in the line of sight

the perimeter *(4x3)* ones double for the parts out of sight but half of them are part of 3 not 2 sides, like the ones in the middle of the vertexes so we subtract 15 *(from 26? = 11 or from 27? = 12)*. there is only 1 cube difference between a solid and surface one *(only one on the inside of a peripheral one, in this case, that goes for all sides, the minimal such container)*.

so we have 2 or 3 left out ... take your pick ... and what about those 3 left out ones emphasized in the triangles also, as follows:

the semi radial fanning figure is not made of true triangles, it leaves out ... 3 triangles at ev'ry cycle's near completion which begins a new one instead

18 ribs which are segmented by 4 concentricities which cross it twice = $72 \times 2 = 144$

3 triangle skips per 18 long ribs = 54 triangles [$3 \times \text{ribs} = 162$] .. subtracted from 144 = ... 90 ... in 2007 i began living with a kin 90 pretty much full time *(... my meanwhile late mother)* it was a frantic year in which i tried, for the first and last time to sort wheat from chaff in my notes, i made a googlepages .. now replaced by sites.google .. with my notes and digital convos about JA collected, my Indywire notes and my work plain, not hidden among quotes .. plus, i foldered all the pages in which i worked with rainbow colours in sequence.

Can you solve this? -1- AAA (Absolute Alpha Alliteration 1/6)

A = capital / cattle / pictographically preserved ... iow, you are talking demographic incontinence .. being too harsh on the predators to protect the helpless overzealously ends up w runaway overgrazing ... desertifying and migrations ensue ...

microclimate change one blade at the time ... i do a wry smile when i see vid titles pass thru my feed like 'nimrod sun god' or some such ... not a fucking blade of grass left w a chance in hell out thereabout whereas if you read novel by that excellent Guy Gavriel Kay about early Byzantime/Muslim glass shard mosaic artisans travelling the terrain which the ottoman empire ravaged and cut short you see another story, quite a few and livelier stories in fact, was filled with thick forest and majestic independent BULLZ!!!! then came bibliographies and the 'canon' fights due to slow scarce precious paper/inkswirlers ... coin/bullet 'flickers' ... i am so tired of alphabet disservices ... but you are in the midst of what i did in the 90s ... rage in fast and full colour [\[\[check out poetpiet at tripod.com at your convenience\]\]](#) ... before i realized it aint's flowers i was tippietapping out but contritutions to an industry hily toxic to evry thing left alive be careful about them RSiz that creep up your fingertips over the years. An old, meanwhile late, intercultural spiritual guide (*such as yourself*) named Arnold Keyserling (*never said a word about Islam come to think of it; him and his wife personally studied w Gurdjeff though*) always did a little left/right brain excercise:

A = focus, pointy, projectile (*right brain*)

try keep an eye (*each*) on hands moved sideways from the front (*left brain*)

You cherry pick the Quran masterfully but the selection for the vulgar crowd consists for 90+ percent about bloody mayhem (*just like the bible*) and jews take understandable offense to having a highly unrepresentative commentary tacked on by outsiders; i am sure the Quran abounds in similar clashes and contradictions no matter how subltly you manage to hint that Allah is the best use of the letter A ever.

another 19 channel has a 4 vid list on the subject, one of them a music vid seen over 3.5 miljan X 'spirit of the radio'

which Salat vids DID i all watch yesterday?

... lost comment is on *(19:45m long)* part 6 *(prolly not shared to G+)*:

<http://www.youtube.com/watch?v=64tPZahrZ20>

For Intelligent Muslims - How to Establish Salat Fully Explained By The Quran (6/9) Rationalize shouldn't that last line be 'for we were fully informed/briefed about him'?

as far as i know one cannot be ackn. 'about' .. anything or anyone. The briefing can be acknowledged *(admitted to have taken place)*.

Also, in the 18th minute your mispronounce veil and make it sound like the word for calf meat *(veal)*. Thanks for this piece of acrobatics. No wonder all them riddles fill madrasas. Could you do a vid about '19=260'? Do you have that work?

ps: there are 2 copies of part 3 online, by mistake prolly??

added:

PsII: oh, you have the whole series double cause of volume issues / specs

psIII: looks like edited comments don't go to G+ which means they get lost cause of the migration out of the ytfeed *(unless you save them somewhere)*.

2 other words you mispronounce: abide and aquit ... them pesky a words eh?

ackn. about = acquainted with??

40 lines it says *(posted to page 4)*

i like that you emphasize patience but think it need not apply to postponing conclusions *(which logically can come only at the end in any case)*; the preclusion however, SHOULD be avoided and i hope you can until you hear my preconclusion out ... should be as interesting, momentous and important as .. you know .. something like precome.

i will compare throngs, *(sacrificial)* rites, riots, deference and substitution .. crossculturally *(notably to tibetan versions)*.

Except in asia, mass worship has tended to be the left hand of the wrong one: warshop. Some relevant remarks here *(fresh)*:

<https://plus.google.com/u/0/110100351831106053963/posts/jVyfapNn81d>

the last third *(which begins thus)*:

Note on the enduring dispersal issues of semites

In a leafless desert sunlight rays down 'onverrichterzake' *(to no [[oxide reducing photosynthetic]] avail)*. like an african child with a tincan toy car one can pretend to farm solar panels which need constant adjustment *(contact)* but that is and remains substitution *(toxic at that, i encourage no-one to use solar panels; grow something instead)*, i therefore dismiss the timing particulars.

Tibetans make head to ground contact on their pilgrimages, taking a few steps in between and yet covering long distance; their blessing collections at the lama 'displays' / charging points are also done with utmost deference *(denoting the figure head's inscrutable positions and easily raising suspicions of feudalism, patrist hierarchy as the weaponized matrist 'social' matrist one up womanship strata spikery)*.

as a sweetener for my harsh word i offer a quote from 19=260 *(dedicated to R Khalifa)* by Jose Arguelles who promotes a "second Quranic dispensation." *(god is math, god is number)*: his last great work is a 'synchronotron, a 21x21 pyramid/square/cube dealie; he made efforts to convert the Vatican and therefore can be classified / lumped in with a another great big numb[ERR]nut who writes himself into the greatest possible narrative: Brian Golightly Marshall *(for whom, other than Jose, i have little affection .. though the late Jose has enraged my many a time too in the past)*.

"Because of my efforts to alert the Vatican regarding the proposal to reform the calendar, replacing the Gregorian with the Thirteen Moon Calendar, I also discovered that the Vatican Observatory, the Specula Vaticana, was also located in Tucson 85719. How could it be that Khalifa and the Vatican had ended up in the same general neighborhood, and now I, with my discovery of the Law of Time, had established a third point of convergence in zip code 85719? The only answer is that God guides whom He pleases, and reveals to whomsoever He pleases, whatever He wills."

a little later he takes the liberty of taking the 300 from sura 18 to mean 3 years (*not instead but alongside Khalifa's full 300+9 we had left on this tortured beachball since 1980 - see p. 467, Final Testament, Appendix 25*) and apply to both Khalifa and him (*he's full of tricks when it comes to 'schotsje lopen' [[fashionabilizing fraction fetishes .. relentlessly]] ... feels not quite as abominably fake as the seance style of [[psyob]] Bob Dobbs with his latest counterpart 'JW' / 'ion' [[out in the open sect with huge online archive]] or as abject as french JDLers threatening Soral and Dieudo in public rallies [[with impunity]] but it's reaching nevertheless*).

one of 9 10m batch on Salat

i held off looking more closely at the Quran till i found somebody like this man

just sent him the first half of 19 = 260 which i would put up on my google docs like you adviced a while ago

his blog

<http://iq2bal.blogspot.com>

your g+ seems to be set to private?

here it is

<https://drive.google.com/file/d/0ByUG9YgQSJHnZEpZdkNGY0hpVjg/edit?usp=sharing>

19 = 260

to iqbal

i may have not sent Ali Mastral a copy yet ... nor uploaded it to my google docs ... either so i am going to send it flat now to both of you and if it makes you curious about the illustrations i WILL put it on google docs

here's the real thing

did what julio had adviced me .. his g+ seems hard to access .. and i don't know about his vids and blog

.... the file seems unscanned but all i shared was the link ... so that maybe why ...

fuck i hate google all of a sudden ... i had hinted at the need to allow folder uploads ... only to find out now that Chrome, which i hate, CAN do THAT

so amputate yourself to delegate a delicate specialism to yet another clutz piece of shite shoftware a lot of people's money is riding on gotta oblige your fellow man eh????

anyway, here it is:

<https://drive.google.com/file/d/0ByUG9YgQSJHnZEpZdkNGY0hpVjg/edit?usp=sharing>

if not it might still show up in my google plus ... dunno

by the way you said viewers could ask to be sent your files ... what sort of a format is that???? some kind of power point????

i would enjoy a copy ... and marvel at your dedication from up close ... i have to keep pixels low or else my fan will blow .. my air sicken ... etcetera.

81 9², 27 x 3, reverse of 18 81 - 18 = 63, begins second circuit 441

82 41 (*divine interval*) x 2 reverse of 28 82 - 28 = 54

83 Prime key, vigesimal 4.3, 43 and 83 connect as the night seer (*43*) and the command of the night seer (*83*)

84 12th order of 7, also 6 x 14, 43 x 28, 3 x 21 vigesimal 4.4, 84 is frequency of the 84,000 dharmas - teachings of the Buddha; synchronic matrix has two sides of 84 units each, hence 84 right hand and 84 left hand dharmas

Desert dunes are swales gone haywire, on the move .. like the youth of aridifying (*and worse*) regions are set a drift ... whereas a combination that couples and steadies both is SOOOOOOO easy to make and go get[/see being] paid for by Sauds who manage to dig up a few long forgotten green thumb genes if they try hard enough. The monster Ariel Sharon is in hell along with the Rebbe Menachem Schneerson and the Christ Brian Leonard Golightly Marshall is rejoicing. How any Christian can lament the death of Sharon is a testament to the work of Satan in the Jews who call themselves Jews and are not and how they have conned the west into believing their lies, murder and mayhem, they the terrorist state using the USA as their arm of destruction and the stupidity of the Christians who fall for it....talking about stupid, the Antichrist Francis wants his cake and to eat it too....or should that be...booger????

in this one S Stone equates the words dreamspell and mindspell to the psyop by millenia old ruler

bloodlines that just skip around continents breeding subtypes and mismanaging these masses ... at least in the eyes of soon to be hunted and isolated if not put down 'health hazards and paranoids.

So is he a Drew Hempelian rather than inspired by Crest and not joining the latter on suspicions of psyop taint .. yet plagiarizing their shit to some extent????????

ex-territoriality was a big buzzWord of a refugee from Russian invasion of Berlin and employee of Anglo ones down under, publishing thousands of micro-fiche since the 60. The inspiration that crystallized and sparked the growing collection was it's crown jewel right off the bat; it was the work of Ulrich v Beckerath -- a Berlin insurance mathematician; a gold and bills of goods connoisseur -- which as the decades rolled along, got snowed under by 'liberty' lit.

If you can manage to see the measurement of bio-incrementality *(mass X diversity)* as an improvement on the basis for the value stabilizing gold was capable of, then by all means raise photosynthesis *(not toxic solar and toxic computing .. PLEASE)* from the rockdust spiked compost heap on up!!! The elitists this man wants to shake a distributed fist at *(or offer learning to behave opps to, same thing really)* use ex-terr'y to evil ends and it should be easy to improve on that at this point ... now that the scope of digi-space is perhaps seen to turn out not just untrustworthy *(like paper, as Myster Stone puts it, speaking on constitution / arbitration)* but waaaay more toxic as well ... though the clearcutting signed most of our death warrant all by 'it'self of course.

The Nazi Connection with Shambhala and Tibet

berzinarchives.com via swan maiden

'the' nazis don't exist, there are completely divergent and antagonistic *(good and bad)* branches of that

graft ... it has a rigidifying effect on the 'human's tree cause it's too many bifurcations away from where their ancestors parted; it rigidifies the tree .. which has great harvest bearing effects but must be protected from turbulence or the 'pleach' (*harmonization*) will be blown asunder.

<http://galacticspacebook.com/profiles/blogs/yall-spotted-this-crest-like-undertaking-yet-nep>

to explain my reference to Drew Hempel i might as well supply - though noone asked - a probable source for it ... and i am throwing in a note about another person who claims contact with the other side (*if he isn't having a McLuhan moment/period/fit/wave*) and who's numerology is quite rudimentary: 2 2s are the hit and he is it .. all double twos are his ... never mentioned Arguelles of Shearer though ... the happily married swan idyll is perhaps part of the high honour white scarf rite in Tibet as well?? God knows what sort of strangely transplanted roots an 'oddaption sprouts from.

* oddly, he uses a human to embody that (*ion*) so should be easily outable ... a necessary thing to do ... cause the snake-oil racket is taking cover by sponsoring alternative media leveraging money away from and off of the too gullible to the too lowly sunk professions of whistle blowers, comedian, camera aimers and other occupation recalibrators. Of course the woo woo factor of a lot of alternative media is already sky-high, so an innocent 'droplement' couldn't hurt right? And who wouldn't want to try a fountain of youth elixir .. isn't that what all religion aims for???

The magic sum of the whole square is 870.
The magic sum of the 4th order squares is 290.
Are there any 8th-order magic squares to count?
Are any of the squares pandiagonal?
Did you remember the 12th-order square itself?

there's that simon again (*for an hour and 7 minutes*), a part 2 will go live in 11 days ... 42 comments there now

... i am still kinda wary owing to the pompous looking zeitgeist architecture, still to much of the hive and bunched bundled masses there ... but hey, all pyramid synchronotifying is management of the masses ... teaching them patience till their time to shine comes not sure one can go Zeitgeisty with organic materials (*unless he's not telling us all about these new tec thingies*); he's leveraging the rainbow family / occupy / crest ethics all the way to the UN it seems, or tries to anyways really got me wondering ...

Got no replies from them either cybersphere soulfulness has begun to suffer too much from it's own E-Waste medium to really make it into hi-tec or sensible tec out of the way ex-territorial pacifism oases it was going all [or nothing] for. Twas a death gamble from the beginning, in my case literally, i thought the true to life principles had to migrate from alphabetization to the metastasis that is digital code but it merely choked the already dead cellulose preserved forms as if they weren't already dead; food for nostalgic melancholia and mourning aids at best; the latter merely encapsulated the former w more absorbing screen effect as bennie to help look away from the digital detritus and fall-out drawback i mentioned.

Something that really irked another millenarian you might well know, Jose A as well, as you well know.

It's the dichotomy and double bind all of life set to symbol and its -ization get trapped in like William Gibson .. seeing the drawbacks yet incapable to escape them ... joking about discovering both Burroughses 'together' .. so for him the one of urbanity and drugs remains juxtaposed with the Burroughs of Tarzan.

I'll remain pessimistic till someone rescues my books and me.

i've had an offer to take the relevant ones (*on healing*) to <http://centrumsavita.wordpress.com> but to me even the ones i merely saved from after market day trash collection over the years remain relevant; i need to honour what little action i took eh?

Harmonizing cyclicity with linearity is and remains any true switchcaller's ambition and ideal. It easily tempts them into leveraging the agency bit to the bigger bangs and beats (*the lure of wider audience equated to validity rather than what it really is and does: the cause of and to cause .. attrition*). the large autonomy and sovereignty sought after is and remains available at the micro level only though (*transforming rock to soil, always my prime lead, example and target*); to co-ordinate that into mass movements and migrations will always cause enough strife and friction to distract from this root (*of every movement, even zionism ... who knew*), however o so populistable and sharable it seems .. it's the confusion between centralizable and centering.

Exterritorial landownership (*wether by trust or throne*) is an oxymoron .. and to expect it to have inviolability status by sheer dint of 'it's time has come' or some such millenarianism ain't gonna magically melt rifles now is it?

mean comment (*unposted*):

please take warning from the 29th minute folks (*radiation damage from overeager experimentation, a welknown characterflaw in these types of 'aheadplungers'*) ... quite a few of them want nothing better than shoot the overwarprdrive hypermagic bullet and sell it too ... i'm even tempted to assert one can be forgiven to come away with a firm conviction all participants lean strongly towards megalomaniac junkies

rather than primitivist permacultural stinternationalism, in fact even after more than a furtive glance i haven't discovered even a scrap of 'modestifying' in them ... the impression Myster Stone was co-opting and/or imitation Crests held up only briefly and ended when i saw the white curved futurist floating cities which SF lovers trying to claw their way back onto the ground seem to have adopted along with toy model tinkerer / integralist Myster Fresco.

I mean, do you see them talk about pure clean simple devices like gravity machines a la Costa and Wesseli that DON'T depend on rare earth and toxwhatnot????? Right. Not.

Fukushima gets focus towards the end of the 37th minute and then a gamut of radiation tidbits follow.

first few minutes of the 4th quarter of an hour has an ionette like person who nevertheless left Hawaii bycause of the radiation. Near the end, 1:30:00 she equates a pathway with a runway. Hell of a lot of hell's worth of good duh intuition did her eh?

No idea how to weight the wish as thoughtpaternity factors in all these fabulous anecdotes and 'reports' but i know it's not ZERO.

1:22:00 sea urchin fairy tale ... damn sure hope it's TRUE!!!! ... but the guy telling it is a fucking beer brewer .. and proly a jew ... kinda little besides, ... that's 3 red flags right there.

Yesterday i checked out DWinter, skyping in from france ... his plagiarism case plagueing him still, decades later? Anyway, he still does that Gogo oldy damn near moldy and insularity ensuring tough actspeed to follow spiel, speaking not of compressing sunshine (*meeting it halfway with decompressed, squeezed, 'charged' rock*) to grow and fluff stuff up, creating a lift, raising gravity POTENTIAL (*which is a definition of photosynthesis*) but keeps it in very abstract terms till the very end when rockdust gets 1 or 2 lines (*Callahan dropped from the pointers altogether*). I think gatekeepers, specially last ditch ones have to move right close to the practical and try abstract it as much as possible without totally robbing it of lifelikeness. Must be a thankless job, souldeadening as well, like all public disservicing, all performance relying on verbiage is and always will be ... if not accompanied by the liberation act, that squeeze, that changing of fire-hazards into very slightly covered nutrient behind swales.

I called for a building stop in the US a decade ago; employ all construction workers in the swalery, the enswaling, the water slowing business.

As usual, i call a crisis 5.5 years ahead of time and see my warning unheeded; no flloodings and securitization crisis would have ever needed to come about and i am still calling stuff .. though becoming less and less optimistic about the use to be found, let alone a good one.

Dan, as usual, differentiates his work from that of his confconfies and this is the first time i hear him claim the tetra is the least fractal thing and most stabilizing (*octave like*) .. which obviously isn't gravity 'creating expansionist terraforming (*anywhere but on earth*) star conquering enough ... sigh ..

first, a note on why:

i always thought it was kinda cute, endearing in that melting into fondness kind of way .. that you keep hacking at the knot of contradiction in your mental make-up by on the one hand accusing all the ones good at bad of prattisin kableahblah yet on the other admiring the Bri[[*man you chose for god .. the good going @ the bad*]]'s way with & aptitude .. for it ... in fact you unhesitantly repeatedly shout some vaunted, unassailable and solar systemwide hegemony about, attributed to him solely.

Jose Arguelles took very great care to mix and remix from a huge range of what i call matrologicians [[*grit/grid sieve/7 .. in dutch to sieve is 'zeven' .. same word as seven*]] both obscure and monotheistic and i suspect it's his little scheme to ensure inclusivity, equalize and balance not genders, races and classes in the first place ... but all the layers UNDER this top one.

The bible is a bibliography and so inherently diverse, not to mention contradictory ... but to go after / into and with it the BriCultWay is myopic. Don't get me wrong ... i work on gravity wheels myself. try Aldo Costa ... quite a thrill when you grasp that thing and use it for other than selling tickets to a change to look down on the BegBin ... eh PigPen ...

Actually, just to put this back in context: my overall theory is not that MB-based leaders are on one side or on the other, but that the MB itself is uncontrollable. All its national branches go off in directions of their own, over and over. That in my view is why Erdogan, like Morsi and like the old Emir of Qatar, were pushed out, or are being pushed out in Erdogan's case. They are unable to exercise the sort of serious overall control that Bandar exercises over the Salafi-Jihadi groups. Being the paymaster for a paramilitary group does not guarantee control over it. The paymaster may find that he just cannot exert the necessary organisational leverage, because the levers just aren't there.

want to draw particular attention to the fact that one of Sibel Edmonds' sources is talking complete nonsense. I don't like to be unkind, but precisely because we all love Sibel so much, we need to be clear. Christoph cites something she wrote in 2011 called "A Note From 'The Insider'" which is full of obvious rubbish. I would never trust anybody who adopts such cloak & dagger airs in the first place, but this 'Insider' is like Franklin Lamb at his very worst. Here we have the following, in its original formatting copied from Sibel :

One of the attending Gulen school owners owned and operated 18 schools for Gulen in Uzbekistan. The CIA operation disguised under 'Teaching English' at these 18 schools in Uzbekistan consisted of 70 CIA operatives, operating under a project named 'Friendship Bridge' (*Operation Code Name*). The operatives also submitted reports to a certain arm of the Pentagon. The same operation (*name not mentioned*) had 60 American-CIA operatives as English teachers in Kyrgyzstan; again carrying US Diplomatic Passports.

I've pointed out before that the term 'operatives' is worthless because of its extreme ambiguity. Do they mean CIA officers, or CIA agents? The distinction is basic and should be memorised by anybody interested in this field who does not already understand it. 'CIA officers' are career professionals employed at Langley and must legally be US citizens. They include field officers, which is to say handlers of local agents. These latter (*'CIA agents'*) are not full-time CIA employees at all. If they were, they would have personal and career protections. Nor in most cases are they US citizens. They are usually citizens of the target country, or of its neighbour in the case of cross-border operations. They are not waged but paid in cash or disguised transfers, in accordance with results. They may be agents of influence, spies in the old sense of information thieves, terrorists, saboteurs, or any of a number of other nefarious things. But my point is that the CIA does not detach cohorts of 60 or 70 officers to any stations, the absolute maximum would be 6 or 7 – RB

Jerd Guillaume-Sam originally shared to Investigations (*Ecclesiastic Freemasonry/Secret Societies*):

You have to remember the basic story of Ecclesiastic Freemasonry when it's being described. They say that it's a
religion with allegory and symbolism. How they write it is "A SYSTEM OF MORALITY, VEILED IN ALLEGORY AND
ILLUSTRATED BY SYMBOLS". "Morality" is "Roma It Y". There's your allegory just in the word "morality" which
basically means RELIGION. "Y" is two in one, it's the male and female divisions in that organization . Roma is where
they came from; gypsies, wanderers, travelers, is how they started the movement. "IT" is the third gender, neither
male nor female but both. "IT" is the goal which they've been working towards for thousands of years. The genetic
engineering(*or perfecting in their words*) of human beings to be better slaves for future outer space travel.

I have never seen such a twisted mishmash of Luciferian confusion in all my life. Really! You take snippets of 9Nania's videos to prove a point. **9Nania has no idea what she is talking about.** The name YHWH does NOT come from the roots she states. She knows nothing--ABSOLUTELY NOTHING--about Hebrew or how to interpret a Hebrew lexicon. She is a biblical and linguistic ignoramus. The name YHWH comes from the root word "hayah," which means "to be" or "to exist." 9Nania SAYS it comes from "hayah," but she very deviously SHOWS the definition of the word "hava," which means "to fall," a completely different word. She tries to demonstrate that the name YHWH comes from a word that means "to fall," which it does not. Then she also says it comes from the word 'avah, which means "to covet" or "to be greedy."

that comment is not to be found on the original vid *(blockers manage to really do a number on threads from now on, thanks to the heated debate cooling measures google took)*, in itself tolerably interesting, though from the satanist antichrist dreading yet out and out pointing to crowd ... they do not realize they are whoring themselves out to jews who rule the very empire they disapprove of at the same time they claim it's inevitable. Why though? Cause the script .. i mean prophecy is really really old and points to astronomical moments to hang their fears up on???????

A thorough critique of Monistic Idealism and the supposed incompatibility between Materialism and quantum physics. I use videos by Idealist YouTubers InspiringPhilosophy and JohananRaatz as a framework for this critique, but I do go beyond what was presented by them in order to present a more complete case against Idealism.

InspiringPhilosophy, i assume *(at first, after sampling a few of the vids and not hearing that accent anymore)* is the one who features early into the vid in which case HE might be that yet another nutter dutchman ... crazy for sure .. horror nerd with a ridiculous accent ... too close for comfort ..

1,171,717 views when i visit JR a few days later, again trying to track the dutchman down

!!!! found ... from the 'about' page of the latter and looked at subbees' names: TheDutchPhilosopher 35 vids ... oh wait, dutch but not THAT one.

it's not the IP guy either *(considerably more popular ... typical scifientist fairy yarn spinner ... and christian on top of that ... no less)*

OK, 14:43 on sunday now and it IS him KNM is the dutchman .. bit of a diagrammarian in his own right ... and i should not look down on the minor leagues struggling with the first stages i left behind aeons ago .. impatiently looking well ... there's none flying at eyelevel i can spot and tapperditap about

as for that inspiringphilosophy, a name that veils his christianity, his conclusions are, what i have to side with the dutchman's final 'utter crap' call on, and i am kinda horrified to see this new hybrid one can accurate charaterize as the quantum christian, since this is a first for me

he seems to actually use the bible in only very few of his vids ... and he doesn't in 'the introspective argument', under which he writes a comment that get 34 thumbups:

This is a simple philosophical argument for God's existence and idealism

Q. What is time?

A. Time is an aggregate measure of physical change modeled in a linear fashion. It has no existence of it's own beyond our sense of sequential causality *(which evaporates predictably under altered states of consciousness – dreams, drugs, trance, etc)*. We are the ones who interpret the digits on the clocks and the calender squares as a shared temporal text. In reality, there are no days, just astrophysical orientations woven together by our memories and monitoring of regular oscillating patterns.

Like space, time can only be as discrete or continuous as the substances and processes we use to measure it. What we are measuring is not an objective condition, but our own normalized intersubjective detection of relations between patterns of energy/change.

Q. Are we a body dreaming or are we a dream bodying?

A. Neither. Body and dream are two opposite sides of the same coin. We are the coin itself; the sense of the two sides opposition to and unity with each other.

from the SUMMARY

Developmental Stage: transcendental voyeur *(localizing motive)* – what is observed/transcended

Archaic/shamanic:

Natural spirits (*magic*) – alienates objectivity with direct animism

Classical/polytheistic:

There are a variety of reasons that caused me to conclude that the 7 Storm formation was not made by Nvidia. Most of them can be found here: cropcircleconnector.com/2013/chualar/comments.html
Scroll down to "Three major questions regarding Nvidia's suggestion..." of their involvement with the Chualar California Crop Circle

The Logical Recital Order is basically Connecting the Chapters/Surahs 7, 10, 11, 21, 23, 26, 29, 37, 42, 54, & 71 which are the Surahs/Chapters that talks about the Story of Prophet Noah in the Quran.

In this recital video, these surahs (*7, 10, 11, 21, 23, 26, 29, 37, 42, 54, & 71*) are re-arranged in this order 42, 21, 26, 71, 7, 11, 23, 54, 10, 37 & 29 because thats how the logics of the story of noah unfolds.

For example, if you go to the video timeline at 17:16, which will bring you to chapter 11 verse 38, which this sequence of verses ends at the timeline near 18:38, which brings you to the same surah 11 but verse 41, the recital should continue to verse 42 however, it continues to surah 54 verse 11 to verse 14 and then back to surah 11 verse 42. Which is the only logical option.

Similar to binary options, there is only one logical option to make a binary number. 19 can only be 10011.

Hope u understand.. if not, please analyze the recital sheet and pay attention to the chapter/surah and the verses as they continue in their sequential order.

Peace

? there is never, and inherently so, an 'only one' option when it comes to logic (*since one is many and like*

theismz, one can at best choose a few [[rather than 'THE' one]] that hold[s] the others at bay - they have, at least and alas, at most also, THAT much lifelikeness in and going for them).

I corresponded a little with an Iranian intellectual (*Reza Negarastani*) in the noughties, who is quite succesful in a certain segment of that field of endeavor and who makes much of how that which we see in christianity, splitting off into denominations, usually involving some sort of migration / colonization and semi-sectarian move or 'other', is very much at work in islam also, if not more so.

I will counter your binary with a vigesimal notation ($19=1$); for example (*which, if you looked into $19=260$ by now, will not be unfamiliar*):

.. $1.7=26$ etcetera .. you do the mathrixication ... i mean fractionation .. you know .. that runaway* thing .. that's why one must be careful to keep water at hand always and whatever nozzle one devizes for directing it, aimed towards the diminutive, micro-layers of creation, .. to breath into clay, watering rock is a must and if a logic of your choice doesn't help keep that process clear and clean it will most likely tox it up. Science is religion on steroids and the type of raw material can't be gotten at on a volunteer basis before it involuntarizes even more undislodgably via hormone disruptors, lab 'ConCockUption' which autisticate, nerdify and savantize just as much on purpose as changing sheepskin colour via some bushbark or other, or playing primitive firework smokescreen with explosives cobbled together from altar environ harvested ashes..

*factionalizationID runs away .. as much as it manages to do away .. with .. everything not conform to forward motion (*the spin in place .. Dutch pas op de plaats ... disqualified before even getting there*). It is thus any invasive species crashes an eco-niche party and monocultivates .. monotonizes ... desertifies it.

LIGHT AND 2016 IN QURAN:

The verse no 92:2 in the holly Quran is the following:

"By the day when it shines in brightness".

The abjad of this verse gives 1438 (*Islamic calendar*), which is equivalent to the year 2016 in the gregorian calendar:

°Y ? ??? 6 ;Z ??

$6+1+30+50+5+1+200+1+700+1+400+3+30+10=1438$ Islamic-Gregorian 2016

This is the first proof that in the year 2016 there will be permanent and long permanent noons.

.....

On this date (*09.04.2012*) or

a few days before this date, fire and flash of brass will be sent to some people. There will be either a war or a comet that will crash Earth causing this event on this date.

Also explains the historical origins of the discovery. ----- The common denominator that pervades every element of the Quran: from the number of chapters, the number of verses, the number of letters in verses, and so on .. is the number 19. ----- 19 is the gematrical value of the word "WAHD" (*Waahed, or "One" in Arabic*). Shows that the message of the Quran is: One God, or Worship One God.

a sibling of the 1st seal which is often taken as crocodile .. close enough to a dragon ... but not half way there .. and i'm not sure a supersonic eagle would lose it's feathers in order to run on photo voltaic firescales twisted towards mamabulb just so.
... but rather i suspect the bird's eye perspective of rivers is the origin of the various dragons, cycling through the elements.

did you note the vid about malawi in you sub feed???
how many people are you subscribed to.
you have an undisclosed youtube account?

dragon of course quite primal
and the lively dream of last nite ... plus the memories of all Arguelles ever said about my seal ... eerily echoing an early rumour i caught about a Hopi elder mentioning the white man in red .. and wondering if that meant me (*as you saw and remember me*) ... which by the way brings me to ask if you have and care to share memories of our daze and noids together ...

i just noted it costs you 16.75 in postage to send me your mom's book .. i promise it will be the first thing i read ... if i ever recommence reading off cellulose i should lay off the screen i guess fine print has become impossilbe already ... and the occasional .. planet driven moisture retention all point a and the most, certain way ..

my sister has had swollen foot probs in the summer for a long time ... but she's THE most unimaginative girl possible and wears fashionable (*stupid*) shoes.

indira gandhi isupposedly said it's good men fight and make up cause with women, though conflict avoiding much better, they would never end.

just heard that on the radio via a hasbara gal ... theater, music and chats with folks in former colonies (*about alcohol, parties and buildings that tumble down from too loud music - lots of them flagged along the procession / pageant / carvival route*).

complete evil to mix good and bad stuff like that .. but it's the jewish way, they think the laugh and cry (*janus*) are inseparable and don't acknowledge wearing masks and wielding wavily woven curtains. Torture? Without it we wouldn't enjoy the good times so much. Their freudian advance posting furthered by 'animmediacy' of their toxic 'roepetoeters' (*cone megaphone*).

It's a lot like degenerate dog, starved affection and gated community 'cascadage' much of which in evidence RIGHT NEXT DOOR!!!!

Good thing about it is i can finally begin to see the end of my mourning period and getting the hell out of

here.

What's the max weight you can send for that postage prize money?
i used to send an entire box full of books for that much ... *(surface)*.

i do want to read thomas pynchon's latest ... and louise erdrich ... i'm sure i missed a few of hers ... she's quite productive and i notice that most of the last 2 pages worth of google alert *(they slowed down a lot ... a bad sign ... ominous in fact ... see the searches gone out empty for other stuff that firm up my decision to flee from all connectivity and fake civilization .. into tribal life ... at least for the next one.... there may be no choice for even those who don't at least mentally prepare)*

Prisc posts tzolkinportal.net on kin 121 *(last day of feb)* ... it's that guy i saw hand out and sell stuff he does gigs at 60 euro a pop

i disagree with the man speaking from the audience in the 36th minute though i have sympathy for what i think he tries to say *(related to the latin used in order to baffle, mystify, confuse and impress the congregation, all the better to treat them like a feudal ruler does cattle .. and much worse)*.

To me on the contrary however, i am charmed by Tibetan singers *(solo female especially and that's cause of my oversize gonads)* all the more exactly bycause i have to guess the meaning ... and i suspect the songs would lose considerable charm when/if / as soon as i find out the are on quotidian topics *(which is likely)*.

More important in general is to realize that a literate society uses alcohol to loosen its rigidifying tendencies, though the habit of carving and engraving lettering on rock is the actual meaning and use shedding way to go about it.

Your turtle island siblings are devastated by alcohol worse than smallpoxblankets and terrorist gunfire combined.

* - i lied, .. it actually uses verdorven and not the noun form ... did find an interesting .. 'grace-note' i'd call it i guess:
'unbeliever' occurs 7 times in the bible and 216 times (*6x6x6*) in the quran:

God schaamt zich niet een voorbeeld te geven met behulp van een mug of wat daarbovenuit gaat. Zij die geloven weten, dat het de waarheid is die van hun Heer komt. if only the typically asian micronization (*in order to avoid population pressures*) were a little more focused on soil .. 'innumerabilizing' ITS demographic would have been the core truth and message in full accord with the Cernunnos Godliness as i see it and jesus the apostle thereof .. and that he is to this day said to be all for fullfilment of law might have been in connection to that ... (*but alas ... the forces of anthropomorphizing the number games rallied against him to do dominance games for a few millenia instead; if we don't terminate them they'll prove to be terminal .. termitical .. in dire need of a mercykiller compost re-ed ... failing that it's not game over but games off until venus gets to spin into pole position*). is this a repeat of my comment on a Warner vid?????

i like that you emphasize patience but think it need not apply to postponing conclusions (*which logically can come only at the end in any case*); the preclusion however, SHOULD be avoided and i hope you can until you hear my preconclusion out ... should be as interesting, momentous and important as .. you know .. something like precome.

i will compare throngs, (*sacrificial*) rites, riots, deference and substitution .. crossculturally (*notably to tibetan versions*).

Except in asia, mass worship has tended to be the left hand of the wrong one: warshop. Some relevant remarks here (*fresh*):

<https://plus.google.com/u/0/110100351831106053963/posts/jVyfapNn81d>

the last third (*which begins thus*):

Note on the enduring dispersal issues of semites

In a leafless desert sunlight rays down 'onverrichterzake' (*to no [[oxide reducing photosynthetic]] avail*).

like an african child with a tincan toy car one can pretend to farm solar panels which need constant adjustment (*contact*) but that is and remains substitution (*toxic at that, i encourage no-one to use solar panels; grow something instead*), i therefore dismiss the timing particulars.

Tibetans make head to ground contact on their pilgrimages, taking a few steps in between and yet covering long distance; their blessing collections at the lama 'displays' / charging points are also done with utmost deference (*denoting the figure head's inscrutable positions and easily raising suspicions of feudalism, patrist hierarchy as the weaponized matrist 'social' matrist one up womanship strata spikery*).

hip strata spikery.

as a sweetener for my harsh word i offer a quote from 19=260 (*dedicated to R Khalifa*) by Jose Arguelles who promotes a "second Quranic dispensation." (*god is math, god is number*): his last great work is a 'synchronotron, a 21x21 pyramid/square/cube dealie; he made efforts to convert the Vatican and therefore can be classified / lumped in with a another great big numb[[ERR]]nut who writes himself into the greatest possible narrative: Brian Golightly Marshall (*for whom, other than Jose, i have little affection .. though the late Jose has enraged my many a time too in the past*).

"Because of my efforts to alert the Vatican regarding the proposal to reform the calendar, replacing the Gregorian with the Thirteen Moon Calendar, I also discovered that the Vatican Observatory, the Specula Vaticana, was also located in Tucson 85719. How could it be that Khalifa and the Vatican had ended up in the same general neighborhood, and now I, with my discovery of the Law of Time, had established a third point of convergence in zip code 85719? The only answer is that God guides whom He pleases, and reveals to whomsoever He pleases, whatever He wills."

a little later he takes the liberty of taking the 300 from sura 18 to mean 3 years (*not instead but alongside Khalifa's full 300+9 we had left on this tortured beachball since 1980 - see p. 467, Final Testament, Appendix*

25) and apply to both Khalifa and him (*he's full of tricks when it comes to 'schotsje lopen' [[fashionabilizing fraction fetishes .. relentlessly]] ... feels not quite as abominably fake as the seance style of [[psyob]] Bob Dobbs with his latest counterpart 'JW' / 'ion' [[out in the open sect with huge online archive]] or as abject as french JDLers threatening Soral and Dieudo in public rallies [[with impunity]] but it's reaching nevertheless*).

death blow to Bob Dobbs / Bob Neveritt ... since he just can't help himself and continues his to uphold his

broken record digitation and E-wastrel addict to himself status ... he can even discuss soap and hide his

germophobia ...what more perfect milestone can he hope to reach????

mediation = diffusion = cools and inflates, excavation in the abstract

a new medium dilutes, cuts and pastes the old media profligately, mass production ratchets exploitation

and rapacious expansion up

first there was the deed, then the accompaniment in song and poetry and wherever the vertical cooling

treegrowth was replaced with social stratification and proliferation of masses and top down command

structures, these hierarchies created climates for literacies to further formalize such cancerous growth.

It's Bob's job to bullshit a mile a minute to deflect all the flippage from going below a certain level,

prevent it from going all the way down; for all his vaunted criticism of literacy he props it up chronically,

hysterically, moronically, machinically. Bob is the devil personified.

The purpose of this page to provide an overview of our book about the End of Time and the numerical analysis methods we used to present possibilities and make End of Time predictions about various events such as the coming of the Imam Mahdi and Jesus Christ (p).

Our book is not a collection of End of Time prophecies. You can read, free of charge, one of the largest collections of Islamic End of Time prophecies, on our associated site: www.discoveringislam.org/end_of_time.htm . Our book presents our own numerical analysis, which you will not find in any other book, and that is why we feel it is worth paying for.

Our book is the first and only serious full scale study of the End of Time, based on numerical analysis of Islamic sources (*Quran and Hadith*), Arabic words, and historical events. It is the result of extensive, full time research, that started around October 2010 and is still continuing. Islam is our religion, but the book is an intellectual endeavor to discover and reveal the truth about the End of Time and its secrets, not simply from an Islamic perspective to validate Islam. This book should be read by every human being on Earth. The book is very useful to Jews and Christians whose perception of the End Times and End of the World is limited to the Torah/ Talmud/ Zohar or to Biblical (*Bible*)/ Messianic prophecies and apparitions (*visions*).

LOVE, and technical information about Halley's Comet Christ and 1 Reed Topiltzin Quetzalcoatl

Posted by **Graham Robert Pence Kent** on April 4, 2014 at 7:19am

[Send Message](#) [View Blog](#)

to Begin this Blog I wanted to start with an email I just sent Andrew Bennett of Joshua's Long Day.

Andrew,
I've done some calculating using a calendar converter for your dates so at least I can agree with you on these points (*in the Indian/Aztec/Maya calendars*) where Halley is likely travelling in the skies from July 21 - Sept. 15 5 BC, the last, 56th day is the day 1 Reed. (*Scroll down for this comparison in the Long Count for six of these intersection dates for Christ/Halley*)

Although I place the year 1 Reed in 4356 (*technically 32 BC*), a Comet did appear in the Maya Records in a ten Reed year in Current Era 943, I have discovered this year to be 4352. Of course this makes 4356 the equivalent of 947 C.E. for the birth of Quetzalcoatl 1 Reed. (*Christ*)

But four-digit years aside, at least the Long Count Calendar dates for 5 BC are consistent with the sightings of Halley and the birth of "Immanuel" referring to the word of God made Flesh; however a one reed year came four years after the Last 1 Reed Day sighting for Halley.

A larger pattern for Halley emerges "Quetzalcoatl is represented by the Aztec historians as a white man, wearing a beard and enveloped in a garment covered with crosses, and resembling an European monk or priest. Some have accounted for him by the supposition that two personages have been confounded; one the early "culture hero," an entirely mythical character, another the pontiff king of Tulan, who assumed dominion about 873 A.D. His reign in Cholula lasted about 10 years. Others have imagined that some visitor from a foreign shore had appeared and introduced great reformatations and this gave rise to the traditions." ---"Myths and Symbols; Or, Aboriginal Religions in America"

By Stephen Denison Peet, pg. 390

873 + 3513 (*within four years of Menes of Egypt as a beginning point for Current Era*) = 4386 + 10 year rule in Cholula = 4396

Usually the date for his rule in Tulan/Tollan is 973 years from 3409, the old date for the birth of Quetzalcoatl before 1 Reed Quetzalcoatl (*Jesus/Immanuel/Topiltzin*) and this puts his rule at 4383 or 4382 in a 1 House year.

Another clue is 4363 (*8 rabbit year*), 878 years from 3485, the Arabic flood date, using this date, when Quetzalcoatl/Jesus is 7 years old, this makes 4352 the equivalent of 11 BC, in accord with Halley that seems to be the same date as 4 or 5 year before his birth year in 4356 1 Reed.

(*4396 is 33 after after 4363*)

Although the Crucifixion even was most likely the years 4398-4434, most likely between 4428 and 4430, when the year was 10 House, and when the year 34 AD is reached from a 4396 1 AD beginning. 4428, 4429 would have been 76-77 years from 4352, 10 Reed year.

The most intriguing is when I used the dated information you supplied me.

I ran the numbers through a calendar converter found here. You can look them up yourself using this program found at:

<https://www.fourmilab.ch/documents/calendar/>

1] September 13, 7 BC = (*9 Sun Ahau, Solar Lord/Flower*)(*Your birth of "Jesus"*)

2] July 21, 5 BC = 10 "Caban, Earthquake" There was a fuzzy star in DONGING [LM] which then trod through WUZHOU. It [re-] appeared to the north of HESHU (*Jesus*) and skirted XUANYUAN and TAI WEI.

3] August 3 BC = 11 Monkey-Artist on the new moon - thus the comet was visible at sunset - it appeared in the west. It trespassed against CIFEI, CHANGQUI, DOU (*DUO is The Big Dipper and Arcturus*), Saturn (*perhaps 180° from where it normally would be in Taurus may have been in Libra beside Arcturus in the east at sunset with the sun in Pisces in August 31, 5 BC. Then Arcturus would rise in the east at sunset. Thus the comet may have been beside Arcturus and when they had passed to stand directly above Bethlehem, the comet travelled with earth's rotation to stand still directly above Bethlehem till the wisemen had found the house of Joseph and Mary with Jesus.*). It pointed its rays again penetrated to the middle of ZIGONG, with DAHUO right behind

4] August 5, BC = 13 Reed, New Year on 1 Pop (*New year*)

5] August 31/Sept. 1, 5 BC = 1 Tishri Hebrew, 3757 = 13 Storm/ 1 SUN AHAU Lord Flower Very appropriate for the standstill on the most sacred day of the Maya Calendar, 1 Ahau/Sun or first Father.

6] Sept 15, 5 BC = 1 Reed, 1 Zip (*Even more fitting!*) On the 56th day (*September 15, 5 BC when the sun must return at the lunar eclipse = blood red moon reflecting a red sun as it moved with earth's rotation the night Herod executed the High Priests*) it passed from view together with CANGLONG." East Asian Archaeoastronomy, [[*Han shu. Wuxing zhi*]] ch. 27

Graham

P.s. I almost sent this yesterday, an important day, April, 3... one more thing, 4352 - 1238 = 3114, so this would make Joshua's Long Day the equivalent of the Maya calendar beginning year in 3114 BC, that year was 1,238 years from a 5 BC HALLEY!!! IF you combine our records, you expert in Western Calendar, myself dominant in the Indian Calendars we have quite the discovery here. As far as the most exacting, I'd have to say we modeled our 4 year leap day from the 4 year day-signs of the Maya, how a 4352 10 Reed finds a 1 Reed year four years later in 4356. The Maya "Adam" was Camaxtli/Mixcoatl who was ceremoniously revered every four years, he was also the earthly "father" of Christ/Quetzalcoatl, who looked for his fathers bones at age 9, at age 7 he inherited his mother's weapons. Both Christ and Quetzalcoatl were born in Caves did you know this???

160 5planetary, 8th of april Cees

The Earth was not handed over to man without giving instructions for use but at the dawn of History, the Bible tells us that from the seed of Abraham a "people of priests and a holy nation" was to come into being as a blessing for all the nations of the Earth. The rebirth in the 20th century of this dormant /holy/ (*set apart*) nation was heralded by the call received on the eve of World War II by Hugh Schonfield, a British Jew, who founded later the Commonwealth of World citizens and was the first Jewish translator of the New Testament into English^{^1} <#sdfootnote1sym>. When Hitler decided to eradicate the Jews from this planet and build a ruling nation of lords, Schonfield felt mandated to carry out a task for which he had been prepared since his childhood: just before the Munich agreements, in 1938, in a transformed state of consciousness, he dramatically heard the words from the Prophet Zachariah: "Not by might, not by power, but by My Spirit". The Nation he then founded did not survive him due to lack of support but the task was left for us to carry out. It was therefore appropriate that from Germany, where Hitler had planned the extinction of the Jewish race and the entrusting of world governance to his own nation of lords, the World Servant-Nation should be given a voice again.

The Tübingen discussions were chiefly aimed at giving a visible shape to a revived embryonic Servant-Nation. They revolved around the new name it would bear, its mode of development and expansion, its structure, its

constitution, and the role which cybernetics could play in spreading the message of World-Service. Symbolism and numbers?

Schiller on a JW congregation i guess his mom got him into *(when she wasn't boarding him up and choking him into ultra nerdism with books)*:

Your catatonic image is from two extremes, neither of them good for a person, but one is outright demonic in the sense of human selfishness, and the other is introverted, boxed in, shelled up.

= kin 255 ... which funny enough has kin 167 show up in a square ... which is today's kin, my dad's (*hexagram 'great invigorating' .. would be his 125th spin*), wavespell 2 of the 5 in in a galactic season .. day 48, 3rd lunar ring

The code discovery of the uChing has been published as a daily / heptad (*week*) practice in the Star Travelers Almanac of Synchronicity of the Galactic Seed year, 2013/2014. This is the follow up of a practice done in between 1997-2013. In this we established the Cube of the Law, which imploded at Galactic Synchronization into the heptocubico that we use now to study our 6+1 mental spheres. In this cube meditation we did, all the UR Runes have become Master Codons. Now we can learn more about them in this new practice that has started. We can experience the logic of being inside this heptocubico, and how it is related to the cubes around it in the infinite cube field of the Galaxy that we inhabit.

In the new heptad practice we decode the Base Matrix Unit of the 64 cube numbers. Their BMU is the position in the telepathic Synchronotron 441 matrix of 21 by 21 units, which we can localize in our brain. All the 64 cube numbers have a BMU that goes from 63 to 378, with intervals of 5 in between. In the first sixteen moons after Galactic Synchronization we decode a sequence of cube numbers in their cube number groups, starting in the first Magnetic Moon of the Galactic Seed Year (*2013/2014*) with the first cube number group: 13, 44, 19 & 50. After sixteen moons we will continue with the second of thirteen sequences of cube numbers. This is again a cycle of 16 years, the result of the Cube of the Law practice, done in between 1997 and 2013.

Almanac-Galactic-Seed

One cube has six sides and these are related with one line of the hexagram. If we are in the center of a cube, all the sides can change into another cube or cube number. On Dali we change the bottom line/side, on Seli the second line (*right side*). On Gamma the back side, which is the third line. On Kali the front side (*fourth line*). On Alpha the left side (*fifth line*) and on Limi the top side / top line of the hexagram. This follows the logic of a dice. In our decoding the bottom line has value 32, the second line (*or right side*) has value 16, the back side 8, front 4, left 2 and top 1.

If the line is yin it will change in our practice into yang. This means that the value of this line will be subtracted from the cube number that perceive in the center of our practice. When its the other around, changing from yang to yin, the value of line (*or side of the cube*) will be added to the cube number in the center. In this way all the sides of the cube are connected with another cube number. We can only perceive this from the center of one cube, which is connected with six other cubes on its sides. If we add up these 6+1 cube numbers, we have decoded the BMU of this cube number, hexagram, UR Rune or DNA codon.

The channel is 144,000 and they say to the 8 spies who feed them at the improper times (*not soon enough*) as Israel should have said to the 10 spies who convinced them not to go into Canaan and to say to Moses well you had us pick these men. They say to these 8 men. YOU HAVE NOT BEGUN RULING WITHOUT THE REST OF US HAVE YOU. If they wake up, they will say no we have not, and yes we see that the elders and the arrangement of our society is lying to you telling you that we want to control all of you. BUT no it is they the WT, my Judas beside me who is doing this to you. And so it motivates them to do as Jesus did when that hour came necessary to do it. Sacrifice is not suicide. Plenty of enemies will sacrifice you. If we get a day and hour asteroid we are going to need someone to sacrifice or no one will do the right thing to live thru it. Like John I don't want to be beheaded, but if waking the bride does behead me so be it. Let it not be Esther who beheads me, but Haman, or Herods whose LOL my sister.

by the way I have about 3000 color charts to guide thru every topic of reconstructed world history and other things it proves, like (148) Nahor Mes.Kalumdug's suicide to join Ur's founder (239) Peleg Mes.Anipada in heaven because Peleg's son (209) Reu A.anipada wouldn't go. So Nahor called his grandson (49) Haran A.Kalumdug back to Ur and they poisoned themselves with 4 guards and 68 wives, with exception to Lot's mother. If she came down, pregnant or with baby Lot, then it was 38 years later that Abram (27) brought Lot (38) and his mom back to Harran because that is when Abram built his house in Harran (1991bc) and married his 17-year old sister though they both lived with his father in Ur.

Russian alphabet is compared with numbers in numerology in detail, but alphabetic systems of other languages can have similar linguistic analyses.

The eighth page compares phonemes of English language with numbers in numerology.

First page describes sacral azbuka of Cyrillics and letters of Slavic alphabet, namely metalinguistic formula and multiple-valued philosophical senses of Cyrillic alphabetic symbols.

Second page represents metalinguistic azbuka or otherwise to tell the sacral logic formula of contemporary or modern Russian alphabet. Namely contemporary letters or characters are compared with esoteric sacral formula which Cyril and Methodius have included in the Slavic alphabet.

Third page results mathematical and numerological numerical systems of some ancient and contemporary alphabets.

Fourth page results information about gematria of words, namely about geometrical perception of words in numerology. And also letters of contemporary Russian alphabet are compared to numbers of duodecimal scale of mathematical notation or calculations.

Fifth page shows spectral parameters of letters in the Russian alphabet. And also fifth page represents dictionary or otherwise to tell gallery where graphical drawings or visual images constructed agree to color characteristics of human names.

Sixth page results logic puzzles with letters or intellectual linguistic conundrums which can be considered as mantic operations or divinations as a result of which it is possible to see words as predictions.

Seventh page results information on numerical values of words or names which can be calculated according to numerological numbers of alphabetic letters or sounds (*phonemes*) of human speech.

Eighth page gives comparison of sounds or phonemes of English language with duodecimal numerological matrix of the Russian alphabet.

Ninth page gives numerological methods for calculations of human names according to ratio of alphabetic letters or characters with decimal and duodecimal numbers.

about half of the nearly 40 vids there is the guru speaking in black against a white background (*rockbottom of tastelessness in my opinion, not to mention digital white actually hurts me, student of ice ages under John Hamaker .. whose guidance by and large holds*) ...

Luc Sala ran the very first internet cafe in a disused brickkiln on the edge of the townpart of jews, with stackery considerably tighter, streets narrower i was turned of by the HDS at the time cause i saw the effects of nerdery (*it's bad to worse effect on all nerdism inclined .. folks**) and labyrinthian excuse musing which in the mechanoracularity of dreamspell i so resented also. In that case it took one of the underlings and ran (*a[]way?*) him.

* Rowan who's blog i follow as consistently as he keeps me banned from commenting (*except for a birthday every 5 years*) hates the word 'folk'. I used to argue against his overemphasis of difference between arabs and jews when we still tapped keys at each other and i think time has vindicated me but he ain't gonna admit it ..

sure there are valid aspects in the scattershot overpower tactics of alphabetization which is but the dark run-up side of/to machismo ammo breathing in and out is/as brutality 'vs' literacy.

remixuppityness is the nerd's 'triumph' (*isolation more like, remember that last line i quoted*) and to mix JA with RUH* would certainly be 'mindblowing' .. but more likely to blow minds UP.

back to di .. again, i quote:

"Her bulimia can be seen through the Not-self Gate 55, which her sun looked towards. When highly emotional, the

inability to take in nourishment. Indeed it is not uncommon for 55s to just not eat when that emotional wave gets in. Combine this with no consistent personal identity in the open G and you have the result of someone who would try to choose an identity they wished to have - slim, pretty and eloquent would have been high up on her list to try to be. With her fixed will behind her, sure she would have naturally become bulimic in chasing the Not-self themes mentioned."

Globally synchronized Rainbow Bridge Meditation + Galactic Activation Portal Day! Time: May 15, 2014 all day
Group Type or Event Location: Planet Earth (*aka Velatropa 24.3*)
Organized By: Foundation for the Law of Time

Event Description:

"There will come a time when the birds will fall from the trees, the rivers will be poisoned and the wolves will die in the forests. But then the warriors of the rainbow will appear and save the world." —Cree Indian saying

What: Create a circumpolar rainbow bridge around the Earth. Who: Everyone (*all are included in the rainbow!*)

Why? To generate a world-wide telepathic wave of love that encompasses the whole Earth and all sentient beings, creating an interdimensional bridge and opening the stargate to other world systems.

How? Through a rolling wave of synchronized global meditations, we can connect our collective mind and electromagnetic field with that of the Earth.

When: This meditation is globally synchronized every seven days (*days 7, 14, 21 and 28 of the 13 Moon calendar*) to build a rolling wave of unity that culminates in the manifestation of the circumpolar rainbow bridge! On every 28th day of the 13 Moon calendar we practice a more detailed meditation. Let's focus our mind for these days on the image of the rainbow bridge. Wherever we may find ourselves, whether it be at home or at a sacred site, let's unify our mind to create a permanent positive thought vibration around the planet by visualizing the rainbow bridge as the sign of Earth's return to Her original state of pristine harmony and peace!!

"I am one with the Earth, the Earth and myself are one mind."

VISUALIZATION INSTRUCTIONS Before the meditation it is good to take a few moments to clear your mind, dissolving all thoughts as they arise. Also focus on feeling love arise in your heart. When you feel your mind clear, then begin the visualization. Visualize yourself inside the Earth's octahedron crystal core. Feel your heart at the center of this crystal core generating an intensely blazing point of white light. This light from your heart core creates an etheric column that extends to the North and South poles from the blazing center to the tips of the octahedron. Now visualize a great stream of multicolored plasma-filled light emanating from your heart core and flowing along the central axis toward both of Earth's poles, shooting out from them, to become two rainbow bands 180 degrees apart. As Earth revolves on its axis, this rainbow bridge remains steady and constant, unmoving. Feel the two streams of rainbow light rushing through your central column, shooting out from above your head and beneath your feet to create a rainbow bridge around your body. Now you and the rainbow bridge are one. The rainbow bridge of world peace is real. Visualized by enough people in a telepathic wave of love the rainbow bridge will become a reality.

Luminous triangle made visible, feel the pulse of the sacred current calling you home.

Three is the ray of rhythm, the galactic heartbeat of natural flow. This universal river offers you movement, and all possibilities flow within its pulse. Open yourself to its current of change!

Number three suggests that there is something you desire to change or integrate into the natural flow of your life. Become the "third point of light," created from the integration of polarity. Feel the pulse of the sacred trinity within you, revealing a new creation. Allow it to integrate that which has seemingly been lost, separated, or obscured from your sight

If you have a tendency to be scattered in your creativity, make an extra effort to focus your energy. Align with your intention to express the truth. Now is the time for the Great Mystery to reveal itself through you. Know yourself as the capstone of light. Allow your creativity to express your spiritual journey.

many pics i hadn't seen before ... like the one of the staircase mural 2:31 ... is that at TESC by any chance .. not how i remember it .. it was painted over apparantly and i never saw the whole thing ... got anymore??

The scripture posted at the end of the video spells death (*forecasts death*) to all people under an illusion that God will save them, or man's technology will save them. Here is how. The word is Jehovah not Lord. Lord means Your Owner. Jehovah means He that is as He unveils and proves he is. So it doesn't mean shout out and call the word Jesus or God or Lord or Jehovah; it means know and act on cause and effect because that is how God created it. I woke up with a ghost trying to enter me. It had the ability because of two factors. My drunk friend had 420 pot smoke in the air and thought it funny to grab me and blow it mouth to mouth into my lungs trying to push him off, and then when I woke up seeing the ghost trying to get into me, that ghost was from his ectoplasm while asleep watching TV in the living room. When I called God and Lord and Jehovah and all those things HELP ME, nothing happened. When I stopped panic and thought, okay what does God Jehovah expect me to know... I trusted those lying spirit mediums who claim mediums pass out to give the ghost the vapor to make the apparition. SO I called out to my friend, shouted, he woke up, my dilated eyes closed up, room went back to dark night lights and the ghost vanished. I sighed with relief and quivered in the adrenaline of terrified fear over the past moment. CONCLUSION: Armageddon comes and you need to understand Lots wife did MORE THAN (*more hinderance; much less effort, massive gripping*) than just look over her shoulder. It put her where death came down to the ground whether she had been standing there or not. This is how 8 billion people now die. Two facts. 8 billion could have built very small family size arks and floated like Noah; 8 billion can now fit on peaks of mountains for one year when the Flood occurs again but YOU people will not believe. It is all about you confusing language; Babel never ended. in fact Eve bitching to Adam was also Babel.

Reza Negarestani's vividly visceral account of the trauma of becoming, of making, of leper creativity can be grafted onto the trauma of creating/acquiring language, to speak as an act and also for the swamp apes painful ordeal of making a meal out of speaking. For each time one speaks there is a void between intent and logos, there is a cavernous ontological difference between hope and word. Every time I utter a word through the spinal catastrophe that is my anthropoid speech impediment I am, on top of producing such expressions through a mechanism comprised of myriad bio-evolutionary contortions and mutilations, also saying words that correspond via lack, via void, to my thoughts and intents. As I scream insults, whisper tender truths or exclaim emphatically- myself, my intent is maimed in the process, in making my vocal mark I leave a part of myself out on the track. To vocalize is to conduct a process of audible poly-furcational automalum, an ontological disintegration. Upon a singular word, we can contemplate how this tragedy of voice operates: as Nicola Masciandaro (*thewhim.blogspot.com*) once commented – "The vocal image of death? – Saying ones name aloud".

first presentation is good though dystopian and problematizing tox/E-waste not at all (*get past the atrocious intro audio in a hurry*). It is by a UCSD prof named Benjamin H. Bratton; his effort comes in via skype and complete with cartoonish illustrations (*horrifying, cynicizing tragicomic insight conveying sights and seeings of tsa/nsa type securitization induced rubs that go waaaaaaaaaaaaaaaaay too deep and far*) to which my list note applies:

may 21st 2014 i take in this flood of dystopiates

.. the next guy is another Benjamin, younger and more abstract; audio worsens to 'unstandability' for me at 46 minutes .. i pick up with guy 3 at 1hour14, he is full on abstract:

'understanding is compression itself'

(1h50th minute) ... yeah as long as you don't ground it in the Julius Hensel manner of ways.
Gets into french thinkers on the subject (*Larruel* *[[whom he calls utopian]]*, *Badiou*).

when 2h20m is nearly up the audio goes to crap again

4 month long exhibition (*13/14*) in Vancouver includes these half criminally abstracting academics who's main task it is not to attack tox and instead swaddle it in fable and fancy

In conjunction with Access Gallery, the independent curator Mohammad Salemy presents "Incredible Machines," a conference addressing different aspects of the expanding role of networked computers and digital processes in the production of knowledge.

I have a dagtaak (*dayjob*) mourning the man i've become in spite of my idealized and strived for chimerical heroical self-made self .. mankind should never have thought he was better at chemistry than a compost heap ... presiding over which as herbalist who twists rope and weaves canvas to spin rocks into deep mudpools .. would have been fully satisfactory ... as is we have monsters like him, like me, like conchita .. .and then there is the asexual herds of nerdery as in Paul Laffoley ... the artist / systemicizers like JA and ... i could list up to about 50 i've looked at closer over the years ... the pressure it too great ... i buckled ... blame it on the pharmaffiosi. 14th of may 2019, k201, rhythmic dragon:

put the first line of code below at the top of your file and place a '/font' (*between code brackets*) in front of ever new date to add the shown tone colour to it i can do a mass replace for that cause my notes have only the dates 'boldened' so i 'tie' the 'noot' with a few keystrokes for 2 waves at a time ...and usually 5 times that cause many days get/got skipped / filled in&out differently i must change the skipping though otherwise the tone/colour sequence get all skewed ... When done properly though, this is helpful to make 'strong' points (*interests, etc,expressed tones*) come and stand out at first glance for each user/adept / devotee / student, even on first and/or furtive encounters (*at zoom outs appropriate for a quick gander at that sort of pattern stacks ... applied to the quran, with each sura on a single line for instance, one gets the idea of a chalice rather than a layer cake, perhaps a plant was the intention ..*). One would have to go for at least 3d lettering first though .. if all hope for illustrating THAT kind of depth into time can give and gain views more than dormant phasespace.

Rick:

Comment on the Chinese Flood 2953bc to king Yu (*2333-2233bc*).

The 2233bc is the sothic 137 Julian years exactly 139x 360 day.

And is lacking 180 epagum days in Peleg's 36 years (*2269-2233bc*); 5 days per year so mistaken as 720 years lacking 180 leap days as it is from 2233bc to the next global astral encounter in 1513bc (*after first half of comet strikes*

Thera Atlantis).

The death of Peleg appears to be 2213bc (*year 740 of 185 leap days from 2953bc*) as 20 years after Reu (*Yu's*) reign ends in 2233bc.

This is a result of year 2232bc of Peleg's 37 years lacking the 185 epagum from 2269bc birth as year 2233bc is 36 years lacking the 180 days by increasing 5 days in just one year (*739-740*), not the 5 leap days of 20 years (*720-740*). But as Babylon who concluded that Reu began rule in 2207bc so that this was Peleg's death of year 740 in 2947bc, the potential exists that some held fast to 239 for Peleg dying in year 640. Thus Yu (*Reu ruling*) in 2333bc is a mistake for Chaldea's birth (*Shelah's birth*) as the first kingship (*that of Reu of Ur known as Xia Sumer the crossing of Sumer, mistaken as Yao or Yu of Xia China, the crossing of China*).

I have never heard this about the terminator thing,interesting ,shows how much I know about plants ?? Monday I was taking my mothers dog for a walk and on the tractor seat were four dead bees and 3 dead wasp .My step dad just used the riding mower Saturday to cut grass so I thought that was a little odd . I'm curious on your views on demonic possession ?Lol completely different subject may seem but in end times as we are in ,in my personal opinion .We will see more demonic possession ect.I do not share many views with you on God ect. But still curious of what you think and believe?I ran into one little boy in a warehouse who was demon possessed and practically was seething in hatred towards me with no reason given ,I said in low voice leave away from me before I cast you out in His name he ran away quickly.some people would think that's crazy but I know what I felt and saw.Pure evil could be felt from his eyes . I felt surprised at how young he was to be possessed ,I would say maybe about 9 years old African American and very sweet looking boy but as soon as my eyes met his ,we'll I knew he was filled with evil.Well I know you like to see the good in everything and make peace and so on so feel free to ignore my comments if you like .I will not be offended .Take care and may God bless you with with a wonderful tomorrow should it come :<)?

Ron Haskell ---- 2 weeks ago (*edited*)

Seeing the good in everything, actually it is why I suffer, because I see both good and bad in all things! I see the worst of it, the most horrific, and I conjure notions that send chills down my back! The difference is that I choose to walk this path, I can still see them! :]

I will consider the video, tomorrow I am going to talk about the other God's, the siblings of El'Ohim, it is should be interesting! :]

Possession in youngsters is something I have considered, but the governances are so great especially considering I do not use video games and I come from a world that is pre-computer! Kids today are plugged in and electronically they are arranging their internal synapse' much differently. I think the doors have been opened by the likes of Blavatsky and Crowley to name a few, NASA too! They are the Seals of Solomon they utilize and pretend to immerse in the Mythos of names to portray their ways!

Have I met a demon, not outside of myself! Have I met an Angel? Yes, it was in a Lucid Conscious state with real-time paralysis (*sort of alien abduction style*), and I have met the Serpent named Kundalini, a two-horned Serpent to which I was in bed with! (*I am not joking!*)

I now understand why, the Serpent exists within us all, it is the Living essence of Lilith who is ultimately the mother of all demons. She is the very one who was in the Garden who beguiled Eve, Adam agreed! The curse to eat of the Dust through her days would be that she must carry us through Life and consume our dust, ashes to ashes, as she is bound through her act of "O"him!

I should do a video talking about how important it is to understand the folded man and how to Seal-out the unwanted expressions of "them", by anointing our homes in Belief, in Faith, by oil if we must, but we must know that the true oil is Love! - :) We need to turn the Kundalini Serpent down to our Pelvis, not our Crown! It is so important!

I will work a bit harder! -- Thank you for the great reply it is much to consider knowing that Children should be protected without fault, but there is something vitally wrong with our picture of this! Michael needs to stand up! He is the Protector of Children as well as the Chief amongst us! We should send him our Prayers as Mercury is about ready to appear in the skies once more again, in the Night Sky just after sunset!?

El is Hell and You Ran Us to Ur-Anus!

you are a botanizer, good .., .. but alas, also a weaponizer excesses filled fever dream book fan, a darn yarn blabber .. the etymology skills of your generation are atrocious the pretend weightlifter sets his heart aflutter and has to go lie down (*21st minute*) .. but it's alright, he gnose Jesus and his soporized snake ... check your mercury levels buddy

to 'the rocks are crying out' (*black guy (huge) holding up a few crystals and dyjabbrin bout 'groundin'*):

As the Living Word, I try to be conscious of my decisions and recently I cut a tree down, something I would try not to do in most cases. I began to dig to get the soil out from around its root base and out came a White Stone, fist size, it fits in my hand well, it is 4 sided like a pyramid, it is White Gypsum, Sandstone! It does not have my name upon it but I have put my thoughts to it, I used it tonight, to sand my feet! It works and fits to my foot like a charm!

I know what is within the stones that they should groan to be released if only a Tree would accept them once again, but now they needn't worry since they have men, fallen men who are but empty vessels who will receive the Stones if they have not planted Trees!

The Nephilim were flooded and since they were immortal by blood their life went into the Stones, their bodies sprouted upward as trees from those very stones! These were the Ancient Trees of old, the Giants we were told, and men came along and chopped them down and built their altars of their wood, they burned the Souls and reaped off of them! This is how they learned the truth on how to set a Sacrifice to restore Life's virtuous Source! They learned how to perform a Miracle and like sending Christ to Hell wasn't enough they plan to do it again!

Traditional Chinese Yu 2333-2233bc *(Peleg's son Reu)* ends his rule with the halfway mark
between Chinese Flood 2953bc and next flood 1513bc. The end of his rule is placed as Eber's
464 years after the calendar study 2697bc *(which creates it in 2637bc)*. Meanwhile the real Flood
2370bc claims this 2333-2233bc is the 100-year old Shelah coming to Ur *(Xia Sumer, not Xia China

elijahs-armageddon.com/traditional_yu_11.html This contrasts the drifts between the former
360-day Chinese calendar *(2207bc)*, then 365-day *(2029bc)*, and current Julian *(1437bc not
2637bc)*. Jupiter only stays with the 12-year cycle in 360-day calendar and does so only up to 427

(Final conclusion of mine is that the 144,000 must pull the same legal game Jesus did to prove the world doesn't stop executions of those who can save it. WHY must they do this. Hasn't it been said that Jesus was stupid to commit legal suicide not defending himself ?) because what it takes to survive an asteroid is NOT stay home, but when all the posts in American Persia have the day and hour posted on it of that asteroid telling Mordecai the day all people will be killed, then Esther the king's bride (*all the stories of Jesus speaking about being the groom king coming back to get the bride*) must go to the king because only if she shows up 40 days like Jesus did back from the dead will anyone defy government (*not in war as others will do that year*) but in a march to the mountains joining those whose last of the 144,000 were slaughtered because they had faith this 40 days in flesh can come true if the number is completed. Jehovah knows who has been selected, doesn't matter how many fakes are paid to come to this trial. Whether they stay, die, don't go to heaven, or flee in fear, they are not for that number because completing that number will result in all of them including the 12 apostles will immediately have that power to be flesh and say Fear not the asteroid because we are with you, we have not died, all 144,000 were best selected and are now together for 40 days before impact. TAKE ALL WILLING TO COME WITH YOU.

(the death of Lot's wife alone, just her, would have been glory for her saving people, not a curse, if she had been leading them all instead of lagging behind griping. LEARN from the elders in Peru when the volcano erupted who then all died because they led everyone to the hall as if protected by miracle so that mudslide cannot sweep it away.)

I mean, fine and dandy .. so you'r going to be taz- even pazful for a while only to scheme militant action that completely countermand, -dict, -indicate and plain counter the lube of voluntarity you will need and 'employ' for the happy stages before it all goes 'down hill' and into the submarines even, right?

There is something screwy and turnoffish oppressive about the socialist collectivoid tendencies as soon as they involve bundling forces, maybe not quite making fists but tensing muscles and making stands in places that are at that very time temporarily spoken for by doubt- but very cloutful forces surpassing any and all ability to be confronted on 'equal'(ly elitist) terms.

The crowding and massification is what I don't like about it. You might say I am chronically unhappy for not having given in to my fancy ideas nearly 20 years ago of writing stuff in the landscape with suitable rockdusts and make the subtlest and least objectionable impact a green guerrilla could hope to ever make on this wobbling clod. -----

To the extent that I really couldn't make any sense out of your comment, I am glad that you didn't take up "writing in suitable rockdust" twenty years ago; it would have only added to the confusion.

Personally, I would love to see some form of activist village spring up nearby the 2003 G8 Summit in France. I was hoping that the 2002 G8 event in the Kanaskis Park outside of Calgary, Alberta, Canada would have had an attendant activist village set up in the woods outside the confarence zone, but that possibility was thoroughly countered by the Canadian and US military forces who totally and uniquely took over the whole area AND also the lack of steadfastness from the "Ewoks" themselves. I realize that there were multiple high-security zones set-up inside and outside the confarence area (the military was even using IR heat-detection devices and motion-detectors in the woods, and also military climbers in the surrounding mountains with surveillance equipment), but a village of some sort COULD have been set-up somewhere well outside of the outermost security zone. I talked with a few ranchers in the area who would have let people set-up a camp on their land that bordered the security zone. So if the Ewoks (and you know who you are) would have been steadfast in their desire to set-up a activist village, they might have been able to do so, BUT they caved in to the pressures of the federal, provincial and local government. Because of a substantial lack of back-bone on the part of the 2002 G8 organizers, the anti-G8 protests in Calgary last year were essentially a failure. The organizers were so concerned about not hurting anyone's feelings that they took away any possibility of decisive action. They met with the Calgary Metropolitan Police for 3 monthes to ensure that the protests would go "smoothly and with as little impact as possible." What bullshit! Basically these wishy-washy organizers killed the protest. The only exception was the 300 car mass vehicle march and caravan to the gates of the G8 Summit. They got stopped at the first gate, of course, but the point is they tried. To those comrades, I give my fondest regards. As for the rest of the "protest", it seems that the Calgarians would only participate in a protest if there was enough Starbucks Mocha Lattes to go around to make it a "comfortable" protest. This is in large contrast with the protestors in Quebec of a few years ago. I would hope that the 2003 G8 protest events in France will be much more activistic. One of the hardest things in organizing any protest is balance between organizing TOO MUCH and not organizing ENOUGH. Not enough organization will make the protest a "Non-Event". Too much organization will make it a protest without momentum and sponteneity.

To those organizers in France:

Do Not Coddle to the wishes of the military and security forces that will be organizing security for the event. Take lessons in organized resistance. Keep yourselves fluid, and spontaneous, yet strong.

Take lessons from the Zapitista Movement in Chiapas, Mexico and also the Chechnians, whom the Russian

militarity has not been able to conquer yet, even though they have been trying for twenty years.
As for the French Alternative-Capitalism activist village, if you seek private land-owners close-by the conference security zone as donor sites for the "village" there can't be too many things the government can do about it, although they shall certainly try. You may need to get temporary gathering permits for the village or you may not, depends on local laws. If the necessary permits are in place, then there is not much they can do to stop you. Good luck in this endeavor. Powr2thePPL!

Oracle BMU-TFI Tzolkin

by Paz Galactic Moon, Spain

Hunab Ku 21 & Tzolkin study and application. Two Tzolkins: The first Tzolkin shows the Oracle BMU-TFI for all 260 Kin. (Simply add the Heptad Gate number and you'll have the daily Hunab Ku 21 BMU-TFI value!). The second Tzolkin shows all 260 Kin, but with the Oracle BMU-TFI reduced to a BMU.

For example: Kin 1, Red Magnetic Dragon

Destiny Kin/Dragon (108) + Analog/Mirror (402) + Guide/Dragon (108) + Antipode/Monkey (312) + Occult/Sun (414) = 1344.

Reduce by the nearest multiple of 441: $1344 - 1323 = \text{BMU 21}$

<http://www.lawoftime.org/pdfs/441-TFIs-Oracles.pdf>

Fifth Force Oracle TFIs of all 260 Kin

by Mayarey Titiritero Kin 193, Colombia

For further Synchronotron study. This Table shows (for all 260 kin) the Oracle TFI, the BMU and resulting Kin Equivalent. The Oracle TFI is the sum of the five kin within the fifth force oracle.

For example: Kin 1, Red Magnetic Dragon

Destiny Kin/Red Magnetic Dragon (1) + Analog/White Magnetic Mirror (118) + Guide/Red Magnetic Dragon (1) + Antipode/Blue Magnetic Monkey (131) + Occult/Yellow Cosmic Sun (260) = 511.

511 reduced by 441 yields BMU 70 ($511 - 441 = 70$).

511 reduced by 260 yields Kin Equivalent 251 ($511 - 260 = \text{Kin 251, Blue Self-Existing Monkey}$)

shows you how to do a foldable stage and on paper it actually takes the same few lines, that seem the same length, to mentally (visual bias alert) construct a different perspective and take on this image, namely the double tetra (uncollapsible if built) ... and all this plays into 'volksmennerij' and the page vs the stage, the mime of mum regiments vs the 'graven' depiction prohibition* conundrum.

ena Xidai - - 6:16 AM Dear Everyone,

We are a community located in China looking for permaculture or natural farming experts to help us restore saline-alkaline land for one of our properties in the westernmost of China, and transform it to a beautiful and fertile farm that are able to provide its residents with abundant organic foods. It would be also good if this farm can be developed ecologically into a favorable habitat for plants and animals.

The United Nations, all national governments, and ecovillages around the world are making efforts to achieve the following goals:

Protect the natural environment to maintain the balance of its ecological system

Prevent land desertification

Reduce the exploitation of underground water

--Eradicate environmental pollution

Increase the land production yield

Get maximum benefits from the land by inputting minimum resources

Maintain the sustainable development of humanity

We are also eager to make our contribution toward these ends by participating in this movement.

The Second Home community of Lifechanyuan has a total of 600 mu (100 acres) of land. We are hoping to implement permaculture and natural farming principles to transform the lands into fertile farms which are able to produce high quality and healthy organic foods, but because we lack practical experience, especially with regards to the knowledge of plant characteristics, we find it difficult to carry out the production and other work in an effectively way. We therefore cordially invite global permaculture and natural farming experts to come here and coach us.

Two of our properties which are called Kataier and Gesaer Farms are located in Xinjiang Province

and one called Nanhua Farm is in Jiangnan. We expect to begin our first work in Xinjiang. The main challenges will be to grow the right grasses, crops, and trees on the saline-alkaline soils, and to reverse the desertification of the land. This is a dry area which receives almost no rain throughout the year, and the irrigation water is mainly from underground aquifers and from rivers. In the long run, we should consider how to reduce the exploitation of these aquifers and rivers in order to maintain the balance and sustainability of the ecosystem. We should also consider how to reduce or eliminate the use of the chemical fertilizers and pesticides, and to produce healthy organic foods.

Because our community has just encountered a serious blow, our financial strength is very weak, and anyone who is willing to teach us must understand that we are not able to afford your travelling expenses or to pay any consultation fees. This is all volunteer work, however we are able to take care of your local transportation, accommodations, and meals. Because our community is a 100% resource sharing community, you can use any material resources while you are in residence here.

We look forward to volunteers who are selflessly dedicated to the sustainable development of humanity come here and give us coaching and guidance in the implementation of permaculture and natural farming on an arid land.

For background of our three new homes, please check:

<http://lifechanyuan.org/bbs/forum.php?mod=viewthread&tid=7057>

If you are interested in this exciting and challenging project, please write to lifechanyuan@sina.cn.

good day to fling a 'bezwerking' in the direction of the .. cramped tradition 'clammerers' .. not that i really
go for it .. my niece has 3 kids, she's christian and 182 too ... a good spot to make and break things ... but
she's not taking to my rocktosoilery one little bit.

uching Juryt has the seasons start at the count of three ... pick four out of 28x13??

Now we are able to synchronize this multi-dimensional and radial logic of cube numbers with the
Dreamspell. In a Galactic Spin, the count of 260 days, we find 4 Galactic seasons of 65 days. The
first Red season starts on Kin 185, Red Electric Serpent. The White season starts on Kin 250,
White Electric Dog and the **Blue season on Kin 55, Blue Electric Eagle**. The last Yellow season
starts on Kin 120: Yellow Electric Sun. These four Kin of the Polar Family with the 3rd (or
Electric) tone are always day 1 in the Galactic seasons. The chapter or cube number related with
them is the inverse cube number of this day number itself. For example, the inverse of day 1 is
chapter 32, we see if we count the hexagram line values not from top to bottom, but from
bottom to top

you remember McLuhan's water invention and (wasn't a) fish joke? It applies to the mythical, proly still as
extinct as it always was, 'cept for a remnant among the Palestinians, cruelly enough, concept of jewishness
.. and if it wasn't for 'them' somebody else would have to save the second to none honour of the world's
most unsettling ethnicity (pretendertude is a lottery casino capitalist passtime and proof of participation
slip menagerie.

Could be comets, could be climate (which has non permaculture at it's root almost always) but the changes which a people spooked and stampeded thereby, 'helps' them become warlike cannot and do not help them stay that way even if / when and after they pretend to settle down - as long as war, like sex, food water and in a store near you too .. soon, AIR is allowed to remain a free of rules fight and a for profit dirty devil business.

the protocols are true ... every bit of it ... and worse obviously ... that's cause the worse is done by the part jew, the mixblood .. and it takes a lot of dilution before the whole multicultural chain [of event]gang thing becomes a movie with dates and timelines racing around in your awareness not even remotely as fast and long as they did in the noggin of Jose Arguelles but fast enough to 'leave' you in the dark (radionically greened cellar produce waaaaay before the recent scientific 'breakthrough') and paralyzed, just like at the movies .. but really a global shaman in a trance -- so the 'analphs' (uncompostibles) receive quite a work through and (tweak) out .. eventually .. through lasting care. This is what i recommend as a zionist treatment, they themselves pointing the way, permaculture diets behind hi walls. Speaking of which, we have the Chinese invasion occupation of Tibet to 'thanktinker with' for this 'Arguellesskill' development. He was quite helpless in front of crowds yet always frustrated they were so puny .. prolly why he gave THE Bible txt lending itself best to most 'humanitude' mocking abuse of entitlement and privilege (the 144 thou one, a totally not nonanthropianizable [-piatable?] but certainly not exclusive anthropic (-poid?) proportion, very much into the phase of combinatoricious type sagacity a 'hi' civilization will be sure to visit ... IF/as long as you allow hi to refer to canopy, not roofs (or worlds, nor roofs thereof) .. unless you combine the two with very clever pleaching that is, of course ..

The grains of sand type innumerable the elect's offspring would be (close second in most damaging txt ever .. when/cause applied to a bloodline .. or a magic salt, a bookkeeping trick, a stage secret) could only be achieved at the cost of all of what and exactly who engendered that desire, the people threatening to turn themselves into a first world class (and the world's first class) poor curmudgeonated nerd breed(s?).

Lots and lots of what i rave away about here sunk in from reading Andrew Lehman (i would appreciate an account of what happened since his operation for a brain aneurism by the way)

The huge howler of it all [(and he always wanted to be funny)], i mean the 144thou thingie, was, that Jose A used a fair/market deceit of the very oldest kind, a type of three piece monty as his main tool. this anagrammar of numbers was as far as he took the term 'breakthrough' back to its roots ... which frustrates me no end to this day ...

In short and other words, he employed a swapswitch swashbucklement of 3digits 144 -414-441 in order to weave his meaning fabric even more catch all tight, spilling very little, leaving almost none through to get away ... a way of that light ... which he let his letters get filtered number by ... and got your number by too ... hell it, it may make you number too .. at least he thought so ... and, like so many a savant, tempted by appreciation, wether single or in crowds .. he thought it was the only way ... not realizing that from literacy to numeracy is from bad to worse instead of the right type or radical he actually idealized and paid lipservice to as well as used to set his hopes on (blush/shame .. instead of his climate improver 'Crests' (dot org) in select remote places, we got downtown Soros outfits) .. so don't count on his numbers for letters trick nerdpresti[digitiz]ige to leave you lighter

whadaya wanna do? cycle puny humans past a pile of rocks (polished and/or not) or .. cycling galactic beings through multi multi story treehouses?? Could someone [w]rite and take a cosmic poll

will you now claim i am a double agent setting up a psyop excuse for goalpost moving, enabling 'them' to claim more and more territory sailing in under the innocent looking but nevertheless false flag of tourism (so so related to tourism)?? Well, how DOES reput and goodwill spread if not through rainbow veins??

what if JA was a schizophrenic with relentless analph chatter making him desperate for and 'glorifications' of the meditative state (beyond abstractions yada yada) yet firmly believing you could dial into it? Either way, after each refreshing space out and 'galactianic' swim (always on the look out for a better technique yet claiming they all aimed at the same) he'd return and work on his pastiche patchwork of stuff with yet another lean on i had first hand experience of just that via/with Arnold Keyserling (in the 80s) and kept wondering why Drew Hempel had such mordicus visceral aversion to JA and then analyzing nutters like 'fivebodied' Bob Dobbs (of 'lockdown bob rule', a psyop from beginning to end - a 20 year difference in birthdate fraud for instance) also helped a lot or else i would not have come to lines of this thinking so easily.

William Irwin Thompson on The Horizons of Planetary Culture

Michael Garfield 621 -----20 views --- Published on Jul 9, 2014 ----[Like] 2 [Dislike] 0

One of the best conversations I've ever had: My second rap with poet-philosopher William Irwin Thompson, former MIT professor and founder of the legendary Lindisfarne Association, on the transformations of self and society in the collapse of civilization and the emergence of a planetary culture - cyborgs, surveillance, and psychedelics in an age of paranoid apocalypticism and inspired new visions for our species.

Get ready for a wild one, folks...comments welcome!

"Were you to attempt to read all the books Thompson refers to before [absorbing his work], you would likely forget why you were reading them before you finished them. Thus unprepared one must ride the whirlwind with Thompson, holding on for dear life as he escorts us back and forth over ten millennia, integrating the warp and woof of myths into the tapestry of our flying-carpet time-machine as we go."

Some of the topics covered in this conversation:

- The disappointment of 2012 & each generation's coping with the disillusionment of epochalism/apocalypticism;
- Douglas Rushkoff's book Present Shock, "fractalnoia" & conspiracy theories, the Deep State, media warfare, paranoia as a necessary step along the path of spiritual evolution;
- The interplay between the growth of a global electronic economy and the awakening of the collective unconscious;
- Intelligence as a primary function of entropy to maximize freedom in chaos, fear & intelligence as two sides of the same phenomenon;
- Prokaryotic vs. eukaryotic strategies, the bacterial bioplasm vs. sexuality & individuality as complementary archetypes;
- The pop mythology of the lone genius vs. the reality of collective intelligence;
- Fractalnoia & Autistic Spectrum Disorders, possible relationship between "intense world syndrome" theory of Autism & the psychological impact of electronic communication media;
- Sloughing off the Surveillance State & making it an art object, Big Data/Quantified Self revolutions in the emergence of a new level of personal psychology, Buddhist Geeks & Mindful Cyborgs;
- Psychedelics and Yoga as alternative spiritual paths, LSD's legacy of both burnout and the inspiration of paradigm-changing scientific discoveries;
- Richard Doyle on the exegesis of Philip K. Dick, discussion of how revolutions are colonized by existing power structures, Jan Irvin's argument that the CIA created psychedelic counterculture;
- Isolation/solitude/privacy as prerequisite to the classical visionary/mystical experience, an opportunity eroded in the hyper-stimulation of electronic culture;
- The self as a collective, the "entelechy" as a colonial organism composed of elemental entities & of which the human as defined by modernity is only a part, wearable computers & medical nanobots as "machines in the ghost" with both light & shadow aspects;

- The perils of being an early adopter and the importance of maintaining a critical attitude toward new technologies;
- How Buckminster Fuller & Marshall McLuhan were destroyed by celebrity, the related genius and tragedy of Terence McKenna;
- The liminal spaces of festival culture as a social equivalent to the mystic isolation of individuals in classical wisdom traditions (*e.g., Burning Man as an island population, rapidly evolving at a distance from the main population*);
- Post-tribal/rule-based sports moving beyond "war in peacetime" toward the individualized rejection of corporate culture, improvisational solo extreme sports as a resurrection of mystical privacy;
- The etherealization of currency (*e.g., Bitcoin, Dadara's art-as-money projects*), of marriage (*e.g., polyamory, nonlocal monogamy*), & of other cultural institutions;
- "Wissenkunst" or "knowledge art" as a new art form emerging in post-academic remix culture, "standup philosophy" as an improvisatory approach to the university lecture in the same sense that post-religious spirituality evolves from religion and jazz evolves from classical music composition;
- The critical importance of failure to transformation & of stigma/social exclusion in the creation of revolutionary figures.

snakeapple tree white-lightning-gate - Shared publicly 5:57 PM ---- #Magic My brother was a stage magicians apprentice. After receiving a standing ovation from the magic circle for his initiation act, his master got into film, he was a professional film editor back when the job involved cutting and taping celluloid. My brother and him were making stop frame animations together. This is how I know for a fact that the stage magician is interested in psychology, in the suspension of disbelief, in how the mind tricks the mind. They are experts at it, not only in making fluffy bunnies appear to appear from an empty hat but in the whole process behind how the observer is tricked into perceiving it as such. The magicians interest in perception is a different angle to the shamans interest in perception. Both are aware that the mind tricks the observer. The magician uses this. The shaman seeks to strip away they veils. Shamans are taught to detach from mind. We are not the mind. Self is not the mind. We all describe it as veils because that is the most accurate terminology or analogy we have. The magician is aware of the ability to perceptually travel between the veils. The shaman has the same description but focus is on deeper or different veils. I suppose it could be said that a shaman focus on his own mind while a magician on other peoples minds. Hypnosis and self hypnosis are the interest of both. Everybody without exception is at some level self hypnotised. C'est ne pas une pipe. ? Patrick Coleman originally shared:

.. from 2001 (*we've had this convo before by the way .. and i don't remember anything but the usual disappointment ... but at least i know what to brace myself for by now ... how is another matter*) ... 23rd of march:

hell i hit people quicker than that Gray'm (*Oh Great Grate HymenHumHymn to the empireligious Wan Dinter deracination*) .. problem is getting a change to be visible, people finding stuff ... more and more of a problem (*see below*) ... apropos DW, ... he promised Callahan material at one point but never delivered ... instead embroiling himself with shadiest of still further disappearance acts: VBridges / Laura Whatsherfatface embrolio .. the latter quotes Michael Topper who disappeared from public life (*even all trace of tapes they sold* .. i have yet to hear his voice .. and it took years to find out what he looked like*) claiming psychic or psyops attack (*really he got cancer and died in 04*)

funny enough both Callahan and Topper have this kind of Kwetal quality to them. I devoted an early chapter in my dutch work to this cartoon character (*capable of the fairy tale type natural magic, he's garden ornament size and his buddy is a garden ornament sized gardener with mini wheelbarrow*) in the "Bommel stories" ... well, sizes are kinda distorted throughout the whole series a cat and a bear get into a car and are somehow made to look like it's perfectly fitting and natural ... so much for natural

Joerg Bergstedt does ... but he has not been translated i don't think.

somewhere else i go into the curious use of the word 'grey' assigned an entire spacerace ... whereas in my book/cosmology ... it's as earthy (*and humane .. unless you do stupid wall stuff instead of compost with it*) as it gets

Hi my name is Kreg (*ALIENKREG@aol.com*) i just was checkin out sum stuff at your sight, you have mention of Michael Topper, and it caught my attention on a search. you have a link there, and i'm sorry to have found it not active, (*apparently the server is no longer hosting it, i think?*) um, well, if you have that page maybe could ya send it over? please? i'm very interested in this man's teachings and have been for some time now, i'm also intrigued by yer reference to 'may be trying on a new suit of arms as we speak', please do share what you have found, as i think, i too, may have found something as well, way too early though jus found minutes ago, i get back to you about it. looking forward to hearing from you, sincerely, Kreg eight should be eighth really that's why but it is eighth I believe; anyway I am critical of Topper. P.S. i understand you don't resonate with Mr. Topper's teachings, but since you have spent time debunking him and have formed somewhat of a relationship therein... he SEEMS to have returned to the world, in a very MT kind of way. it does SEEM that <http://www.amazon.com> has ALOT of reviews/recommendations from Mr. Topper on all sorts of cultural gems strewn throughout the cyber pages of Amazons Goliath database... go see, search his name there... i just found this yesterday, and initially suspected it could be Michael's son, also named Michael.. but i don't think that is the case after a bit more consideration. please dont bother to email me back mean or intellectual opinions, i'm not interested in verbal diarrhea of this sort. don't you see, telling me to "not be an asshole" is yourself --> being an ASSHOLE--- you obviously LIKE offending MT students, but i won't take yer bait and sink in the mud with you. nice trading info wit ya, Kreg ----- ooh groce MUD such an all too humble and humilitating substance to go with nasty words I don't like; so far from my lofty saucerness I'm about to go have dinner in the flying saucer for your information Will check out and see if what you say is true .. .or ..if have already found some of 'm reviews you could perhaps pass down the URL's yes? Cool to share hot evidence no? NO? Not even if I apologize for getting your bottom end misdiagnosed? that url is a cursed mix up I guess but eighth or eighth it 'll always remain the 8th misc ----- it appears this Michael Topper is the one known as MT's son. he mentions in a review being 5 years old when a certain release came out.... which dates him to be , currently apx. 26 years old. i have emailed him before i sorted it myself, we'll see what he has to say, more than likly not very much. I once thought I

found MT upon reading a clever and to my mind right (*eous*) sounding review of 'the lamb lies down on broadway'; is that what you're thinking of and/or found also? Anything else and/or something different? these are direct links to the Amazon stuff, its a bit tricky to find from their homepage...so i send you these.. Michael Topper's list amazon.com/exec/obidos/tg/cm/member-fil/-/A3Q83VI243WI7U/102-9693955-8627329 ----- Indeed, not only 'tlldob' but 14 more records (*all the other ones I grew up with*) reviewed and 104 in total (*books I guess*): Michael's reviews... amazon.com/exec/obidos/tg/cm/member-reviews/-/A3Q83VI243WI7U/102-9693955-8627329 Well, this review of "The Lamb" you mention was reviewed by MT's son, also named Michael Topper, i know of the review and have it printed out. i corresponded with him at the time, as did Alex as he has pointed out to you-- he had the same thing to say to both of us, VERY LITTLE, something like, "you'll know when he returns". it DOES appear he is also the one writing the VERY INTERESTING reviews at Amazon.com, i hope he has something more to share re: MT's current activity i'll let you know if he does. I was confused at first since I clicked on the yes album to find topper's review (*happens to be one of also 104 but a 'find in page' for topper wasn't among them and I clicked through all over 10 pages worth*). What I saw clicking through the 'Michael Topper's Public Reviews' doesn't compare to his best and certainly not even remotely to 'work' by his supposed father (*I doubt it*). Matter of fact, getting through all 104 of his reviews I still don't find the green 'close to the edge' Yes album; I give up.

Tom Fontaine claiming there ain't no david star in the bible

you are very wrong here Tom, check out Vernon Jenkins (*from an 07 file*):

THE SOLID-GNOMON / HOLLOW-CUBE SERIES

Abstract

As is made clear in 1Kings 6:20 and Revelation 21:16, the CUBE, per se, is a God-ordained symbol of HOLINESS, and it should come as no great surprise that this - the second of the five platonic solids - should figure numerically in establishing firm links between Creator and Creation.

1. Introduction

The cubes of the natural numbers form the infinite series,

$C = 1, 8, 27, 64, 125, 216, 343, 512, \dots$ whose i th term, $C(i) = i^3$

Any term in this series may be understood to be a stack of unit cubes - these functioning as counters. Here, for example, are representations of 216-as-cube, i.e. $C(6)$, and 512-as-cube, i.e. $C(8)$:

Notable derivatives of the C-series are the 1-solid-gnomons,

..... snip

The creation of a simple 1-solid-gnomon is explained below:

At (a), we show $C(4)$; at (b), $C(4)$ with $C(3)$ inset; at (c), $C(4)$ with $C(3)$ removed. What remains is $64 - 27 = 37 = D(4)$

unit cubes. The prefix '1-' here refers to the number of these units which determine the width of the wall. Observe that 8 such gnomons may be used to construct a hollow-cube, as demonstrated below.

+Piety Piet duh Pious Poet Do you have a rebuttal or just sarcasms. You've shown no credible proof proving me wrong. Show me where a Star of David existed prior Theodor Herzl. Heck even China has it The Star Of David is not an exclusively Jewish or Hebrew symbol. It is a fact that this symbol has been used for millenia by other peoples and cultures, long before it came to be associated with the Jews or Israel.

one click away from your link:

http://members.home.nl/frankcolijn/frankcolijn/5_The_Star_of_David.htm

So the triangle of 7 is 28. The bible writer used this fact by starting the first verse of the bible, Gen.1:1, with 7 words and 28 letters. Besides that has the first word 6 letters (*T3=6*) and has the phrase 'In the beginning God created the heaven', 21 letters (*T6=21*).

The triangle of 7 with 28 places is the starting point for making the Star of David with 37 units.

Asians built Mari Syria until Hamurabi destroyed it in 1762bc where all Asians were then taken to Babylon from 1762-1625bc and released to go to India.

The Chinese left India in 1437bc following Yu II who ruled them in India from 1497-1437bc and then became founder of Xia Chin

Subject: Vishnu (*Noah's death*) Abraham & Sarah (*Brahman & Saraswati*) Shelah (*Shevah or Shiva*)
http://www.academia.edu/4540206/Brahma_and_Abraham_Divine_Covenants_of_Common-Origin

<https://answers.yahoo.com/question/index?qid=20111220042205AATtZXH> (*on Harappa India*)

Reading your article on Abraham/Sarah being Brahman/Saraswati and noted the two columns where Brahman-Aspati bearing the son at 100 named Brih-Aspati is across from circumcision and i think you need to insert notation that a Bris (*Brih*) is that circumcision. Also to add to this: Vish-Nu was not VishNu until Noah died and was claimed in heaven, of which Abraham and Sarah (*Brahman and Saraswati*) left Ur 77 years later, having that son 25 years later, and then 18 years later Shelah at age 433 died when English-Hittites of Ararat (*Turkey*) destroyed Ur in 1900bc (*killing king Ibbi-Sin the year before*). From your article i am thus extending the remarkable parallel to that name Shelah (*Shiloh who blessed Peleg's son Reu in a prediction that Reu [Yu] would become king of Ur Xian Sumer*) by equating Shelah as Shevah as Shiva the year he died and the Hindu left Ur to go discover the Indus and build Harappa India in 1900bc. Wikipedia divides Harappa into 2600-1900bc and 1900-1300bc but Genesis divides it as 1900-1625bc and 1625-1300bc. The division came when Hindu left Babylon at Amizaduga's death and brought all the Asians with them, the Chinese and Koreans and Japanese and Mayans that had built Mari Syria in 2029bc when they left the first fall of Ur's 1st dynasty, who then were captive 137 years (*1762-1625bc*) in Babylon, and were then led by Hindu to join family already there the past 275 years since 1900bc. This is why the lunar dates of Nannar (*Venus*) in 1625bc are confused as being lunar dates of Nannar (*the moon*) of 1900bc causing the 2400 years back to Adam (*1625-4025bc*) being mistaken as the 1200 back to Noah (*1900-3100bc*) and so 3600 back to Adam as 5500bc.

would you like some help getting a straight bead on alcohol so you are shocked into staying away from it, driving large quarantining circles around it ... simply by reading the truth about it for once? free scholarship available in a land collectively suffering nearly as much as all countries along the line from anglo to russo ones, if not from the alcohol then from the other hook of make believers; Bob Dobbs recently said that literacy and alcohol go together ... and that's proly why chinese hat tibetans and also why the prayermill hasn't progressed into a beautiful rock chime bass line 'honeymoneymaker' (*that might take a little reading if you haven't already seen me allude in this direction before. So are you in Mexico or Wyoming or someplace super arid? The change will do you good*).

my mom was 33 y y than me ... buxom too but plenny health probs from the side effects of oversaltation (*one of the colonialization drives working in tandem with the alc prob*). she loved pretty clothes and jewelry for a while, then sobered up .. flowers while raising me, her hubby

roadogging her .. and me :. but never managed to kick the bible, the pesticides, the paints, the soaps ... and one of her last words for me was 'satan'. Too late to cut my hair to please her now ... her garden is wild and wall to wall for the first time it can escape the virgin black earth doctrine of singlemindedness, regimentation and all that fistmaking rot of massesmanagement in the various hells 'monomaimia' 'accomplish', euphemzing the 'heaven' out of it with potemkin labels like 'cleanliness' etcetera, all of which leading .. straight .. to metastatizations of mechanization like Monsanto (*Blackwater, Xe, Academi ... need i go on or take over already? .. 'satan' .., hahaaha! Thanks for helping me cheer about that for the first time ... guess nearly 9 months of crying was enough.

satan is a word that occurs at least once in her beloved bible (*there's talk of the 'snake' [today is 5snake] in genesis*):

Openbaring 12: 9 En de grote draak werd op de aarde geworpen, de oude slang, die genaamd wordt duivel en de satan, die de gehele wereld verleidt; hij werd op de aarde geworpen en zijn engelen met hem.

... met a funny online mirror this week, she a 47 year old mirror living in some very very arid place like SoCal, Fl or Mixeco maybe - so exhibitionist she just has to be a sexworker i wrote her a comment about me mom cause i miscalculated her bd as dog (*110*) due to an incomplete phrasing on one of her older posts

Damn lonely over here ... debating wether to go for the less than an hour away doot celebration at a scenic in the center of Holland today ... this post makes me not regret not going .. so far .. even more. Reading it to the gatherers would be waaaaaay fun though .. all the while swinging that eminently 8signed octa i built ... though i can't remember where my displace leafthroughs and the connectors are at the mo i can't seem to find any live coverage either .. frontier's radio is on summer hiatus one of their early staff came to me in the early nineties to get some Michael Topper .. and in light of all them other (*Mother*) ritualist i was to keep meeting over the years ... and the plain weird weird weird stuff like the grey headed IMF lady going off on a 'seven seven seven' .. 'tonegyn't' (*i commented about sieving sieves someplace - literally what the nursery 'zevende zeven' means - your millgirl genes must be screaming for more rite now*), i mean between the string of stolen planes with macabre cargos reminding one of doctormarysmonkey.com (*+s?*) and the biologically weaponized US soldiers incepting the SUPPOSEDLY spanish flue, even if i hadn't heard that oddest of (*Douglas Dietrich*) tales once again .. live .. last nite ... on an irish station this time (*'no borders' .. which i think i found thru shoutcast*) ... it's really less wonder that i can't make any headway than that i am still alive at all!!!!

When are you coming to holland/belgium (*your name oblige you at all yet???? Not so 'Clear' yet?*).

ps: DD by the way went into my themes very seriously though briefly on his last tuesday monogue show. Not sure if i should be flattered though ... a lot of stuff is quite off the wall but soberly speaking he's on about folks that meditate up all the ways one can send prayers express, on steroids, switcheroo the wishcommand structure, .. nitro fuel them and all that impudent jettery rocketry. At 11:20 RAPID TRIDENT = 138 in simple English gematria A=1, B=2 as you say.

The MH of MH370 and MH17 is M = 13 and H = 8, hence 138.

same guy -- 1 hour ago

Ok so what is the formula for two three-digit numbers when reflected or reversed will add to 969?

1. Both outside numbers must add to 9

2. The centre number must always be 3.

ie 039+930

138+831

237+732

336+633

435+534

So only 5 three-digit numbers and their mirrors add to 969.

Notice also the progression is up and down by 99 (*for 33+33+33*) for each pair of three digits. ie 039+99=138 etc

$$969 = 19 \times (17+17+17)$$

Also, if you multiply each of the digits in the three-digit numbers in the first column and add them you get $207 = 3 \times 69$, the number at the top of the Freemason arch.

The second column is the same 207 and thus 3×69 again.

$$\text{And } 69+69 = 138 \text{ (MH).}$$

$$\text{And } 2+7 = 9 \text{ or } 3+3+3.$$

$$\text{For both columns} = 6+6+6.$$

Also, if you add the difference between each of the 5 pairs it adds to $2475 = 5 \times 5 \times 99$

$$2 \times 4 \times 7 \times 5 = 280 \text{ or } 70+70+70+70 \text{ or } 7 \times 40$$

$$2+4+7+5 = 6+6+6.$$

$$24+75 = 99 \text{ or } 33+33+33 \text{ or } 11 \times (3+3+3)$$

Lastly, taking each of the original 10 numbers and listing their equivalent Prime Numbers (*including 1 as prime*) and adding them we come to 35,034.

Using the clustering principle (*adding the three digits after the comma to the number(s) before the comma*) we get $34+35 = 69$, your Masonic arch number.

Then, listing the differences between the 10 primes 3 more times (*starting from the bottom of the list every time ie the original '930' end which is the biggest number*) we come to a set of 7 figures which give us +146 and -146 giving us 0. Yes, ZERO!

$$146 = 73+73.$$

Yes, I was astonished! However, I must admit that the last set of calculations cannot be totally relied upon because it does get a bit difficult with the pluses and minuses. Ha! Any ideas guys??

The significance of Truchet's arrangements (*for the present investigation*) lies in the graphical treatment of combinatories. The handling of a two-fold division (*or bi-colored tiles*) in a topological manner is 'a kind of metaphor for the hierarchy of separations and connection in all things.' (SMITH & BOUCHER, 1987; p. 378)

"point of supramental descent"

'dustout' spraykit salesman and multimedia group guy commenting on a CHC vid (*w an older one of mine there too ... is that how he got there ... looking for dust stuff??*):

Blavatsky had an excuse: just like Newton she lived in a pre-Hubble world. Many bright minds of the time believed "there must be a mystery" by default (*they didn't know better*). When you think of all that the human race has learned since, what excuse do you have to keep propagating such gross ignorance, and for getting your wisdom from The Golden Dawn, and your research from "Final Destination"? Ask yourself, what is the CURRENT point of view of the brightest minds? What contribution has any of the ritual masters brought to advance knowledge, science, the quality of life? I see the fascination of wearing a cloak and slashing pentagrams in the air reciting weird things and imagining glorious scenarios while you try to calculate "secrets"... but we're post-Google now and it's plain ridiculous... Here is the first true step to becoming more than you are now: drop the fairy tales and have the chutzpah (*that's the only Askenaze word you need to memorize*) to accept the harsh reality of what you are: a talking ape, too smart to stay in the jungle but too dumb to master the Universe. That is the true test of your maturity, not persisting in the garb of "mystery". And for those of you who think of the esoteric as "satanic", you are way more batshit than they are. At least they had the perspicacity to dig deep into what they believe, while you just take it raw as it's being served to you.?

The Flawed Auroville Matrimandir

A Distortion of the Mother's Supramental Vision

'This earth is ours, a field of Night'

In 1976, when the final veil was drawn aside concealing the deepest secrets of the Mother's Vision, with it came the knowledge that the nuclear issue would be centred on India and not between the then super powers. This was inevitable given the distorted axis as it was right at that time set in place in the Auroville Matrimandir. At the time this seemed preposterous, yet this is what the distortions revealed, a subject matter we will leave for another time. Yet it has come to pass.

All of this has to do with the final element in the equation: 0-1. It is interesting that these numbers have become so immensely significant in our contemporary civilisation. Indeed, when in 1969 the Mother revealed her work with Number in the creative zone of the physical, could she have imagined the scope and sweep of her nighttime activities? Or that Number would dominate both the mundane and the sacred in an unfolding that stood only a few years in the future? Ground Zero is the codeword for what has come to be a very controlled operation revealing the full extent of the new Power working in the world. There are some revolutionary functions of this Power which 9/11 demonstrated better than anything we could describe in these pages.

Came across this once very strikingly beautiful lassy going after a number circle/coil (*lifegiving vs the dead spiral .. according to Paul Laffoley who hasn't put out anything new for quite a while now*)

I take the charts of others and add to them. For example this had a white background, i made it black. It had wide print, i put finer print. The Anti-proton voicebox was huge, so i cut it back smaller. Then i added the water canopy and the labels of thickness to it.

Subject: NOAHS ARK FOUND --Why Palego is wrong in his math which is NOT Jehovah, because it is not science Jehovah created. Angelo Palego is part of <http://www.noahsark.it/>

Subject: NOAHS ARK number of days until water drains to sea level

If you have noticed, i dig up my old 10-year old and 20-year old charts and clarify them better. I recall a website that specifically explained the stadia or mile that Columbus used to claim the Earth was smaller. And i think i should find that exlanation since modern men do such equally hap-hazard math like children.

=====

Signature: I am a writer for God Jehovah. This means everything that i send out privately or publicly I submit to the receiver as PUBLIC DOMAIN. Spread it, its not heaven or hell, it is life or death in a global disaster. Water canopy is going back up to make paradise by asteroid impact; you need to step aside or die.

(Regarding drainage from 10-01-600 onward; the greater the volume of the river, the faster it flows. As it lessens then it also slows down the rate of flow. This analogy is merely to show that at the same rate, that the Flood lasts 2.5 times longer for the planet from the height of Little Ararat downward. It doesnt fit the math to say Mount Ararat was covered over its peak on day 40 when it wasn't yet submerged until day 150 to begin rising. Destructive pictures by religion is what gives the fuel to atheist scientists who build the world's biggest ships and deal with God's physical laws directly as Noah did.)

Using formula # 1 and finding the ark is of no more glory to an italian than Columbus using the wrong formula to find America and insist that this land is China. The glory of his finding it does not override nor glorify the stupidity of calculation by unscientific illogical math proclaiming like an ancient Egyptian that its some magical infallible math as it is God who designs the numbers of math. The tectonic rate will always be the same when another asteroid strikes, it is possible to climb 40 feet every 12 hours to get to the top of a mountain. Surviving a water canopy going up doesn't freeze out everything on a mountain top the way removing a canopy does, with cold and rain which will kill even if Mount Everest is not under water. Jesus is correct that Armageddon requires flight to mountains. You must be ready at the mountains before astral impact. Yet indoors, possibly below ground to survive the shockwave of heat and wind. Only a massive effort in organization could do this

his 149 pics are prolly the most intimate and lovey dovey series of duuuh family clicks i ever saw ... it even
includes a pic of a golem ... who seems to have found work as a cook.

Since Ziv has a cooking fixation that's no suprise ... he might be jewish too, given his first and fairly fresh
gathering vid seems to be shot in Israel - that on the whole most disparate and desperate delusionality
kindled hellhole, choked and filled with, .. founded on demonization of their very neighbours and ironically
closest thing to the very people they came from all over the world to impersonate and 'be' (displace and
torture is what that in fact, under such conditions, works out to) - it's a nitetime theater thing i think
having rainbow gatherings anywhere away from checkpoints is cowardice and blasphemy and every other
karma clogging sin in the bin, hook in the book and lack in the back .. but hey ... you'll prolly see it all
differently .. if you do ... i'll be damned to link it though

14th minute: being palestinian is not the perverse act being jewish has been turned into and to drag them

into your game ('here, hold this fire cracker still for the camera a second already') is not the way a chivalrous duel works, the challengee gets to choose the weapons if any, primary one of those being to not engage and simply go on tending olive trees and catch fish ... both of which jews criminally culpably openly block and molest and kill as surely as the whales have disappeared from the first whaling grounds with their very same vessel templi and vellum libri policies; yall ought to help me rescue jesus and his message i say!!!!!!!!!!!!!!!!!!!!!!

i normally council dispersion and enactment of protests in rainbow family settings .. not on the painpoints of prestige and parade but .. in israel .. many things are topsy turvy ... to do with the instrumentalizaion of bastardization (female line bullshit = identity splits and losses which, as McLuhan said lead to violence .. but without mention this 'clever' buffer and cushion for villein 'orthodoxupremacy')

i just published the first portion of the above here:

so much people power ... such a good time .. yet so little grounding, no rock spun, much less a little fresh dust make to contain waste & prevent stink + hold water attract clouds and pay true service to the innumeracy factor, the miracle of repeatabilities repletions and cycles no matter their size but always at hand from smallest on up.

Should i blame myself? for counseling rather than showing a true execution, exertion and celebration of the 'count'erculture that celebrates numberlessness in a grounded fashion, envisioned at rainbow gatherings attended in the 80s?

The innumerate and illiterate native peoples had a slowly eroding effect in history on the whole. I suspect it will take a consciously EXnumerate and EXliterate 'tribe' (*club / community / pioneer crew*) to show how to let go of that blocking shackles substitutionalism before true sovereignty with the heart and smart to open rock and care for the proceeds, can catch on.

The dust thing is obviously as timely as timeless, .. comin around willy nilly ... wether in the form of volcanoes and bombs or along the ways of spinning boulder on boulder set up to wet up thru and thru via strategically fitted canvasclad wingarmpoles fitted to a few pegged and pinned holes here and there; care to help load the prayerwheel folks? One baktun for each of seven generations to unfold their long-rehearsed and ancient future history.

Within this seven baktun span less four years there will be exactly

53 cycles of 52-years, the Sirian round of time, running from 2016, 11 Storm, to 4772, also an 11 Storm year, 2756 years in all for the Seven Dynasties of Timeship Earth to unfold their future legacy.

Then shall I return, time's special witness, by Arcturus Star Command, on the eighth day after the 7th bakun – the completion of the 20 baktuns of the cycle of the transformation of the Earth, on the 90th day following the completion of the 53rd solar galactic cycle, the cycle of Sirian rebirth in time ...And then it will be understood what is meant by seven generations to come, seven baktuns in all, 53 cycles of the Sirian Wheel of Time.

It is my job – my duty – for all humanity to see and to define what lies beyond that thresh-hold for the next 2760 years – until my next return at that time as a star traveler from the distant future – that is, until the year AD 4772 – exactly seven baktuns and eight days after 2012.

Look: From 3113 BC to 353 BC, the end of the seventh Baktun of the Mind Teachings is exactly 2760 years, the same measure as 2012 to 4772, 2760 years, exactly seven baktuns after the closing of the cycle – that is when I shall return.

4772 = 7885 years after 3113 BC that is exactly 2,880,000 kin, the equivalent of 20 baktuns. In vigesimal notation 20 baktuns, 144,000 x 20 kin, is written 1.0.0.0.0.0.

Background Information: The initial 812 day program of Radiance began on Kin 69, 4 Moon, Magnetic 16, 2 Wizard year 54 (*Aug. 10, 2007*). It completed on, 10 Dragon kin 101, Self Existing 14, 4 Seed year (*Oct. 31, 2009*). This first 812-day program was oriented toward cultivating psychophysical radiance of subtle body as a principle quality of the noosphere.

The next 812-day program of Sirian Rebirth began on 11 wind, Kin 102, of the Self existing 15 of the Self Existing Seed year (*November 1, 2009–Mevlana Day*). For this cycle we were focussed on the integration of the 441 Holomind Perceiver into conscious functioning for noogenesis through activation of red and blue vulom force field circuits (*method of synchrotron*). The program would have taken us through to Resonant Moon 12, Kin 133, Red Electric Skywalker (*which is the GUIDE for the Red Electric Moon, Kin 29*).

my thought last nite:

to posit and briefly entertain the thought jesus might come back and be disconcerted to the point of refusing to be himself out of disgust with stuff around him; zionist christians make sure he can't be himself ...

there prolly have been millions of parallels since his crucifiction
i didn't get crucified this time but sidelined; declared offside, a total loss, written off, given up on, given a

clear off bonus ... but not until i refused the entire family tree's line of work: butchering *(still eat meat though)*.
the euphoria over my birth made place gradually for horror as it became clear i intended to change the gamerules and improve them; they refused to see anything in that effort except sabotage and the attempt to betray and threaten disgracefully and ungratefully; the non-participant, the refuser ... ergens van af weten = in the know = the 'inknower'
de afweter *(not used as a noun but as a verb: af laten weten = verzaken = shirk, shy away, be chicken, cowardly, gutless ... without the 'off' byword it turns into the neutral 'communicate')*.

well, i think i can examine the lines i made public over the years and still treasure carefully *(see part 2 below)* to safely conclude that i have been a true nostradamus of sorts for our time.

Any and all hypothetical and/or semi-sibling / descendant / retrieved archetype ... jesuslikes like that *(like us)* would be prone to having this thought cross their mind or well up from their hearts:
to think / feel / themselves to be a sort of clot, plug and prop that blocks the drain that could easily wash all evil away specially if they believe a substantial part of the gospels. Technically it's just an inside outing of it.

wasn't the gospel bread as well as fish? Not doubled over to kneed it .. but doubled to match the quantity needed

i personally think there were are and will continue to be 100s of thousands like that particularly fabulated, feasted, feted, faithered and feistily defended fabled hominid, not to mention the masqotteering hijacks for offense exploits at any given one .. and all, .. literally each and every .. time slot, point, frame and fraction you care to cut the flow into and up to, or cut up the flow with .. beats me what yall do offcamera.

what if a suicide of such a person, each and every one of each and every such person ... accrues into the cumulative deadlock we have now ... where crude bloodshed removes the excess testosterone terrorized by dividing them into leagues and locales and organizing clash after gash after ashbash wouldn't that actually freeZE the situation to serialized hells, themselves piling up into a challelnge grown even greater next time around, when ways, means and ops to remedy things are at hand and their disposal once again???

Perrenial question: how to change astonished and horrified disbelief into action?????
the waits ever longer in between kinda along those doubling lines
Merlin who froze into a crystal might be a metaphor for the paralyzing effect a growing awareness of horror's scope can have. I have no appetite for Lovecraftian stuff but hordes of others do.

JA wrote this, announcing his return on kin 90, some time previous to passing on 89

4772 = 7885 years after 3113 BC that is exactly 2,880,000 kin, the equivalent of 20 baktuns. In vigesimal notation 20 baktuns, 144,000 x 20 kin, is written 1.0.0.0.0.0.

so
3113 to 353 bc is as 2012 to 4772 *(2760kin difference each)*,
in vigesimal that is a full round of 20 baktuns
written 100thou *(with dots in between each number as above)*

353BC = birth of heraclitus

24300 Hamilton Pool Road
 Dripping Springs, TX 78620

The phone number for the Hamilton Pool Preserve is 512-264-2740.

2740 – (260 X 10) = Kin 140

10 Sun or 20th day of the Overtone Moon (9 Moon Year)

Also the last day of the 4th 28-day cycle of the 812 Days to Solar Consciousness (Dec. 4th 2014)

512 – 260 = Kin 252

5 Human or 20th day of the Solar Moon (9 Moon Year)

Also the last day of the 8th 28-day cycle of the 812 Days to Solar Consciousness (Mar. 26th 2015).

160+64=224

264 – 260 = Kin 4

4 Seed or 18th day of the Lunar Moon (11 Storm Year)

Also the last day of the 27th 28-day cycle of the 812 Days to Solar Consciousness (Sep. 9th 2016).

Vinals are 20-day cycles that recount the sequence of the cycle of solar wisdom. Vinal cycles start at the beginning of the year and change every 20 days on the yearly solar seal.

There are 18 Vinals (x20 days = 360 days) + a five-day cycle called the Uayeb (= 365 days), a time for purification and reflection. Names from the vinal solar cycle are derived from the original Maya. Together the vinals constitute the pure solar cycle or Haab, and the affirmations describe the wisdom of the sun as a single, multiply articulated thought form.

2740 + 20 (one complete Vinal) = 2760 years

Can you define what lies beyond the threshold of the next 2760 years? Or should I say “2,760 Planetary Service Wavespells”?

The Hamilton Pool Preserve is a natural pool that was created when the dome of an underground river collapsed due to massive erosion thousands of years ago. The pool is located about 23 miles west of Austin, TX off Highway 71. A protected natural habitat featuring a jade green pool into which a 50-foot waterfall flows, the pool is surrounded by large slabs of limestone that rest by the water’s edge. Large stalactites grow from the ceiling high above and are home to moss, maidenhair fern and cliff swallows. The Ashe Juniper (Cedar) uplands of the preserve are home to the endangered golden-cheeked warbler. Hamilton Pool is part of the Balcones Canyonlands Preserve and is a protected environment.

How much will this pool have moved in 2,760 years? If you measured inches of erosion per year then you could put together an accurate hypothesis. What metaphor matches the way a stream of water erodes and cuts through rock. What purity are we containing? What has the power to cut through ancient repositories of information and energy. The ancient stone stands rigid and unmoving during a lifetime. But after many lifetimes, only the gold refined in the fire will remain. How much were we willing to love? How often did we stand in the face of fear to prove that love is more important and more powerful? Seven generations later, only the love that you’ve shared while here on Earth will trickle through. If you gave enough of it, and if it was powerful enough to conquer your darker selves.

Some time ago, I made a decision to absolve my shadow self by giving into my luminous self. I also made a promise

to my tekas that I would purify them in the freshest underground springwater that I could find. I had neglected them for some number of days and by this point their influence was fading. I felt my relationship with them symbolizing an unfulfilled transformation.

On Red Crystal Serpent (*Kin 25*), against all financial logic, security, and comfort, I bought a ticket to Barton Springs in Austin. In the afternoon after I had bought my bus ticket, I witnessed a brilliant white cloud refusing to be absorbed by an oncoming storm. Just when negativity promised a bleak outcome, a sparkling little white cloud scoffed at the storm, reflecting the sun's light in the most amazing brilliance, causing into existence a beautiful double rainbow. Lightning crackled around the tiny cloud as if the storm threatened it's adversity, but the sliver of light would not diminish in radiance. Of it's own power, it moved perpendicular to the storm.

If it is within my power, I will always strive to preserve my luminous self. My tekas are gratitude and generosity stones. By showing them generosity, they in turn teach me how to properly interact with nature (*the universe*) and other people. I have learned so much on this simple trip to purify my tekas. I'm hoping next trip will take me to the Hamilton Pool. :}

the 12th was kin 26 and the 17th of the first moon and so

a wave later is kin 39 and 2nd day of the 2nd moon

It has been 26 years since the EU rainbow gathering happened next to the ruins of a mountain village in northern Spain and the week long celebration began on the 20th, <http://xochipilli.wordpress.com/2014/08/18/encuentro-arco-iris-en-la-ecoaldea-de-matavenero-poibueno-el-bierzo/> posted on the same day here: <https://plus.google.com/110100351831106053963>

but i was quite shocked to see google doesn't show the freshest additions to non registrees, a dirty facebook trick .. after all (*their line of reasoning*):

those precision ads garner sooooo much more money .. rite?

.... i use adblock in the meantime, in part cause of the annoying art but more because they slow my schedule / box down even worse than the barely tolerable level i run at without that grief; i have a 2G processor running Linux now

I alway confuse the village name, Matavenero with Monte Verita (*southern switzerland*), another spot i have a too poor a relation with, but not due to seeing the denudation of slopes where the to be Armada-ized wood stood alive and well in my minds eye*. Nice work if you can get it ...

Matvenero's beginning kinda answered prayers i myself had helped formulate the years previously in Austria and Ireland, the up to that point only 2 preceding European rainbow family gathering locations, the 3rd was a first of many i missed .. but whether for mentioned reason?

As i wrote, Matavenero used to be the ruins of a mountain village in northern Spain; it became the first and only such permanent post gathering rainbow village; the family persisted, persevered and 'permanenticated'.

Apparantly there is 15 acres of quite arable terrain in Hungary someplace .. or 30 .. for 15 years already, not sure now. i could look up the name; very little happening there apart from new age to dos and a yurt dwelling lady (*i '+'ed her*)

* apropos fleets vs treecover

One of my first favorite vids is by a Scot who shows his grown young son swinging from an oak he planted .. Italo Calvino's book 'the baron in the trees' could as well have been about a journey from Scotland to the Persian Gulf (*have a tree for him to stay in on a boat across the channel .. why not??*).

Like i said, the village materialized after heartsong shares were emitted at the rainbow stocktaking markets of the Irish and Austrian gatherings .. and yet i passed it up. ... Or was that the year i ran into the 'legal alien' status questionings by a longhair hater at the Canadian border?

Not so deft at calendarization am i? Matter of fact i accused this very endeavor of horrible things the other day, check nania9 .. or 9nania (*getting tired here, lost a great deal of this compositions closing a window which had multiple tabs i did not warn me about ... the Firefox on Linux works in slightly different ways than it does on Windows*) or that G+ link

on kin 36, 3 days ago, last day of the first moon for this 10dog year, is when it was 303 days after mom (*k90*) departed ... i had a very strange dream .. one part of which was feeling shoved rhythmically .. in the back .. by hindsight it may very well have been a memory of what dad's penis felt like while i housed in mom's hot little oven (*sure blew his fuse very quick every time i noticed years later*) ... but i have also come to understand that his rich years were quite unfaithful as well ... i awoke with what i thought was a bad heartburn .. which never happens so i was going over last nite's intake: ginger tea ... i now think it was a lower heart cramp (*one or more of them seven curved crescent letter shaped muscles that make up that noble bundle of muscles we call an organ locked up*), and began a tonemoan to try zapajig it loose pipin hot stuffup story of course .. specially if you consider i differ 33 years with both parents. did they grant me another lease of/on life ... or was it rather an attempt to call me away to save me huge disappointment coming up if i hang on .. or in order to keep that ratio stable; honour it con- and affirmationwise for another try, the very sort of attempt at repair between the 4 of us (*i include my down syndrome sister, 9 years older, whose latter years could have been eased had i taken my care task much more*

seriously and conscientious enough to ease me mom's worries) the very sorta thing i had been praying for at their grave (*these past 10 moons and 23 days*) regularly ... lately making way for trying to see if letting go is not much closer to my taskmark and the more decent thing to do ...

Time will tell wether i can pray for them to be released from pesky pests like me and spare us all dangers of disappointment and discouragement - giving up and step away from those dangers that would prolly if not inevitably develop their slippery slopes yet again .. iow, i feel quite unsure wether or not my prayers to the contrary would actually have effects other/better than preserving a status quo.

anyhoo, such a repeat (*'repiet'*) can be 'superfluosized' and obviated if we get this **piet riteride** right, this little matter of preventing further - than to, (*that is*) across the brink of unstoppable - slide into thanatopian tribulations which a certain global and intertribal cabal has plotted out and unleashes on us all right now as it happens (*Ukraine distraction directly related to Gaza aims no?*), acting as if prophecy is a merely global sport we at dreamground zerospell know different better eh?

forgot doing that bit about mom 90

As remarked upon and linked on this post earlier, RQ wrote about JA's return in 2000 years (*a 'weltenjahr' away*), a fully processed precession forward, on kin 90. Apart from the absurd precision across that kinda distance ... (*hallmark of pretension if you ask me but perhaps no earlier opp arises to tie up loose ends*), i look forward to refamiliarization any ol' day though full well realize any kin's bearer n wearer ain't necessarily anything like other such kin's bearers

Judging by earthly conditions, up (*so*) there where'er, may be like down (*so*) here .. with times aplenty in between any 2 rite hilite times ... wherein and at which fools are tempted by hunger to jump the gun, take huge risks and bite unripe apples, deciding that to fake it is better than nothing. Impatience ruins everything, pe-empts, usurps and falsifies. Perhaps our stomachs settle down in discarnate bimbo limbo.

Fred

Reggie, I think what people have to do more than anything else is initiate a move towards independent agriculture. In fact, I'll make this prediction: once the federal government finally collapses in toto, the only people who won't eventually find themselves dependent on National Guard "safe towns" (*each run by a tyrannical National Guard leader*) are those who have banded-together over the common cause of independent farming.

You have to understand what's likely to happen in the next few years. First, the Federal Reserve is likely to get abolished—there's already too much disgrace and disgust centered on that institution for it to long endure. However, I predict however gets rid of the Fed Res is simply going to pick up where the Fed Res left off—that is, continue these wars-for-western-hegemony in the Mideast and elsewhere. And as a result you're going to see a series of coup d'états in America, followed by increasing fractiousness. In the process, you're going to see plagues break out right and left on our own shores. These plagues will be what precipitate the creation of Army National Guard "safe towns", or walled-off residential & business areas under the entire jurisdiction of an ANG brigade commander.

What will take the place if an ANG unit isn't nearby to commandeer a town is the police force will, itself, commandeer as much of that populated area as it can control by itself. It may receive federal assistance in men & military equipment prior to the US federal government completely collapsing. Various leaders from the existing civilian gov't will "coalesce" in a sort of ad-hock council underneath the state/local police chief or federal overseer. Most petty legal disputes will be held in temporary suspension; jails will be overflowing with offenders whose cases cannot be processed. Gated walls and high fences will then be erected around the "safe town". Stockpiles of food will be distributed to the persons therein, but military personnel will take all the choice stocks for themselves. Eventually, the police chief/ANG brigade commander will announce a program of scavenging from residential areas outside the safe town—yet in truth, they won't be scavenging from their neighbors, so much as pillaging their neighbors.

Eventually, the walled townships—called them "citadels"—will be overturned from within, as the populace will start to perceive internal tyranny as a greater aggravation than external threats. And at that point—once they are overturned—they, rather than the farms, will return to being "centers of civilization". However, overturning a

citadel from within is likely to be a very bloody affair. I'd say the better choice (*if possible*) is to concentrate on independent farming.

Why are functions important, especially in the study of complex phenomena or hierarchical and multi-layered systems where complexity arises not because of the size or the number of components or processes involved but because of the particularity of the mode of organization that orchestrates the activities and operations of various structural and functional hierarchies? One answer to this question would be because any account of change - whether in the context of evolution or in the context of normative modification, intervention, rectification and reorganization - is ultimately the change in function. Even when we change the structure, we do that with the aim of inducing a change in function i.e. what a thing does and how it can be improved or replaced by a different set of activities. But the change of function is far from easy since we need to locate the exact function we are referring to within a much wider functional organization, within an environment and in accordance with existing structural constraints. What a complex system appears to be doing is hardly ever what it actually does. In order to implement a change in function, first we should identify what a system does, how it does it, how its functions are organized and how the activity in question is orchestrated through this complex organization. In other words, we must have the knowledge of 'what a system does' in order to change a function and alter a system's or a phenomenon's behavior. This presentation extends the 'navigational paradigm' to questions regarding construction and modification of complex systems through the lenses of mechanistic explanation and multi-level analysis of functional organization.?

Will you be a part of it?

The outline of my talk at the Escape Velocities symposium on November 13:

The Human Centipede, A View From the Art World

Is it possible to understand the function of art within any consequential prescriptive or interventionist mode synchronous with the descriptive resources of the modern system of knowledge? In other words, does art have any import for a project of construction aimed at liberation of intelligence, illiberalization of freedom and collective enhancement? The positive answer to this question it will be argued hinges on a systematic extrication of the definition of art from the contemporary art world. Aimed at debunking the more ambitious claims of the art world with regard to speculative vistas and political vocations, this presentation involves an etiological scrutiny into premises of two international group art exhibitions, 'Speculation On Anonymous Materials' and 'and Materials and Money and Crisis'. Underlining major tendencies of the art world in its search for contemporaneity and pertinence, these exhibitions accentuate the two faces of the same art world currency: longing for the outside and critical self-reflection. One through producing impersonal experience and diversification of the bijective space of affect into a myriad of relations and complicities, and the other through a politically sober introspection into the conditions under which its horizon has been integrated.

However both accelerative projection and decelerative reflection are retrofitted into a world of cognitive templates whose nebulizing function creates a cultural fog of conceptual conflation and practical impotency. It is through this operative fog that some of the more insidious mechanisms of neoliberal capitalism are directly plugged into the cognitive infrastructure under the guise of a world that appears determined to extend the plasticity of imagination and expand frontiers of action. But this is a world in which the financial closure of capitalism is cloned and grafted onto a cognitively maimed economy for accumulating false alternatives in the name of liberation of imagination and action. A suture of different overambitious vocations and driven by the wealth of waste it generates, the resulting beast is a prophetic vision of a tightly connected and controlled society with a single closed alimentary circuit, the human centipede. Those who scheme to infiltrate this world in order to militantly or cunningly liberate it from the inside are locked into the compactly segmented structure of the metameric organism. At once necessary for the growth yet expendable, every insider is a new addition to the iterated sequence of mouths and rectums through which the art world bootstraps itself - a miracle made possible

by a simple but efficacious financial and cognitive algorithm. Dreams of acceleration or deceleration, speculative enthusiasm for the outside or critical self-reflection are revealed to be simply changes of frequency in the rate of the said iteration.

another one at 'Lara's' place (*a commenter*):

Igor Strelkov, Donetsk 28 July 2014. Subtitled.

Unshaven, visibly tired and hot straight from the battlefield, the leader of the Donbass People's Militia firmly denied any responsibility for the attack on the Malaysia Airlines flight MH17. The blame was based on the supposedly leaked phone conversation of one of Strelkov's people - Igor Bezler confessing of shooting down the passenger plane, and Strelkov's own "tweet" about it on his page in VKontakte - Russian social media site. Both accusations have been proven false.

The Bezler's phone call appeared on youtube soon after the crash, with already subtitles in many languages, but the actual file for it was created one day before the plane crash. The date 16 July shows clearly on Youtube data information about the clip.

Strelkov's "tweeting" is also proven fake because he doesn't have any accounts in the social networks. He stated it many times. That page was created by his "fans". They use his photo as an avatar and his name in such way that all the messages from the rebels appear as if from the man himself.

After the Malaysian Airline plane crash the western media tried hard to picture Strelkov as a "bete noire", a new Russian Osama Bin Laden, a cold-blooded terrorist who can shoot down the passenger airplane and laugh about it with the cynical remarks. But nothing can be farther from the truth! Igor Strelkov is the man of honour, clear conscience, high ideals, strong morality and courage. He writes books and poetry, he is a devoted christian, a father, a patriot - no wonder the West fears and hates him so much. His sudden fame burdens him a lot. Strelkov dislikes the attention and has to be "dragged by the rope" for meeting journalists. For millions of people he is a hero, symbol of resistance and fighting for freedom. There is a beautiful comparison picturing him as reincarnated Russian officer of the long past, forgotten and much loved image belonging to a different epoch. A character from one of the Tolstoy's novels - a man of a flaming heart, pure soul, high ideals and a courage of a lion.

Being a military man Strelkov has his secrets, but in this present war he is fighting on the side of Good against Evil with the devil himself. ----- Some questions about the Boeing waiting to be answered: ---- why was the route of the aircraft changed on the very day of the crash, so it went right above the area of a military action? ----- why the US hasn't provided the satellite data showing that antiaircraft system BUK was used by rebels to shoot down the plane? ---- why did the Spanish air traffic controller, working in Ukraine reported that the Boeing was being followed by the two Ukrainian military fighter jets? ----- why did Kiev failed to release the transcripts from the air traffic control communications? The report seized by Ukrainian security services immediately after the incident.----- why did the thick black column of smoke, which always appears when BUK fires and which remains in the sky for a long time, on this occasion had never materialised? ----- why did the Boeing fall as one lump and in one place instead of being blown into thousands of little pieces and scattered all over the wide area - this is what happens when the powerful BUK is used? ----- why did the passengers bodies have a strong smell of decay just 30 minutes after the crash, had no blood and looked like old corpses from the morgue fridge? ----- why there was no food on the plane, and no chairs or seat-belts fragment were found in the wreckage? ----- - why some of the victims were naked and some dressed entirely in Hugo Boss outfits?----- why were all the passports found looked brand new and shiny, without a trace of dirt, smoke or fire? Some had holes in them or the corners cut as if the passports were expired? ----- why did all the dead people were registered on facebook on the same day - 21 April, 2013, have no friends, no favourite pages and with just one single photo for the identity?

Some of these questions are based on rumours, some are proven but the spooky list can go on and on ... There are too many suspicious moments and bizarre details to the catastrophe that one can't help but think of yet another 9/11, false-flag event. The aim is to call the rebels terrorists, to paint Putin as a bad guy, to start a new big war with Russia in the middle of Europe. And if nothing of this works - to use it as a smoke screen for new military invasion of Gaza. ----- Igor Strelkov's mentioning of the bodies of black people fighters among the killed enemies is very significant. Some blamed him for being racist. The thing is - there are not many black people living in Ukraine and virtually none of them serving in the army. It is simply a proof that those were foreign mercenaries

Hox genes infer there are Hox codons.

Mathematics predict there existence.

'When DNA Makes RNA Makes Protein',

T becomes U in RNA.

Mathematically, each of the 64 RNA codons belong to one uracil driven codon foursome that has either one white or one black Hox codon in it.

The role of white and black Hox codons is to regulate protein organization in multiple levels of relational space -- the primary sequence -- the scaffolding -- and the diagonal bilateral organization.

A black Hox codon's position and number of occurrences in any primary sequence of a gene drive the purpose and eventual position of that particular segment in the protein.

White Hox codons, in turn, 'shepherd' the black Hox

codon driven segments into its unique protein given shape.

2 pics further *(6 of 188)*

This hand drawn illustration of the 16 uracil driven RNA codons *(0-15)* illustrate how the 16 *(0-15)* uracil driven RNA codons are nested within the 64 *(0-63)* RNA codons in a Base-2 System.

Black Hox codons: 0, 12, 18, 30, 33, 45, 51 and 63; are unchanging, palindromic, oscillating base-2 patterns that code for an amino acid AND regulate the function and purpose of the gene segment it appears in.

White Hox codons: 7, 11, 21, 25, 38, 42, 52 and 56 are non-palindromic base-2 patterns that facilitate the forming and shaping of the remaining 48 RNA codons that are broken out across six color families *(blue, yellow, green, red, purple and orange)* with each color family consisting of 8 RNA codons which code for unique amino acids.

Unencumbered energy always whorls -- seeking balance -- yet can be attracted, repulsed. directed and joined in this state.

You instead concentrate on dislodging popes.

Now THERE's is a little something J&S put their mind to as well, albeit more to a recalibration of time than space, as proponents of the dreamspell calendar change to peace movement, but i have much much better for you, JA was quite fond of citing the quran: all is number, god is number.

I'm currently studying with Sergio Calderón Cheh K'eh. He is the son of Héctor Calderón, an author and engineer who happened to be present when the Tomb of Pacal was opened, and wrote a book about the correlation of the

christian and mayan dates. Argüelles based a lot of his work on the discoveries of Héctor Calderón and Hugh Harleston Jr. <http://www.hharlestonjr.com/zodiac.html>

So Sergio made adaptations to his father's program to calculate the correct dates in the mayan calendar with the actual gregorian dates. I'm still learning about it, so I can't share much yet, but I will when I understand more about this... but his proposal is correlated to the planets of the solar system, equinoxes and solstices, moon and solar eclipses.

Constructing the Pyramid

So, lets get building the pyramid. First, you need to construct the base level, the 19x19 square of cubes.

This level contains 361 cubes.

Level 2 is $17 \times 17 = 289$ cubes

Level 3 is $15 \times 15 = 225$ cubes

Level 4 is $13 \times 13 = 169$ cubes

Level 5 is $11 \times 11 = 121$ cubes

Level 6 is $9 \times 9 = 81$ cubes

Level 7 is $7 \times 7 = 49$ cubes

Level 8 is $5 \times 5 = 25$ cubes

Level 9 is $3 \times 3 = 9$ cubes

Level 19:19 is $1 \times 1 = 1$ cube = Votan's Stone

$361 + 289 + 225 + 169 + 121 + 81 + 49 + 25 + 9 + 1 = 1330$

A Total of 1330 cubes are required to model the 19:19 matrix in Pyramid form. This is the blueprint of the Temple of Inscriptions and the Temple of Kukulkan.

Pacal Votan descended from this world on kin 58, White Rhythmic Mirror, August 29th 683AD. In the Dreamspell this was the year of the Self Existing Wizard, kin 134.

We have passed 1330 years since the Death of Pacal Votan. 1330 cycles of the 19:19 Matrix. 1330 Solar Years.

$2013 - 683 = 1330$ cubes = $1 \times 19:19$ Matrix in Pyramid Form

– 13 months prior to 9/11, on August 11th, 2000, Kin 115: Blue Spectral Eagle, there was a clear video taken of a flying saucer hovering right next to the World Trade Center in Brighton England.

56-Year Cycle from 1945 – 2001

T & T points out that the following 56 year cycle divides into precise sub-cycles of 28 years each. This 56-year cycle was predicated by the first world wars (1914 – 1945) which established the world market, a total industrialized market and communication base for the expansion of technology and the creation of the global structure of the technosphere.

The first 28 years, 1945 – 1973 – Begins with Hiroshima and ends with the completion of the World Trade Center towers in NYC. Time and the Technosphere describes Hiroshima as the final stage set of biogeochemical combustion leading into the noosphere. This cycle accomplishes the creation of the world market, the transformation of the biosphere into the technosphere.

The second 28 years, 1973 – 2001 – Spans from the dedication of the World Trade Center towers to their destruction. Marks the phase of globalization — the absolute dominance of the materialist market economics inclusive of the end of the Cold War in 1990.

At very midpoint of the second 28-year cycle is Harmonic Convergence of August 16 – 17, 1987, exactly 14 years after the dedication of the World Trade Center towers and 14 years before their destruction. Note that the Harmonic Convergence and Hiroshima both occurred on Kin 55: Blue Electric Eagle

Global recordings of Synchrotron light from 56 intense birkeland currents by mankind in antiquity

Synchrotron Light Recordings (*SLR's*) of the filaments in a high-current, auroral-like extraterrestrial Z-pinch were recorded on all continents during the Neolithic. Mostly carved on granite (*petroglyphs*), SLR's also provided the templates for megaliths, stupas and temples, large statues and circles from quarried stones weighing up to 200 tons. In this paper we report the discovery of some 5,000 surveyed sites worldwide where the common motif is that of the 56 filaments inflowing (*electrons*) to the Earth's southern pole. In addition to the rock art, the influence of the pattern is also reflected in sacred iconography from all cultures. From our survey of over 139 countries now including Lhailand, Cambodia, Mongolia, India, Chile, and Easter Island, we find that the artists view was $\pm 1.5^\circ$ true south, the direction of aurora synchrotron radiation seen above Antarctica.

Indeed. I also met Arguelles' partner Stephanie: equally charming, but I couldn't really figure her out. Will be interesting to see what she does over the next year: she understandably went quiet after Jose died, but has been blogging again recently. She is the Red Queen of the Dreamspell movement, after all.

one must gently rub piousness and hatred (*penitency and punity*) together in a slow, deliberate but firm way to get away from both suprise/emergency preventable setback scenarios ... quite like mixing black and white produces grey and that too is merely an extreme abstraction and faintest reflection of what a grounded action - which these similes borrow their value from in the first place .. and often displace, even prevent - would cause and result in, namely:

'regreenery' as follows:

rock and ice (*black and white*) rubbed together (*water 'thrown' into rock, etcetera*) .. and the results (*freshest, most 'medicinal' / commonsensical clay*) supplied to and kept handy in every toilet so as to capture the volatiles (*valuable stuff people praise the chemdustrial pharmaffia for replacing, but stink when this act is neglected or talked over and past as indicated*). Something similar got proposed in the 1880s by a german who was the first 'organicization' counsellor / ambassador (*a 'physiological chemist actually*) to be taken to court by the at that time mere fledging pharmaffiose corporates flexing their 'legal' muscle. Before that we had white 'god' jesus learnt from but the clash his attempt to take these lessons home and apply them there -- which would have regreened the entire ME and levant and caucasus and turkey and greece and spain, maybe even babylon and the sahara by now -- caused hasn't ended yet "over it is nineteen" (*see Jose Arguelles on Quran*)

1 :: 2

the whole diffusion and leaky demographic problem (*predator/desertifyer vs regreener*) plays into this so it is not a hard and fast rule but generally:

no as yes = country side more (*long courtships*)

no as no = city more/habit

Lachulung La = 5050 meters

another (*google image*) illustration (*of many*) shows an obelisk on back of turtle with anaconda wrap/torque held by multiple gods either side, looks like 'hi-testy' bad boys on one side and the rest on the other

About 5 years ago i noticed this iconography while searching for the indian version of cernunnos and saw people on either side of a river hold what seemed like a long rope across it .. which made me suspect a cernunnos connection due to the torque [*'lus' = loop*] of course; i was actually thinking it might have been metal and a rather outsized nutcracker type thing applied to large boulders via teamwork and perhaps waterpower; one can imagine the many opps along wild rivers ...

but back to the metaphysicalization of the plain physical ...

Quirlen des Milchozeans

"Die leuchtende Essenz **verklumpte** sich und verteilte sich in den Tiefen des Raumes. Von einem astronomischen Standpunkt ist das leicht zu deuten: es ist die Milchstraße, die Welt-Materie, oder der **Urschlamm** in seiner ersten Form." "Im Chaos der **Ursuppe** sind die Göttlichkeit (*Amrita*) und Visha (*Gift, Tod, Negativität*) latent angelegt. Beides vermischt sich."

Laut Blavatsky steht er in direkter Verbindung mit der Legende des "Krieges im Himmel" und dem "Fall der Engel". Ich habe über diese Themen schon ausführlich geschrieben: Luzifer und Drachenkampf, brauche es deshalb hier nicht nochmal tun.

what if this is an incomplete picture and what's actually happening is michael pulling the teat of a cosmic cow and spraying a [*i admit, suspiciously straight*] squirt of milk into the dragon's mouth???

Robert Graves claimed Adam's rib was really a rival scene with knife showing much like the lower right pic here (*zeus 'vs' typhon*) ... who says it is not rather a case of him sculpting and the people around him gathering the chips to further soften and refine his tough opening act --- nazis used to brutally open a gvt without planning an off switch? tragedy in ukraine was that the gvt goons had already adopted a model pacifism and the west addled monsters had to punish them for it of course; not willing to have their show 'stolen' --- via the compost heap, comm. gardens etc ... thus the man is emerging from the rock not just as a sculpture but with multigenerational aperture, literally, in flesh and blood, as a process.

the egyptian equivalent was big enough to cut off rivers ... seems to me this mythologizes the effect of huge dust production sent down turbulent waters to settle and fill up a ravine behind a dam

like most places this blogger is happy enough with the parabel to not look for the pragmatic root of the matter/letter or make do with an up and out rather than down and inwards explanation; subjectivity is taboo and faked before mined .. which takes the fun out of it and turns it *(to aim claim mine own .. own up)* into a macabre spectacle; he, for example, links to [http://kristallmensch.net/07-09 skeletal 'school of crystalline body awareness'](http://kristallmensch.net/07-09_skeletal_school_of_crystalline_body_awareness)

the feudalization, or abstraction process, needed to spike the sociography is done with waffle such as this Dalai Teaching recently in Amsterdam in a christian church *(6 hours total)* but the chinese party replaces religious texts with top down money ... which comes down the same thing, iow, it comes down on reality as a disastrous demand and extortion of 'respect', etcetera.

The large carved stone sarcophagus lid in the Temple of Inscriptions is a famous piece of Classic Maya art. The widely accepted interpretation of the sarcophagus lid is that Pakal is descending into Xibalba, the Maya underworld.

today in Belgium, palace of justice (*palais de justice*) nicknamed 'butterfly' hosts 8 of the so far retrievable 46 'Sharia for Belgium' members (*a 'good' number of them died in Syria*) in order to help them with their 'recruitmentprovocations' .. ehrr .. no sorry, ostensibly it is because they are illegally calling for 'their' women's rights to a .. dust protector (*don't mean something that may have saved the lives of 30 people near the japanese gritsy cough yesterday, close up footage of some of them was found nor do i mean someone who can 'project' the appropriate substance through their compost etc .. but that hiding cloth, practically protecting FROM it, but very ineffectively and certainly not tide turningly so*); i mean the veil, a thingie which i won't indignify with the usual silly names like rag (*integral to ragheads, the male version of 'erodoregio' the shame over whic gets so well hidden that a cure is out of sight*). Males of ANCESTORMADE DESERTS sport thicker layers, his head tied up in several 'turns' due to his outdoor activity concentration presume, where one and all is threatened by the sun; unimaginably attractive to northern crusaders since jesus who showed them the way of [regreenery] failure. Or perhaps they had grown oddly attached to a hostage kept at their courts, first principles of empire after all; one's offspring let go in to the occupier's ways and secrets who in turn hope to keep unruly underling rulers in order and the latter in the illusion that the best of them, the very ones in line with them had a straight line to the very heart of the enemy .. to get the best of them in the long term. Feminotions as in supremacist queendoms do spread .. on rags ... and in gamergates and Potteresque legislations, the genderwars are trying .. vy for prominence with religious ones, i think they are winning .. on the internet .. cause gaming is very very big ... which bodes well for dreamspell synchronotron and other iterations ...

Given the female headgear fetish (*strong among evangelicals too, the old whitie establishment*) it's a bit rich/much to see them scold and try deride moslima headgear as 'rags' since islamic headgear aims at public status due to cleanliness, newness, beauty of ply and fold plus deftness with that, the primal forms for which must be sought in the 'primarer' (*is that a word?*) feather ones. So don't call them rags as if they were proof of poverty (*thrift down to the last thread*) rather than an impoverishment process to which they are the seal, sign symbol and capstone .. not to mention drainplug to stop stuff comin back up (*comin up though*).

Perhaps i will save the passage about the [Stockholm Syndromatically speaking ostensibly] intended effect: modesty, for anothe day since it has to do with early farming, and so do tthe djihadists of course, Euro versions most famous for what their UK brethren did, alcohol patrol in Sharia streets and hoods; attempted in germany as well .. I see alcohol as a huge problem and the huger the more i realize most of asia is hooked as well, or at least loaded, cocked and aimed at their selves.

France has lost the 3 years of exceptional lefty rule in their 'chosenite' house. House of politicians, those who are bought by and take pay for keeping their instructors out of sight and pretend it's people's choices they work for; that may be in the nick of time for Alain Soral who couldn't make videos without being slammed with yet another hail of courtcases anymore. adjust ice anybody?

About Synchrotrons

Version 1, last updated by Eric Levy at 2013-05-02

A synchrotron is a particular type of cyclic particle accelerator originating from the cyclotron in which the guiding
magnetic field (*bending the particles into a closed path*) is time-dependent, being synchronized to a particle beam of
increasing kinetic energy. The synchrotron is one of the first accelerator concepts that enable the construction of
large-scale facilities, since bending, beam focusing and acceleration can be separated into different components.

Jannis 189;

Your comment [below] surprises me. I have quoted from the 7:7::7:7 manual many times here, and have read my two
copies [having received the second one from the hands of it's author, Valum Votan] scores of times.

The illustration in your link shows the Dali One card on top, with Sunday still written above it. If Dali and each Moon

participants to whom he handed a 7:7::7:7 'game'?

The next blog will address [again] the other issues you have raised.

Thanks for caring about this important matter :}

About 5 years ago i noticed this iconography while searching for the indian version of cernunnos and saw people on either side of a river hold what seemed like a long rope across it .. which made me suspect a cernunnos connection due to the torque ['lus' = loop] of course; i was actually thinking it might have been metal and a rather outsized nutcracker type thing applied to large boulders via teamwork and perhaps waterpower; one can imagine the many opps along wild rivers ...

Robert Graves claimed Adam's rib was really a rival scene with knife showing much like the lower right pic here (*zeus 'vs' typhon*) ... who says it is not rather a case of him sculpting and the people around him gathering the chips to further soften and refine his tough opening act --- nazis used to brutally open a gvt without planning an off switch? tragedy in ukraine was that the gvt goons had already adopted a model pacifism and the west addled monsters had to punish them for it of course; not willing to have their show 'stolen' --- via the compost heap, comm. gardens etc ... thus the man is emerging from the rock not just as a sculpture but with multigenerational aperture, literally, in flesh and blood, as a process.

the egyptian equivalent was big enough to cut off rivers ... seems to me this mythologizes the effect of huge dust production sent down turbulent waters to settle and fill up a ravine behind a dam

Dashavtar Illustrated Story - Kurma Avtar...The Turtle Incarnation

This comic narrates the adventurous story of Kurma Avatar- The Turtle incarnation of the Lord. It describes in a nutshell the Samudra Manthan pastime wherein Lord Vishnu takes the form of a turtle to save the Mandara mountain from sinking into the ocean. - iskcondesiretree.net

all this proves is that the schizotypification of reality *(turning it on it's head, never mind churning)* is very very old

is it a comfort to tell the kiddies one can trick the bad guys into work and cheat them of payment or is it always the other way round?

apropo churning, a chunk of hope is hidden in cooperation around that primal truth: making local glacial milk will bring the health and vitality of the non-manmade versions anywhere that sort of smarts is applied *(best therapy for bad guys, works without fail if you catch them early enough)*

part 2 sets off meticulously abstracting physical mechanics but then switches to mind over matter instead of offering illustrations; the 'stain' mentioned occurs in the samudra manthan story and makes me think that great god who turns poison into nectar must be a stand in / personification / anthromorphosized ... compost heap!!!!!!

i as usual have a visceral reaction to that kind of imaginary limbclimb; it's pretending you live in a tree without growing the tree first; it's presumptuous and precipitous and yes hypocritical, not to mention suspect in the sense china likes cast its aspersions, that one *[s dogam]* asserts peace and quieting of mind is at all possible without creating and maintaining the conditions for peace of body , maintained, kept up and in place. Are they skipping that cause it's childsplay, goes without saying ... or cause trees don't grow in most of Tibet??????

How did you like my intuitions regarding the churning?

isn't perhaps the churn and it's liquidation *(prevented by the god taking the turlte shape to prevent this)* quite as important as the churned and one with it to become the type of stuff one may associate with global milk and all that stuff Blavatsky calls it???

i guess most other proof spoof derivations will seem similarly trivial to the ones in this vid; here's the first 3:

ebola diagnosis psyop date $9/30 + 2014 = 2944 + 2 \times 9 \times 4 \times 4 = 3232 + 2323 = 5555$

$9/30 + 039 =$ speed of saturn

tie ins are 3:

2: an 'adding to it's mirror trick (*to wit the last date that was dropped from the calendar switch of 1752 - presumably a batch, 10? i dunno*)

3: 9/11 victim numbers (*2977*) similarly reconfigured (*dunno how that's respectful to the dead but hey, all's debonair in the name of numbonominalist whipcrack callers at the calendaroundance*) except that he splits once (*29x77*) and then adds a mirror

6th of october (just guessing)

i think i shall elaborate

lengthier version (add ins and ons from the next day) here:

<https://plus.google.com/110100351831106053963/posts/2yTrWnPEFpb>

for a man who boasts about understanding the flip stage he is remarkably unable to turn the table [t] and value the 'REFUGE' AS FEED FOR THE LOWLIEST (majority constituted on a vote per organism basis, to really care for the most defenseless tender and innocent at the soft belly button of all creation), a pinch is enough.

Value it highest -- provision over [bycause as?] vision, such an easy to open goal eh? Simple insight that opens a huge credit account - see what water management (slowing it) can do via Sepp Holzer, imagine what an equivalent for rock (speeding it) can do in combination with it.

The shavings, drill, grind, polish and chisel debris; called various other names at quarries: float, tailings ... etcetera .. see www.remineralize.org - the sober take ... but deep since we ARE talking a huge climate factor here (well spotted by the man i adopted as godfather [very briefly] in the eighties: John D Hamaker).

To value that which gets carved up, out and away, then dumped and discarded, is hygiene yet germaphobe Bob (he seems cured now though) has become a pharmaffioso in his own rite. I thought all men with universal(izable) insights would fight every hint at and tendency to [wards] their own exclusivity, even if it becomes clearer and clearer a one in (billions) viewed thru their own eyes?

When writing in stone it is this which gets carved up out and away, then dumped and discarded, put and kept out of sight until their containing dams breaks and another distraction from the creamiest, finest substance known to terrestrialization which forces it's way down to weigh down the consciences of people in it's way and wake quite precipitously and punishingly, is born.

The early days of writing were more conductive (conductive) to grounding, the waste byproduct being quite as large and the bowel movement masses of those running materials back and forth. The tactile (braille-like) clay served as the main recording medium but that's too oozy for desertminded Bob, never mind the lozenge aspect and the saving OF SOILfeetBANKS [Cernunnos in the Reims Museum] before the saving IN WALLstreetBANKS prevailed via deracination drives of dumb down uniformation.

The other day my fave blogger (who's been blocking me for yyyeeaaaarrrrzzzz so don't hesitate if you feel the need again to prevent me from warning people about this dangerous man who has turned Joyce's replacement of Geloof Hoop en Liefde [faith, hope and heart] with silence, exile and cunning on it's head and turned it into hysteria, occupation [every nonred american guilty of that as far as i am concerned] and dogma) wrote something i could proly rearrange to hint at all this even more:

"Profit being an objective quantity generated inside the production process, not a subjective quantity generated when the product is sold in the marketplace, as liberals teach."

beleaf trust and love =/as the wing root and snake iconography was an obsession of sorts decades ago ... i sowed myself a wingsuit of many colours on the machine of a circus at 95 glastonbury as my vid upload shows (very briefly alas - i've had extreme bad luck with camerawork though my very own nephew sold all sorts of christian formula tv shows all over the world).

i don't suppose i'll ever convince him jesus meant to turn that cross into tree growing 'pow[D]er' machine ... hat tip to him from Pacal i guess. See 'arte mexatlan' for a clear answer ... in clay ...

Pacal Votan's perch was not a rocketseat [alien hype and indigene suppression are synonymous by the way, another aspect of decrepitude and dishonour (that) Bob is fully beholden and sold out to] but a coin of the realm, kinda outsized compared to Cernunnos' more handy format, the latter shook his out of a bag onto the ground ... Perhaps these discs were sent to roll down waterways or something; PV prints his ass on one (held in the maws of an animal mostly hidden by the maws of another barely above ground itself snake within dragon within the fresh mud of aeons immemorial?????)

... all of which easily taken to emphasize, stress and press, to say, im- and express the importance of cleanliness pressing up against godliness, upon his people very tightly. A scatological asskiss farewell joke

that went underground for 1400 years ..
and yet PV didn't do no writing of importance at all if you listen to Bob too closely. He IS a ridiculous
psyops poodle subjected to a family circle conspiracy intent on monetizing birthdate deceit .. which may or
may not have gotten underway as a posterboyship expressly launched to sell wonderdrops at some later
date; quite the pension scheme and forethought eh?

some of the first words written in this piece are in the following line but they kept being pushed down by
interjections, introspersals and whatnots a mimick of the tibetan prayerslab engravery phase piling up
upon itself

.... to leave the impression (*impress the illusion, henceforth reiterated as the interminably expressed*
[runaway laws/letters of] repression of the [primal meaning / primality serving] vacation/impression as if
written in stone) over the expression. Takes two [traces] to trace i guess.

Can you see leaves as expression of loose (*ned*) rock?

Fully im- and expressed rock could fly around the world if primally produced .. but even though riches
denotes the more and more dustfree enviros w more and more smoothened and hardened surfaces to
refuse dust a place to collect and hide, this does not mean that there is a huge connection from wealth to
dustproduction AND VISA VERSA!!!!!!

This i grasped in the eighties before bob, before mcluhan .. and that comprehension since then ripened a
conviction (*consensual victual*) in me that many a monument was/is the overstock for work that never got
done on/with it, the transtrick work of feeding soil with it (*mountain to soil .. rinse repeat, seafloor to*
mountain), like Cernunnos did (*and jesus proolly learned on his travels, a 'meshage' he failed to bring home*
succesfully or else we'd have a regreened levant, babylon and possibly even sahara by now), like tibetans
were working up to do but their pr went haywire and their prayerwheel remained unloaded.

who use inevitable events like comets as excuses and alibis for their false flaggery (*cause comets cause*
violence don't you know, 2 laws of nature implying a third: one never gets along with one's neighbours; all
migration is hostile and every place it is being cheered and celebrated is advertizing it's Stockholm Syndrome

to follow up on 'cubophobe' nicholson a bit i composed a reply to the first few minutes of his 42 minute
long one but was put off by the artificial gold making clip (*from History Channell, which makes up a good
section of it*) that i did not post it; it is perhaps useful for all those many many conspies and synchromystics
hammering away with and peering thru similarly shaped codeprisms so i'll post it here:

Y7pBMCwGbSM

repeat of above

there's a few connections i propose you try out/on for size
you know the celebration of schizophrenia / mercantilist rootless cosmopolitanism under the guise of
'rights to defend oneself' etcetera is rampant right?

Very simple and easy to do perfectly (*how hard can a white = black 'table turning' n deckstacking be now?*).
Such inversions of cause and effect are performed by those who think it's great to A] sin, B] play the
despot and/.or C] finally believe in 1 a skill of their very own, a perfectability / 2 owning a go (o)d old
testamentarian sense of self and purpose, being worthy of sacrifice and to get paid for these bits of
atavist theatre. Easy also to forget the whorish offshorish bit, of course.

Re your biblical memes:
ask yourself what ashes (*arisings from them, etcetera*) might have to do with cornerstones how DO you
spin prayermills that really rock (*filled with them in fact*) .. how do WE fluff up and buff out the latter into
the former (*rocks into ashes*) and if it's ashes you're after, how do you get heaps and piles without burnin
the place down?

to what extent were the christian communities dream, blueprint, golden rule, saving grace and easy
spread, due to it's permacultural content and soundness?

how do you see rockdust as 'building block' and cornerstone of top quality compost unless you have been
shown?

One can easily block avenues of logic in man's mind and the nerdification process takes a mighty
alphabetization / dicksnip lef/rite combination before accomplished (*or a wander away from Eden**) but

then it can go to work on any other ethnicity it so chooses to tackle and 'transhumanize' (*a computer / phone dependence is all that takes, which means you are guilty as hell, stuck in that web as much as me; turning my work into a top rate commercial CAN prevent our present apocalypse from being dragged on and out for the rest of this transition*).

ps: read 'Tony van Renterghem'; he wrote 'when santa was a shaman', combine with www.calendarsign.com, add some primitivism and rainbow family ethics, then perhaps we can prevent the next great centripetal pressures and pushes to reform and rescue some centralism or other and one after another (*always sacrificial unless pure, passive and sharing, 'read only's thrown on a heap, run thru a sorting hopper and available to all; no longer usurping the centrality where true rubs are laid - rocks in, dusts out, all nigh bore hoods should have'm#*).

you wouldn't want to have to count all christians in the world all expecting help from one .. ONE!!! .. man, a historical yet eternal figure but what if what if that very same jesus was, like me, an expert in spreading tips and tie-ns contributing to the strength of overall weave cohesion, diversity, resilience and all them friendly neighbourhood buzzwords intoned with hope and dream by those who feel they are missing it and want it back .. even though their direct ancestors have been enjoying steadily dwindling amounts of all that romantic nostalgic stuff and what if he, just like me, was expecting his messages to be picked up carried along and carried out ...even though the connection were hard to find and make, remaining quite a tenuous and broken trail of crumbs posted in dribs and drabs that make the life of a commentarian?

to put it bluntly, what if jesuslike people expect help from people they know can vastly benefit JUST AS MUCH as christians are expecting their salvation from some unique individual?
What if both gaps (*from the one to the many and the other way around back again*) match, overlap and 'cover' / miss a meanwhile evermore eroding ravine?

The Pacal Hypothesis - Posted by Jannis 7 Moon on October 14, 2014

Jannis (*german photographer, lot incrowder*) connecting my father[*'s kin*] to you{rs} (*kristin/gurdun*):

Ascension: 28. August 683 is Kin 167 Blue Spectral Hand
Planet: Earth
13 Moon date: Lunar Moon 6 or 2.6
Old Tzolkin: Kin 58, 6 Etznab

I dissolve in order to know Releasing healing I seal the store of accomplishment With the spectral tone of liberation
I am guided by my own power doubled

Sounds like a perfect day to leave this blue planet I dissolve in order to know.....Releasing healing....I seal the store of accomplishmentWith the spectral tone of liberation. Kin 167 Pacal's ascension minus Kin 89 Votan's ascension is 78. Sum of the tones on Pacal Votan's tomb and his special number. Note also that the last day of this gregorian year 31.12.2014 will be Kin 167. Besides this a current Tetrad of altogether 4 so called Blood Moons started on Kin 167 Blue Spectral Hand, while the 3rd Lunar Eclipse will be on Planetary 1, Kin 1 Red Magnetic Dragon. 260 days or 1 Tzolkin spin since the Peace crop circle appeared close to lake Ammer, Bavaria.

Secret Towers Of The Himalayas

Dexter Webster - 83 ----- 46,656 Nov 28, 2013

The Himalayan Towers are a series of stone towers located mostly in Tibet. Carbon dating shows they were built approximately 500 to 1,100 years ago. Since they are generally located in prosperous villages, it is believed that their primary function was as a demonstration of a family's prestige within the community. For strength, many of the towers use a star pattern of walls as opposed to a strictly rectangular method. Heights can exceed 60m. For more information see the work of **Frederique Darragon**.

Piet Betcetera --- 1 second ago

the key to them proly lies in what Philip Callahan (rip?) discovered about dia- and paramagnetism (a type of elf range that is particularly conducive to plantgrowth ... also achievable via glacial milk or hand / loaded prayerwheel ground (hard) rock).

the field effect is of course closer to the 'Biodynamic Preparations' as remedial actions, more energetic than the tracemineral affair (which allows for longer lasting effect and so can save on travel expenses when the energy and smarts are there to make a bigger initial investment (re smarts, see buoyancy power, search 'auftrieb' videos (german word for it)

It all comes down, in simplest terms to diversity, aka variety .. and the modern word permaculture covers a lot of it as well.

SiChuan University Unicorn heritage institute was founded

Writefrom?Institute -- Author?LiangZhao -- Date?2010-12-10

The SICHUAN UNIVERSITY UNICORN HERITAGE INSTITUTE was joint-founded by the LITERATURE & JOURNALISM INSTITUTE of SICHUAN UNIVERSITY and the UNICORN FOUNDATION in August of 2004. This institute, which is founded to study, protect and carry forward the TRADITIONAL CULTURE OF MINORITIES IN WEST CHINA and to protect the environment is a non-profit cooperative organization.

The LITERATURE & JOURNALISM INSTITUTE of SICHUAN UNIVERSITY has been studying the CHINESE FOLK CULTURE, CHINESE POPULAR CULTURE and ANTHROPOLOGY for a long time. It has a national research base that is called the CHINESE POPULAR CULTURE INSTITUTE and it is also the first university in China to be qualified to award DOCTOR'S DEGREE OF ANTHROPOLOGY. At the end of 2004, it was approved to be the NATIONAL 985 INNOVATION BASE, which works on CULTURAL HERITAGE & CULTURE INTERACTION together with the HISTORICAL CULTURE INSTITUTE of SICHUAN UNIVERSITY and some other related organizations. The LITERATURE & JOURNALISM INSTITUTE of SICHUAN UNIVERSITY has done a great deal of work in POPULAR LANGUAGE, POPULAR LITERATURE, POPULAR RELIGION, ETHNOLOGIC and UNWRITTEN & IMMATERIAL CULTURAL HERITAGE etc.

The UNICORN FOUNDATION was co-founded by Madam Bingyan (*Frederique Darragon*) from France and Wang Shibo (*Weiyang*) from China. Its main task is to introduce the TOWERS OF DANBA COUNTY IN SICHUAN PROVINCE to people all over the world, and to improve the EDUCATIONAL CONDITION of those poor areas in China (*mainly in the TIBETAN DISTRICT in SICHUAN PROVINCE*). The documentary named MYSTERIOUS TOWERS OF HIMALAYA, which was finished by MADAM BINGYAN in November in 2003, has been shown by the DISCOVERY CHANNEL and has attracted worldwide attention.

The SICHUAN UNIVERSITY UNICORN HERITAGE INSTITUTE is combining the FOLK-CUSTOM STUDY of the UNICORN FOUNDATION with SICHUAN UNIVERSITY'S strong suit in researching, studying and noting the excellent FOLK-CULTURE OF WEST CHINA, and renewing & protecting those rare heritage sites (*especially the languages, cultures and arts of the minorities in west China*). Its main tasks are to cause domestic and international attention and to promote the international communication of culture and science.

The following are some activities going on recently:

The Photographic Exhibition of "Towers of Himalaya" is being held in the AUN, Beijing, Chengdu, Hongkong and Paris from December of 2004 to August of 2005. We have begun setting up a library for the study of minorities in southwest China, etc.

Distinctive spiral grooves carved on ritual jade rings buried in tombs dating from China's Spring and Autumn period (*771–475 BC*) follow a precise mathematical form described by the spiral of Archimedes, 300 years before he lived.

dumbass goes and tests this kind of thing in space:

Physics of Attractive Colloids

Colloids are microscopic particles so small that they move diffusively when dispersed in a fluid, exhibiting Brownian motion, controlled by the temperature of the system, like atoms. However, unlike atoms, colloids are big enough to see with light, so they can be probed with microscopes and laser light scattering. The interactions between atoms are fixed, dictated by quantum mechanics, but those in colloids can be very finely tuned.

Drying of Complex Suspensions

Mixtures of immiscible fluids with colloids can be very complex but they are technologically important for industries such as paints and protective coatings, especially when such materials undergo drying. Emulsions containing colloidal particles are particularly interesting as controllable test cases of such systems, but they are difficult to image because these mixtures typically scatter light strongly. Lei Xu, Alexis Bergès, myself and others describe a full 3D picture of what happens when these emulsions dry out.

Thanks 55, for your long comment, which I'm still digesting :}

The "Z = 260? is the alpha-numeric system which was introduced in CHC 7, with no explanation as to why it was replacing Votan's original one introduced in an earlier CHC.

The two alpha-numeric systems mentioned by Valum Votan are the widely used "A = 1; Z = 26?, which I call the SGF [Simple Gematric System first used in the 'definition' for number 198 in CHC; 198 equals Synchronotron]

his more advanced system the CGF [Complex Gematrical System]

Here it is: A – J = 1 through 10

K = 20 L = 30 M = 40 N = 50 O = 60 P = 70 Q = 80 R = 90 S = 100

T = 200 U = 300 V = 400 W = 500 X = 600 Y = 700 Z = 800

So, Poet Piet would be 70 + 60 + 5 + 200 = 335

70 + 9 + 5 + 200 = 284, for a total of 619.

The BMU of your name is 619 – 441 = 178

It's 'Kin equivalent' is 619 – 520 = 99: 8 Storm

Claire, calculated via the CGF = 138. Kin 138: Galactic Mirror, codes the 28th day of the Third Moon which is coded by 198]

- 1] Melito (170 C.E.), in agreement with the original Jewish reckoning, gave the number of Old Testament books as 22.
- 2] Origen (210 C.E.) also gave the same numbering: "It should be stated that the canonical books, as the Hebrews have handed them down, are twenty-two; corresponding with the number of their letters."
- 3] Hilary of Poitiers (360 C.E.): "The Law of the Old Testament is considered as divided into twenty-two books, so as to correspond to the number of letters."
- 4] Athanasius (365 C.E.): "There are then of the Old Testament twenty-two books in number ... this is the number of the letters among the Hebrews."
- 5] The Council of Laodicea (343–391 C.E.): Twenty-two books.
- 6] Cyril of Jerusalem (386 C.E.): "Read the divine scriptures, the twenty-two books of the Old Testament."
- 7] Gregory of Nazianzus (390 C.E.): "I have exhibited twenty-two BOOKS, corresponding with the twenty-two letters of the Hebrews."
- 8] Epiphanius (400 C.E.): Twenty-two books.
- 9] Rufinus (410 C.E.): Twenty-two books.
- 10] Jerome (410 C.E.): "That the Hebrews have twenty-two letters is testified ... as there are twenty-two elementary characters by means of which we write in Hebrew all we say ... so we reckon twenty-two books by which ... a righteous man is instructed."
- 11] Synopsis of Sacred Scripture (c. 500 C.E.): "The canonical books of the Old Testament are twenty-two, equal in number to the Hebrew letters; for they have so many original letters."
- 12] Isidore of Seville (600 C.E.) said the Old Testament was settled by Ezra the priest into twenty-two books "that the books in the Law might correspond in number with the letters."
- 13] Leontius (610 C.E.): "Of the Old Testament there are twenty-two books."
- 14] John of Damascus (730 C.E.): "Observe further that there are two and twenty books of the Old Testament, one for each letter of the Hebrew alphabet."
- 15] Nicephorus (9th century C.E.): "There are two and twenty books of the Old Testament."
- 16] Jesudad, Bishop of Hadad, Syria (852 C.E.) recognized a CANON of twenty-two books.
- 17] Hrabanus (9th century C.E.) said the Old Testament was formed by Ezra into twenty-two books "that there might be as many books in the Law as there are letters."
- 18] Moses of Chorene the Armenian historian (c. 1000 C.E. or perhaps as early as the 6th century) "speaks of twenty-two books of the Old Testament. This was clearly the Jewish Canon."
- 19] Peter of Cluny (1150 C.E.): Twenty-two BOOKS.
- 20] John of Salisbury (1180 C.E.): Twenty-two books.
- 21] Hugh of St. Victor (12th century): "As there are twenty-two alphabetic letters, by means of which we write in Hebrew, and speak what we have to say, so twenty-two books are reckoned, by means of which ... the yet tender infancy of our man is instructed, while it yet hath need of milk."
- 22] Richard of St. Victor (13th century): Twenty-two books.

The infamous 2014 Cube; what it means and why it was placed.

I know my accent isn't the easiest to follow and I'm not the greatest speaker but it's more about the information than myself that needs to be shared.

The Guidestones are the door to the future and the Cube is the Key. 9/11 & 4/11 is what all of time revolves around and this is an attempt to try and explain what that means.

Since the numbers associated with the Cube are 11/4 & 11/8 this video had to follow the same...created on 11/4 and released on 11/8. I know I will get a lot of 'crap' about this but hey, this is Acrimea and we are all welcome to our opinion...as long as it follows the masses way of thinking :}

An important question that is left unanswered is why the original notch was cut from the English slab in the first place. In the Godlike Productions post likely made by him, Massenelli claims that Will Ellis was directed to remove the initial cube by a person who has recently died, but he gives no further details.

A Chinese say SORRY to the Tibetan people (*English subtitles*)

hi all Tibetan friends and everyone, i hate to see this nice place for building our solidarity becoming a litter ground for the chinese communist party trolls (*i.e. "50 cent party" members*) :) but, my belief in freedom of speech outweighs the feeling in my heart, so i'll not censor their annoying rants. please don't dignify the ccp trolls with a response.

as a Chinese i choose to follow HHDL's teachings and try to keep the kindness and tolerance in my heart (*sometimes it's hard!*) and never allow our enemy to drag us down to its level :) thanks

=+=+=+=+=+=+=+=+=

(*This video is the english translation of the chinese version under the same title*)

I have kept my silence, thinking that my voice does not count. But listening to these racist slurs daily, seeing the most shameless lies flowing freely, facing this world that is more silent than me, i do not want to bear anymore --- after what happened in 2012. To keep my silence as a chinese is to collude with the criminals, and i must shout out --- even if no one will hear. As said in a poem: "shout to the moor, hear no echo. What is in mind, is buried in a hole."

Dear Tibetan friends and everyone ^-^ After posting a new video that i made (*?Little Apple? by Chairman Mao Ze-dong*) i was asked whether i was fan of chairman mao.

i guess that the question might come from a Tibetan friend who grew up overseas and was unfamiliar with the chinese communist party (*ccp*) regime's narratives. My video was really trying to debunk three lies that were massaged by the ccp into many chinese people's heads:

first, that chairman mao was a great patriot who bowed his head to no foreign power; second, that chairman mao led the bloody communist insurgence for the people's interests, not for his personal interests; third, that amid the madness of the "cultural revolution", premier Zhou En-lai was a stabilizing force who represented the ccp's "conscience".

If you ask a Tibetan friend who grew up inside Tibet and was familiar with the ccp's propaganda, she or he would

tell you that my video was only a satire exposing these ccp's lies, and that i am certainly NOT a fan of chairman mao :

As a chinese i deeply resent the atrocities that the ccp regime has committed against the Tibetan people, Tibetan language and Tibetan civilization!

<http://en.wikipedia.org/wiki/Magi>; "

Victor H. Mair provides archaeological and linguistic evidence suggesting that Chinese w? (? "*shaman; witch, wizard; magician*", *Old Chinese *myag*) was a loanword from Old Persian *maguš "magician; magi". He describes:

The recent discovery at an early Chou site of two figurines with unmistakably Caucasoid or Europoid feature is startling prima facie evidence of East-West interaction during the first half of the first millennium Before the Current Era. It is especially interesting that one of the figurines bears on the top of his head the clearly incised graph ? which identifies him as a wu (**myag*)."

Mair connects the ancient Bronzeware script for wu ? "shaman" (*a cross with potents*) with a Western heraldic symbol of magicians, the cross potent ?, which "can hardly be attributable to sheer coincidence or chance independent origination."

That would mean that they were also the "Aryans" and yes they were also in China as: <http://en.wikipedia.org/wiki/Yuezhi> and http://en.wikipedia.org/wiki/Kochi_people who can be seen also as mummies called the "Tarim Basin Mummies" and "the beauty of Loulan", "Tarim" a yemenite name which we could connect to Hassan ibn Sabbah (*the Assassins, Persia and the story of the old man on the mountain*) of whom they say he was born in Yemen. part 16 is mostly on Khalifa,

part 17 has him holding up a tzolkin to show the diagonal (*from 6storm upwards*) with it's 19 fold consistencies (*a unique amount vs those of all other possible diagonals*)

27 and 28 are extremely dry (*permutaciones*)

added to 16:
arguelles begins to relate his involvement with the quran in the previous part, thru this one (*on Rashid Khalifa mostly*) and in the next (*showing the '19 over all' quran text reflected in the way diagonals run and figure in the tzolkin*). See:

youwannano wat really cracks me up, fucks me over, baffles me stupid and gets my goat?
my numbers (*to those who worship them .. and i don't mean the simplistic 999 crowds .. but the 'synchronometricians' known as 'Red Queen' and Ruben Skywalker; check www.galacticSPACEBOOK.com*) come up in such blatantly obvious ways, even when perusing the field with a half cocked eye (*kin 55 is me, a number that figures hugely in their theonumology*) that i must be raising a heavenhi stink [-:X i do realize that someone who makes the best of a rotten situation is hard to focus on realistically ... if christianity has anything to teach ... X:-] to repel them from at least perusing my run-ins with them (*me, who much like their guru [Jose Arguelles] claims to aim for, will completely boulder [bowl over] the main traditions - buddha, jesus, mohammed/PACAL VOTAN, born in 1:2 proportions apart*).
This year's last day is me dad's kin .. guess they are all necrophiliacs, waiting to do me postmortem .. if and/or whenever something/someone puts a stop to the linkrot i see before my own eyes or pieces my message together from variuos deposits and the pile of cellulose i stuffed this little 'fokhok' with.

A secular / mundane version of the above is reflected in the afflicted paternity i share :-:- along with the hosts of others (*10th minute of this vid ... JA was [mex]mixrace too*), that make the shows examined in this vid perrenially reiterably updatably popular .. curses [humor is psychedelic turbulence said Baudrillard in a sentence underlined by McLuhan right?]-:- yet seem to be quite unique in managing to see thru (*jesus complex*) ... or ... share yet seem unable to resolve and concretize from con- to percept and vica versack again from public to private, setting up a breath of life sort of 1:2 in that good old n gold nontox type binary ... the translation from private to public gets all choppy ... hippy dippy

.... or ... can neither escape nor share.

Lana Lokteff is herself a white whore (*the land was payed for and there was happy mixing*) ... it's that horrible 'allowed' (*haloed*) yet mandatory 'Truth-In-Bible-Ratio' again, cheering for institutions that should be dismantled as carefully as you would collect and disassemble any toxic waste, holy book, etcetera; she's like the white whore i saw yesterday, raising her arms under a giant rocket ...

to Lokteff

ps: do stop wallowing in the stink and swallowing the emowhipcrackdrink instead, direct your gaze to those furthering unity through 'consensability' via lowering the common denominator standard; everybody benefits from compost outgrowing the pharmaffia .. jussayin ... and SA scores hi on that front, certainly not doing any worse than North America when it comes to community building .. look up ecoaldeas ...

Bell curve fetishism generalizes the cost of it's thanatopian pinnacle and rocketry rot. Try put that in your superior twat and jiggle it a bit if it does not immediately fit ... palestinian olive oil would and will again do wonders if and when all them goodie goodie whities had been going and will once again go about that region in a real christian way even a little bit. That entails imitating the northern white lessons jesus learned and tried to take home, restoring greenery, growing back throughout semitic realms; white black and spanish alike should fade from red ground and you holding up examples of early diffusion is exactly as dishonest and potemkinesque as the proppy trailer you accuse of cherry picking.

Oh, and one more piece of good advice read a few TCBoyle books

don't be so fucked up by the "apocalypse". if jesus come back, he will rule in heaven, on earth, in hell. he will be the king of both evil and good people.?

he'll have to wait and be patient until enough light suffuses humanity for them to see their ways furthered by helping folks like him clear enough and believe me, i we're not the only ones.

entertaining and slick but i say hoax alert caveat emptor. It's a 'best of' .. stuff by Haramain on saucers, a guy showing one at the back of the sun very amazing stonework, Icke discussing hybridizing and bloodlines, Dona showing an exact replica of the dollar pyramid and funny skulls from Equador near the Nazca lines, pointed to in precise masonry on fairly large and smooth river boulders someplace .. so there are parts of truth here (*freshwater treasure map for pirates?*) but on the whole we see tragically comics poisoned minds 'at work', like Pete Champoux admitting that 'his huge pleasure' experienced while playing with google earth (*drawing long-ass straight lines*) stems from him growing up with superman.

.... the bad news waves keep building; storms come to places already in drought but hardly carry water all of that makes it very difficult to revive anybody's cheery disposition, let alone somebody who thinks jesus didn't do miracles .. he just used truly common sense (*in itself miraculour enough for me mind you ... but god what a gulf / disconnect between religion and their inspirations!!!!!!*)

* besides, my subfeed contained horrible news from Ecuador just yesterday, givin me pause ... even though time is running out. Needless to say the faith in my ability to drop hints effectively is at an all time low. There are those who don't believe in hints, .. they drone on and on, hammer away and apply all ways of emphaticality 7 ways to sunday ... such as 'truthiracy3'; in his latest he does the old american thing, keep doing what you do but faster; if anybody is familiar with the RQ blog heading illustration of half red half bleu and likes that kind of stuff, acquaintance with his vids are instructive when trying to see how things come to polarization ... but get stuck there and not past it; subbing combinatorix with binarity at it's base guarantees bipolarity *(iow zionism)* as easily as dedication to the road / market and it's mercantilism slides into mercenary cruelty before you can pronounce the word culture using two full breaths.

how come the best vids - the ones one thinks need the most distribution on the double, made by a guy you think you should sell your house for in order to give him all your money to, rather than give it to you for some extra Ecuadorian acreage for me to go hide in when push comes to 'scape clause* - paint horrible hells patterned on painfully real footage; here's one on africa and i'll challenge you to actually visit my place *(the thumb does not visit the image tenor of your blog anyhow)*:
<https://plus.google.com/118295092547933782328/posts/5joA9Zg2Gdd>

Well ... let me try end on cheery note:
i once again, as i do just about bi-annually since around the turn of the millenium, stumbled into Meegan, a savant in his own right ... it's quite easy to see the resemblance to lots of differently styled *(coloured, punctuated, etc)* square style iconography:
[youtube.com/watch?v=QPMYJ79H-8E](https://www.youtube.com/watch?v=QPMYJ79H-8E)

his matrix gives a centrality to 2X7 .. and given i've been reading Rowan's blog *(and comments before that)* for over a decade *(him being kin 27)* it's nice to notice this vaguely mysterious resonance. I asked him if the Rodin crowd hasn't tried to engage him ... he's been on G+ for a while already, leaving strangely accusatory and haughty comments to people who fail to see the merit in his defence for the Catholic Church ... anyway, he made his work into 3 vids .. and there's a 2013 article i shared on my 'Piet Betcetera' account.
And as to a final cheery thought:
Guess what, ... i am nearly cured of expecting a relevant answer from any and all of you

you know WHAT is really blasphemous? ... To claim *(that)* a common sense guy is really an exceptional miracle guy *(godson as you call it)* .. giving all helpless and unloved 'surplus', refugeeed and otherwise displaced or exploited people you urge to believe this rot false hope and a pacifier that can only frustrate and further the designs of the wicked. Think about it. I did. .. And i know cause i am jesus as much as anybody ... so there.

good to see that blog* is going still and escaped the fate of a peruvian ecologist but i usually can't stomach the staple short circuitry when it comes to coloursavvyness ... guess i have to wait till folks join me on the
white in whiteland = good *(x4 =/same for and same with all 4 root colours)*
against the ... i mean in order to disinflate *(that staple)*:
* - white *(on redland against black)* = good X black = bad

let's write the saga on how compostman was imposed as punishment *(due to the lags causing 'waste' and stink)* .. to where it became the most desirable and high status profession ... due to better and better timing ... and then, as the divisions causing any and professions in the first place, melted away, that same thing became, first an easily re- and preflectible attitude / practice *('handigheidje' = skill ... high dad*

167hand, kin of the, last day today, which in some tarots is the day of the highest card, king of spades), then common sense and next reflexive for long enough to be shared widely enough to become inborn ... before we again venture out and perhaps again destroy a planet prematurely .. needlessly ... dunno that there are game devs i inspired just yet ... but i keep trying as long as i feel a keyboard under my fingertips.

looks like plenty of opportunity to thicken and/or regrow the greenery on the denuded steepnesses in that region, iow, practice a little strategic swaling ... one would have to design a machine to make these tiny horizontal (*contour following*) banks on what looks like pretty rocky ground to help them regain soil cover; i read about 'keyline' systems decades before finally realizing their importance; there prolly is nothing as fruitful as preparing for floods ... and i don't mean building no godddam boats either.

NS1.26.13.13: Yellow Overtone Human, Kin 252,

As of today, 108 days of the 144 days to Star Remembrance are complete. We are in the command tower of the Art wavespell. Yellow Overtone Human is the sage who holds the free will power of wisdom and is the occult power of Red Solar Moon, year-bearer for 2014-2015. Two days ago we entered the White Season of Love, the 65-day cycle initiated by the White Electric Dog. This cycle concludes on White Lunar Wizard, Kin 54. Note that this White Season of Love began on Gregorian date 7/7 — Cosmic Moon 11 (13.11). It concludes on Gregorian 9/9 — Lunar Moon 18 (2.18). Kin 218 is the opening of the tomb of Pacal Votan.

That first property is an opportunity to put down roots. I enjoy remodeling and enhancing

places, [though I'll hire people to do the wiring and plumbing] I made a lot of money doing that in California [though most was given away, or loaned to the wrong people. The biggest chunk, over 1/2 million profit, was taken by the banker types]. I'll see what other properties are available when I get to Ecuador.

Xochipili has subscribed to my blog for several years, but I never realized he was a Galactic Mirror. Speaking of twins, my niece delivered twin girls last night!

I hope you're able to visit the Spanish Peace Garden, with its 13 horses, soon :) I'd love to hear about your experiences and thoughts there. Soon, I'll be reporting from Ecuador, 'home to be' of a fledgling [tiny] resonating Crest.

Peace, Claire

thank you for writing, Claire; it's a pity one's bad judgement keeps one from connecting 'rite' as well as doing it wrong. i take it you have no taste for being a broker bookkeeper .. or absentee owner even? neither do i

you are much braver than me, i'd not go it alone, not even 200 clicks from here .. where i could easily get 10 acres for the price of this house (*realtor estimate done today*). did you plow thru that ecoaldeas list i posted some years ago? are there a few crest-like places in ecuador? have you contacted them? you don't speak spanish right? Plan to learn i guess. not sure if they have 13 horses in pedrun. i'll wait to visit there until you make it here ... we'll go find the mill that gave you your name ... grin ..

my impression of vilcabamba is, like i said before, a place that has suffered deforestation to a quite dangerous extent (*my impression of most places in the world*) but everything and -body has gotten used to it, the silt has washed off the boulders in the river and life goes on ... good recruiting spot though ... and perhaps a moneyspinner if you could rent some places out. Wonder what the birds sound like ... send me an audio file if/when you come across one will you.

Re the weird rocks alex found/bought

imagine the percussion possible with such ringy pieces ... shattering them against each other over a huge basin (*stadium type*) ... must really be capable of whipping up the 'testymones' and have effects far more exciting and sustainable than stadium concerts are nowadays .. imagine a few half spheres hung up and spinning to bounce the sound back down and all them sorts of effects he's an acoustic man so he'd readily see the point i bet.

Is that you with the motorcycle at the top of your RoToSoTaTa YouTube page? You look younger than expected. First link doesn't open. Sounds like we're talking about two different Crests in Spain. Can you send me the link to the one in Pedrun?

The hardest part is the actual trip there. Once i'm there I'll be fine. That first link I sent is the rockiest area I've seen in Ecuador, so hope you're not judging from that.

Funny, that you asked about the birds today; after viewing the link you sent to 2 vids in Mexico today, I almost left a comment re the beautiful sounds of birds singing in the background :) I expect to be serenaded by birds pretty constantly in Ecuador, and will send you some 'sounds' when I come across them.

You're right, Alex does seem to be very acoustic, and also writes of the plethora of birds, including hummingbirds. He named that 17th Pyramid the Hummingbird Pyramid. nope, it's a suburban setting attached to the village i was born in, one street away from those dutch views that reach the horizon cause of all the cow pasture. It's a concrete jungle with minimal to no gardens though.
my attachment is only the 5 years of o so odd closeness .. which by hindsight seems a lot like a sick apartness causing me to reflexively duck and think: don't even try anything ever again.

Sacha Stone interview with Boris Petrovic from Teslavisio.n.tv

about myster Stone's subject in the 44th minute:

his mentor in these matters, Dan Winter once did a little collab with Philip Callahan and promised hours of footage more ... but nothing ever came and I was unable to find out what happened to PC. And that's not the only dent my confidence in those who are given to mixing totally fundamental work with expressions of fiery and inflammatory fabulation suffered.

Hi Piet, I liked the last line of your penultimate e-mail :}

Neil [12 Wizard] and Sandra [14.3] were here for 5 hours, and after they left, I started examining the links here. I had already explored sacredsuenos extensively, and plan to meet them when they come to the Vilcabamba weekend market to sell their goat cheese [which I love anyway]

I really like the video of Don Alvaro Taxo, from the EagleCondor site [sorry, my computer is 'acting up' again so I won't be able to correct errors]

Interesting how many more have opened since you first posted these a year and 1/2 ago.

I used to go through Auburn on my way to Lake Tahoe, which you probably also explored on your motorbike.

I'll write more when my computer is better.

So glad you're going to let go of your grief, in favor of your future :) Just now realized I'm at the top of your e-mail instead of the bottom, let me know if you found this reply.

Always had a sense of import for prosperity *(even with the bad example[/precedent?] of rebeltravellers like jesus)*. Exposure to blessing and dangers of vanity bloat by way of admirers who like to mirror my work in order to increase my workload with blemish removal and perfectionizing buffs will prolly not be part of my earthly reward and lot. Alas

So glad you're going to let go of your grief, in favor of your future :}

that's the plan anyway i am letting it depend on my assessment *(as just described)* being erroneous, a misunderstanding, a self-effacement, a withdrawal, a false humility and cowardice i won't be let get away with and being pleasantly suprised instead.

The idea that i never had a chance in the first place *(despite living on an island with a mother into gardening quite unmolested for about half a decade)* kinda tries to bribe my laziness into a metastatization of disillusionment *(always a strong point of mine due to my easy access of all the magic possible but aborted, at hand but blocked)* ... i'll prolly not even get my bible victim assistance agency off the ground in this here bible belt with the Rotterdam skyline visible on clear days.

Just now realized I'm at the top of your e-mail instead of the bottom, let me know if you found this reply.

up to date

Upcoming Events:

February: I will be in Australia doing a masterclass on the work of Reza Negarestani in Sydney (*as a lead up to Aesthetics after Finitude*), a workshop on creation and the concept of worlds in Melbourne, and possible another event to be confirmed.

From February 26-March 1st I'll be in Amsterdam speaking at The Geological Imaginary conference.

Beyond that I'll be in France for some months planning an event on Geopolitics and Geophilosophy at PAF for the Summer.

he's obviously an evil genius bent and intent on sterilizing (*avoiding, blanking on*) the hyperstition period that contains/holds / received my input:

From Schelling's writings it is clear he has immense respect for Kant, calling him the Aristotle of Germany (*as he puts it in The Grounding of Positive Philosophy*) and that he nearly perfected negative philosophy through the Critiques. By negative philosophy Schelling means a pure rationalism that addresses the conceptual specifically or, in other words, the negative philosophy determines what is real but not reality (*GPP, 131*). By no means does Schelling assert or infer that the negative philosophy is unnecessary only that, by its own definition, it can have have no content other than what is determined according to its own ground such that as soon as reason determines something as real the reality of that conceptual content dissipates.

he was there earlier this years already:

After Lisbon I headed to France to participate in the PAF Summer University and the philosophy week organized by Diana Khamis, Katrina Burch, and Amy Ireland.
<http://www.pa-f.net/node/25099>

what he says about paf is roughly what is envisioned for sanvita in Niederfeld (*sauerland - east of Duisburg*)

<http://naughtthought.wordpress.com/2014/09/04/post-lisbonpaf/>

There's a passage in Schelling's Clara that weirdly describes PAF that I'll end with:

"Of the significance that these institutions once held, they have perhaps kept only the picturesque. However, one will find it easier and more agreeable to close down the institutions altogether than to restore them in accordance with their original aim in a way that would be appropriate for our times. When I see such a quiet cloister down below in the valley, or go past one on a hill from which it looks down, I have often thought to myself: if one day the time should come for all these monuments of a bygone time, please let at least one of our princes think to preserve one or two of these sanctuaries, to keep the buildings and their goods together, and to endow them to the arts and sciences."

"Get Reassembled: Time, Intelligence, Acceleration" focused on the legacy of the CCRU, the difference between Nick Land's past and current work, the thought of Reza Negarestani, and, more generally, the relation between other contemporary strands of thought particularly out side of the context of purely academic philosophy. The whole week was a great experience and there was too much material too go over. Pete Wolfendale's lectures are available online here as is his discussion after the event here.

Like the Berlin Summer School (*but in a quite different sense*) the university struggled with the borders of rationalism particularly vis a vis art, politics, and the very nature of intelligence. These debates between the participants were reflected through the historical trajectory in terms of tracking the CCRU's trajectory. Basically what does it mean to go from Sadie Plant and Nick Land of the mid 90s to new rationalism, transmodernism, and the various splinters from the splitting of the always-already split edifice of Speculative Realism.

There is more to be said here, about two different trajectories of French thought – the animal (on the left) and the formal (on the right) (and both Brassier and Badiou have written on this), but what we might note here is the figure of Spinoza as common root to both the philosophical and psychoanalytical categories, but also as purveyor of both the creaturely (affect) and the rational (reason), depending on what one reads of The Ethics and indeed how one reads it. We might map some of the accelerationist texts, in particular Negarestani and Brassier, between Badiou and Lacan (insofar as both are philosophical, but also attend to a kind of subject (albeit, a rational one) which means they have an psychoanalytic aspect (though, crucially, no account of an unconscious). This very partial and reductive schema (which leaves out any analytic philosophical precursors) nevertheless allows a more pointed reflection on what an accelerationist position would be on the left (of the diagram), between, precisely, Deleuze and Guattari (is it only CCRU and Land or are there other possibilities?). But also, pace Spinoza, what a composite subject might look like (or what different composite subjects might look like). One that is as much about living the matheme or assuming a name as it is about embracing the pathic/affective and becoming-anonymous/molecular.

here she (Pat Reed) is with someone else, then on a panel, introduced in the 24th minute

one of the many i run into on my second day in a row of a fourth (or so) grand perusal of the ever spreading fieldage of speculative realism# (missing subject of which metamute articulated in september*) since i left hyperstition .. well before abandoning 'peacepalestine', run by mary rizzo, around 05.

which i propose to rename as follows: sosophisticated idealism, the new coat across awakening potentialities, to keep on suffocating dat good ol hirnwix in it's own juices.

her 54th minute solution ('massive collaboration') is wrong .. much better to point at diffusion via dispersal principles, non-testconned terrain

A creature can walk with god or in lockstep, tyrannized by their own warrior and worrier societies if/when not by predators.

The mating obsession and stretch has burst it in such shortsighted purpose defeating ways we will confuse future anthroppies about our use of 'rock' to designate music with impact that cuts the real thing of at the

pass with E-waste, in tandem with first mentioned anthropomorphization of 'sociality'; be sociable to mud and low lying places; it's dough for a future bake to shake and make us over but inalienably cause rooting as a follow up to all that was good about rooted is immanent, right at hand ... 11hand ... kin 167 .. falls on the king of spades day (new year's eve) this year

ps, her concluding lines (48th minute):

imagination is the primary faculty thru which we can exceed what is directly before us, imagination marks a moment of fertile alienation, it's a willfull fabulation of alienation that separates us from what is, towards the foreignness of what could be. so the future as i've been talking about it here, is ultimately posited as an affirmative force for alienation which ..

(piet preventing a doubling here, it's already to headily 'doublicitous' enough)

.. in this light is not something to be overcome but an abstract power of speculative labour, oriented towards the inexistent. in the face of daunting complexity the future is tasked with descriptions of and for constructive alienation, that can separate us from the situation of what is, orienting us conceptually and materially, towards a foreign place of actualization. if the future can only be constituted by a recursive interplay between description and place, it's our pressing labour to exit critical stagnation, generative only of a tragic present future and work stereoscopically, to articulate and construct our desired estrangement as an actual place"

"desired estrangement" ... ? wow, ... what a nubile feminoidy thing to say ... funny you should mention that in this day and age of mass migration glorifying and suppression of occupations, expellations .. etcetera. i think you wrested the grand prize of patheticisms free from it's moorings with that grand finale well and good, ... or at least the one for highly bland and tasteless ambiguity, .. cause these dry dry dry lines could as easily be taken as inaugural for new occupation waves as the ones before it could at best be a roughest yet vaguest of outlines for permacultivation of damaged territory.

The Fight Between Carnival and the Quotidian

2009 | One bag of hand sorted confetti (*by colour*) ordered in a Cartesian Grid. | Each Panel: 81 cm X 81 cm framed | Total pieces of confetti +9000

The Fight Between Carnival and the Quotidian takes its point of inspiration from Pieter Bruegel's painting "The Fight Between Carnival and Lent" (1559) where an abutment of social forces plays out in a market square between a convent and a bar/brothel. In the contemporary variant, confetti is deployed as the medium of collective bacchanal, yet a medium which has been perversely re-ordered and classified into a categorical formal system, denied of its inherent celebratory capacity. A tension ensues between the everyday taxonomies of bureaucratic structures and the chaotic plurality of things and peoples they seek to organize and (*ac*)count for.
